1-1-2001
Still Looking for the operational manual for a Philips AL990
communications portable receiver. A service manual would be a big plus
as well. Will be willing to pay copy fees and shipping or I may have
some literature you
need? Thanks in advance, Picture of radio is shown below! email me
directly at rlonn@home.com

I'm interested in purchasing a 6 meter amp capable of 1kw - 1.5kw out. If you have one that you would rate a 9 out of 10 (10 being mint) I'd be interested in the following:

1.) How much do you want for the unit.
2.) How much will shipping cost me?
3.) How do you want to be paid? MO, PayPal, MasterCard ;-) ??
4.) You will HAVE to provide me with CURRENT pictures of this unit via email, or the web.

If you have such a unit please email me, I am interested.

PS - Also looking for similar 432 amps.

I have a Pro-43 200 channel Realistic Radio Shack scanner for auction on ebay. This scanner has an early datecode. The mod has not been done yet, but it can be done on this datecode.

This is only a 3 day auction, so bid early. Thanks for looking.

Hey all,
I have for auction 1 Alinco DJ-G1 2 meter HT. This is the one with the spectrum scope to see if there is activity on a nearby channel.

There is only 1 day left, and no reserve. Price is only $98 now. Have a happy new year!

I want to thank all for the input and assistance. I have more than enough information now.

I can, in the future, provide info for those whom need it for the FT-101 series. One of my procurements through all this was an original Maintenance Service Manual - FT-101 Series.

Happy Holidays to all!

Thanks Again!

I just spoke with a man in New York State (Albany area) that says he
has lots of Tektronix BoatAnchor Scopes (mostly tube type) for give
away, trade, etc. if you can pickup (or maybe pay shipping-- but these
are very hard to ship). He doesn't have usenet and is not interested
in Ebay.

Send him email-- I am not in the loop. Just a favor.

Joe: joseph.oneill@ogs.state.ny.us

Good luck.

Steve.

copy of ad

Pro 2035 1000 Channel Scanner
Covers 25 Mhz ---> 1.3 Gig!

This scanner is the replacement of the ever popular PRO-2006 only w/
a tuning knob and 1000 channels. It's very similar to the Pro-2042.
This is a powerful scanner, yet I am selling because I am a starving
college student, w/ more school than money.

Scanner is in great shape w/ the exception of some slight warpage on the top
part of the scanner. (hey, it's HOT here in AZ!) However the scanner is
works great!

PRODUCT FEATURE LIST:
Channels of Operation:..... 1100 Channels in Any Band Combinations
(100 Channels per bank x 10 banks and 100 Monitor Channels)
Coverage.....25-520 760-1300 MHz
Scan ..... 50 channels/second
Search..... 50 steps/second
Steps ..... 5, 12.5 & 50 kHz
Modes ..... AM, FM & WFM
Attenuator .... Yes
Data skip ..... Yes
TAPE OUT Jack
Audio 1.8W
Memory .... non-volatile
Power ... 120V AC 14V DC
Size ...10.5"(W) x 4"(H) x 7.5"(D)

Supports computer-controlled scanning w/ additional interface.

14. Updated FS or trade list

GE MP-A VHF 146.-174. 160 channels Aegis digital encryption w/ battery and charger 9-9.5 condition. works great I use it daily. $375.00
GE MP-A UHF 440.- 470. 192 channels. w/ battery and charger an 8.5 $275.00
GE MTL VHF 16 channel scan. With battery and charger about an 8. $150.00
GE Monogram SP2550 VHF ex CSX radio with battery and charger $100.00
GE NPC200 UHF 16 channel scan with battery and rapid charger. New Uniden case. Radio works and looks new. $150.00
Vertex VX500 UHF 32 channel scan with battery and charger. $185.00
GE Master 2 UHF 75 watt. with pre-amp no accessories. No Icoms $75.00
GE Master 2 UHF 40 watt repeater in a Desk mate case with GE controller. No duplexers. I will add a UHF Master 2 75 watt for parts with the station that way you can make it a 75 watt with a pre-amp. $650.00
Motorola MX300s software adapter for the 1801 suitcase programmer. part number RTL5805C. $250.00
GE Master exec 2 Mobile repeater. VHF radio with a UHF receive section. with your choice of a Master 2 or a delta cable. $25.00 I have several of these.
GE Voice guard 9600 series encryption boxes. $20.00 I have several of these.
Motorola Micor VHF 110 watt mobile. drawer only. make a repeater. $25.00 ea.
GE Mobile Vehicle charger. Turns the MP-A, MPD, MTL, and TPX into a mobile radio and charges the battery. Comes with the mic, speaker and wiring harness. this is my personal setup so I know it works. Price with one of the above radio's $100.00 if purchased separately $125.00
GE MP-A, MTL, MPD, and TPX speaker Mic's new in the box with all paperwork. $35.00. I have 2 of these. I also have 1 used Public safety speaker mic for $35.00
Marconi UHF portable HT 16 channel. Looks like a standard. I powered up with a power supply and the thing works and has good sensitivity. No charger so I do not know about the battery. about an 8.5 $75.00
My terms
Shipping is the responsibility of the buyer on all Items. All Items sold as is but Portable radio's will not be DOA. I will not cover return shipping but will pay to ship a replacement if I have one. I can have the above radio's programmed ask about price. Trades welcome just ask.
Wanted Items
4EX22A10 mini e-prom programmer.
TQ3330 Delta ranger interface.
TQ2310 suitcase programmer if I can trade above items for it.
Dual band mobile ham radio's.
Cash also works
Dean

26. For Sale: Ham's Car (Raleigh, NC)

Newsgroup: rec.radio.amateur.swap
Date: 2001-01-10 21:52:40 UTC
From: garypearce@ipass.net
Message-ID: <3a5dd950.25213312@news.rdu.bellsouth.net>
Source record: 6153

Hamï¿½s car for sale in Raleigh, NC area. The semi-famous KN4AQ-mobile is on the block. It comes wired for three antennas, audio and power distribution.

The car is a 1992 Saturn SL-2 with about 135,000 miles. Itï¿½s in very good mechanical and cosmetic condition. It has automatic transmission, power steering, power brakes, air conditioning (already converted to the non-freon system), rear window de-froster, premium stereo/cassette, cruise control.

The ham stuff includes three NMO antenna mounts in real holes (one on the roof, two on the trunk deck), a 12 V power distribution block wired to the battery, and an audio amp/coupling system to the front stereo speakers (puts a dual-band mobileï¿½s audio into the right and left in-door speakers, which sounds great!. Sorry, the radios are not included, but I could be persuaded to toss in a dual-band Larsen whip.

Asking $2500. See it at: http://www.ipass.net/~garypearce/

73,
Gary KN4AQ
Cary (Raleigh), NC

28. New ham radio auction on the net.

Newsgroup: rec.radio.amateur.swap
Date: 2001-01-12 01:07:02 UTC
From: Mike Crane <kc5gjn@hamsnet.net>
Message-ID: <XLs76.1332$_y3.7591@newsfeed.slurp.net>
Source record: 6155

I am testing some new auction software on the Ham's Net server. If this
works out It will be a regular feature on Ham's Net. There is no charge for
the auction so go post your items. It would also be a big help to kick
things off.

RADIO FLEA MARKET in BEETSTERZWAAG.

The flea market takes place to - 26 May 2001. Do you look for an exotic transistor kit or a super recipient, fixed and do manufacture kit... or do meet of radio friends? Dan comes Saturday 26 May to the Friese radio market into Beetsterzwaag!

Many thousand visitors come each year from the entire Netherlands and Europe to this radio flea market spectacle, approx. 100 dealers, with most diverse articles, like senders - recevers - power supplies - antennas - software - hardware and literature.

Additionally of businessmen in the place also a flea market with many attraction organized for large and small. There is unfortunately no sales desks free on the radio flea market more, but you can reserve suburb, announce, for the year 2002. Is possible also by telephone & email, contact on to take with the executive committee. Down are these addresses.

How does one find Beetsterzwaag? From direction Apeldoorn = > Zwolle = > Meppel = >
Heerenveen = > Drachten, departure after Gorredijk Tijnje comes departure (28) Beetsterzwaag.

From direction Bremen = > Groningen = > Drachten = > Heerenveen, departure after Drachten Haven comes departure (28) Beetsterzwaag.

On 2mtr, 145,650 Digi Meppel and 145,700 Digi Joure can one to instruct leave themselves. Inlet is from 09:00 to 16:00 MESZ, into which Cafeteria one also boarded into this time.

This whole is organized of VERON FRIESE WOUDEN. Cordially Welcome in Friesland on the FRM!

Hi, I'd like to have a spare pair of true Eimac 3-500z tubes, they don't need to be electrically matched. They don't even have to be new as long as the output is full and normal. What have you got?

Yes, I know I can get them and other brands from the RF Parts, etc, but they are a bit out of my budget.

Thanks!

Neil, K1VY
(603) 465-2788
(800) 962-2949

P.S. Also, while I have your attention, I'm still looking for a noise blanker for my Drake TR-5 and TR-7 (NB-5 and NB-7/7a respectively). All leads gratefully accepted.

Hi there.

HOW ABOUT a LINK to the NEW CRYSTALS swapping BBS?

There is a NEW Crystal Exchange Message Board (free) on the
web at:

http://senac.com/boards/880/

There you can post sale & want ads and find radio crystals for sale
by others!

Sell your excess crystals there!!

The previous old message board was being ruined by Taiwanese
infiltrators that ruined it with off-topic SPAM ads. This one is
secure.

The above is all hobbyist and non-commercial. OK, the BBS has
sponsor ads, that is how we get it free.

I have concentrated all of my HAM LINKS
efforts over the past few years to editing the Open Directory
system, and I am the editor for all of the Ham Radio
BOATANCHORS links on there.

I like the robot that automatically removes any bad links for me!

Never any 404 errors!!

We have a broad variety of specialty links to over 700 sites
(arranged by category) of interest to hams who enjoy antique rigs.

Please also link to:

http://dmoz.org/Recreation/Amateur_Radio/Boatanchors/

1) Knight P2 SWR bridge with meter unit and remote sensing
unit/cable. Excellent condition. Picture available. Will sell for
$19.00 plus shipping.

2) Micromatch Model 262 SWR meters, with remote sensing
unit and cable.

Classic style equipment. This will look GREAT with any antique
ham radio station! I have two of these. One with the remote
sensing unit in solid metal as pictured on web site.

The other one has the same meter, but the remote sensing
unit has the more normal 'basket metal' finish. Same color.

They look great with Collins and other tube era rigs.

Both units are in excellent condition.
Will sell for only $25.00 for each unit, plus shipping.

Hello,

Thank you for writing in to day with your input on our categories.

Please understand that we hear from our members on a daily basis on how
they feel our categories should be set up as we all any new features
they feel would be an asset to the eBay site. We appreciate your
willingness to share your thoughts and ideas with us.

We have noted your Consumer Electronics Category Suggestion and will
look into the possibility of including it in future category
implementations.

Again, thank you for your suggestion and we hope to hear from you again
in the future. Have a great day! :)

Regards,

Sheena
eBay Customer Support

****

Original message follows:

Form Message
Subject: Other find item questions
Item:
Message: Who put Commercial Radios under: "Everything
Else:Office
Equipment:Commercial Radios"?????

Why was it moved some place else at all?????

Does someone at Ebay think this is cute or what?

Commercial Radio belongs back where it was under Consumer Electronics.

Please put it back as it is just wrong!

Thanks and I hope someone really reads this.

Have a great day.

From: Mike Crane <kc5gjn@hamsnet.net>
Message-ID: <F9Ac6.3612$Uo2.8688@newsfeed.slurp.net>
Source record: 6200

Hi folks,

I saw some traffic at the Ham's Net Auction from the last posting but it didn't last long. I would just like to invite anyone who has not been there to check out http://www.hamsnet.net/auction/ The auction is free so please help me get this thing rolling by posting some items and bidding on the items that are there. At the moment I need postings.

I am trying to make a common place for hams to buy and sell their equipment online. Although the auction is a new addition to Ham's Net, I have been running the server for the past two years. I have been hosting free e-mail accounts and website hosting for hams only so this is by no means fly by night.

If you are curious about what Ham's Net is, take some time to check it out at http://www.hamsnet.net/

Thanks for your help

FS:MFJ 1278, HF/VHF tnc. This is the straight 1278, not the B model.
Has the 3.6X Version EPROM upgrade, software, power supply, etc.
Excellent condition cosmetically, electrically the mailbox does not function
properly. This unit will do CW, RTTY, Amtor, SSTV, ASCII as well as
automatic signal type detection. Original box also.
$70 and split the UPS or USPS to your QTH.
Thanks,
Randy N�SAH

I have for sale or possible trade the following ham equipment:
1) Midland model 13-505 two meter transceiver. This is a 12 channel crystal controlled, 25 watt rig. It is in very good condition with original manual.
$45.00 plus shipping

2) Realistic HTX 202 HT with battery, charger and battery pack.
$75.00 plus shipping

3) Bud 6 meter variable low pass filter model LF-601. If you are getting into TVs, this may be just what you need. Scratches and paint chips but real clean inside. $20.00 plus shipping.

4) Ten Tec PM-3 Power Mite QRP 40/20 meter transceiver with hard to find AC-5 tuner. Works good, knobs appear to be non original.
$115.00 plus shipping.

Cross-posted to: rec.ham-radio,rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.swap

Okay here is my problem. Just purchased the Radio Shack through the glass antenna. The "Glue" did'nt hold. What can I do now?! The only part of the antenna connection that is solid is the outside, no problem with that "glue" its on the glass with no problem, however the inside of the truck I can't get it to stick! What can I use that will keep it together, please help! Reply directly since I most likely wont be checking until next weekend. Email ngwd@flash.net

73 Daniel KC4OXP
Winder, Georgia

P.S. On another topic, I do have a Larson Mag Mount, a 2000 Toyota PreRunner, does anyone know (without drilling a hole) how I can get the coax into the truck without drilling? Thanks!

Does any company make an A-B switch for HPIB or GPIB? I checked Agilent (HP) catalog and web site with no luck and a web search wasn't too helpful either.

Theory says I shouldn't need one, but I have a setup where it would be easier to install a switch than to find out what the problem is.

If you can offer any info or assistance, please let me know!

Best regards,

Michael Tracy, KC1SX, ARRL Lab

Try National Instruments, they sell a lot of HPIB cables, etc.

"Michael Tracy" <kc1sx@arrl.org>
from NETPLEX Internet Services - http://www.ntplx.net/ pressed
the keys in the following order:

> Does any company make an A-B switch for HPIB or GPIB? I checked Agilent (HP)
> catalog and web site with no luck and a web search wasn't too helpful either.

They do exists - but there is little demand for them these days.
I frequently see them in the surplus stores and fleamarkets. I
doubt if anyone is actively making them anymore.

They were very plentiful back in the days of HP pen plotters. I
know Black Box and Inmac made them.

www.blackbox.com
www.inmac.com

Also try searching with keywords like "black Box, Inmac, GPIB,
switch"

Also try IEEE-488 card vendors like National Instruments, IOtech
and Keithley.

Check your favorite surplus equipment dealers and Ebay.

> Theory says I shouldn't need one, but I have a setup where it would be easier
> to install a switch than to find out what the problem is.

What's the problem? Are you trying to use two talk-only machines
and one plotter? If the devices allow it - change to an addressed
system (define separate plotter and instrument addresses)

If it is an addressed system, make sure the two instruments have
different addresses. The GPIB bus is simple and does not handle
address conflicts very well.

Good Luck!

Cheers,
Paul Grohe

Be sure to clean the glass with alcohol before trying to glue to it. Inside windows build up a "film" that can keep the glue from sticking properly. If you're a smoker, I'd say this is particularly important.

no rubberduck antennas or batterys

these are for the VHF-Hi band
this is all i know about them.
presently a sticker is afixed with 173 mhz freq on them

No more infor than this
50.00US for the batch of 3 (via International postal check or certified
check)

includes shipping
thanks

Beautiful noise attenuating aviation headset.Both the amplified dynamic mic and headset have a gain control! Its model H10-30 and wired for icom rigs! Manual and wiring diagram is included! Im the original purchaser and am non smoker! Unit is in mint condition. The audio on transmit and received is unsurpassed. Im asking $140 shipped. Picture supplied upon request! I can be reached by calling 763-389-3966. Thanks Dan, KD0YO

FOR SALE:

Signal Corps 0-1 mA DC meter,
brand new and in the box. Face plate is marked
'Signal Corps' which looks neat. Approximately 3.125 inches diameter.
I have one left of these for sale at $10.00 plus $4.00 shipping

Picture is at:
http://www.geocities.com/happysurfer1/imag/signalcorps1ma.jpg

Other goodies for sale at:
http://home.cfl.rr.com/happysurfer/radios.htm

FOR SALE:

Navy Key - Ser #0694 beautiful brass straight key with shorting bar.
Steel center section needs wire brushing to shine it up and remove
slight rust. Will sell for $35.00 plus $4.00 shipping
Picture at:
http://www.geocities.com/happysurfer1/imag/Navy_Key.jpg.jpg

Straight key - brass and silver, made in Japan. It has the shorting
bar and adjustable contacts. As you can see from the picture, this
key is in really nice, like-new condition.
Will sell for $22.00 plus $5.00 shipping
Picture at:
http://www.geocities.com/happysurfer1/imag/straightkey.jpg

WILLIAM NYE CO. CW straight key. This one is really nice - looks
really great. Photo does not do it justice:
http://www.geocities.com/happysurfer1/imag/NYE1.jpg
Will sell for $55.00 plus shipping

HAM KEY Iambic paddles. Red and chrome on black
wrinkle-finish base.
This paddle is in excellent condition. Available for $50.00 plus $6.50
shipping
Picture:
http://www.geocities.com/happysurfer1/imag/p1140002.jpg

Hallicrafters HA-1 Keyer in tip-top condition. Rear panel connector
is included. It looks like a new one that just came out of the box.
Working and in ultra-excellent shape.
Will sell for $95.00 plus shipping
Picture at:

Yeasu FT 726R transceiver with two meter module only. Has satellite board and cw filter. Presently not working. Want $275.00 plus shipping or trade for something interesting, HF, QRP, ?. With Manual.
When turned on, the rig lights up, you have sound from the speaker. The squelch works. The shift and width work. RF gain seems to respond.
The display does not light properly. Sometimes it comes on and has one digit on and other times nothing. When you turn it off, the display flashes. Above the display seems locked up as the NOR LSB, USB, CW, and FM all are lit. Most switches have no effect. Seems like its trying to work but doesn't. May be something easily repairable, I don't know. I would like to keep the radio if it was working.

136. Technical and Math Books For Sale

Newsgroup: rec.radio.amateur.swap
Date: 2001-02-14 16:22:31 UTC
From: Christopher Trask <ctrask@primenet.com>
Message-ID: <96ebc7rsi5@nnrp1.phx.gblx.net>
Source record: 6113

I have the following technical and math books for sale:

1. Alvarez, E.C. and D.E. Fleckles, "Introduction to Electron Tubes and Semiconductors," McGraw-Hill, 1965, hbk, VG/-with no markings and very slight wear. A good undergraduate text bridging the gap from vacuum tubes to transistors.
$13.50

2. Aharoni, Amikam, "Introduction to the Theory of Ferromagnetism," Oxford, 1996, hbk, 315 pages, Fine/-. This book is an excellent introduction to all aspects of ferromagnetism, and has an extensive bibliogrqphy (over 600 entries), making it an essential reference for entry and expert level professionals dealing with magnetic materials. This book is still in print and lists for over $75.
$35.00

3. Black, Harold S., "Modulation Theory," Van Nostrand, 1953. Hbk, 363 pages, XLIB VG--/- with slight wear to outside and no markings inside except for library stamps inside front cover and on FFEP. Cover edges and spine are faded from exposure to light. This book is one of the Bell Telephone Laboratory Series from the early 1950's and is a good reference on amplitude and frequency modulation and demodulation.
$17.50

4. Blackband, W.T. (ed), "Propagation of Radio Waves at Frequencies Below 300Kc/s," Macmillan, 1964, hbk, 478 pages, XLIB VG/- with virtually no wear. Call number on spine, usual library markings on page ends and top, as well as title page. A very exhaustive work consisting of conference papers including such well-known authors as John Belrose. An excellent copy.
$30.00

5. Cattermole, K.W., "Transistor Circuits, 2nd ed.," Gordon and Breach, 1964, hbk, 470 pages,G+/- with slight wear and bumping to cover and spine. Inside is immaculate. Although dated, this book describes circuitry such as wide-band neutralized common-base amplifiers that you won't find elsewhere.
$15.00

6. Dawley, R.L.., "Radio Handbook, 13th ed.," Editors and Engineers, 1951, hbk, G-/- with moderate wear overall, spine faded from handling and light, small ink stain on top of pages, no markings on pages. This is a substantial book and is very similar to the Radio Amateur's Handbook in many ways.
$15.00

7. Dow, William G., "Fundamentals of Engineering Electronics, 1st ed.," Wiley, 1937, hbk, 604 pages, VG-/- with bumping to cover corners and spine ends being the only external blemishes. Owner's name on FFEP, no detected markings inside. A very clean and unspoiled copy of a classic work.
$22.50

8. Fox, Jerome (ed)., "Proceedings of the Symposium on Modern Network Synthesis," Polytechnic Institute of Brooklyn, 1952, pbk, 342 pages. VG-/- with no markings on pages, cover and spine faded with exposure to light. Owner's name on upper right-hand corner of cover. A good collection of papers regarding both passive and active (tube) network synthesis.
$12.50

9. Gartner, Wolfgang G., "Transistors: Principles, Design, and Appications," Van Nostrand, 1960, hbk, 675 pages, G-/- with no wear to outside. Slight to moderate amount of underlining in first five chapters, clean elsewhere. A very good text written at the end of the initial era of the bipolar transistor and just prior to the junction FET.
$13.50

10. Hetterscheid, W. Th., "Designing Transistor IF Amplifiers," Philips Technical Library, 1966, hbk, 330 pages, VG/G+ with no markings except owner's name on end of pages. Dust jacket has slight defects from handling, such as tears and creases as well as chip-outs. One of the most thoroughly written books on any aspect of solid-state circuit design, and an uncommon find in any condition.
$25.00

11. Hunter, Lloyd P., "Handbook of Semiconductor Electronics, 1st ed.," McGraw-Hill, 1956, flexible handbook binding, VG+/- with virtually no wear and no markings except for owner's name on FFEP. This is a beautiful copy of an early comprehensive work on bipolar transistors, diodes, photocells, semiconductor physics, and applications.
$17.50

12. Kotel'nikov, V.A., "The Theory of Optimum Noise Immunity," McGraw-Hill, 1959, hbk, VG-/- with moderate wear to top of spine and owner's name on FFEP. Excellent early text on communications in noisy signal environments.
$15.00

13. Kraus, John D. and Keith R. Carver, "Electromagnetics, 2nd ed.," McGraw-Hill, 1973, hbk, 828 pages, XLIB VG-/- with slight wear, mostly bumping, to outside. Call number on spine, card pocket inside rear cover, library stamp inside front cover, but no markings found elsewhere. This book is easily recognized, having been authored by one of the foremost experts in the areas of antennas and electromagnetics. A nice, clean copy.
$22.50

14. Landee, R.W., D.C. Davis, and A.P. Albrecht, "Electronic Designer's Handbook, 1st ed.," McGraw-Hill, 1957, hbk, VG/- with slight wear to rear hinge and hinge ends. Exceptionally clean inside, owner's name on FFEP. This is a substantial reference for vacuum-tube designers, and should sit right next to the Big Red Book. A very nice copy.
$17.50

15. Le Croisette, Dennis, "Transistors," Prentice-Hall, 1963, hbk, 280 pages, G+/- with moderate wear to cover expremeties and no markings on pages. This is an interesting early undergraduate textbook on the bipolar transistor, with a chapter on h-parameters and an additional chapter on tunnel diodes.
$12.50

16. Lee, Reuben, "Electronic Transformers and Circuits, 1st ed.," Wiley, 1947, hbk, 282 pages, G-/- with moderate wear to cover and spine extremities. Spine worn through at bottom, cover worn through at corners. Owner's stamp on FFEP and title page. Some minor pencil marginalia. Perhaps the earliest textbook on the subject of signal transformers, this book covers everything from air-cored RF transformers to iron-cored audio power transformers, including a section on saturable-core reactors (transductors).
$15.00

17. Lenk, John D., "Handbook of Modern Solid-State Amplifiers," Prentice-Hall, 1974, hbk, VG-/G+ with owner's name inside FC, minor bumping to spine ends, but no makings on pages. Dustjacket is worn on spine ends and cover corners, also faded along spine. Very clean copy.
$13.50

18. Leutz, Charles R., "Modern Radio Reception," Experimenters Information Service, 1925, hbk, 337 pages, G+/-. This book has sufferred some minor damage by rodents (it came from a barn), consisting of 2" chewed along the front hinge , 3" along the top of the front cover, and 1" along the top of the rear cover. Book would be in VG condition otherwise as there is no other wear and no markings. This highly sought-after collectible is very worthy of restoration, and easily so.
$25.00

19. Malvino, A.P., "Electronic Principles, 3rd ed.," McGraw-Hill, 1984, hbk, 754 pages, VG-/- with minor hilighting and underlining for first 100 pages. Outside is pristine. This is a substantial undergraduate textbook on semiconductors, covering as much as can be done in just these few pages.
$17.50

20. Maxwell, James Clerk, "A Treatise on Electricity and Magnetism," Dover, 1954, hbk, 1000- pages, VG+/G+. No markings inside except for annotation on title page. Dust jacket is faded on spine and slightly worn, missing a piece from the top

of the spine. This is the original Dover one-volume reprint of Maxwell's extensive work from the 19th century. Clean throughout, this is a very nice copy despite the dust jacket blemishes.
$20.00

21. Milnes, A.G., "Semiconductor Devices and Integrated Electronics," Van Nostrand, 1980, hbk, 999 pages, VG+/VG- with no markings inside except owner's stamp on FFEP, dust jacket has two tears, spine faded fro exposure to light. An exhaustive reference, this book contains substantial material regarding the state of the art in semicondcuctors at the beginning of LSI and VLSI. A very clean copy.
$25.00

23. Quarrington, C.A., "Radio Circuits and Data," Caxton Publishing, 1948 (printed 1951), hbk, 90 pages, VG--/- with no markings inside. Cover is slightly worn along edges and spine is moderately worn along hinges, top, and bottom. This book contains complete schematics of a few commercial British receivers, as well as functional schematics of mixers detectors, amplifiers, etc. Extensive tables for hardware and vacuum tube characteristics. A real collector's item.
$17.50

24. Radio Corporation of America, "Solid-State Power Circuits," RCA, 1971, hbk, 698 pages, VG-/- with owner's name inside front cover. A very good reference for design of power circuits using bipolar transistors, silicon rectifiers, thyristors, and more. Covers areas from power supplies to microwave power amplifiers.
$15.00

25. Richter, Walter, "Fundamentals of Industrial Electronic Circuits, 1st ed.," McGraw-Hill, 1947, hbk, VG-/- with owner's name on FFEP, very light foxing overall, no markings on pages. Very good text on vacuum tube theory and applications.
$13.50

26. Smith, Carl E., "Applied Mathematics for Radio and Communication Engineers," Dover, 1961, pbk, 336 pages, G+/- with very little wear for a paperback of this age, but still some wear overall and yellowing to pages. No markings found on pages. A good mathematical reference, this Dover reprint is every bit as useful as the original that was used extensively during WWII.
$10.00

27. Sokolnikoff, I.S. and E.S. Sokolnikoff, "Higher Mathematics for Engineers and Physicists, 2nd ed," McGraw-Hill, 1941, hbk, 587 pages, G+/- with very little wear and no markings on pages. Owners name inscribed on FFEP. This is a substantial book on the subjects of infinite series, integral and differential calculus,

vector analysis, and other forms of higher mathematics.
$17.50

28. Valdes, Leopoldo B., "The Physical Theory of Transistors,"
McGraw-Hill, 1961, hbk, G+/- with owner's name on FFEP,
underlining in first four chapters. Very slight wear to cover
Excellent early work on semiconductor theory.
$12.50

29. Vavilov, Viktor S., "Effects of Radiation on Semiconductors,"
Consultants Bureau, 1963, hbk, VG+/G. Book is immaculate,
but dustjacket has a piece missing from the FC bottom as well
as some damage to the FC outer corner and the spine ends.
Still a very nice copy of an early book on radiation effects.
$15.00

30. Walter, Carlton H., "Traveling Wave Antennas," McGraw-Hill,
1970, 429 pages, hbk, VG+/- with virtually no wear to outside,
owner's nameplate inside FC. This is the original edition of one
of the very few texts on traveling wave antennas.
$17.50

31. Westman, H.P. (ed), "Reference Data for Engineers, 4th ed.,"
ITT, 1956, hbk, G+/- with slight to moderate wear to spine ends
and cover extremities, but inside is very clean with no markings to
be found. A great deal of information on vacuum tubes, waveguides,
transmission lines, scattering parameters, etc.
$13.50

Prices are exclusive of shipping costs. For US, add $3.50 for first
book, and $1.50 for each additional, unless noted otherwise. Canada and
foreign dependent on actual cost. Payment in US$ in advance by cheque or
money order. Books will be held for 14 days after confirmation. Money
orders preferred, checks accepted from established customers. All
dustjackets are protected with Brodart covers. Paperbacks are protected
with archival sleeves.

Mint Yaesu FT900AT HF rig and MD100A8X Mike for sale. 100 memories, built in autotuner,
100 watts out 160-10. All-mode, built in cw keyer with full break-in. IF shift and notch
filtering. CW and AM narrow filtering as well. This rig has never been mobile, not a scratch.
Mars/CAP modified. This rig works 100% and is in line now. The base mike is less than 3
months old. Rig comes with box, manual, hand mike, power lead. Mike comes with box as
well. Will ship insured on receipt of U.S. Postal Money Order for $750 (Shipping included) to
James O'Brien,3910 Hiram-Sudie Road, Hiram, Georgia, 30141-3126. No checks, etc.,US
postal Money Order.Tracking number e-mailed on shipment Thanks W4AMP

139. 2M- AMP question

Newsgroup: rec.radio.amateur.swap

I purchased (used) a RF concepts 2M amp (45in-160out) rfc 2-417.

I used it with a yeasu dual band (VHF/UHF) but it seems to be
attenuating the UHF receive considerably.

Has anyone one else experienced this, is it normal ? is there a fix ?

Jim

141. FA: MFJ Local/UTC Clock Accessory

Newsgroup: rec.radio.amateur.swap
Date: 2001-02-17 14:59:47 UTC
From: Bigchunk <wem@pobox.com>
Message-ID: <Dlwj6.885$gm3.14584@typhoon.jacksonville.mediaone.net>
Source record: 6118

This is a great station accessory.
It has new batteries and tracks LOCAL time as well as UTC time. It is small and fits on the rig or desktop. MFJ sold a ton of them. It has a polished aluminum solid rack frame and the plastic clocks slide in/out when necessary to change the batteries.

To reset the time you don't have to take them out...just push the proper buttons/combinations on the ends and you're there.

I hace an Optoelectronics R10 Interceptor FM Communications Interceptor (30-2000MHz) The unit has marginal batteries and no antenna. I got it from a friend in trade and I cannot get it to work right. Unit is sold AS IS. Opto states they can repair it, but I figure i'd just sell and let some techie fix or send it out, asking $75 shipped conus. Photos upon request

This is a multiple CD set of vintage rig owners manuals, service and repair info, schematics and more that I have compiled over the years ! There are literally hundreds of rigs covered on these CD's. All are printable using a simple graphics viewing program and Adobe Acrobat Reader. Manufaturers included are: Alinco, Alliance, Alpha, Ameco, Ameritron, Amp Supply, Antenna Mart, Astatic, Astron, Autek, B&K, B&W, Babcock, Breting, CDE, Central Electronics, Clarostat, Collins, Conar, Dentron, Dowkey, Dragon, Drake, Eddystone, Eico, Eldico, Elmac, Electro Voice, Geloso, Gonset, General Radio, Gross, Hallicrafters, Hammerlund, Harvey Wells, Heathkit, Henry, Hickok, Hewlett Packard, HyGain, Icom, James, Johnson, Kenwood, Knight Kit, Lafayette, Lysco, Maxon, Midland, Motorola, Standard, Telcraft, Tmc, Triplett, VEB, Waters, Weston, World Radio Labs, Yaesu, CB Radios, and more. Hundreds sold in the past. Being updated weekly now. No hams shack is complete without this CD set of vintage manuals ! There is also a list of mods included for vaious rigs, scanners, cb's and whatnot. Buyer agrees to prepay and cover shipping. Email me if interested.

You can use any terminal program to run the PK 232. I use Procom to run mine.
But windows hyperterminal will work fine.
I hope that helps

Will trade Yaesu FT-2200 VHF for similar UHF amatuer or commercial
mobile radio.

The 2200 is in excellent shape. Original box, manual, mounting bracket,
seldom used. MARS/CAP modified (140-174 MHz TX, 110-180 MHz RX,
110-139.995 AM RX).

From: Ed Juge/NM <ed_juge@zianet.com>
Message-ID: <3a969128.0@oracle.zianet.com>
Source record: 6148

I have for sale a very nice Winged 30L-1 with good Svetlana tubes and new filter caps, replaced a year or so ago. (The old ones were working, but old so I decided to replace them.) It has a new, heavy-duty line cord. Appears to be 1967 vintage. I've been running it on 120VAC, on 80, 40 and 20meters. It works like a charm.

Offering it because I've sold the KWM-2A I was using it with and I have a Ten-Tec Titan 425 for use with my Icom transceiver.

The amp looks great, but the case and trim ring have been repainted. Trim ring shows some tiny scratches under the paint but you have to look for them. Inside appears very clean. For $700 I'll ship it UPS ground CONUS.

Thanks... Ed, W5EJ

WANTED:

Drake AC-4 power supply: New or NOS filter capacitors that are direct replacements.

Drake DC-4 power supply: New or NOS filter capacitors and New or NOS power transistors that are direct replacements.

OR a source where I can buy them - please email any Electronic store URLs or their name and phone numbers.

THANKS, CHRIS, WG8I

174. FA: QRP station 20 meter SSB / CW ends Saturday 24

176. Technical and Math Books For Sale

Newsgroup: rec.radio.amateur.swap
Date: 2001-02-24 20:34:58 UTC
From: Christopher Trask <ctrask@primenet.com>
Message-ID: <9795ti$fh9$1@nnrp2.phx.gblx.net>
Source record: 6004
Cross-posted to: misc.books.technical,rec.radio.swap,rec.radio.amateur.swap

I have the following technical and math books for sale:

1. Albert, Arthur Lemuel
Electronics and Electron Devices
3rd ed., Macmillan, 1956, cloth, VG-/-, $15.00
This text was the last in a long series of books authored by A.L. Albert, and contains a couple of chapters on semiconductors and transistors, but is still predominantly oriented towards vacuum tubes. There is a very slight amount of pencil underlining in the first 100 pages, but otherwise the interior is clean. Owner's address label removed fom FFEP, cover has foxing and slight wear overall, worn through slightly at lower corners.

2. Appleton, E.V.
Thermionic Vacuum Tubes
1st ed, Methuen, 1932, cloth, G+, $15.00
No markings to be found internally. Binding split between FFEP and title page, but book is intact. Cover is worn through at corners, spine is bumped and worn at ends. Subjects include triodes, tetrodes, pentodes, amplifiers, oscillators, and rectifiers.

3. Beck, A.H.W.
Thermionic Valves: Their Theory and Design
Cambridge, 1953, cloth, VG-/-, $22.50
Owner's name and annotation on FFEP, otherwise no markings internally. Cover and spine have slight wear and bumping overall, but no serious defects. A very clean copy of a somewhat obscure textbook on the subject of vacuum tube theory and design, including klystrons, magnetrons, and travelling-wave tubes.

4. Boyce, William F. and Joseph J. Roche
The Radio and Electronics Handbook
2nd ed., Howard W. Sams, 1952, VG-/G, $15.00
No markings internally except for owner's stamp on FFEP. Cover and spine have very slight wear. Dustjacket has small portions missing at top and bottom of spine, lower edge of front, as well as rubbing overall. Contains extensive chapters on practically every practical aspect of consumer electronics, including vacuum tube data. A clean copy despite the dustjacket blemishes.

5. Bridgers, H.E., J.H. Scaff, and J.N. Shive
Transistor Technology, Volume 1
Van Nostrand, 1958, cloth, XLIB, G+/-, $15.00
Library pocket inside FC, annotations to title page, otherwise no internal markings. Call number on spine, bumping to spine ends and corner covers, slight wear from handline. A clean copy of a significant

reference on the fabrication and characterization of germanium transistors.

6. Camm, F.J. (ed)
Amplifiers: Design and Construction
George Newnes, 1957, cloth, VG/VG-, $15.00
No markings to be found anywhere. Cover and spine are very slightly worn at top and bottom. Dustjacket has some small chips and light wear to spine top and bottm. A very clean copy of an interesting small book on vacuum tube amplifiers from small signal to power.

7. Camm, F.J. (ed)
The Superhet Manual
George Newnes, 1940, cloth, G+/-, $12.50
Yellowing to pages and spots due to age. Cover slightly worn along edges, more so on bottom, with bumping to corners. Spine worn slightly on ends, faded with exposure to light. Interesting book dealing with the principles, design, and servicing of superheterodyne receivers.

8. Dawley, R.L.
Radio Handbook
13th ed., Editors and Engineers, 1951, hbk, G-/-, $15.00
Moderate wear overall, spine faded from handling and light, small ink stain on top of pages, no markings on pages. This is a substantial book and is very similar to the Radio Amateur's Handbook in many ways.

9. DeFrance, Joseph J.
Electron Tubes and Semiconductors
Prentice-Hall, 1958, hbk, G+/-, $12.50
Slight wear and bumping to outside. Owner's name inside FC, moderate underlining throughout. A good entry-level textbook from the era where transistors were becoming more widely used but tubes still dominated.

10. Department of Electrical Engineering
Applied Electronics
Wiley, 1948, cloth, G+/-, $15.00
No markings on pages. Owner's plate inside FC. Slight to moderate wear to cover and spine, slight crease down middle of spine. This was a substantial and essential textbook for undergraduate courses during the second half of WWII, and later went to a second edition. Extensive chapters on all classes of amplifiers, rectifiers, and vacuum tube theory.

11. Department of Electrical Engineering
Magnetic Circuits and Transformers
Wiley, 1943, cloth, VG-/-, $20.00
No markings internally. Cover is worn slightly at corners and bottom edges. Spine is slightly worn at end. This is a very clean copy of a highly sought-after reference on magnetism

12. Dummer, G.W.A. and H.M. Nordenberg
Fixed and Variable Capacitors

McGraw-Hill, 1960, hbk, VG-/-, $13.50
Owner's name at top of cover, tape over owner's name on FFEP, one instance of underlining (page 108), and minor bumping to spine ends. Overall, a nice copy of this book. And I DO NOT agree with the underlined statement on page 108.

12. Eastman, Gerald A.
Television System Measurements
Tektronix, 1969, pbk, VG-/-, 0-062-1064-00, $10.00
With the exception of a name written in ink on the spine and cover, the latter of which is crossed out, this copy of one of the Tektronix series on measurements concepts is very clean, having mo markings on the pages.

13. Fitchen, Franklin C.
Transistor Circuit Analysis and Design
Van Nostrand, 1960, cloth, G/G+, $12.50
A very thorough early undergraduate text on transistor theory and applications. Moderate underlining throughout, very slight wear to cover and spine, minor bumping to spine ends and cover corners. Dustjacket has some slight rubbing, small tear at spine bottom.

14. Gartner, Wolfgang G.
Transistors: Principles, Design, and Appications
Van Nostrand, 1960, hbk, G-/-, $13.50
No wear to outside. Slight to moderate amount of underlining in first five chapters, clean elsewhere. A very good text written at the end of the initial era of the bipolar transistor and just prior to the junction FET.

15. Glasford, Glenn M.
Fundamentals of Television Engineering
McGraw-Hill, 1955, hbk, VG-/-, $17.50
Owner's name on page ends and some very occasional pencil markings. Cover and spine have very slight wear and bumping to extremities. A nice, relatively clean copy of an early textbook on television system and circuit design, from the camera to the picture tube. Has a nice chapter on wideband amplifiers.

16. Guillemin, E.A.
The Mathematics of Circuit Analysis
Wiley, 1949, cloth, G-/-, $12.50
No markings to be found on pages. Owner's label on FFEP. Cover and spine worn with handling. Cover corners worn through slightly. Spine ends and cover edges slightly worn. One of the classics in circuit analysis, the contents of this book will never go out of date.

17. Henney, Keith
Principles of Radio
5th ed., Wiley, 1952, cloth, G+/-, $13.50
This is a very clean copy, having no markings on pages. Covers all aspects of radio receivers from the antenna to the audio output amplifier and everything in between. Spine is darkened slightly from exposure to

light. Spine ends and cover corners bumped.

18. Henney, Keith and Glen A. Richardson
Principles of Radio
6th ed., Wiley, 1952, cloth, G+/-, $12.50
This is a very clean copy of the last edition of this book, having no markings on pages. Covers all aspects of radio receivers from the antenna to the audio output amplifier and everything in between. Cover and spine have some wear from handling, gold leaf on spine being faded. Spine ends and cover corners bumped, upper front cover corner worn through slightly.

19. Hetterscheid, W. Th.
Designing Transistor IF Amplifiers
Philips Technical Library, 1966, hbk, VG/G+, $25.00
No markings except owner's name on end of pages. Dust jacket has slight defects from handling, such as tears and creases as well as chip-outs. One of the most thoroughly written books on any aspect of solid-state circuit design, and an uncommon find in any condition.

20. Hicks, Tyler G. (ed)
Standard Handbook of Engineering Calculations
McGraw-Hill, 1972, hbk, VG-/-, $20.00
Owner's name on FFEP, small notations on title page, otherwise no makings inside to be found. Cover has minor bumping to corners, spine has slight crease down centre, some minot wear to top and bottom. This reference covers basic mathematics from civil to nuclear engineering and is very clean.

21. Jordan, Edward C.
Electromagnetic Waves and Radiating Systems
1st ed., Prentice-Hall, 1950, cloth, G+/-, $12.50
Slight wear to cover and spine extremeties, pages yellowed at edges with age, rare markings in pencil. A cleaner than average copy of a classic text on electromagnetics and antennas.

22. Ketchum, Donald J. and E. Charles Alvarez
Pulse and Switching Circuits
McGraw-Hill, 1965, hbk, G-/-, $10.00
Very slight wear but some moisture damage to top of first quarter of pages. Spotless otherwise. This text covers both late vacuum tube and early transistor pulse circuitry.

23. King, Ronold W.P., H.R. Mimno, and A.H. Wing
Transmission Lines, Antennas, and Wave Guides
McGraw-Hill, 1945, VG+/-, $15.00
Owner's name inside FC. No other blemishes other than yellowing of paper edges with age. This is an exceptionally clean copy.

24. Kiver, Milton S.
Transistors
3rd ed., McGraw-Hill, 1962, cloth, VG-/-, $12.50

A nicer than average copy, there are no internal defects to be found. Blemshes are limited to some minor rubbing and bumping to spine ends and cover corners. Kiver was one of the first to author undergraduate textbooks on transistor theory and applications, and this edition has good chapters on amplifier design and experiments.

25. Landee, R.W., D.C. Davis, and A.P. Albrecht
Electronic Designer's Handbook
McGraw-Hill, 1957, cloth, VG+/G-, $20.00
Owner's name on FFEP, no other markings found internally. Cover and spine are blemish-free with the exception of some slight bumping to the spine ends. Dust jacket has numerous tears, moderate edgewear, and spot on front where a price sticker (?) was removed. This is an exceptionally clean copy of a substantial reference for vacuum-tube designers and hobbyists, and a dustjacket in any conditon is very uncommon. This should sit right next to The Big Red Book.

26. Le Croisette, Dennis
Transistors
Prentice-Hall, 1963, hbk, G+/-, $12.50
Moderate wear to cover extremities and no markings on pages. This is an interesting early undergraduate textbook on the bipolar transistor, with a chapter on h-parameters and an additional chapter on tunnel diodes.

27. Lee, Reuben
Electronic Transformers and Circuits
1st ed., Wiley, 1947, hbk, G-/-, $15.00
Moderate wear to cover and spine extremities. Spine worn through at bottom, cover worn through at corners. Owner's stamp on FFEP and title page. Some minor pencil marginalia. Perhaps the earliest textbook on the subject of signal transformers, this book covers everything from air-cored RF transformers to iron-cored audio power transformers, including a section on saturable-core reactors (transductors).

28. Lenk, John D.
Handbook of Modern Solid-State Amplifiers
Prentice-Hall, 1974, hbk, VG-/G+, $13,50
Owner's name inside FC, minor bumping to spine ends, but no makings on pages. Dustjacket is slightly worn on spine ends and cover corners. Very clean copy.

29. Lenk, John D.
Handbook of Oscilloscope Theory and Application
Prentice-Hall, 1968, hbk, VG+/VG-, $12.50
No defects to book, minor wear and one 3/4" tear to DJ. A very nice copy.

30. Lenk, John D.
Handbook of Simplified Solid-State Circuit Design
Prentice-Hall, 1971, 0-13-381731-8, cloth, VG+/VG, $17.50
A highly sought-after reference on solid-state circuit design, this is an exceptionally clean copy, hnaving only minor bumping to spine ends and

cover corners, and very slight wear to dustjacket spine ends.

31. LePage, William R, and Samuel Seely
General Network Analysis
McGraw-Hill, 1952, hbk, G+/-, $15.00
Owner's name inside FC. Small stain on FC, minor bumping to spine ends. No markings on pages, making this a very clean copy of a classic text on network analysis.

Prices are exclusive of shipping costs. For US, add $3.50 for first book, and $1.50 for each additional, unless noted otherwise. Canada and foreign dependent on actual cost. Payment in US$ in advance by cheque or money order. Books will be held for 14 days after confirmation. Money orders preferred, checks accepted from established customers. All dustjackets are protected with Brodart covers. Paperbacks are protected with archival sleeves.

Dual Band Amateur Ham Radio Handheld
EBAY AUCTION Item #1216996273

For Sale : MAHA-REXON RL-501 with 200 channel memory, Dual Band ht 2mt/440mhz with MAHA's NMH High-output battery pack. Last for aprox. 14hr of listening to the local repeater. I have the original box, packing and owners manual along with the ac charger and a custom leather case, and a speaker mic that I will include in this auction. Has seen little use, mostly during field day. I am selling to upgrade to the new APRS handheld, as I enjoy that aspect of the hobby more theses days. The unit is used but clean, small marks on the original antenna where the speaker mic was clipped for storage, but unharmed in anyway. I would rate this unit a 8 out of 10 on the looks scale, and a 10 for opperation. As with any used gear I will not accept any returns or refunds, and this unit is sold without any warranty, but I will state that this unit is fully functional on my desk as I place this auction listing.. I AM A PAYPAL VERIFIED Seller, I would like the winning accepted bidder to use PayPal with Visa or MasterCard etc.. much Quicker and it protects you against fraud, but will accept money order / certified bank drafts, No personal Checks. Buyer to pay Fixed S/h of $10.00. US Bidders Only. I reserve the right to offer to sell to the next highest bidder if the winner has unexceptable bad feedback Rating.

What do you mean "As with any used gear I will not accept any returns or refunds,".

Since you apparently don't know the difference between For Sale and For Auction, little else you have to say has no meaning.....

I have 7 working VHF model Rnet 150 Data radio transceivers for sale.
Motorola sold RNET unit support and sales to Dataradio. Full specs below.
http://www.dataradio.com/products_auto_rnet_vhf_specs.html

Photos of these units upon request

Asking $70 each or make offer for all.
will consider trades for HAM / Laptop items

Just wanted to correct a few things.....

Motorola did not sell the crystal controlled product line to Dataradio, Inc. The RNet 150 is a crystal controlled unit. In fact, Motorola had to discontinue the crystal product line prior to the sale due to the limited availability of key components. Only the synthesized portion of the boxed RNet product line was sold to Dataradio, Inc. Dataradio, however, does offer compatible product.

The RNet 150 has been superceded by the JSLM RNet VHF which was designed to meet much higher performance specifications. The link in your post references the JSLM RNet VHF specifications.....not the RNet 150 specifications.

The JSLM RNet is available at VHF and UHF frequencies and is a drop in replacement for either the crystal controlled prouducts or the frequency synthesized telemetry products that Motorola used to manufacture.

The new JSLM RNet is available in either a 'pre-farmed' or 're-farmed' (11K0 emission designator) version. Anyone needing a drop in replacement for the RNet 150 or the RNet 450 telemetry radios can obtain one from Dataradio....the JSLM RNet is it.

Regards, Ernie

Outbacker Perth + HF antenna

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1216261945

Closes in 1 day. Get this great HF mobile antenna for much less than retail. Below are the specs. Thanks for looking

Adam / kc7ljq

This is the perfect antenna for your HF mobiling needs, or for the apartment dweller who wants a compact HF antenna. Made in Australia, this tunable antenna has received rave reviews.

This mobile antenna with tuning spike fully extended is 1.8 metres long (around 4 feet) - a 900 mm main shaft with a 900 mm tuning spike.

Operates on 80 - 75 - 40 - 30 - 20 - 17 - 15 - 12 - 10 - 6 - and the 2m band. The PERTHplus is ideally suited to fender, gutter, or trunk mounting applications, or can be bullbar mounted. It is easily transported, packing down to 900 mm . Suits all HF transceivers. Just "Plug - N - Play" for the desired band.

Help! I need to raise some cash for a new rig, so my 737 has to go.

This near mint condition (has some dust and fingerprints on it) Icom 737 operates SSB, CW, AM, and FM. It has the auto antenna tuner, dual vfos, split operation, band pass tuning, notch filter, 101 memory channels and much more. Output power is variable from 10 to 100 watts on SSB, CW, and FM and 10 to 40 watts on am. This is from a non-smoking environment. Comes with the original hand mic with up/down controls, power cable, operating manual and optional service manual. Will come packed in the original Icom boxes. I will ship for $625 anywhere in lower 48 states. You can check out my feedback rating on eBay under the user id "kabeezy".
Thanks for reading this.

I have a TenTec Omni D model C for sale along with a matching 20 amp power suppply. Both units are in very good condition and pictures are available upon request. I'm asking $350 plus shipping for the pair. I used them in Alaska to work most of Europe on a G5RV and always recieved excellent reports. It's a great setup for the beginner as well as the TenTec collectors out there. I'll consider trades towards an HF/UHF/VHF mobile antenna and/or dual band handheld radios.

HAMFEST March 4, 2001 - Lindenhurst, LI

GREAT SOUTH BAY AMATEUR RADIO CLUB and SUFFOLK COUNTY RADIO CLUB
ARRL APPROVED LONG ISLAND HAMFEST - March 4, 2001

LINDENHURST, LI - NY

On March 4, 2001 the Great South Bay Amateur Radio Club will again
sponsor an indoor Hamfest-Computer Show. The location will be at the:

Knights of Columbus
400 South Broadway, Lindenhurst, NY.
This is an ARRL approved Hamfest.

There will be radio equipment, electronic components, computers and access-
ories, software, books, technical manuals, ARRL information, Amateur Radio
License Exams, Door Prizes.

Advanced registration is $18.00 each table. Tables at the door are $25.00
each. Contact Walter Wenzel KA2RGI at 631 957-0218 for table reservations.
NO TABLES WILL BE RESERVED WITHOUT PRIOR PAYMENT due to the space available.

General admission is $ 6.00. Wife's and children under 12 admitted with no
charge.

VE - ARRL - 12:00 NOON at Babylon Town Hall, 200 E Sunrise Hwy, Lindenhurst.
For exam candidates please remember to bring your original FCC Amateur
Radio license (if licensed), any C.S.C.E. forms that are pending, plus a
photocopy of each, pens, calculator, formal form of ID (preferably photo
ID), and the examination fee, to the exam session. Current ARRL/VEC fee is
$10.00, exact change is appreciated.

Talk-in will be via GSBARC Repeater on 146.685 -600 136.5 PL.

Food Service during the Hamfest will be provided by members of the Knights
of Columbus Council.

Information is also available during the GSBARC 2 meter info net every
Monday evening at 7:00 PM following the Newsline Report on the W2GSB
repeater, 146.685 -600 136.5 PL required. You may also write to:

Hi Larry
rec.radio.swap is alive and well. Maybe you deleted it off your system.

"Very Clean" Ameritron AL-811H with the 10 Meter Mod dealer installed. Amp works great on all bands. I have raised the ALC to operate the amp at only 450 watts out which means the amp has not been over worked. The amp is currently in use and is available for on the air tests. $625.00 plus shipping. Contact Anthony at wb5tty@hotmail.com , also visit my web page to see who I am. If you perfere to call my home number is 254-778-3428. If you will be in the area of Temple, TX, I will be happy to demo the amp for you.

73,

Anthony, WB5TTY

228. Technical and Math Books For Sale

Newsgroup: rec.radio.amateur.swap
Date: 2001-03-06 20:19:13 UTC
From: Christopher Trask <ctrask@primenet.com>
Message-ID: <983go1$j1f$2@nnrp2.phx.gblx.net>
Source record: 5955

I have the following technical and math books for sale:

1. Albert, Arthur Lemuel
Electronics and Electron Devices
3rd ed., Macmillan, 1956, cloth, VG-/-, $15.00
This text was the last in a long series of books authored by A.L. Albert, and contains a couple of chapters on semiconductors and transistors, but is still predominantly oriented towards vacuum tubes. There is a very slight amount of pencil underlining in the first 100 pages, but otherwise the interior is clean. Owner's address label removed fom FFEP, cover has foxing and slight wear overall, worn through slightly at lower corners.

2. Angelo, E.J.
Electronic Circuits: A Unified Treatment of Vacuum Tubes and Transistors
McGraw-Hill, 1958, cloth, VG-/-, $15.00
Some minor pencil underlining and notes in the first few chapters, owner's names inside FC and on FFEP. Minor bumping to cover corners and spine ends, but virtually no wearing to cover surface or edges. This undergraduate textbook bridges the gap between vacuum tube and transistor circuit design, with a primary emphasis on rectifiers and amplifiers.

3. Angelakos, D.J. and T.E. Everhart
Microwave Communications
McGraw-Hill, 1968, cloth, VG-/-, $12.50
Underlining, hilighting, and notes in Chapter 2, clean elsewhere. Binding is spotless, with very slight bumping to cover corners and spine ends. An essential textbook at the time, this volume covers klystrons, traveling-wave tubes, tunnel diodes, parametric amplifiers, masers, antennas, and a variety of other subjects.

4. Bevitt, William D.
Transistors Handbook
Prentice-Hall, 1956, hbk, VG/G-, $12.50
No markings inside, moderate wear and some chipping to dj. This was the first handbook for transistors, as it says on the DJ.

5. Bucher, Elmer E.
The Wireless Experimenters Manual
Wireless Press, 1920, cloth, G-/-, $25.00
Minor mildew spotting to FC, moderate mildew spotting to RC, mildew staining inside both covers, minor staining to title page. Pages slightly yellowed from age, surprisingly clean in spite of mildew staining elsewhere. A very basic text for amateurs in the early days of radio, this well-known book covers the essentials of transmitters, receivers, antennas, oscillators, amplifiers, and vacuum tube theory as it was understood at the time. Quite good condition considering the mildew.

6. Chaffee, E. Leon
Theory of Thermionic Vacuum Tubes
McGraw-Hill, 1933, cloth, VG/-, $20.00
Owner's stamp inside FC, inside RC, and on title page. Binding is very clean, having slight bumping to cover corners and spine ends. Pages are slightly yellowed from age. This was one of the earliest textbooks on vacuum tube theory, and one of the most substantial. Chaffee was a renowned expert on the subject of regeneration theory, with to entire chapters being devoted to the subject. A very clean copy of an essential and classic textbook on vacuum tubes.

7. Freeman, J.J.
Principles of Noise
Wiley, 1958, cloth, VG-/-, $15.00
Rare to occasional underlining and notes throughout, owner's name and address on FFEP. Binding is spotless with very minor bumping to spine ends. This book provides a very basic understanding of the principles and characteristics of noise in vacuum tubes, discussing the physical sources of noise as well as two-terminal and four-terminal representations, and the all-important concept of noise figure.

8. Marcus, Abraham and William Marcus
Elements of Radio
3rd ed., Prentice-Hall, 1953, cloth, VG+/-, $13.50
No markings found internally, and scarcely an wear to to cover and spine. This is an exceptionally clean copy copy of a well known and respected textbook on vacuum tube radio receivers and electronics.

9. Martin, Thomas L.
Electronic Circuits
Prentice-Hall, 1955, cloth, VG/-, $13.50
Owner's name on FFEP, otherwise no markings internally. Slight wear to cover and spine, very slight bumping to cover corners and spine ends. This is an extensive book covering of linear amplifiers, primarily with vacuum tubes but with a chapter on transistor circuits as well. Additional chapters on negative resistances, noise, modulators, rectifiers, mixers, magnetic amplifiers, and more. An exceptionally clean copy of a worthwhile reference for vacuum tube circuit designers.

10. Morecroft, J.H.
Principles of Radio Communication
Wiley, 1921, cloth, XLIB, G+/-, $25.00.
Library stamp inside FC, no internal markings otherwise. Covers are in good shape, with the bottom edge or the rear worn through about one inch. Spine is faded as with exposure to light, slight wear to ends. Library call number on spine. According to the library stamp, this book was originally in the ship's library of the USS Omaha. A substantial volume on early methods of radio communication, and a real collector's item even without the tour of navy duty.

11. Motorola
The Semiconductor Data Book
4th ed., Motorola, 1969, VG-/-, $17.50

Clean throughout, upper cover corners slightly frayed, spine and cover lettering faded from handiling and age. A very large reference manual from an era when Motorola was considered a world leader in discrete semiconductor manufacturing, unlike today. This is a large book and will require additional postage for shipping.

12. Moxon, L.A.
Recent Advances in Radio Receivers
Cambridge, 1949, cloth, XLIB, VG-/-, $25.00
Library pastedown inside FC, library mrkings on pages after title page, otherwise no markings internally. Call number on spine, some light rubbing to cover corners and spine ends. Most of this book is entailed in the discussion of noise factor (noise figure), including theory and measurement. Chapters included on the design of amplifiers and mixers with regard to noise factor, as well as two chapters on the design of IF amplifiers.

12. Papoulis, Athanasios
Circuits and Systems: A Modern Approach
Holt, Rinehart, and Winston, 1980, hbk, G+/-, 0-03-056097-7, $15.00
Spine ends and cover corners worn, occasional marginalia and hilighting. Basic undergraduate text covering Laplace transforms, z-transforms, convolution, fourier series, and other concepts essential to communications theory.

13. Quarrington, C.A.
Radio Circuits and Data
Caxton Publishing, 1948 (printed 1951), hbk, 90 pages, VG--/-, $17.50
No markings inside. Cover is slightly worn along edges and spine is moderately worn along hinges, top, and bottom. This book contains complete schematics of a few commercial British receivers, as well as functional schematics of mixers detectors, amplifiers, etc. Extensive tables for hardware and vacuum tube characteristics. A real collector's item.

14. Radio Corporation of America
Solid-State Power Circuits
RCA, 1971, hbk, VG/-, $15.00
Owner's name inside front and back covers. A very good reference for design of power circuits using bipolar transistors, silicon rectifiers, thyristors, and more. Covers areas from power supplies to microwave power amplifiers.

15. Reintjes, J.F. and G.T. Coate
Principles of Radar
3rd ed., McGraw-Hill, 1952, cloth, G/-, $12.50
Owner's name inside FC and on FFEP. No markings on pages. Cover and spine have moderate rubbing, especially along cover edges, spine ends, and hinges. Slight fraying to front cover lower corner. Despite the wear to the cover and spine, this is a very clean copy of a later edition of what was essentially the bible for radar designers during the second world war, and this edition reflects the improvements that were attained

in the after-war years.

16. Richter, Walter
Fundamentals of Industrial Electronic Circuits
McGraw-Hill, 1947, hbk, VG-/-, $13.50
Owner's name on FFEP, very light foxing overall, no markings on pages. Very good text on vacuum tube theory and applications.

17. Schure, Alexander
Basic Transistors
Rider, 1961, paperback, VG-/-, $7.50
No markings inside ot our, slight rubbing to covers and spine, slight wear to cover corners and spine ends. As the title suggests, this is a bery basic book on transistors, written at the time where transistors were rapidly replacing vacuum tubes in commercial and consumer electronics.

18. Sears, Francis W.
Addison-Wesley, 1954, VG-/-, $12.50
Some markings and underlining in first 19 pages, clean elsewhere. Owner's name inside FC. Some slight bumping and wear on spine ends and cover sorners. Lettering on spine faded with handling. Nice undergraduate textbook.

19. Sevin, Leonce J.
Field-Effect Transistors
McGraw-Hill, 1965, hbk, VG+/-, $15.00
A very clean, unblemished copy of an essential reference for junction FETs.

20. Shea, Richard F.
Transistor Applications
Wiley, 1964, cloth, VG+/G+, $20.00
This early reference on transistor applications and circuit design is exceptionally clean throughout, having no markings to be found anywhere. Minor bumping to cover corners and spine ends. Dustjacket has some wear along edges, mostly spine ends, as well as some dirt from handling.

21. Slurzberg, M. and W. Osterheld
Essentials of Electricity - Electronics
3rd ed., McGraw-Hill, 1965, 0-07-058260-2, cloth, VG/-, $15.00
Slight bumping to spine ends, some light soiling from handling. This is a wonderfully clean copy of a very basic text on the principles of electricity, and includes chapters on vacuum tubes and transistors.

22. Sterling, George E.
The Radio Manual
3rd ed., Van Nostrand, 1940, hbk, G+/-, $15.00
Moderate wear and bumping to cover and spine extremeties, owner's name on FFEP, but no markings on pages. This book is a wealth of information on the state of the art in radio broadcasting and telecommunications prior to WWII.

23. Sturley, K.R.
Radio Receiver Design, Part 1
1st ed., Wiley, 1943, G+/-, $15.00
No markings internally. Cover slightly worn, hardly noticeable. Original gold leaf letter rubbed off spine and replaced poorly with white paint. This is one of the most significant books ever written on the subject of radio receivers.

24. Terman, Frederick E.
Radio Engineering
3rd ed., McGraw-Hill, 1947, cloth, VG-/-, $20.00
Owner's name on FFEP, no other internal marking found. Pages slightly yellowed from age. Cover corners and spine ends are slightly bumped. Top ends of hinges and cover corners are slightly worn through, some diagonal creasing on spine. Despite it's age, this copy of one of the most readily recognized and respected textbooks on radio theory and circuitry shows just a slight amount of wear.

25. Thomson, J.
The Services' Textbook of Radio, Volume 3: Electronics
Her Majesty's Stationary Office (HMSO), 1955, cloth, XLIB, G/-, $15.00
Pocket with publisher's note inside FC, library markings inside FC. No markings on pages. Moderate wear to cover and spine, with cover corners frayed and top of spine moderately bumped. Call number on spine, lettering on spine rubbed by handling. Primarily a reference on vacuum tubes, there is a surprising chapter on semiconductors, one of the earliest to be found. Other chapters deal with subjects of magnetrons, velocity-modulated tubes (valves), noise, etc.

26. Van Valkenburg, M.E.
Network Analysis
3rd ed., Prentice-Hall, 1974, 0-13-611095-9, cloth, VG-/-, $15.00
Slight to moderate wear to cover, spine ends, and hinges. Binding slightly split between FFEP and title page. No markings on pages, making this a clean, if not otherwise slightly worn, copy of a substantial textbook on network analysis.

27. Walston, J.A. and J.R. Miller (ed)
Transistor Circuit Design
McGraw-Hill, 1963, cloth, VG+/G, $17.50
Owner's name on FFEP, otherwise no markings throughout. Very little wear to cover and spine. Dustjacket has slight wear to edge, consisting of chip-outs and rubbing.This is an exceptionally nice copy of a substantial reference on disctrete small-signal and power amplifier design, as well as switching circuitry design, including voltage regulators.

28. Wedlock, Bruce D. and James K. Roberge
Electronic Components and Measurements
Prentice-Hall, 1969, decorative boards, VG/-, $12.50
Owner's name inside FC, otherwise no other markings internally. Cover has little wear except for slight fraying at corners. Spine worn slightly at ends, darkened slightly from exposure to light. This is a very clean copy of a worthwhile text covering the basics of measuring and

characterizing electronic components.

29. Zimmermann, Henry J. and Samuel J. Mason
Electronic Circuit Theory: Devices, Models, and Circuits
Wiley, 1959, cloth, VG-/-, $13.50
Very occasional pencil underlining and marginalia. Owner's name crossed out inside FC. Cover and spine are slightly rubbed, mostly to bottom edges. Relatively clean copy of a very thorough textbook covering both vacuum tube and transistor circuitry.

Prices are exclusive of shipping costs. Unless stated otherwise, for USPS bookrate shipping add $3.50 for first book and $1.50 for each additional. For USPS Priority shipping add $5.00 for first book and $2.50 for each additional. Canadian and foreign shipping dependent on actual cost. Payment in US$ in advance by cheque or money order. Money orders preferred, cheques accepted from established customers. Books will be held for 14 days after confirmation. All dustjackets are protected with Brodart covers, paperbacks are protected with archival sleeves. Books may be returned within 30 days, with prior approval, if not as described.

I have for sale in excellent condition a Yaesu FT-736R......It comes standard with 2 meters and 440......

Options that are included is as follows:

FEX-736-220 Mhz Module
FEX-736-50 Mhz Module
FTS-8 37-tone CTCSS Subaudible Tone Squelch Unit
Keyer Unit B Internal Electronic Iambic Keyer
XF-455MC 600 Hz CW Narrow Filter

I do not have a microphone to go along with it.......I am a non-smoker and works excellent........
I have the original box and manual and will take $1250 plus shipping......I can be reached at (508) 821-2993 or e-mail......WZ1U Steve / Lakeville, Ma.

Hello group,
I was robbeb by another ham, a 2 meter rig, i traded with this guy, he got my package I have proof of this, but he never sent his part of the deal,he keeps making promises, but i never get anything.
Is there a way i can warn all hams in america about this HAM, i did many deals with other hams, first time i get ripped off. and it hurts.
If anyone can give me some advice, i'll appreciate. By the way, it was a Canadian ham,

Make copies of your "proof" and send them to the police department and prosecutor of the city where this person lives. They should send you the proper way to "capture" the wayward ham. ....maybe if you post your proof we hams can send him a post card with "SHAME ON YOU FOR STEALING" from a fellow ham. Good luck.

At the risk of bringing on another flame war...

I think you mean "they're" as in the contraction of the words "they"
and "are". "Their" is the possessive form of "them", as in "their
words are good".

Sorry, don't mean to be a pain, but it speaks better of a person when
they use our language properly. Also, you'll probably attract more
visitors to your site if you promote it without obvious typo, grammar
and spelling problems.

Just my 2cents.

Neil

235. FS: Bird 43 meter(s) in near mint condition. Also some elements.

Newsgroup: rec.radio.amateur.swap
Date: 2001-03-10 06:49:31 UTC
From: Grant Hopper <ghopper@eskimo.com>

I have two Bird 43 inline Watt meters for sale. Both come with the shorting plug, but no case or elements.

The first one is in near perfect condition, with no scratches, scrapes or dents, and only two tiny spots where the paint is missing. Also, it has the PL-259 connectors. I would like to get $170.00 plus shipping for this one but will consider offers.

The second one is in good condition, but does have some wear spots: no dents, but some paint is chipped and shows signs of use but not abuse. It has 'N' connectors. I would like to get $160.00 plus shipping for this one but will consider offers.

I have several elements avalible: 100C for $60, 10D for $40, includes priority mail shipping and insurance. I may decide to sell some of the other element I have so, inquire if interested. Also, I have pictures of all availble.

Has the little rubber "doughnut" behind the tuning knob/skirt on your TR-7 (or R7/RV-7/RV-75) gotten all dried up and stiff? If your radio is like most of them, unless this doughnut has been replaced recently it now looks like it's been "baked" and doesn't function very well (it needs to be supple and rubbery for the zero-adjustment to work/feel right).

I have the perfect replacement part, brand new. It's made of the same material as the factory unit, same dimensions, and works great. I even wrote up clear, step-by-step illustrated instructions showing how to do the job, with pointers on what to avoid.

To get your doughnut and instructions, send $2 to:

Neil Rosenberg, K1VY
60 Plain Road
Hollis, NH 03049

If you want 2 or more they're $1.50 each, shipped.

Satisfaction guaranteed, of course. By the way, they also work great on 4-line gear!

Email to K1VY@arrl.net or call (603) 465-2788

Thanks!

Help!

I have a Wilson WR-1000 Rotor and control that have never been used.
Unfortunately,
I need a 10 pin connector to fit the old Wilson WR-1000 rotor and the
documentation/manual for the rotor and control box.

"I think" I have a connector, or at least I had one, but can not find it.
I never did have a manual.

I'd greatly appreciate any help.

If any one responds, please copy me via e-mail as I don't always get to see
replies on the newsgroups.

Thanks,

I have a number of extra pieces of Amateur Radio equipment I am selling.

Icom IC-2AT (the one with the keypad!) Includes antenna, DC adapter pack, and a BP-3 battery pack. The radio is in very good condition and would make an excellent unit for an APRS setup, mobile/portable packet, Fox transmitter, or a backup 2M rig.

Picture of unit: http://www.eskimo.com/~ghopper/IC2AT.jpg

I would like $75 for the unit but would consider reasonable offers.

email me at ghopper@eskimo.com

I am also selling: an IC-02AT, condition questionable, IC-03AT, 2M 35watt amp, Bird Watt meters and elements, Clamp on AC ammmeter, B&K high voltage probe, and a number of other items.

250. FS: Bird 43 wattmeters and elements

Newsgroup: rec.radio.amateur.swap
Date: 2001-03-13 22:10:49 UTC
From: Grant Hopper <ghopper@eskimo.com>
Message-ID: <ghopper-D9668E.14104913032001@eskinews.eskimo.com>
Source record: 5977
Cross-posted to:
rec.radio.swap,rec.ham-radio.swap,rec.radio.amateur.swap,alt.ham-radio.marketplace,rec.radio.amateur.equipment

Jim,

Meter #1 is a Bird 43 with UHF connectors. The unit is in very good to excellent condition. Comes with the shorting plug. No case, no elements.
Pictures:
http:/www.eskimo.com/~ghopper/birdf1.jpg Front
http:/www.eskimo.com/~ghopper/birdtop.jpg Top
http:/www.eskimo.com/~ghopper/birdstrap.jpg Strap
http:/www.eskimo.com/~ghopper/birdback.jpg Back
http:/www.eskimo.com/~ghopper/birdlt.jpg Left
http:/www.eskimo.com/~ghopper/birdrt.jpg Right
http:/www.eskimo.com/~ghopper/birdbot.jpg bottom

The jpgs are large and show a lot of detail because I had someone who was very interested in the condition (apparently a collector) and had offered $180 but within the hour had emailed back that he had decided on another unit. Go figure. I would like $170 for this unit but will consider reasonable offers once the unit has been posted for sale for a while.

Meter #2 is a Bird 43 with N connectors (male/female). The unit is in fair to good condition. Comes with the shorting plug. No case, no elements.
Pictures:
http:/www.eskimo.com/~ghopper/nbirdf.jpg Front
http:/www.eskimo.com/~ghopper/nbirdt.jpg Top
http:/www.eskimo.com/~ghopper/nbirdb.jpg Back
http:/www.eskimo.com/~ghopper/nbirdl.jpg Left
http:/www.eskimo.com/~ghopper/nbirdr.jpg Right

This unit has a 'Motorolla' label however, it is identical to 'Bird' bird meters with the exception of two extra screws holding the back on. The unit has some wear but looks good and works fine. I would like $160 for this unit but will consider reasonable offers once the unit has been posted for sale for a while.

I have two elements that I am immediately putting up for sale. Several others have already been sold, pending the receipt of funds. I may elect to sell others depending on how fast this stuff sells and/or the size of offers I get for the other elements.

The two are a 10D (200-500 Mhz, 10 watts) for $40, and a 100C (100-125 Mhz, 100 watt) for $60.
Picture:

http:/www.eskimo.com/~ghopper/elements.jpg

I also have a 250B, 500D, 25E, 100E, and 250E that are surplus to my needs and I may sell if I get a sufficient offer.

All items are plus shipping. All items are guaranteed against DOA, and are otherwise sold as-is. Payment by cashier's check or money order

Thanks for considering these items.

Grant Hopper
KB7WSD
ghopper@eskimo.com

I am also selling: an IC-2AT, condition very good, IC-02AT condition questionable, IC-03AT condition very good, 2M 35watt amp, B&K high voltage probe, 2M amp, a blasting machine, B&W CCD video camera, Kenwood SP-230 speaker, an Icom BC-35 battery charger, old video camera power supplies ($5 ea) which I have used as power supplies for other projects (built-in), and a number of other items.

251. Vintage VHF/UHF equipment

Newsgroup: rec.radio.amateur.swap
Date: 2001-03-13 22:33:58 UTC
From: "Phil T. (VA3UX)" <phil@vaxxine.com>
Message-ID: <3AAEA056.72DE37C8@vaxxine.com>
Source record: 5978

have two pieces of what I would call "vintage" commercial radio
equipment.

One is a GE Transmitter/Receiver combination; all vacuum tube, power
amp
uses a 5894. Currently set-up for 168.99 Mhz. This is the original
cabinet which is about 3 feet tall, 2 feet wide and about 10" deep
(kinda
of like a big cereal box). The receiver and transmitter are on separate

chassis and can be removed from the cabinet. each has its own integral
power supply. Weighs 60 - 75 lbs (estimate)

The second is a Motorola repeater set-up for 412.0125 Mhz
transmit/417.0125
Mhz receive. This appears to be vintage solid state. Weight is around
80
lbs+ (estimate). Cabinet is similar size and shape to the GE unit
above.
Model number is XC34MSY-3IQ1CT.

These were both working when taken out of service last year. I bought
'em
but I really doubt I'll get around to using them (too many other
projects
on the go).

Any interested parties out there, please make reasonable offers. I'm
not a
VHF/UHF guy, so if these are just plain junk, feel free to tell me so.
There's a good pile of parts in these that I can use for something else.

Please reply direct to : phil@vaxxine.com

Thanks

Phil

Hello Dana:
My friend's IC751 might soon turn into scrap, if he is not able to determine
the correct value of the resistors associated with the internal fan motor.
One resistor has burned out and he has placed a short across the terminal
points.....
Can u provide me the resistance and wattage rating for the two resistors
used in the fan motor speed circuit?
Pse post or reply to wa.tworsx@verizon.net.

Hi all. Just a notice about two auctions on Ebay that I'm running:

Drake R4-C.
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1221376865

Drake AC-4
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1221393733

As always with my auctions, they are both satisfaction guaranteed.

Thanks for your interest;
Neil, K1VY

I detect a potential conflict of interest here. :-)

john

260. WANTED to buy: Drake DC-4 Mobile Power Supply

*** Vintage Electronic Manuals (original unless noted) ***

Army / Airforce / Navy
AN/APS-13 Airborne Radar (1944) $20
AN/URM25D Signal Gen (partial copy) $10
BC-314G Receiver (schematic copy only) $3
BC-344D Receiver (schematic copy only) $3
SCR-211 A-T plus AA-AL Frequency Meter $25
SCR-522 A/T2 SCR 542 A/T2
(cover badly worn -- insides ok) $30
TM11-825 TWT PB-50A Transmitter (1944) $25
LM-14 Frequency Indictor (1943) $20
Hughes HTR-12A/C HTR-13A/C Radar $30
Hughes Aircraft Unit 24 MA-1,
F-106A computer maint. manual $30

B&K
415 Sweep/Marker Generator $15

B&W
400 Distortion Meter $15
410 Distortion & Voltmeter (copy) $8

Boontoon
160-A / 170-A Q Meter (copy) $5

Bytcom
24/12ADH Modem $5

Central Electronics
20A SSB Exciter partial manual copy
plus (original?) schematic $25

Concord Data Systems
224 Autodial Modem $5

Collins
32S-1 Transmitter $50
70-E8 Oscillator glossy brochure
(1947 copyright) $10
520 5430 00 Vernier Tuning Knob $5

Eico
HFT-90 FM Tuner $10

Federal Telephone and Radio
FT-125-B25A $20

Fluke
8022B DMM $10

General Radio
1606-A Impedance Bridge (copy) $10

Gorler
UT-345 AFC / UT-343 FM Tuner $10

Heathkit
309C RF Probe $5
A-9C Audio Amplifier $15
AG-9 Audio Generator $10
CM-1073 Auto Tune-up Meter $5

FM-3 FM Tuner $10
FM-4 FM Tuner $10

IM-4100 Frequency Counter $10
IO-105 Dual Trace Oscilloscope $15
O-11 Oscilloscope $10

SA2500 Antenna tuner (new) $50

TC-2 Tube Checker $10
V-6 VTVM $8
WA-P2 Preamplifier $10

Hewlett Packard
150A/AR Oscilloscope $10
152 Dual Trace Amplifier $5
400A VTVM $5
400C VTVM $5
400D/H VTVM $10
400D/H/L VTVM $12
410B VTVM $12

3455A Digital Voltmeter (operation) $10
5340A Frequency Counter (comb bound copy) $50
6200A Power supply -- Harrison Lab version
lower right part of front cover missing $15
7035B X-Y Recorder $20

8445A Preselector (bound copy) $20
8556A Spectrum Analyzer LF unit $45
8672A Synthesized Generator $100

10811A/B Quartz Crystal Oscillator $20

Motorola
Motran (136-174 MHz) FM transceiver instructions,
schematics 68P81044A10 (2 books) $30

Motran (150.8-174 MHz) FM transceiver instructions,
service/schematics 68P81040A45 (2 books) $30

Motran (150.8-174 MHz) FM transceiver service manual (copy)
68P81041A15 $15

Model X53GJV-1091A Two-Way FM Radio (160-174 MHz)
service manual (copy) $15

Radio Shack
CT-101 Cell Phone Owners Manual $5
CT-101 Cell Phone Service Manual $20
SA-10 Stereo Amplifier $2

RCA
WR-64B Color Bar Generator(copy) $5
5-E 5KW AM Broadcast Xmtr $50

Sabotronics
2000 DMM $10

Signal One
CX7A (partial copy -- schematics mostly) $10

Teac
MV-550 VCR Service Manual $20
MV-800 Owners Manual $5

Tektronix
DC505A Counter (bound copy) $20
FG503 Function Generator $25
FG504 Funct Gen. (SN <40000) $30
FG504 Funct Gen, comb bound copy
(SN >40000) $20
PS503A Power Supply
(back cover missing) $20
SG503 Leveled Sine Wave Gen $25

Yaesu
FT-101 service manual -- not quite complete copy
though I think it has all the "real" service info, plus
a dozen or so FT newsletters (copies) (1974-76) $30

FT-101E / FT101 ES (in Japanese) $10

********** Old Radio Books & Catalogs **********

RCA HB-3 Tube Handbook
Loose leaf 6 ring binder style data sheets starting in the late '40's with
additions and
updates through October 1966. Sepatate sections cover Transmitting Tubes,
Receiving Tubes (Part 1 & 2),
Industrial receiving tubes, Photosensitive devices, Thyratons & such,
CRT's &
Picture tubes,

Miscellaneous types, & semiconductors. The updates appear to have been
made
in all
these sections except Picture Tubes which is somewhat disorganized. It also
appears that the
obsolete data sheets were kept for reference. The whole collection is about
30" wide on a shelf.
Shipping weight will be 20 lbs. Excellent condition; mostly never read! One
gotcha - No binders. $250

Heathkit Catalogs
1954, 55, 56, 57, 58, 59 &
Fall-Winter '62-63,
Xmas '89 + Winter & Spring '90 $100 all

Handbook of PREFERED CIRCUITS
Navy Aeronautical Electronic Equipment
vols. 1&2 (1955 tubes & 1962 transistors)
very good condtion $40

Most Often Needed 1926-1938 Radio Diagrams, originally published by
Supreme Publications 1941. This is a REPRINT, by Vintage Radio.
240 pages, solid schematics! Like new, $50

RCA TT-3 Air-Cooled Transmitting Tubes 1938 copyright
overall good condition w/slight damage at top & bottom of
spine & first 20 pages of lower right corner. 192 pages -- $30

Radio Supply Company catalog 1934 (they used to be in downtown Los Angeles)
-- a little smudging on the back cover and two middle pages torn on the
edge but, otherwise in fine condition. There is a sticker from the
(original?)
owner on the first inside page. 85 pages, the last 10 or so of which are
receiving and transmitter tube data from the era. $20

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet
Excellent condition 20 pages or so $10

Elin company overview book 1932
very good condition except cover is almost loose
Text is in GERMAN. Lots of photographs of electrical equipment,
tools, machinery, and construction projects.
128 pages $10

Radio Doings Call Book Spring 1931 edition
cover taped at spine, otherwise very good
50 pages $15

Radio Doings Vol 15, #1 June 1929 edition
cover, first two & last two sheets missing otherwise o.k.
pages 5-62 remain $10

Official Radio Service Manual 1930, originally published by Gernsback Publications. This is a REPRINT by Vestal Press, 1984. Schematics & some service info. 352 pages, like new $60.

All of the above plus shipping, if necessary, naturally.

268. Technical and Math Books For Sale

Newsgroup: rec.radio.amateur.swap
Date: 2001-03-17 23:52:25 UTC
From: Christopher Trask <ctrask@primenet.com>
Message-ID: <990tbp$24n$5@nnrp2.phx.gblx.net>
Source record: 5995

I have the following technical and math books for sale:

1. Albert, Arthur Lemuel
Electronics and Electron Devices
3rd ed., Macmillan, 1956, cloth, VG-/-, $15.00
This text was the last in a long series of books authored by A.L. Albert, and contains a couple of chapters on semiconductors and transistors, but is still predominantly oriented towards vacuum tubes. There is a very slight amount of pencil underlining in the first 100 pages, but otherwise the interior is clean. Owner's address label removed fom FFEP, cover has foxing and slight wear overall, worn through slightly at lower corners.

2. Angelo, E.J.
Electronic Circuits: A Unified Treatment of Vacuum Tubes and Transistors
McGraw-Hill, 1958, cloth, VG-/-, $15.00
Some minor pencil underlining and notes in the first few chapters, owner's names inside FC and on FFEP. Minor bumping to cover corners and spine ends, but virtually no wearing to cover surface or edges. This undergraduate textbook bridges the gap between vacuum tube and transistor circuit design, with a primary emphasis on rectifiers and amplifiers.

3. Balabanian, Norman
Network Synthesis
Prentice-Hall, 1958, cloth, VG-/-, $15.00
Some minor pen underlining, seems to be limited to the chapter on the synthesis of general one-ports. Owner's name inside FC. Binding is exceptionally bright, minimal wear to cover corners and hinge ends. Despite the underlining, this is a very, very clean copy of one of the classic tectbooks on passive network synthesis, covering such subjects as the realization of lossless two-ports, insertion-loss synthesis, realization of RC two-ports, and many other subjects essential to the basic understanding of network synthesis.

4. Boyce, William F. and Joseph J. Roche
The Radio and Electronics Handbook
2nd ed., Howard W. Sams, 1952, VG-/G, $15.00
No markings internally except for owner's stamp on FFEP. Cover and spine have very slight wear. Dustjacket has small portions missing at top and bottom of spine, lower edge of front, as well as rubbing overall. Contains extensive chapters on practically every practical aspect of consumer electronics, including vacuum tube data. A clean copy despite the dustjacket blemishes.

5. Cattermole, K.W.
Transistor Circuits
2nd ed., Gordon and Breach, 1964, hbk, G+/-, $15.00

Slight wear and bumping to cover and spine. Inside is immaculate. Although dated, this book describes circuitry such as wide-band neutralized common-base amplifiers that you won't find elsewhere.

6. Chaffee, E. Leon
Theory of Thermionic Vacuum Tubes
McGraw-Hill, 1933, cloth, VG/-, $20.00
Owner's stamp inside FC, inside RC, and on title page. Binding is very clean, having slight bumping to cover corners and spine ends. Pages are slightly yellowed from age. This was one of the earliest textbooks on vacuum tube theory, and one of the most substantial. Chaffee was a renowned expert on the subject of regeneration theory, with to entire chapters being devoted to the subject. A very clean copy of an essential and classic textbook on vacuum tubes.

7. Collin, Robert E.
Field Theory of Guided Waves
McGraw-Hill, 1960, cloth, VG-/-, $25.00
Owner's address label on FFEP, no markings found elsewhere. Binding has very slight wear to cover corners, slight wear to spine ends. This is a very clean copy of one of the most significant textbooks written on the subject of electromagnetic theory as it applies to waveguides.

8. Department of Electrical Engineering
Magnetic Circuits and Transformers
Wiley, 1943, cloth, VG-/-, $20.00
No markings internally. Cover is worn slightly at corners and bottom edges. Spine is slightly worn at end. This is a very clean copy of a highly sought-after reference on magnetism

9. Dow, William G.
Fundamentals of Engineering Electronics
1st ed., Wiley, 1937, hbk, VG-/-, $22.50
Bumping to cover corners and spine ends being the only external blemishes. Owner's name on FFEP, no detected markings inside. A very clean and unspoiled copy of a classic work.

10. Dummer, G.W.A. and H.M. Nordenberg
Fixed and Variable Capacitors
McGraw-Hill, 1960, hbk, VG-/-, $13.50
Owner's name at top of cover, tape over owner's name on FFEP, one instance of underlining (page 108), and minor bumping to spine ends. Overall, a nice copy of this book. And I DO NOT agree with the underlined statement on page 108.

11. Editorial Staff
Radio for the Millions
Popular Science, 1943, cloth, VG-/-, $20.00
A very clean copy of a highly collectible volume containing reprints of articles from Popular Science including regenerative, TRF, and superheterodyne receivers. Also includes interesting applications of radio including a wireless phonograph/microphone. Minot bumping to top

and bottom of spine.

12. Fink, Donald G.
Radar Engineering
McGraw-Hill, 1947, cloth, VG+/-, $12.5
Owner's name on FFEP (crossed out) and title page.No markings to be found internally. Cover is in much better than average condition, very lightly foxed with slight wear to spine ends.This was one of the very first textbooks to be made available on the subject of radar after the close of the second world war.

13. Freeman, J.J.
Principles of Noise
Wiley, 1958, cloth, VG-/-, $15.00
Rare to occasional underlining and notes throughout, owner's name and address on FFEP. Binding is spotless with very minor bumping to spine ends. This book provides a very basic understanding of the principles and characteristics of noise in vacuum tubes, discussing the physical sources of noise as well as two-terminal and four-terminal representations, and the all-important concept of noise figure.

14. Ghirardi, Alfred A.
Radio Physics Course
2nd ed., Murray Hill Books, 1932, cloth, VG-/-, $20.00
No markings anywhere internally. Cover has very slight wear overall, slight bumping to front cover upper corner, slight wear to spine ends, gold leaf on spine faded from handling. This is a very clean copy of a substantial textbook used as a home study course on the principles of electricity and radio, covering all aspects of electricity, electronics, vacuum tubes, radio receivers, television, broadcasting, and a wide range of additional subjects.

15. Gibson, H.L.
Test Equipment for the Radio Amateur
2nd ed., Radio Society of Great Britain, 1978, VG+/VG+, $20.00
Owner's paste-down inside FC, embosed stamp on FFEP, otherwise immaculate inside and out. This is essentially a new copy of a must-have book for radio amateurs, both beginning and advanced, in need of a handy and thorough reference on the usage of test equipment. Errata sheet is included.

16. Glasford, Glenn M.
Fundamentals of Television Engineering
McGraw-Hill, 1955, hbk, VG-/-, $17.50
Owner's name on page ends and some very occasional pencil markings. Cover and spine have very slight wear and bumping to extremities. A nice, relatively clean copy of an early textbook on television system and circuit design, from the camera to the picture tube. Has a nice chapter on wideband amplifiers.

17. Glasgow, R.S.
Principles of Radio Engineering

McGraw-Hill, 1936, cloth, XLIB, G+/-, $10.00
Library pocket and stamp inside FC, library stamp on FFEP and bottom of block, later owner's name on FFEP. Cover and spine have slight wear, most noticeable at top of spine. This textbook covers every aspect of radio transmitters, receivers, modulators, antennas, and radio communication as well as electrical and vacuum tube theory. A very worthy companion to the Terman and Henney books that you already have.

18. Henney, Keith (ed)
Radio Engineering Handbook
3rd ed., McGraw-Hill, 1941, flexible handbook, VG-/-, $15.00
Not a single marking found internally. Cover shows very slight wear around edges, primarily cover corners and spine bottom. This book was one of the most heavily used for instruction during the second world war, and ranks right alongside Terman's similar work. An exceptionally clean copy.

19. Johnson, David E.
Introduction to Filter Theory
Prentice-Hall, 1976, 0-13-483776-2, decorative boards, VG-/-, $15.00
Slight amount of hilighting in first five chapters. Cover is pristine, with no shelfwear to be seen. Without the hilighting, this book would be in near fine condition. A first undergraduate course text in filters, the chapters include approximation, elements of passive synthesis, all-pass filters, Bessel filters, passive synthesis, active filters, and much more.

20. King, Ronold W.P., H.R. Mimno, and A.H. Wing
Transmission Lines, Antennas, and Wave Guides
McGraw-Hill, 1945, VG-/-, $15.00
Owner's name on FFEP. No other blemishes internally other than yellowing of paper edges with age. Slight foxing to cover and spine, moderate wear to spine bottom, bumping to spine top. Spine lettering still bright.

21. Krauss, H.L., C.W. Bostian, and F.H. Raab
Solid State Radio Engineering
Wiley, 1980, cloth, 0-471-03018-X, VG+/-, $45.00
Owner's name on FFEP, otherwise clean internally. Cover and spine have some minor wear from handling, mostly to cover corners and spine ends. This is still considered to be the most thorough textbook on modern HF, VHF, and UHF power amplifier design, and covers everything from Class A to Class S designs. New copies are listed at $105.

22. Lenk, John D.
Handbook of Modern Solid-State Amplifiers
Prentice-Hall, 1974, hbk, VG-/G+, $13,50
Owner's name inside FC, minor bumping to spine ends, but no makings on pages. Dustjacket is slightly worn on spine ends and cover corners. Very clean copy.

23. Lenk, John D.
Handbook of Simplified Solid-State Circuit Design

Prentice-Hall, 1971, 0-13-381731-8, cloth, VG+/VG, $17.50
A highly sought-after reference on solid-state circuit design, this is an exceptionally clean copy, hnaving only minor bumping to spine ends and cover corners, and very slight wear to dustjacket spine ends.

24. Leutz, Charles R.
Modern Radio Reception
Experimenter Information Service, 1925, hbk, G+/-, $25.00
This book has suffered some minor damage by rodents (it came from a barn), consisting of 2" chewed along the front hinge , 3" along the top of the front cover, and 1" along the top of the rear cover. Book would be in VG condition otherwise as there is no other wear and no markings. This highly sought-after collectible is very worthy of restoration, and easily so.

25. Marcus, Abraham and William Marcus
Elements of Radio
4th ed., Prentice-Hall, 1959, decorative cloth, VG-/-, $15.00
No markings internally, slight rubbing over cover and spine with slight bumping to cover corners and spine ends. An exceptionally clean copy of a well known and respected textbook on vacuum tube radio receivers and electronics, with only six pages introducing and discussing the transistor.

26. Martin, Thomas L.
Electronic Circuits
Prentice-Hall, 1955, cloth, VG/-, $13.50
Owner's name on FFEP, otherwise no markings internally. Slight wear to cover and spine, very slight bumping to cover corners and spine ends. This is an extensive book covering of linear amplifiers, primarily with vacuum tubes but with a chapter on transistor circuits as well. Additional chapters on negative resistances, noise, modulators, rectifiers, mixers, magnetic amplifiers, and more. An exceptionally clean copy of a worthwhile reference for vacuum tube circuit designers.

27. Mills, John
Radio Communication Theory and Methods
McGraw-Hill, 1917, flexible handbook, XLIB, G/-, $7.50
Library pastedown inside FC, label of some sort peeled off FFEP, pocket removed from inside RC, errata sheet laid in inside RC. Cover shows moderate wear all around, rear hinge worn through for 3/4 of length, call number applied with white paint to spine, varnish on upper 1/2" of spine, spine bottom worn through. Internally, this book is in good shape, but the cover and spine need some care. A wonderful little book from the very beginning of radio communication.

28. Milnes, A.G.
Semiconductor Devices and Integrated Electronics
Van Nostrand, 1980, hbk, 999 pages, VG+/VG-, $25.00
No markings inside except owner's stamp on FFEP, dust jacket has two tears, spine faded fro exposure to light. An exhaustive reference, this book contains substantial material regarding the state of the art in

semicondcuctors at the beginning of LSI and VLSI. A very clean copy.

29. Molloy, E. and W.E. Pannett (eds.)
Radio and Television Engineers' Reference Book
2nd ed., George Newnes, 1956, cloth, G+/-, $20.00
With the exception of the owner's stamp on the FFEP, there are no makings to be found internally. Cover and soine show cinsiderable wear all around, with front cover corners worn through, a couple of small spots worn through on rear cover, spine top and bottom as well as hinges having moderate wear but not worn through. Coffee cup (?) ring on front cover (my kind of engineer), small wear spot on front cover. This is a very thick book of what must be well over 1,000 pages, hard to tell since each chapter is numbered individually. This book is, for all purposes, the British equivalent of the 4th ed. Of the ITT reference book, but has much, much more in it. An absolute must have for vacuum tube freaks.

30. Motorola
The Semiconductor Data Book
4th ed., Motorola, 1969, VG-/-, $17.50
Clean throughout, upper cover corners slightly frayed, spine and cover lettering faded from handiling and age. A very large reference manual from an era when Motorola was considered a world leader in discrete semiconductor manufacturing, unlike today. This is a large book and will require additional postage for shipping.

Prices are exclusive of shipping costs. Unless stated otherwise, for USPS bookrate shipping add $3.50 for first book and $1.50 for each additional. For USPS Priority shipping add $5.00 for first book and $2.50 for each additional. Canadian and foreign shipping dependent on actual cost. Payment in US$ in advance by cheque or money order. Money orders preferred, cheques accepted from established customers. Books will be held for 14 days after confirmation. All dustjackets are protected with Brodart covers, paperbacks are protected with archival sleeves. Books may be returned within 30 days, with prior approval, if not as described.

269. F.S. Icom 2700H mobile Dual band

Newsgroup: rec.radio.amateur.swap
Date: 2001-03-18 07:29:59 UTC
From: Scott Hilton <n0oba1@home.com>
Message-ID: <XtZs6.439073$ge4.154240059@news2.rdc2.tx.home.com>
Source record: 5996

I have a Icom 2700 mobile in very good condition with the tone decoder board installed. I am the second owner and it's been a base since I have had it for the last 4 months. I would like to trade for a Kenwood 733 or sell for 275 plus shipping. Any questions please email.

Scott

One or more, working or not, or pieces. I've worn out mechanicals on the original, and am looking for a 'parts department'.

Tks!

73, Dave, K3BHJ

271. Wanted: Kenwood SM-220/BS-8

********** Test Equipment -- all functional!! ******

Bird 43 (or similar) RF Wattmeter plug-in elements:
50W, 100-250 MHz -- $40

Data I/O Unipack 2, PROM progamming fixture for 29A/B programmers. $50

DataPulse (Systron Donner) Model 101, 10 MHz Pulse Generator,
10 Hz TO 10 MHz in 6 Ranges, 8.5" x 4" x 11" deep $50

General Radio 758-A 55-400 MHz Wavemeter. Dial in need of severe polishing
but, insides are clean. $30

Heath AW-1 Audio Wattmeter with manual $30.

Heathkit / Zenith ET-3100 Electronic Design Experimenter. Small protoboard
plus 200Hz-20KHz Sine & Squarewave generator, individually variable +/- 15 V
supplies, 30VCT AC source, 1K & 100K undedicated potentiometers. AC Line
powered. $75

Harrison (later HP) 865B 40V .5A Max. Constant Voltage-Constant Current
Laboratory Power Supplies $40 ea $70 pair

Hewlett Packard 461A, 1 KHz - 150 MHz Amplifier,
50 ohm in/out, switchable 20 & 40 dB gain. $100

Hewlett Packard 141T Spectrum Analyzer system including mainframe, 8552B IF
section,
8553B, and 8555A RF sections plus 8443A Tracking generator.
All original knobs, terminators,etc. clean and working fine; no internet
"surprises"!
With manuals (or copies thereof...) for all units. $2200

Kepco Dual PCX 15-1.5 MAT 15 volt 1.5 amp max lab power supply in Kepco
PC-4 cabinet. Individual voltage & current meters (4 total). Ten turn voltage

adjust -- $100

Kepco Dual PCX 40-0.5 MAT 40 volt .5 amp max lab power supply in Kepco
PC-4 cabinet. Individual voltage & current meters (4 total). Ten turn voltage

adjust -- $100

Polarad 1207A Microwave Signal Generator 3.7-8.4 GHz. $100

Pomona #2399 cast Aluminum Boxes (2&#65533;" x 1-1/8" x 7/8" o.d.) w/ gold plated SMA

female connector on each end. New (in factory sealed plastic bag) -- $15 ea

Tektronix P6006 10X Scope Probe (used) $10
P6012 10X Scope Probe (used) $10

********** More Test Equipment **********

Hewlett Packard 204B Opt. 2 Audio Oscillator (transistor), 5Hz to 560KHz in 5 ranges. 5" x 6" x 8" deep.
This is a rechargeable battery unit but, the batteries died and were removed long ago. The batteries would need to be
replaced before operating or the unit could be converted to AC operation by adding a couple capacitors & zeners.
I believe the unit is otherwise complete & functional but, I can't test nor guarantee that!
This is from a friend's estate and it may have been in storage for as long as 25 years.
An original HP manual is included -- $50.

All of the above plus shipping, if necessary, naturally.

274. FS: Coax Connectors & Coax Relays

Newsgroup: rec.radio.amateur.swap
Date: 2001-03-18 18:37:51 UTC
From: marv_e_ads@juno.com
Message-ID: <992v9vcef1@news.netmar.com>
Source record: 5855
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,sci.electronics.equipment,alt.ham-radio.marketplace

******** Used Coax Connectors *************

Andrews Heliax UHF connectors 1/2" 44AP male -- $10 (last one)

UG-643 C Female-Female barrel connectors, $3 ea
UG-637 UHF Male to C Female adapters, $5 ea

UG-259A/U 91836 -- HN female to LC female bulkhead adapter -- $30

6 dB low power pads with N connectors, male on one end, female on the other.
Approx. 1"x1"x3" overall. 3 available $10 ea.

********* New Coax Connectors ***********

UG-1213/U HN Male Cable connector NOS -- $10

Kings KH-39-11 HN Female Cable connector NOS -- $10

Below are all new crimp on connectors, with all hardware, in individual
plastic bags; early-mid 1990's date codes.
I believe that they are all for RG-59 size cable.

Kings Electronics (US made in New York, new home state of ex-President
William Jefferson Clinton)

KC-59-642-M06 BNC Cable Male -- $1 ea

KA-59-385-M06 TNC Cable Male -- $1 ea

KA-19-43 TNC Bulkhead Female -- $1 ea

********* Coax Antenna Relays **********

These all have (3) UHF connectors. They are somewhat old looking on the
outside but,
I popped the inspection port on each and all the contacts are all happy.
And they all go click upon application of the appropriate voltage.

Dow-Key DK-60 style
110-115 VAC coil -- $30

Advance (same style but, heavier contacts & construction)
115 VAC coil -- $30

All of the above plus shipping, if necessary, naturally.

****** VACUUM CAPACITORS & other Vacuum things **********

Jennings Vacuum Variables -- all used (or at least aged)

UCS-300-15S 300pF 15KV $250 with standard puller, later manufacture (blue)

UCSL-750 750pF 3KV $150 with standard puller
UCSL-1000 1000pF 3KV $150 with standard puller

R1G SPST 20KV 20Amp Vacuum Switch $100

---------Fixed vacuum caps----------

Jennings VC-12 12pF 20KV $25
Jennings 50pF 86KV $86
Western Elec 100pF 5KV $50 (This one hi-pot checked @ 14KV)

--------- Vacuum Relays -----------

Old "T" style vacuum relays for sale, where the coil slips over one leg
of the glass enclosed contact assembly -- One of the contacts has a Penta
Labs
part number: 420 53 3875. The coils are 28V. $10 ea

Struthers Dunn Type 78CCA109 "Keying Relay" which consists of a vacuum
relay mounted on top of a small (2"x3"x4") metal enclosure. There is a
15 pin Jones connector on the side of the box. I believe that there are
some auxiliary contacts in the box in addition to the vacuum relay.
This is also a 28V unit. $15

********** Air Variable Capacitors ********

Hammarlund NZ-10 Neutralizing capacitors, shiny NOS, $25 pair

Johnson 154-506 Dual 153pF 3KV air variable used, good ¼" shaft, $20ea (2
available)

Johnson D Series Dual 200pF .080 air spacing about 4"x4"x8" overall, ¼" shaft
$20

G.I. Corp 70 pF, .080" air spacing, about 3.5"x3.5"x3" overall, ¼" shaft $2ea
(2 available)

Cardwell 400pF, .045" air spacing, about 4"x4"x3" overall (plates open) ¼"
shaft. $5ea (2 available)

All of the above plus shipping, if necessary, naturally.

******** Roller Coils **********

B&W 3853 72 uH NOS but, a mite tarnished from age. $60

Johnson 229-202 18uH used good, $50

La Pointe L-0201 406-1 (identical to a Johnson 229-201) 10 uH. used good, $30

********* B&W Air Dux coils *********

These are all shiny NOS, 10" lengths, unless noted otherwise

#2408T 3" dia, 8TPI, #14 wire -- $30

#2008T 2.5" dia, 8TPI, #14 wire -- $30
#2006T 2.5" dia, 6TPI, #12 wire -- $30
#2008-31 2.5"dia x 4" long , 8TPI, #14 wire with 2 turn #14 link at center.
NIB $25

#1604T 2" dia, 4TPI, #12 wire, slight tarnish $20

#1208T 1.5" dia, 6TPI, #12 wire, slight tarnish $20
#1216T 1.5" dia, 16TPI, #16 wire, somewhat tarnished $20

#1006T 1.25" dia, 6TPI, #14 wire, somewhat tarnished $15

and a couple of miniductors (lighter construction)

#3035 3" dia, 10TPI, #16 wire, slight tarnish -- $25
#3029 2.5" dia, 6TPI, #12 wire, used somewhat tarnished but, no turns
soldered $20

and a couple of Illumintronic Engineering parts

375 7367-P1 -- 1.5" dia.x 5.75" winding w/ indented turns, 14 TPI, #17, 7"
overall
including plastic center support, un-used somewhat tarnished $25

980-0121-000 -- 2.5" dia. x 7.5" winding w/ indented turns, 8 TPI, #14, 9.5"
overall
including plastic center support, used somewhat tarnished but, no turns
soldered $30

All of the above plus shipping, if necessary, naturally.

********** MICROWAVE **********

Micromega 28450-1265 Solid State sources.
I believe that these are on 12.65 GHz and can be tuned but,
I don't know how far. And these are also phase lockable but,
I don't know the reference frequency input. WR-75 output flange.
Terminals are marked. $50 ea

Hughes M-band balanced mixer assemblies which have WR-75 flanges
on the RF & Oscillator inputs and wire terminals on the IF outputs. $30 ea

Avantek SD7-0738N GaAs Fet Preamp. 3.7-4.2 Ghz WR-229 input flange.
N output connector. 4 pin AN type power connector -- pin assignments
noted on label. $50

Rantec FU-301 Filter? or Delay Line?? at some GHz ...I don't know.
N connectors -- 7 3/4" x 3 3/4" x 1" overall. $10

Display (or paperweight) Traveling Wave Tube. The tube was cut in half and
encased in clear resin. 15" x 4" x 1.5" thick. There are some scratches on
the resin surface which I think could be buffed out. $50

And a similar display piece of just the cathode assembly from a
larger Traveling Wave Tube. 3.5" x3.5" x 1.25" thick $25

Hewlett Packard 930A Switch WR-90 X - band $30
Note: this is a waveguide part

WR75 terminations $3 ea

IMPATT Diodes -- NOS individually packaged with test data
NEC ND8P15-5H-C 1W @ 14.8 GHz $75 ea
NEC ND8V12TU 2.5W @ 12.6 GHz $100 (one only)
Loral GC-5831E 300mw @ 12.5 Ghz $40 ea

Microwave Mixer Diodes (I think!) -- NOS in original capsule packaging
Sylvania D5163 4 pcs $40 all

All of the above plus shipping, if necessary, naturally.

********** MISCELLANEOUS **********

Teaberry model TB 6503 HF SWR / Power meter. 100W / 10W ranges FWD & REF
power plus SWR. UHF connectors. $10

Homebrew 435 MHz power splitter with (3) N connectors. This made out of
brass
sheet stock and is about 15" long by 1" square. $10

Late '70's vintage likely Military, probably airborne, VHF power amplifier
assembly. It consists of 7 almost identical amplifier assemblies clustered
around a
central housing that has splitter combiner networks which are plugged
onto each end with a bunch of SMB connectors. There are TNC's for the
main in's & outs. I think it was originally configured as one amp,
driving two, driving four boards. The complete assembly measures 7.5" x 5"
x 3.5" overall -- the individual RF amp boards are 4.5" by 2". The outer
covers
are mostly missing. Each amplifier is a push pull design -- they appear to
be
50 ohm in & out impedance with either PT6747 or PT6702 TRW transistors. I
would
guess this unit operates on 28VDC. I don't know what frequency range it
covers nor the power level though, just guessing, it probably puts out at
least 100W. And there is no manufacturer name -- probably went with
the outer cover. Six of the stages are marked OK and one, the input
stage I think, is marked NO Good. The individual amps have integral heat sink
plates so, they could be
removed from the assembly and used separately. $70

Heavily built RF Attenuator, adjustable between 0-50dB in 10dB steps. 8"
flying leads w/
one terminated in a BNC Bulkhead female and the other with an N Male
connector. Looks like it should be good to at least 1 GHz. 3 1/2" diameter
by 4" deep overall
and weighs about 4 pounds each. There are tapped holes in the front frame
for
panel mounting. No manufacturer is indicated. A 3/8" shaft adjusts by pulling
(with a
spring return) and turning so there is no chance of inadvertent resetting.
No knob
nor dial is included. $25

Red & Black Five Way Binding Posts -- NOS, look like HH Smith 459, requires
1/2" mounting hole up and

will fit up to 3/8" thick panel. $1/ pair (one ea red & black)

Large Silver Plated 6uH (calculated) coil -- 12 turns of 3/8" diameter copper tubing,
4" diameter x 9" long overall. The ends are factory finished into flat tabs w/ 3/16"
mounting holes. The silver is tarnished over about 1/2 its surface from age. $30

200W (or so -- 10" long) 1500 ohm 10 tap (every 150 ohms) power resistors -- used good, $10 ea

Ohmite 100 ohm 225 W resistors (10" long) used good, $8 ea

10 Meg meter resistor assembly used to measure 10KV with a 1mA meter movement.
It consists of 2 large, 10" long, 5 Meg resistors mounted in a nicely made 12" x7" x 2" plexiglass housing. $10

Drake TR4 (probably fits the 3 also) factory made DC power cable (10 pin Jones to 12 pin Jones) - used good $10

Lambda FBH-24 Hybrid Regulators NOS -- $10 ea

Motorola 4-pin Microphone connectors 28-16730 or Amphenol 01-MC4M -- NIB $5ea

Motorola 0180700T14, 4-wire coily cord mike cable assembly with a mike connector as above on one
end and a spring strain relief on the other. There are some flat pins on the free wire ends -- NIB $15

Powerstat Type 10 120V 1.25 A variable transformer (variac) used, no knob or dial -- $15
Type 10B 120V 1.75 A variable transformer (variac) used, with dial, no knob -- $20
Later 10B 120V 2.25 A variable transformer (variac) used, with dial, no knob -- $25
Later 10B 120V 2.25 A variable transformer (variac) NOS, with dial, no knob -- $30

Switchcraft 4PDT lever switches (#160012L) NIB/NOS -- $3ea
Three pos., 2 form C momentary (#130312) NOS -- $2ea

Mossmann 3PDT lever switch (4803Z1P2) NOS -- $2

A couple old RF chokes:
#22 enameled wire space wound 24 TPI for 2.75 on a 1" diameter grooved fiberglass form 5" overall -- $10
#27 (green enameled) wire wound 40 TPI for 4.3" on a 3/4" diameter ceramic form which steps to a 1.3" diameter base tapped for two 6-32 screws, 5.5" long overall. Looks like winding has been cleanly spliced, twice -- $15

6 dB low power pads with N connectors, male on one end, female on the other.
Approx. 1"x1"x3" overall. 3 available $10 ea.

Pomona #2399 cast Aluminum Boxes (2" x 1-1/8" x 7/8" o.d.) w/ gold plated SMA

female connector on each end. New (in factory sealed plastic bag) -- $15 ea

Sarkes-Tarzian Model 78D center-tapped Selenium Rectifiers. NOS! $5ea

TIP34A 10A 60V TO-218 PNP Power Transistors, Motorola NOS. 4/$1

General Electric WW2 vintage (has that BC-375 look) 6 position RF switch.
Very solid detents! Used, excellent. $10

Filter Cap Assemblies: Eight 80 uF/450V axial electrolytics mounted to a 5"x8"
fiberglass
PCB -- these are currently wired sort of series-parallel but, could be
reconfigured by
cutting & jumping a couple PC traces. $20 ea. (2 available)

GE rectifiers, 100A, 200PIV, 1N3289, DO-8 large stud package. These look like
NOS --
(It doesn't appear that the anode leads have ever been bolted to anything.)
4 pieces -- $30 all

Motorola rectifiers, 50A, 100PIV, plate mounted. 2ea MR1201FL & MR1201FLR (a
bridge worth)-- NOS $10

Westinghouse 6-1-1B/1N1188 3 Phase 600V 35 Amp rectifier assembly
with heatsink. Unused but, tarnished from long storage $10.

Fuse assortment, still in the original Littlefuse or Buss boxes of 5.
Including:
1/100 A
1/8 A
.175 A
1/4 A
1/2 A
3/4 A
1 A
2 A
3 A
5 A
10 A
20 A
30 A

Plus a few inbetween values. Most are 3AG, some are slow blow.
30 boxes total -- $30

***** Mechanical Things & tools *****

Sanyo-Denki 103-775-0611 Stepper Motors -- 1/4" dia. shaft extends about 3/4"
out each end.
Outer Case is about 2.2" round, with a square flange on one end, by 1.5" deep.

1.8Deg (200 step/rev) 2.25V, 1.25A, 8 lead configuration presently wired as 4 lead units
(I think the coils are wired in series for bi-directional drive) to "Molex" connectors.
RFE 10 pieces, $100 all

NOS fan that fits some Japanese radio...marked: 57 10.01 100V
The wires from the motor are about 4' long and are terminated in a 2 pin JST connector.
The impeller has 8 blades and is 7 cm in diameter.
It is mounted to a U shaped metal frame with four mounting holes spaced 5cm by 9cm
$10

Craftsman 335.25926 "Drill Press" -- adapts a 1/4" electric drill (not included)
to function as a small drill press. Used, but not much! $20

All of the above plus shipping, if necessary, naturally.

283. Wanted R4C...Swap Collins KWM-2 or 75S1 for R4C

Newsgroup: rec.radio.amateur.swap
Date: 2001-03-18 23:58:54 UTC
From: 2w8ji@akorn.net
Message-ID: <3ab549b0.306542474@news.accessunited.com>
Source record: 5860
Cross-posted to: rec.radio.amateur.swap,rec.radio.amateur.equipment

I'm looking for R4C's, non-working models OK as long as PTO is good.
Prefer 250 Hz and 500Hz optional filters.

Any S/N, even the ones with the MOSFET mixer, are OK since I gut the
mixers out anyway.

I have a 75S1 and a KWM-2, in pretty good shape, I'll trade for EQUAL
value Drake gear. And no..... I won't swap even up for a non-working
junk R4C.

Drop the 2 from my e-mail.

73 Tom W8JI

I have 5 NOS 826 tubes and 3 NOS 829b tubes. These are the military versions. Question is what equipment did the 826 go in?

288. FS:UNIDEN BC-9000XLT $250.00

Newsgroup: rec.radio.amateur.swap
Date: 2001-03-20 15:43:11 UTC
From: Lustre1@webtv.net
Message-ID: <3454-3AB77A8F-90@storefull-238.iap.bryant.webtv.net>
Source record: 5865

The Uniden Bearcat BC-9000XLT is a scanner offering great frequency coverage. This models covers virtually every frequency from 25 MHz to 1300 MHz (less cellular, although clear images are between 360~385MHz!). It receives military frequencies not found on most other scanners. You get 500 channels organized in 20 banks of 25 channels each. A VFO control (manual tuning knob) enables fast selection of memories or frequencies. TurboScan allows you to scan up to 100 channels per second and TurboSearch lets you select either 100 or 300 steps per second when searching VHF frequencies. The automatic store feature searches out active frequencies and automatically stores them for you in an available memory location.
Selectable mode allows you to change the default receiving mode (AM, FM-wide or FM-narrow) to hear all the action. You can also change the default step sizes!
Advanced features include: Two Line Alpha LCD, allows you to label your frequencies, i.e.; "Detroit Police", Delay Key (2 seconds), Channel Lockout, Data Skip (the scanner skips over non-voice channels), Backlight Dimmer, High Cut Audio Filter and tape recorder activation.
External jacks include: BNC antenna, external speaker, line out, aux jack and DC power. The BC9000XLT comes with: AC adapter, telescopic antenna and Owner's Manual. Size: 10.5x3.5x7.375 inches. Frequencies: 25-550 MHz,
760-824 MHz, 849-869 MHz, 894-1300 MHz!
Includes Uniden's optional CTCSS tone decoder board, installed!!! Like new condition, complete with A.C. Power Pack, Antenna, Original Box, User Manual, etc.
Note: This scanner has been discontinued by Uniden, and to the best of my knowledge, distributors stocks have been depleted. $250.00, including shipping within U.S., lower 48 states. John English

********** Neon Lamps **********

Type Quantity

NE-2 About 100 NOS
NE-2D 8
NE-15 1
NE-16 15
NE-17 3
NE-20 2
NE-32 6 Big
NE-42 3 Real Big
NE-45 12
NE-48 5
NE-51 22
NE-79 1
CM-81A 3

& an OSRAM N32 marked 380V
plus a couple other screw-in types on which I can't read the numbers

These are a mix of new and used, mostly made by GE, though I saw a few Westinghouse and RCA while I was making the list -- they probably average 40 years old and most of the bases are somewhat tarnished from age. I lit up a couple of the larger ones and they seem to work ok -- a transistor curve tracer works great to test these.

If anyone would like the whole bunch, I'll take $75 for them all.

Plus shipping, if necessary, naturally.

The best deal going these days is the RFP branded tube from RF Parts. They're made in China, but tested and guaranteed. At this stage of the game a new Eimac is overpriced, the French tubes require more drive, and the odd labelled Chinese tubes, from the same factory as RFP, often are below standard.

Eimac hasn't made 3-500's or other glass tubes for years. Triton
bought the old tooling from Eimac.

>the French tubes require more drive,

The Amperex 3-500s (French tubes) require the same drive as the Eimac
tubes did. They are more reliable than the Chinese tubes.

>the odd labelled Chinese tubes, from the same factory as RFP, often are
>below standard.

I haven't seen a relable Chinese 3-500Z yet, and I see hundreds of
them a year.

The Amperex tubes are somewhat troublesome with filament-grid shorts,
but are still much more relaible than the best Chinese tubes.

Ameritron sells new tubes at good prices.

I am at my wits end with this problem....please help.

I have a 1988 Toyota Camry that causes interference to my 2 meter radio and scanners. I'm not sure what is causing it because the scanner gets a whining noise even when it operates on its own power and using the rubber duckie. This tells me that it's RFI. The 2 meter radio gets it even worse since its hooked to the cars electrical system. It gets alternator whine and some other kind of RFI interference. I thought it was my older Kenwood mobile but I just upgraded to a newer mobile and still get the interference....maybe even worse. Its so bad that unless I have a S-7 or better signal on you, I can't hear you. It actually cuts the signal out as if someone were keying over them. I hate talking on repeaters so I don't have the luxury of full scale signals. We try to stay on simplex unless its a must to go to the repeater.

I have read several web pages and first things to try is this:
New (better) Plug wires.
Plugs!
Check the Distributor for cracks or abnormal wear.
****

I have already ran power wires straight to the battery.
Tried Ferrite coils on the Power leads and antenna coax.
I read that Toyotas are bad about having a noisy fuel pump?!?! Any experiences?
I know there has to be others with the answer to this problem......please help if you know the answer.

Dan I also have a 88 Toy, I had the same thing here, I went to Radio shack and bought the largest noise filter that they had amp wise. (Choke type) and put it in the power lead at the radio. Fixed 90% + ! I have now put in a new radio, the kenwood 700 and it works fine with that too. (There is still some kind of noise that I don't hear or see on the meter that blocks out some if not most of aprs when the car is running. If I am where there is STRONG aprs it works OK.)

Not specifically. Just make sure you use a good braided ground strap
from the chassis directly to ground and wire the power directly to the
battery and you should be ok.

Jerry

If you are going to use it on the higher HF bands, a simple whip is ok. On the lower bands, it will load, if you use a SGC-230 type tuner. If you try a cheaper tuner, such as a LDG, it probably won't. Too much inductance needed. Even if you do manage to match the whip, the radiation efficiency will be unacepptably low. Trust me: get a loaded whip of some sort. SGC uses one that has a self resonance point around 14 MHz. That loads from 80-10 meters. Jim

jhilins,
I have no idea if the Jeep is more susceptible to RF than
other vehicles, but I'll offer this. Route all cables as far
from the 'computer' as possible. Do NOT use braid as a ground
strap, it will deteriorate in weather. Instead, use a copper
strap such as the flashing used around roofs. And make the
best mechanincal connection you can. Most problems with mobile
antennas usually come back to grounding.
The standard steel whip, or SGC's whip are useless on the
lower HF bands. They ~will~ load, but no one will hear you.
If your going to use 80 and 40 meters, invest in some kind of
loaded antenna, otherwise you will be a very frustrated camper.
'Doc
PS - Also, invest in a 5 gallon bucket of torroids...

Doc, I've been using braid for grounding straps for 35 years... no problems.

I occasionally set my TS850 in the seat next to me and use
a Hustler antenna on 20 meters...no special wiring...just ran
the power from the 850 directly to the battery...use RG58
to the antenna mounted on the rear bumber...has worked
fine, little or no ignition noise from a 97 TJ.

Doc,

It amazes me that the tuner/whip combinations garner any sales at all. Of course, it is just MHO, BUT that opinion is based on many years of HF mobile study, installation, and mistakes. In some cases, a hamstick will outperform those things--and a hamstick is just about the worst thing on the lower bands. I wouldn't waste my time, nor my hard earned cash, on those things.

It is an unfortunate thing that some people *really* believe that a "tuner" actually "tunes" an antenna. I had such a conversation with a supposedly knowledgable Extra class last week! When I pointed out that tuners don't "tune" the antenna, he confidently assured me that a certain brand of "tuner" both (quote) "physically and electrically" tune the whip! PHOOEY! I hear sub-standard mobiles on the air all the time. They are often down in the mud, unreadable, or just not even *there*. Yet their owners swear by the "great" performance their tuner/whip combo is giving, how "good" their hamstick (dummy load on a stick) is, and my question is always: Compared to WHAT? Put 'em in field trials, run field strength tests against bugcatchers and screwdrivers. See the superior field strength of competitive, high Q, RESONANT antennas--it'll make ya sick! I guarantee your tuner/whip or hamstick will get MASHED in a field trial.

Now, having thrown off on the tuners, etc, let me say this: Certainly, there are times when it is not feasible to use higher efficiency antennas. The spouse threatens bodily harm if you drill holes in the new car, or there is no way to attach a big antenna. You do what you have to with what you can. And that is understandable. But if you are out for the best signal you can obtain, it takes a BIG, UGLY antenna to do the job.

Jeez Jerry, you're confusing the heck out of me.

Didn't you say a couple of weeks ago when someone asked about wiring a CB to: wire the hot side to the battery and the neg side to a nearby bare metal groud?

I had thought of wiring my CB direct to the battery (pos & neg, both fused) and then had second thoughts after reading that post of yours.

Now I've interpretted your post below to say pos and neg to battery.

No, the braided (or whatever) ground strap I was referring to goes between the radio's chassis and the Jeep body or chassis. It's just that a braided ground strap provides not only a good DC ground, but a good RF ground too. The positive side still goes to directly to the battery through an inline fuse. The rule-of-thumb is that the ground wire should go to the closest possible electrical ground. The ground wire can either be the black wire, or simply a ground-wire (or braided ground wire) connected between the radio's chassis (like a cabinet screw) and the Jeep's body or chassis. HTH!

Hello, go with a screwdriver antenna, it does not need a tuner...its big, its ugly, but it beats everything else, that I've tried. Hamsticks work soso above 40m, but for 75 go with the screwdriver. Ground the rig to nearest chassis ground, just grounding thru the coax shield is not good enough. It will work some without it but will work better with chassis ground. I've used a 706 for a couple of years and have learned the importance of good grounds and good antennas. On the bugcatcher, they work fine, but everytime you want to change frequency you have to stop and move the jumper. Hope this helps...AL

********** Homebrew Radio things ******************

Many hams build things with a large investment in time & parts that are worth far less... later. Here are some items from the estate stuff I've been selling that fit that description -- priced accordingly.

Unless noted, most of the items below are built on PCB material and most of the enclosures are made by soldering pieces of PCB material into a box -- not all sides may be present! Batteries not included! A few of these devices come with schematics, mostly not. The wiring is all open enough that you can generally see what is going on.

Battery drainer -- LM317K (TO-3) plus a pot wired as a current sink to drain batteries -- 4" x 3" x 1.5" -- $2

PL Tone generator -- Wein Bridge Oscillator powered by two 9 volt batteries. - $3

Fully populated 2.5" x 5.5" homebrew PCB w/ two 1496 balanced mixers, a couple slug tuned coils, plus a CA3001-- I only see power connections; Don't know what this does! $4

Touch Tone Encoder -- Western Electric Touch Tone Dial mounted in a 4"x4"x2" metal enclosure with power switch. Has a 4 pin DIN connector plus matching cable terminated in a 1/8" mini plug. $5

Two Tone generator -- Two Wein Bridge Oscillators powered by two 9 volt batteries on perf board. - $5

Some kind of test oscillator with a 556, two pots with anodized gold (colored) knobs, pwr. sw.. LED,. & Banana jack outputs -- $5

435 MHz power splitter with (3) N connectors. This made out of brass sheet stock and is about 15" long by 1" square. $10

Varactor multiplier (unfinished) -- looks like it's designed for 144 to 440. Built in a 3.5" x 2" x 7/8" extruded aluminum case -- top plate missing. Silver plated coils, Johnson 189-6-4 caps. It think it is complete execpt for the input and output leads. $10

VLF Up converter -- Converts 30KHz - 530KHz up to the 3MHz Range -- 6" x 4.5" x 1.25", requires external +12V -- $10

Some kind of VHF thing just started. Pomona 4"x2.5"x1.5" cast box with a couple 160-104 capacitors, BNC connectors, a miniature 50K bourns pot., 6 capacitors mounted to gold plated terminals with a very pretty gold flashed internal shield structure. Nothing is soldered -- this was just started.

$10

Antenna Noise bridge? -- Pot & Cap plus 4 transistor circuit mounted in a 5" x 4" x 2" enclosure. BNC connectors marked ANT & RX. Pwr SW. & Led Powered by a single 9 volt battery. - $10

Two Meter to 24-28 MHz receiving converter (I think!) -- 5" x 4" x 1.75" -- $12

A VHF thing -- Two trombone lines adjustable between 4-6" with a transistor connected between them plus a Phasotron 50 ua 2" round meter on a BNC cable with a small loop w/a diode. -- $12

Active Field Strength Meter -- Schematic per 1985 ARRL Handbook p 39-10. Built in a 5" x 4" x 3" black crackle finish metal case with a Simpson Model 29, 4" meter, covering the entire front of the box. -- $15

144-148 MHz to 24-28 MHz Transverter -- 5" x4" x 4" overall -- 2N3866 Output transistor, probably runs about a watt on transmit. Barrier strip for power (12V?) and an 8 pin Japanese style Mike connector for ?. Transmit & receive sections are each 5" x4" x 2" and only interconnected with a few wires -- $30

All of the above plus shipping, if necessary, naturally.

FT-101 service manual -- not quite complete copy
though I think it has all the "real" service info, plus
a dozen or so FT newsletters (copies) (1974-76) $30

FT-101E / FT101 ES (in Japanese) $10

********** Old Radio Books & Catalogs **********

RCA HB-3 Tube Handbook
Loose leaf 6 ring binder style data sheets starting in the late '40's with
additions and
updates through October 1966. Sepatate sections cover Transmitting Tubes,
Receiving Tubes (Part 1 & 2),
Industrial receiving tubes, Photosensitive devices, Thyratons & such, CRT's &
Picture tubes,
Miscellaneous types, & semiconductors. The updates appear to have been made

in all
these sections except Picture Tubes which is somewhat disorganized. It also appears that the
obsolete data sheets were kept for reference. The whole collection is about 30" wide on a shelf.
Shipping weight will be 20 lbs. Excellent condition; mostly never read! One gotcha - No binders. $250

Heathkit Catalogs
1954, 55, 56, 57, 58, 59 &
Fall-Winter '62-63,
Xmas '89 + Winter & Spring '90 $100 all

Handbook of PREFERED CIRCUITS
Navy Aeronautical Electronic Equipment
vols. 1&2 (1955 tubes & 1962 transistors)
very good condtion $40

Most Often Needed 1926-1938 Radio Diagrams, originally published by Supreme Publications 1941. This is a REPRINT, by Vintage Radio.
240 pages, solid schematics! Like new, $50

RCA TT-3 Air-Cooled Transmitting Tubes 1938 copyright
overall good condition w/slight damage at top & bottom of
spine & first 20 pages of lower right corner. 192 pages -- $30

Radio Supply Company catalog 1934 (they used to be in downtown Los Angeles) -- a little smudging on the back cover and two middle pages torn on the edge but, otherwise in fine condition. There is a sticker from the (original?)
owner on the first inside page. 85 pages, the last 10 or so of which are receiving and transmitter tube data from the era. $20

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet
Excellent condition 20 pages or so $10

Elin company overview book 1932
very good condition except cover is almost loose
Text is in GERMAN. Lots of photographs of electrical equipment,
tools, machinery, and construction projects.
128 pages $10

Radio Doings Call Book Spring 1931 edition
cover taped at spine, otherwise very good
50 pages $15

Radio Doings Vol 15, #1 June 1929 edition
cover, first two & last two sheets missing otherwise o.k.
pages 5-62 remain $10

Official Radio Service Manual 1930, originally published by Gernsback Publications. This is a REPRINT by Vestal Press, 1984. Schematics &
some service info. 352 pages, like new $60.

Plus shipping, if necessary, naturally.

Three 5CM diameter knobs that look like they are from a Kenwood TS-830 (main tuning knob) or similar
One is "stock", one has been filled in back with shot to give it some heft, and the third is the spinner version. These are used with just a few minor blemishes visible in the aluminum disks; the plastic part looks fine.
Asking $30 for all three.

Plus shipping, if necessary, naturally.

I have a Ten Tec Scout 555 with all band modules & 937 power supply forsale.
Asking $450.00 Shipped CONUS. others pay actual shipping . Great little rig
, Works great , apperance would say was an 8 some wear on lettering &
minor marks. One modification so that power output can be adjusted from 2.5
to 50 watts. This is easily removed and returned to original if you desire.
Has noise Blanker installed.
Would consider partial trade of MFJ 9030 / OHR 100A (30m) rig or similar.

Please contact me off List at elbc@pivot.net
Pictures can be emailed if desired.

Have a need for a Motorola TRN4963A for a 82 vintage Micom S HF radio.

Schaumburg is out, no more to be had.

Building one is an option, but finding one out yonder is much easier :)

Reply e-mail, but not to the return on this message.

Ladies and Gentlemen, I am considering putting up for sale or trade; a Motorola Radius P110 UHF radio. Right now the radio is in the 450 area but has capabilities from the 430-470 Mhz range. It has, technically 8 channels, but the 8th,right now, is set up to scan whichever channels you program it to scan. It has a brand new battery and 90 minute charger. Im probably wasting my time by adding this, but it also comes with the UHF antenna and the lapel speaker/mike. For me to say that I know how much this radio is worth would be for me to lie to all of you kind people, but as it has been explained to me it is worth several hundred dollars. Exactly how much baffles me but if you bring me the right trade- I will be more than happy to trade or sale. Its in like new condition, I cleaned almost all of the blood and bodily fluids out of it. Just kidding, but it used to be an EMS/ Law Enforcement radio, but was taken out of service when the officer had to take a leave of absence due to a medical condition.

From: WD9IFW <5406285@127.0.0.1>
Message-ID: <3ac70cca$1@feed.binaries.net>
Source record: 5930

Looking to trade a Icom IC-746, SM-20 desk mic & CT-17 computer
interface (Never used) for a Icom IC-706 MK II G with the seperation
kit. The 746 and mic are about 9.5 on a scale of 10. Pictures provided
by email if you would like. The 706 should be mint to very good
condition. On air evaluation of 746 available.
The only stipulation on the trade is that I would be able to test 706 for
1 to 2 days before shipping 746. Been had on trades before and won't
trade "DOWN" to a bad rig again. If this isn't agreeable, please don't
bother emailing back.
BTW I also have original box for 746 and it has never been mobile.

TNX & 73's. Jack Lovell. WD9IFW

358. FOR SALE: Motorola MT-1000 / HT-600 MOBILE DECKS

Newsgroup: rec.radio.amateur.swap
Date: 2001-04-05 21:29:14 UTC
From: Larry Braden <lbraden@home.com>
Message-ID: <20010405.212544.1928063036.11981@lodgepole.braden.org>
Source record: 5935
Cross-posted to: rec.radio.amateur.swap,rec.radio.amateur.equipment,rec.radio.swap

20 ea. - NTN5612A - MVA mobile decks for either HT-600 or MT-1000
Motorola radios. Provides audio, PTT, mike audio out,
discriminator audio output thru a 25 pin "D" connector on the back.

This unit *powers and recharges* your radio from your vehicle. Radio pops
out for handheld use There is also a "telephone-type" modular connector on the
left side for a mike if you don't won't to go through the 25-pin "D" connector.

The release button is a standard keyed lock, so keys should
be available at the locksmith. No mounting hardware is included, but a U
shaped aluminum hanger should be easy to fabricate from stock at your
local hardware store I also provide pinout assignments sheet to help you
avoid the info hunt. $35.00 ea. +shipping

Heavy-duty Motorola HMN1035A Microphone with the modular "telephone"
modular connector is $15.00 +shipping

See the pics at:

http://members.home.net/lbraden/main.htm

These used "portacomm" units are being sold AS-IS and priced for quick
sale. New ones cost slightly over $400.00 apiece, so this is an
excellent deal for MT1000 and HT600 owners. Send me an email to reserve
one for you and to email you appropriate USPS shipping cost to add to
order.

Thanks,

Larry Braden KC5CWG lbraden@home.com

The "PEANUT WHISTLE TWO" 40 meter QRP CW transmitter! Plenty in stock!
Great to take along to Dayton! Just team it up with your little portable
general coverage receiver. (i.e. Sangean 909, RS DX-398, Grundig YB-400,
Sony 7600G, etc.) A steal at only $19.95!

372. WTB: Quartz Crystals

Newsgroup: rec.radio.amateur.swap
Date: 2001-04-11 19:38:39 UTC
From: rhebert <rexheb@NOSPAMbellsouth.net>
Message-ID: <3p2B6.99653$r55.6395629@news5.aus1.giganews.com>
Source record: 5949

Hello guys,

I've got an RCA WR-50B RF Generator w/ IF Sweep
that says it can use a crystal plugged into its front panel
socket to generate a marker during sweep

The oscillator circuit is described in the manual as a
parallel-resonant Pierce design with 32pF loading

I'm trying to locate 1 each of these crystals
(I've included the old RCA part numbers incase they are of any use)

100 KHz ... RCA PN: 11C100
455 KHz ... RCA PN: 11C101
1.0 MHz ... RCA PN: 11C102
4.5 MHz ... RCA PN: 214796
10 MHz ... RCA PN: 11C103
10.7 MHz ... RCA PN: 11C104

Base: HC-6U or HC-13 maybe
pin diameter: 0.05"
pin spacing: 0.486"
--- tell me what case style you have - I'll adapt for it ---

If anyone has any of these or equivalents for sale
or can help me locate them, please contact me

Thanks

Rex Hebert WD5FVZ
Lafayette, Louisiana

I think I'm interested in purchasing a WBL V22 paddle. Must be in excellent working and cosmetic condx. .

I don't have a good handle on current prices of these paddles. Any thoughts would also be appreciated from someone who has bought or sold one recently.

PLEASE REPLY VIA PRIVATE EMAIL, not on the newsgroup.

Thanks... Ed, W5EJ

Starting price: $88

NO RESERVE!!!!

Yaesu FT-470

Compact Dual Band 2m/70cm FM Transceiver

a.. Four VFOs & 42 Memories

b.. High Performance Scanner

c.. Built In 10 Memory DTMF Autodialer

d.. CTCSS Features

This equipment was used by my son and now is mine. I am a ham but don't know much about it. It is about 1990-91 vintage I think. Included is the following: I have the MANUAL, a BRAND NEW FNB-11 12v 600mAh battery bought on 3/11/2001 from Batteries America ($30 alone!) and MADE for this radio. The radio is cosmetically in good condition. I have a MODIFICATION sheet I will ship with it but the MODS have NOT been made! (MARS mod, extended reception etc) A schematic diagram is INCLUDED with the manual!

393. WTB Software Manual

397. FS: Old Radio Knobs

Newsgroup: rec.radio.amateur.swap
Date: 2001-04-17 02:50:14 UTC
From: marv_e_ads@juno.com
Message-ID: <9bgb16$rt4$1@news.netmar.com>
Source record: 5826
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

********** Knobs **********

These are all used, most have set screws, with nothing worse than minor scuffs
and smudges and fit 1/4" shafts, unless noted.

Dakaware
1-1/16" Knurled Knob -- $4
1-1/16" Knurled Knob w/ 1.5" skirt w/ white indicator line -- $7ea
1-1/16" Knurled Knob w/ 2" skirt marked 0-10 -- $10
1-5/8" Knurled Knob w/ 2-1/16" skirt & unfilled indicator line -- $10
2-3/8" Knurled Knob w/ white vinyl pointer at skirt level -- $15 ea
2-3/8" Knurled Knob w/ 3" skirt & unfilled indicator line -- $15
2-1/16" skirt only -- $5

Short (1-3/16")pointer knob w/ white indicator line $2 ea
Long (2") pointer knob w/ white indicator line $3

Harry Davies
#1206 1-3/8" knobs -- $5 ea
Short (1-3/16")pointer knob unfilled indicator line -- Not sure if this is
Davies... There are a box of these -- $1 ea

Hewlett Packard (70's vintage)1-5/8" spinner knob w/ 3/8" bushing -- $10

Kurz-Kasch
#308 1-1/8" knob -- $5
#308 1-1/8" knob w/ 1-3/4" brite metal skirt with 100 graduations and tens
indicated in black -- $10
#309 1-5/8" knob w/ metal spinner and 2-1/4" black metal skirt with 100
graduations and tens indicated in white -- $15
#309? (may not be KK) 1-5/8" knob w/ plastic spinner and 2-1/4" metal skirt
with 100 graduations and tens indicated -- $15

#310 2-3/8" knob -- hub drilled out to 3/8" -- $10
#310 2-3/8" knob w/metal spinner shaft -- $15 ea
#311 2-1/16" skirted knob (some of the white lines are need refilling on
these) -- $10 ea
#380 1.5" skirted knob -- $7

These look like what was on some '60's Hammarlund, Eico & Knight Kit
stuff
#642 1.5" skirted knob -- $7
#647 1" skirted knob w/indictor line -- $7 ea
#653 1.5" skirted knob w/indictor line -- $7 ea

Millen? (has a logo that looks like a "M" with an "I" superimposed at the center) #309 3-1/2" Handwheel style knobs as seen on the SX-28, if I recall correctly.
These are all in need of minor plastic surgery -- two have chips out the skirt where the set screw goes and one has had it's center drilled through... perhaps, to make a concentric assembly??
$10 ea.

National HRT 2-1/16" diameter
Black, trim rings somewhat tarnished -- $5 ea
Gray, trim ring shiny like new -- $10

There are also many knobs from 1960's Tektronix and Hewlett Packard oscilloscopes, if anyone has any need, please inquire.

All of the above plus shipping, if necessary, naturally.

Message-ID: <9bgbggsdn1@news.netmar.com>
Source record: 5829
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

********** Power Supplies **********

Open (L-shaped) frame power supplies with attached 2 wire polarized line cord, 120V 60 Hz AC input. There is a relay that switches the 3 voltage outputs. They measure about 6" x 3" x 2". They have an internal 1A line fuse. They have a six-pin SIL output connector and come with a matching cable to pigtails. The wires are: GND, +5V switched, -5V switched, relay (gnd to operate), +12 switched, and +12 constant (for the relay). Just guessing from the 780X series regulators, I would think that the +12 and +5 outputs are good for about an amp. and the -5, which regulator is unheatsinked, perhaps a couple hundred mA.

5 units available. $15 ea.

Lambda LM B0-60 -- 0-60V, .45A Linear Power supply with remote sense terminals, screwdriver voltage adjust, 5"x3"x7" -- used $25

Power General
Model 1035-2 -- 12V, 3A, Switching Power supply, uncased PCB 5"x3"x2" -- NOS $15

Model 3050-1 -- 5V@6A , 12V@1A & -12V@1A, Switching Power supply, uncased PCB 5"x4"x2" -- NOS -- $25 ea (4 available)

Model 3056-6 -- 5V@6A & 12V@3A, Switching Power supply, uncased PCB 5"x4"x1.5" -- NOS $25

Sierracin 5C12A -- 12V (5 Amp?) Switching Power supply with remote sense terminals -- open frame 5"x8.5" x2" -- used $15 ea (2 available)

All of the above plus shipping, if necessary, naturally.

NOS --
(It doesn't appear that the anode leads have ever been bolted to anything.)
4 pieces -- $30 all

GE 4JA61C rectifiers, 50A, 300PIV, large stud package. A pair for $5.

GE 4JA63C rectifiers, 50A, 300PIV, large stud package. Four for $10.

GE A70B, 100A, 200PIV, DO-8 large stud package. Used. Four for $15.

GE C156D, 110A, 400V Inverter SCR's, used. $10ea.

Lambda FBH-24 Hybrid Regulators NOS -- $10 ea

Motorola NOS rectifiers, 50A, 100PIV, plate mounted. 2ea MR1201FL & MR1201FLR
(a bridge worth)-- NOS $10

Motorola NOS TIP34A 10A 60V TO-218 PNP Power Transistors. 4/$1

Sarkes-Tarzian Model 78D center-tapped Selenium Rectifiers. NOS! $5ea

Westinghouse 6-1-1B/1N1188 3 Phase 600V 35 Amp rectifier assembly
with heatsink. Unused but, tarnished from long storage $10.

Westinghouse NOS, 80A, 1000V house-numbered SCR's $15ea.

Westinghouse NOS, 20A, 1000V house-numbered Rectifiers $4ea.

All of the above plus shipping, if necessary, naturally.

******** Roller Coils **********

B&W 3853 72 uH NOS but, a mite tarnished from age. $60

Johnson 229-202 18uH used good, $50

La Pointe L-0201 406-1 (identical to a Johnson 229-201) 10 uH. used good, $30

********* B&W Air Dux coils *********

These are all shiny NOS, 10" lengths, unless noted otherwise

#2408T 3" dia, 8TPI, #14 wire -- $30

#2008T 2.5" dia, 8TPI, #14 wire -- $30
#2008-31 2.5"dia x 4" long , 8TPI, #14 wire with 2 turn #14 link at center.
NIB $25

#1604T 2" dia, 4TPI, #12 wire, slight tarnish $20

#1208T 1.5" dia, 6TPI, #12 wire, slight tarnish $20
#1216T 1.5" dia, 16TPI, #16 wire, somewhat tarnished $20

#1006T 1.25" dia, 6TPI, #14 wire, somewhat tarnished $15

These are all somewhat tarnished NOS partial lengths

#1008T 1.25" dia, 8 TPI, #16 wire, 8" long -- $12
#1016T 1.25" dia, 16 TPI, #20 wire, 8" long -- $12
#1032T 1.25" dia, 32 TPI, #24 wire, 5" long -- $10

a couple of miniductors (lighter construction)

#3035 3" dia, 10TPI, #16 wire, slight tarnish 10" long -- $25
#3027 2" dia 10TPI, #16, 7" long shiny -- $20

and a couple of Illumintronic Engineering parts

375 7367-P1 -- 1.5" dia.x 5.75" winding w/ indented turns, 14 TPI, #17, 7"
overall
including plastic center support, un-used somewhat tarnished $25

980-0121-000 -- 2.5" dia. x 7.5" winding w/ indented turns, 8 TPI, #14, 9.5"
overall
including plastic center support, used somewhat tarnished but, no turns
soldered $30

All of the above plus shipping, if necessary, naturally.

********** Air Variable Capacitors ********

Hammarlund NZ-10 Neutralizing capacitors, shiny NOS, $25 pair

Johnson 154-506 Dual 153pF 3KV air variable used, good ¼" shaft, $20ea (2 available)

Johnson D Series Dual 200pF .080 air spacing about 4"x4"x8" overall, ¼" shaft $20

G.I. Corp 70 pF, .080" air spacing, about 3.5"x3.5"x3" overall, ¼" shaft $2ea (2 available)

Cardwell 400pF, .045" air spacing, about 4"x4"x3" overall (plates open) ¼" shaft. $5ea (2 available)

********* Ceramic Doorknob & Disk caps *****

These are all made by Sprague, they are either NOS or little used.
(Large) Doorknob style $15 ea

2400pF 40KV (last one)

These are used Centralab or similar -- $5 ea or 5/$20

500pF 10KV "TV" style
68pF 5KV 850 series

These are NOS disks by KD & Erie $3ea or 4/$10

1500pF 7.5KV
.01uF 4KV

And a couple NOS Silver Mica caps.

2200 pF 500V CM06 $1 ea
5100 pF 500V CM07 (high current rating) $2 ea

All of the above plus shipping, if necessary, naturally.

****** VACUUM CAPACITORS & other Vacuum things **********

Jennings Vacuum Variables -- all used (or at least aged)

UCS-300-15S 300pF 15KV $250 with standard puller, later manufacture (blue)

UCSL-750 750pF 3KV $150 with standard puller
UCSL-1000 1000pF 3KV $150 with standard puller

R1G SPST 20KV 20Amp Vacuum Switch $100

---------Fixed vacuum caps----------

Jennings VC-12 12pF 20KV $25
Jennings 50pF 86KV $86
Western Elec 100pF 5KV $50 (This one hi-pot checked @ 14KV)

--------- Vacuum Relays -----------

Old "T" style vacuum relays for sale, where the coil slips over one leg
of the glass enclosed contact assembly -- One of the contacts has a Penta
Labs
part number: 420 53 3875. The coils are 28V. $10 ea

Struthers Dunn Type 78CCA109 "Keying Relay" which consists of a vacuum
relay mounted on top of a small (2"x3"x4") metal enclosure. There is a
15 pin Jones connector on the side of the box. I believe that there are
some auxiliary contacts in the box in addition to the vacuum relay.
This is also a 28V unit. $15

All of the above plus shipping, if necessary, naturally.

power amp. in the estate. $100 ea

7580W/4CX250R (Amperex & Eimac) pulls $25 ea --or-- 5 for $100

7034/4X150A clean pulls $10 ea --or-- 5 for $40

--------- Planar Tubes (used)-----------
2C39A -- $10 ea
7289 (3CX100A5) -- $15 ea
7698 -- $10 ea
7843 -- $5 ea
Y602B -- $10
Y2177 -- $10 ea
EE144 -- $10

-------- Lighthouse tubes -------
2C46 pull $3

-------- Pencil tubes -----------
6442 pull $5 ea
7554 pull $5

--------- Acorn tubes -----------
6F4 used $3
954 used $1 ea
955 used $1 ea
956 used $1 ea

--------- and the rest -----------

6CL6 pulls $1 ea
6DQ6B RCA likely NIB + GE 6DQ6B pull -- $10 both
4637 (RCA) pull $40
5654 (6AK5) pulls $2 ea
5763 pulls/NOS $5 ea
6481 new $50

********** SOCKETS **********

Eimac SK-1500A mounted to a 17" square aluminum panel. Includes a current
transformer to monitor filament current. $200

Johnson 211 / Birnbach 434 "50 watt" sockets fit 450TL/TH etc. used $20 ea

Johnson 248 / RCA UT-106 & Other 7 Pin Septar (for 8877, 829, etc) used
$10ea

Eimac SK 510 socket, "Overused": One screen contact missing - lower air
channel milled off for 4-1000A / 3-1000Z fine for a lamp! $10

4CX250 family sockets --
Eimac SK 610 (cathode grounded) last pair -- $30
Johnson 124-111 chimneys, last pair -- $20

Eimac HR-3 plate disspators (.072 hole) $2ea
Larger fin version of above (by Bud?) $3ea

Plate dissipators from 3-400Z's (I think -1/8" hole) $4ea

Millen #36002 ceramic plate caps (3/8" hole) $3ea 4/$10

Erie Chemflex SO-427-3 Teflon insulated 7pin miniature tube sockets
including saddle w/ lugs, NOS -- $5 ea

All of the above plus shipping, if necessary, naturally.

409. FS Coax Antenna Relays & Coax Connectors

Newsgroup: rec.radio.amateur.swap
Date: 2001-04-17 03:05:49 UTC
From: marv_e_ads@juno.com
Message-ID: <9bgbud$st4$1@news.netmar.com>
Source record: 5835
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

******** Used Coax Connectors *************

Andrews Heliax UHF connectors 1/2" 44AP male -- $10 (last one)

UG-643 C Female-Female barrel connectors, $3 ea
UG-637 UHF Male to C Female adapters, $5 ea

UG-259A/U 91836 -- HN female to LC female bulkhead adapter -- $30

********* New Coax Connectors ***********

UG-1213/U HN Male Cable connector NOS -- $10

Kings KH-39-11 HN Female Cable connector NOS -- $10

Below are all new crimp on connectors, with all hardware, in individual
plastic bags; early-mid 1990's date codes.
I believe that they are all for RG-59 size cable.

Kings Electronics (US made in New York, new home state of ex-President
William Jefferson Clinton)

KC-59-642-M06 BNC Cable Male -- $1 ea

KA-59-385-M06 TNC Cable Male -- $1 ea

KA-19-43 TNC Bulkhead Female -- $1 ea

********* Coax Antenna Relays **********

These all have (3) UHF connectors. They are somewhat old looking on the
outside but,
I popped the inspection port on each and all the contacts are all happy.
And they all go click upon application of the appropriate voltage.

Dow-Key DK-60 style
110-115 VAC coil -- $30

Advance (same style but, heavier contacts & construction)
115 VAC coil -- $30

All of the above plus shipping, if necessary, naturally.

********** Test Equipment -- all functional!! ******

Bud GIMIX Wavemeter 80-10 Meters, has some white paint splatter just on the top. $10

Data I/O Unipack 2, PROM progamming fixture for 29A/B programmers. $50

DataPulse (Systron Donner) Model 101, 10 MHz Pulse Generator,
10 Hz TO 10 MHz in 6 Ranges, 8.5" x 4" x 11" deep $50

General Radio 758-A 55-400 MHz Wavemeter. Dial in need of severe polishing but, insides are clean. $30

Heathkit / Zenith ET-3100 Electronic Design Experimenter. Small protoboard plus 200Hz-20KHz Sine & Squarewave generator, individually variable +/- 15 V supplies, 30VCT AC source, 1K & 100K undedicated potentiometers. AC Line powered. $75

Hewlett Packard 141T Spectrum Analyzer system including mainframe, 8552B IF section,
8553B, and 8555A RF sections plus 8443A Tracking generator.
All original knobs, terminators,etc. clean and working fine; no internet "surprises"!
With manuals (or copies thereof...) for all units. $2200

Hewlett Packard 427A (transistorized) volt-ohmmeter with nice 4" mirrored scale. Reads as low as 10 mV full scale on AC and up to 1000V AC or DC. Including a spare battery and an original HP manual -- $75

Hewlett Packard 461A, 1 KHz - 150 MHz Amplifier,
50 ohm in/out, switchable 20 & 40 dB gain. $100

Harrison (later HP) 865B 40V .5A Max. Constant Voltage-Constant Current Laboratory Power Supplies $40 ea $70 pair

Hewlett Packard 4260A Universal Bridge -- measures resistors, capacitors and inductors. Also checks inductor Q and capacitor D using either internal 1KC source or external oscillator. Has "semi-auto" nulling feature in L&C modes. 6" hi x 8" wide x 12" deep overall -- 115/230 VAC powered. Cosmetically very good. $300

Kepco Dual PCX 15-1.5 MAT 15 volt 1.5 amp max lab power supply in Kepco PC-4 cabinet. Individual voltage & current meters (4 total). Ten turn voltage

adjust -- $100

Kepco Dual PCX 40-0.5 MAT 40 volt .5 amp max lab power supply in Kepco
PC-4 cabinet. Individual voltage & current meters (4 total). Ten turn voltage

adjust -- $100

Polarad 1207A Microwave Signal Generator 3.7-8.4 GHz. $100

Pomona #2399 cast Aluminum Boxes (2" x 1-1/8" x 7/8" o.d.) w/ gold plated SMA

female connector on each end. New (in factory sealed plastic bag) -- $15 ea

Sierra Electronics model 164B Bi-Directional Power / SWR meter with 181-A-1000
element -- covers 200-1000 MHz with four power ranges: 10W, 50W, 100W & 500W
full scale. Case is in fair-good condition finished in "Howard Hughes"
(light) green -- leather carrying strap is in very good condition. N
connectors (M&F) -- $100

Teaberry model TB 6503 HF SWR / Power meter. 100W / 10W ranges FWD & REF
power plus SWR. UHF connectors. $10

Tektronix P6006 10X Scope Probe (used) $10
P6012 10X Scope Probe (used) $10

All of the above plus shipping, if necessary, naturally.

413. FS: RF Attenuators

Newsgroup: rec.radio.amateur.swap
Date: 2001-04-17 03:09:17 UTC
From: marv_e_ads@juno.com
Message-ID: <9bgc4t$t4r$1@news.netmar.com>
Source record: 5842
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

********** RF Attenuators **********

Heavily built RF Attenuator, adjustable between 0-50dB in 10dB steps. 8" flying leads w/one terminated in a BNC Bulkhead female and the other with an N Male
connector. Looks like it should be good to at least 1 GHz. 3 1/2" diameter by 4" deep overall and weighs about 4 pounds each. There are tapped holes in the front frame for
panel mounting. No manufacturer is indicated. A 3/8" shaft adjusts by pulling (with a
spring return) and turning so there is no chance of inadvertent resetting. No knob
nor dial is included. $25

Tekscan LA-54 0-59 dB 50 ohm RF attenuator -- about 1.5" diameter by 4" long overall with concentric knobs (10db & 1 dB steps) & side mounted BNC connectors. 30dB position reads about 2.5 dB too high -- $35

Telonic TB-50A 0-10dB 50 ohm RF attenuator -- 3" diameter by 3" deep w/ side mounted BNC connectors. $25

Telonic TG-950 0-100dB 50 ohm RF attenuator -- Nine toggle switches attenuate by 1,2,3,6,10,20,20,20 &20 dB steps. 9" long by 2/5" hi by 2" deep w/ end mounted BNC connectors. $45

Mfg. Unknown, L-101A in-line VHF Waveguide-beyond-cutoff style attenuator, -30 to -100 dB range. 10" long overall max. w/ UHF connectors. $20

6 dB low power pads with N connectors, male on one end, female on the other. Approx. 1"x1"x3" overall. 2 available $10 ea.

All of the above plus shipping, if necessary, naturally.

414. FS: Homebrew Estate Items

Newsgroup: rec.radio.amateur.swap
Date: 2001-04-17 03:11:07 UTC
From: marv_e_ads@juno.com
Message-ID: <9bgc8b$t9m$1@news.netmar.com>
Source record: 5836
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

********** Homebrew Radio things ******************

Many hams build things with a large investment in time & parts that are worth far less... later. Here are some items from the estate stuff I've been selling that fit that description -- priced accordingly.

Unless noted, most of the items below are built on PCB material and most of the enclosures are made by soldering pieces of PCB material into a box -- not all sides may be present! Batteries not included! A few of these devices come with schematics, mostly not. The wiring is all open enough that you can generally see what is going on.

Battery drainer -- LM317K (TO-3) plus a pot wired as a current sink to drain batteries -- 4" x 3" x 1.5" -- $2

PL Tone generator -- Wein Bridge Oscillator powered by two 9 volt batteries. - $3

Fully populated 2.5" x 5.5" homebrew PCB w/ two 1496 balanced mixers, a couple slug tuned coils, plus a CA3001-- I only see power connections; Don't know what this does! $4

Touch Tone Encoder -- Western Electric Touch Tone Dial mounted in a 4"x4"x2" metal enclosure with power switch. Has a 4 pin DIN connector plus matching cable terminated in a 1/8" mini plug. $5

Two Tone generator -- Two Wein Bridge Oscillators powered by two 9 volt batteries on perf board. - $5

Some kind of test oscillator with a 556, two pots with anodized gold (colored) knobs, pwr. sw.. LED,. & Banana jack outputs -- $5

60dB Sampling Tap -- HN female connectors for the main line and a BNC for the tap. 1KW in the line puts 1mW to the tap. -- $10

435 MHz power splitter with (3) N connectors. This made out of brass sheet stock and is about 15" long by 1" square. $10

Varactor multiplier (unfinished) -- looks like it's designed for 144 to 440. Built in a 3.5" x 2" x 7/8" extruded aluminum case -- top plate missing. Silver plated coils, Johnson 189-6-4 caps. It think it is complete execpt for the input and output leads. $10

Some kind of VHF thing just started. Pomona 4"x2.5"x1.5" cast box with a couple 160-104 capacitors, BNC connectors, a miniature 50K bourns pot., 6 capacitors mounted to gold plated terminals with a very pretty gold flashed internal shield structure. Nothing is soldered -- this was just started.

$10

Antenna Noise bridge? -- Pot & Cap plus 4 transistor circuit mounted in a 5" x 4" x 2" enclosure. BNC connectors marked ANT & RX. Pwr SW. & Led Powered by a single 9 volt battery. - $10

Two Meter to 24-28 MHz converter (I think!) -- 5" x 4" x 1.75" -- $12

A VHF thing -- Two trombone lines adjustable between 4-6" with a transistor connected between them plus a Phasotron 50 ua 2" round meter on a BNC cable with a small loop w/a diode. -- $12

Active Field Strength Meter -- Schematic per 1985 ARRL Handbook p 39-10. Built in a 5" x 4" x 3" black crackle finish metal case with a Simpson Model 29, 4" meter, covering the entire front of the box. -- $15

NTSC Frequency reference -- I think this was a QST project in the early 1980's. PCB in 4"x5"x8" metal case (top missing) w/feet, AC line powered. -- $20

144-148 MHz to 24-28 MHz Transverter -- 5" x4" x 4" overall -- 2N3866 Output transistor, probably runs about a watt on transmit. Barrier strip for power (12V?) and an 8 pin Japanese style Mike connector for ?. Transmit & receive sections are each 5" x4" x 2" and only interconnected with a few wires -- $30

All of the above plus shipping, if necessary, naturally.

*** Vintage Electronic Manuals (original unless noted) ***

Army / Airforce / Navy
AN/APS-13 Airborne Radar (1944) $20
AN/URM25D Signal Gen (partial copy) $10
BC-314G Receiver (schematic copy only) $3
BC-344D Receiver (schematic copy only) $3
SCR-211 A-T plus AA-AL Frequency Meter $25
SCR-522 A/T2 SCR 542 A/T2
(cover badly worn -- insides ok) $30
TM11-825 TWT PB-50A Transmitter (1944) $25
LM-14 Frequency Indictor (1943) $20
Hughes HTR-12A/C HTR-13A/C Radar $30
Hughes Aircraft Unit 24 MA-1,
F-106A computer maint. manual $30

B&K
415 Sweep/Marker Generator $15

B&W
400 Distortion Meter $15
410 Distortion & Voltmeter (copy) $8

Boontoon
160-A / 170-A Q Meter (copy) $5

Bytcom
24/12ADH Modem $5

Central Electronics
20A SSB Exciter partial manual copy
plus (original?) schematic $25

Concord Data Systems
224 Autodial Modem $5

Collins
32S-1 Transmitter $50
70-E8 Oscillator glossy brochure
(1947 copyright) $10
520 5430 00 Vernier Tuning Knob $5

Eico
HFT-90 FM Tuner $10

Federal Telephone and Radio
FT-125-B25A $20

Fluke
8022B DMM $10

General Radio
1606-A Impedance Bridge (copy) $10

Gorler
UT-345 AFC / UT-343 FM Tuner $10

Heathkit
309C RF Probe $5
A-9C Audio Amplifier $15
AG-9 Audio Generator $10
CM-1073 Auto Tune-up Meter $5

FM-3 FM Tuner $10
FM-4 FM Tuner $10

IM-4100 Frequency Counter $10
O-11 Oscilloscope $10

SA2500 Antenna tuner (new) $50

TC-2 Tube Checker $10
V-6 VTVM $8
WA-P2 Preamplifier $10

Hewlett Packard
150A/AR Oscilloscope $10
152 Dual Trace Amplifier $5
400A VTVM $5
400C VTVM $5
400D/H VTVM $10
400D/H/L VTVM $12
410B VTVM $12

3455A Digital Voltmeter (operation) $10
5340A Frequency Counter (comb bound copy) $50
6200A Power supply -- Harrison Lab version
lower right part of front cover missing $15
7035B X-Y Recorder $20

8445A Preselector (bound copy) $20
8556A Spectrum Analyzer LF unit $45
8672A Synthesized Generator $100

10811A/B Quartz Crystal Oscillator $20

Motorola
Motran (136-174 MHz) FM transceiver instructions,
schematics 68P81044A10 (2 books) $30

Motran (150.8-174 MHz) FM transceiver instructions,
service/schematics 68P81040A45 (2 books) $30

Motran (150.8-174 MHz) FM transceiver service manual (copy)

416. FS: Old Radio Books & Catalogs

Newsgroup: rec.radio.amateur.swap
Date: 2001-04-17 03:12:26 UTC
From: marv_e_ads@juno.com
Message-ID: <9bgcaq$td3$1@news.netmar.com>
Source record: 5843
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

********** Old Radio Books & Catalogs **********

RCA HB-3 Tube Handbook
Loose leaf 6 ring binder style data sheets starting in the late '40's with
additions and
updates through October 1966. Sepatate sections cover Transmitting Tubes,
Receiving Tubes (Part 1 & 2),
Industrial receiving tubes, Photosensitive devices, Thyratons & such, CRT's &
Picture tubes,
Miscellaneous types, & semiconductors. The updates appear to have been made
in all
these sections except Picture Tubes which is somewhat disorganized. It also
appears that the
obsolete data sheets were kept for reference. The whole collection is about
30" wide on a shelf.
Shipping weight will be 20 lbs. Excellent condition; mostly never read! One
gotcha - No binders. $250

Heathkit Catalogs
1954, 55, 56, 57, 58, 59 &
Fall-Winter '62-63,
Xmas '89 + Winter & Spring '90 $100 all

Handbook of PREFERED CIRCUITS
Navy Aeronautical Electronic Equipment
vols. 1&2 (1955 tubes & 1962 transistors)
very good condtion $40

Most Often Needed 1926-1938 Radio Diagrams, originally published by
Supreme Publications 1941. This is a REPRINT, by Vintage Radio.
240 pages, solid schematics! Like new, $20

RCA TT-3 Air-Cooled Transmitting Tubes 1938 copyright
overall good condition w/slight damage at top & bottom of
spine & first 20 pages of lower right corner. 192 pages -- $30

Radio Supply Company catalog 1934 (they used to be in downtown Los Angeles)
-- a little smudging on the back cover and two middle pages torn on the
edge but, otherwise in fine condition. There is a sticker from the
(original?)
owner on the first inside page. 85 pages, the last 10 or so of which are
receiving and transmitter tube data from the era. $20

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet
Excellent condition 20 pages or so $10

Elin company overview book 1932
very good condition except cover is almost loose
Text is in GERMAN. Lots of photographs of electrical equipment,
tools, machinery, and construction projects.
128 pages $10

Radio Doings Call Book Spring 1931 edition
cover taped at spine, otherwise very good
50 pages $15

Radio Doings Vol 15, #1 June 1929 edition
cover, first two & last two sheets missing otherwise o.k.
pages 5-62 remain $10

Official Radio Service Manual 1930, originally published by Gernsback
Publications. This is a REPRINT by Vestal Press, 1984. Schematics &
some service info. 352 pages, like new $20.

All of the above plus shipping, if necessary, naturally.

This is New In The Box. My vertical came down this winter and
is beyond help. I had ordered it over the winter but now I have no
use for it. It cost $120.00 from HRO and you can have it for $95.00
shipped UPS ground.

Please Email direct as I am putting this on a few news groups.

Thanks and have a great day, John w1hzh

Kenwood TS-820S, CW filter, Digital display, & External VFO
$325 Plus shipping and packing. Copy of owners manual and
original service manual included.

Kenwood R-599A/T-599A Twins. No converters.
Includes owners manuals & Turner M+2/U hand mic.
$300 Plus shipping and packing.

Both radios in good condition. I can't and won't say "mint", they aren't
Besides - "mint" means to me "sealed" as in "mint coin sets"

Both transmit and receive very well, full output on all bands (per manual
specifications). Neither has an external speaker.

Will trade for Boatanchors - specifically AM.
Mohawk or Apache - perhaps deal for both?

Please respond to address below.

Bob

Here we have another spammer. He misleads
in the subject line by saying this item
is FS "OR" For Sale "OR" misleads and
indicates said item is for sale when it
is actually FA = For Auction. The FA is
used by those of us that do not Do Auctions.
We set our spam filters for FA in the subject
line and we do NOT have to see the auction
spam. Do not trust this person.

"If they Lie in the subject line"
They will have no problem misrepresenting
the JUNK they have at the Auction..

Just My Opinion..

Bob

Check this out:

TWO Radios

Yaesu FT811s that work on COMMERCIAL BANDs too!

See them at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1231379398&r=0&t=0&showTutorial=0&ed=988511542&indexURL=0&rd=1

2 RADIOS
Yaesu FT-811

Compact 70cm FM Transceivers
(420Mhz-470Mhz)

a.. This auction is for TWO Radios-excellent for TWO people to use to travel and talk!

b.. 49 Tunable Memories

c.. High Performance Scanners

d.. Memories store repeater offsets

e.. Auto Power Off to save batteries

f.. Uses the Yaesu FNB series Batteries

g.. Includes CSC-35 Soft Case (NEW)

h.. MMB-32A Mobile Hanger Bracket Included (for window or dash)

i.. BRAND NEW 12vdc Battery! (3/1/01)

j.. TECHNICAL MANUAL included!

This equipment was used by myself and son when he was young and lived near me. I bought TWO so we could talk privately on the ham bands. They are in excellent shape.
Included is the following: I have two MANUALS, A separate TECHNICAL MANUAL (ONE), a BRAND NEW BATTERY - FNB-11 12v 600mAh bought on 3/11/2001 from Batteries America ($30 alone!)

They BOTH are in good WORKING order.

Check out my auction here: http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1230459252&r=0&t=0&showTutorial=0&ed=988232759&indexURL=0&rd=1
Starting price: $88

NO RESERVE!!!!

Yaesu FT-470

Compact Dual Band 2m/70cm FM Transceiver

a.. Four VFOs & 42 Memories

b.. High Performance Scanner

c.. Built In 10 Memory DTMF Autodialer

d.. CTCSS Features

This equipment was used by my son and now is mine. I am a ham but don't know much about it. It is about 1990-91 vintage I think. Included is the following: I have the MANUAL, a BRAND NEW FNB-11 12v 600mAh battery bought on 3/11/2001 from Batteries America ($30 alone!) and MADE for this radio. The radio is cosmetically in good condition. I have a MODIFICATION sheet I will ship with it but the MODS have NOT been made! (MARS mod, extended reception etc) A schematic diagram is INCLUDED with the manual!

I have 3 ten foot tower sections (2 middle and 1 top section) I also have
2 rotors and 2 rotor controllers + rotor cable.
the first rotor and controller are fairly heave duty (easilly several
tribanders or monoband hf antennas) the second rotor/controller is a
chanelmaster tv rotor (will easilly handle 2 or more vhf/uhf antennas- I
had a 3 El 6M mono, a 3 el 2m Mono and a large tv antenna on this rotor,
handled no problem)
Im asking $200 for the lot, however its pick up only (rome, Ga) sorry I dont
have a truck
for more info call steve, KS4OP at 706-235-4591

Ends Apr-28-01 10:49:26 PDT

You are bidding on a Kenwood TH-215A VHF FM handheld transceiver with optional SMC-30 speaker/mic. Included with the handheld are: PB-2 (8.4 volt, 500 mAh battery pack); wall charger; SMC-30 speaker/microphone; rubber antenna; and the original instruction manual. I have used the radio and it works perfectly. The battery pack holds a charge well and has good life. The radio is in excellent condition (9.5 of 10). The only flaws are a few scratches on the back panel. The radio has a receive range of 141.000 MHz to 162.995 MHz. The transmit range is 144.000 MHz to 147.995 MHz. I believe it can be modified for MARS/CAP. The radio has 10 memories (is capable of working odd splits), 38 tone PL encode, 3 types of scan (band, memory, and programmable limit), 3 scan modes (seek, time, and carrier), adjustable battery saver mode, lighted display, priority watch feature, key lock mode, TX disable mode, DTMF pad, reverse feature, and can be powered directly by 7.2-16 volts DC via a jack on top of the radio. The transmit power is approximately 5 watts when powered by 13.8 volts DC and approximately 2.5 watts when powered with the battery pack that is included. It has a low power setting of approximately one half watt. The deviation has been measured at 3.78 KHz. The receive sensitivity has been measured at .15uv 12 db Sinad. I have replaced the lithium memory backup battery, so it should be good for another 5+ years. The radio is missing the belt clip. I am selling the radio to free up money for a two meter all-mode rig I purchased. Buyer to pay actual shipping charges from 65781 (no "handling", packing charges etc). I will pack the radio securely and guarantee it is working when it leaves here. If the buyer wants insurance on the shipment, it will be at their option and expense. I will ship it by USPS unless the buyer prefers other means. I reserve the right to relist the item if ebay is down during the last 5 hours of the auction. I have tried to be very complete in this description, but if you have questions, please email.

I have played with both and went with the TS. I had the 746 and the 847. The DSP on the 756 sounds so crummy to me. I didnt like it at all. The scope is neat but i wont use it its called turn the vfo for me. And I like the versitility of the 2000 the upgrades for it will be via Firmware / uploads via computer. Why do I need to buy a new rig just buy the upgraded firmware. Why hasnt the big 3 come up with this 10 years ago? Who knows. Ten Tec does it the with the Jupiter. For me the choice is hands down the TS for its many options and for not having to buy filters. Its a good rig. And I can assure you I will get my DXCC with this one.

Hi Howard,

IMD does NOT cause TVI, it causes splatter on adjacent frequencies.
Since splatter is masked by stronger signals or noise, it is best
tested in a controlled environement. That's why the tests are so
important.

We have gradually been accepting poorer and poorer rigs for use.
Keyclicks and splatter are on the way UP, that is definite.

The TS-2000 is a large step towards more deterioration in spectral
purity of our rigs. Personally, I hope they never become popular or
they are corrected and at least brought back to the same specs as most
other radios.

We may never return to the spectral purity of something like a Collins
KWM-2 (we are now about 15-20 dB worse than that in the typical rig),
but there is no reason to accept constantly declining transmitter
close-spaced performance. The TS-2000 is another 15 dB in the wrong
direction.

I can get better IMD performance from a class C amplifier, so I have
to wonder what engineering mistakes they made.

Since I live in a quiet rural location, and work weak signals, this
problem is very evident to me. It may not be evident in other
situations, that's why testing is important. The numbers don't lie,

and the TS-2000 is the worse radio to hit the market in a long time.

Shame on them for ignoring IMD performace.

From: Justin Moon <justin@georgiadigital.com>
Message-ID: <yAJF6.2812$5b1.169214@news1.atl>
Source record: 5795

I have a Swan 500cx HF rig in good condition. I would say an 8 out of a 10. All knobs are there, all the screen printing is intact, all the lights light, it all looks good. The radio is just the radio, there is no mic or key. Also have the matched Swan 117xc power supply and speaker. All power and speaker cables are included and in good shape. The radio has little sign of use. Powers up good, and receives good. I have not tested the transmit, but I know it does transmit. Would be a great matched set for an HF station, esecially for someone who likes older rigs or someone who doesn't want to spend a fortune on a newer rig.

If interested e-mail me for more information.

Thanks, Justin Moon KE4CAA

In testing the TS-2000 has the higest transmitter IMD of any radio on
the market today, by a large margin.

Anyone who understands IMD would know that it doesn't mean the audio
"sounds bad". All it means in this case is the spurious garbage
outside the required bandwidth of the transmitter is maybe 40 times
higher than that from other rigs.

We need cleaner radios, not dirtier ones.

With attitudes like yours it's no wonder radios click and splatter
more than they used to. The manufacturers don't need to worry because
people will accept deteriorating performance with question.

It isn't MY fault they have a poor design. Don't blame it on me!

Possibly more proof that Kenwood is courting the CB crowd? (They could care
less about IMD - even if they knew what it was)

I suspect it is more proof that engineers know less or care less about what acceptable performance is, rather than intentional.

You can see examples of this creeping into the CW sections of rigs, where they call the ratio control "weight" and provide no means of adjusting the weight...which people commonly want to adjust....and instead change the ratio of dot-to-dash which no one in their right mind wants to change.

Same think with keying waveforms... and more important bandwidth of CW transmitters.

They must have customers who buy a radio without knowing or caring if it really doesn't work as well as it should, or doesn't have needed features. I'm sure the manufacturers don't get enough constructive feedback demanding they clean up transmitters and receivers and add useful features like a weight control for CW.

When I told a certain manufacturer their top-of-the-line radio had leading edge overshoot to 300 watts on key closure (even when power was set to 50 watts!) and had no weight control their marketing guy responded "no one cares, no one works CW anyway..and all radios have power overshoot".

Personally, I want to buy the cleanest radio I can. I worry about blocking and IMD performance, and how it might bother other people, more than I worry about 10,000 stacked memories or extended double DSP.

Like new TS450/SAT with YK-88C filter (500 Hz CW, $130 new) installed. All functions are perfect and cosmetics are 9.5 out of 10. Includes factory packing, mike, power cord, manual. Never been "tampered with". Asking $695 plus shipping to ConUS by way of your choice.

Also have matching Kenwood MC-60A desk mike ($140 new), $95.

$770 for both radio and desk mike.

I need a smaller rig for the dash of the RV.

The ONLY trade I'll consider is for a "like new" 706MkIIG. Will ship on receipt of US Postal Money Order, or when your personal check clears. Will "double box" the original packing to keep it safe.

Email me if you have questions.

73s.....Rudi - WA6RW

Hi all. I have a VERY nice Yaesu VX-5R for sale. I'm the original owner, the unit has only been used very lightly, and never abused. I have ALL the original packing and manual, plus I have the nice pocket reference that VE3AYR produced. I'll even throw in the Yaesu leatherette case that they made for this unit.

The unit looks and acts just like the day I bought it brand new. I've installed the handy spring-clip style belt-clip (Motorola brand) but you can easily put the original clip back on, it's included. The reason for selling is that my old eyes just can't read the tiny print any more (sigh).

When bought new (February of 2000) with the above accessories it cost me over $400. My selling price is $295 plus S/H. Price is FIRM.

I'm sure you'll like this tiny little powerhouse, don't miss out. First money buys it.

Neil
You might want to rethink your price since the radio can be bought new
for $300 with free shipping from
http://www.gigaparts.com/radioindex.shtml

I have several 16 channel Maxtrac mobile radios for sale Model number D34MJA7DA5CK. These radios came from a city Police Department and were all working when taken out of service less than 6 months ago. They come with power cord and microphone. These radios program in the 439 to 470 range. I would rate them at 8 1/2 out of 10. For and extra $10.00 I will throw in an external speaker. I accept Paypal or money orders. Again radio, microphone and power cord $115.00 each.

Like new TS450/SAT with YK-88C filter (500 Hz CW, $130 new) installed. All functions are perfect and cosmetics are 9.5 out of 10. Includes factory packing, mike, power cord, manual. Never been "tampered with". Also includes mobile bracket (but rig has never gone mobile).

Asking $650 plus shipping to ConUS by way of your choice.

Also have matching Kenwood MC-60A desk mike ($140 new), $95.

$725 for both radio and desk mike.

I need a smaller rig for the dash of the RV.

I'll consider a trade for a "like new" 706MkIIG.

Will ship on receipt of US Postal Money Order, or when your personal check clears. Will "double box" the original packing to keep it safe.

Email me if you have questions.

73s.....Rudi - WA6RW

Please do reply to (leeassoc@hotmail.com)

At this site:
http://www.aaroncake.net/circuits/3Wfmtran.htm

looks like I've got everything but I need the "parts" that makes it more superior or powerfull up to 5wat.

I am not sure which of this list below would be the one to change for the better to make my fm trans. go beyond 1 mile.

I have a veronica 1w without antenna and had it for years where now looks like the little light is out, and I have to hold it in my hand to even work or add something metallic to it, the 2nd board I have is broken and all it does is change the stations. That seems to be missing one metalic tube on it...

Thanks..

I have two bird model 43 watt meters for sale. Your choice $160.00 plus shipping. Both have been tested (they were used in my shack and work great.) I am selling them because I actually have three and I really don't need three...

One has N connectors and a bird/motorola label. Good condition, no dents, etc. some signs of wear and a few paint chips.

Picture: http://www.eskimo.com/~ghopper/nbirdf.jpg

Number two has UHF connectors and is in near perfect physical condition.

Picture: http://www.eskimo.com/~ghopper/birdf1.jpg

the pictures are somewhat large so give them time to load.

I don't know what's up with the blue tint in the photo, but the meter face is white (like it should be). I suspect the blue is from the flash on the digital camera. I have more photos if interested.

Both come with a shorting plug.

Here we have yet another opportunity to educate you on the proper use of filters. Most newsreaders come with them as standard features built in. I'm sure that there are as many people who get really tired of hearing you piss and moan about it when it is really simple to solve. If you will set your newsreader to block out everything that has FS in the header, you will never be bothered by it again, and we won't have to sit and read your whiny post complaining about it. It's clear that everyone else in the world isn't going to change just for you, so either you change or stop whining about it.

I have a Kenwood TS-430 with the SSB filter that I am selling. The rig is in good condition and has been checked out. The package does not include a mic or a power cord. However, I just found out that you can get the correct plug from chrystler dealers for around $7.00

I am looking for the best offer over $350 plus shipping.

Looking IMMEDIATELY for a 2 meter HT, it must be:

*Programmable
*Have at least 20 memory allocations
*PL Tone Transmit capable (most repeaters in my area are toned)
*Reasonable condition, do not care about exterior condition, as long as display is completely readable.
*Brand name not as important, and age is not either as long as it fits above requirements.
--

Am also looking for a 2 meter (or even multiband with 2 meters as one of the bands) mobile rig capable of at least 35 watts FM, must have PL Tone Transmit capabilities and at least 10-20 memories.

If you have something that you are waiting to sell later on in the year at a swap or just have an extra radio as listed above, please email me with what you would be asking for it (before any shipping charges) I am a college student so I am willing sacrifice with a less than perfect exterior (as long as it is totally functional otherwise) to save a few dollars.

I just purchased a mixed lot of ham radio "stuff."

Within the collection was a brand new (or darn close to it...) Kenwood backlit DTMF hand mic with the RJ-45 (eight pin phone style) connector. I checked it out on my TM-742 and it works fine. Since I already have a backup MC-53DM, I am going to sell this one. I'd like $60.00 and because it is so light and small that it will fit safely into the USPS priority mail flat rate envelope that I will ship it for $3.50.

There is some more kenwood stuff in the collection, like the front panel display for a 742 as well as the band unit housing. I need to do a little more reading before I decide if I'm going to sell it, and how to price it if I do.

Email if interested.

I picked up a fairly nice Heathkit SA-2060A 2kw antenna tuner at Hosstrader's yesterday, but alas no manual. I'd like to rewind the balun in the back (it's been over-driven and repaired) and it would help to have the description.

I will buy a manual outright, or pay for a decent photocopy. Or if you've got it in electronic form, that's even better.

Thanks all!

I have for auction a repeater made from two Brand new Low band 60 watt maxtracs. It uses the NHRC-4 controller with link port. It is all cased in a home brewed rack mount case. Looks great. All for less than it would cost you to buy and build. Why? Because I need a duplexer for my two meter repeater. So I can get it back on the air in tip top shape.

RADIO FLEA MARKET in BEETSTERZWAAG.

The flea market takes place to - 26 May 2001. Do you look for an exotic transistor kit or a super recipient, fixed and do manufacture kit... or do meet of radio friends? Dan comes Saturday 26 May to the Friese radio market into Beetsterzwaag!

Many thousand visitors come each year from the entire Netherlands and Europe to this radio flea market spectacle, approx. 100 dealers, with most diverse articles, like senders - recievers - power supplies - antennas - software - hardware and literature.

Additionally of businessmen in the place also a flea market with many attraction organized for large and small. There is unfortunately no sales desks free on the radio flea market more, but you can reserve suburb, announce, for the year 2002. Is possible also by telephone & email, contact on to take with the executive committee. Down are these addresses.

How does one find Beetsterzwaag? From direction Apeldoorn = > Zwolle = > Meppel = >
Heerenveen = > Drachten, departure after Gorredijk Tijnje comes departure (28) Beetsterzwaag.

From direction Bremen = > Groningen = > Drachten = > Heerenveen, departure after Drachten Haven comes departure (28) Beetsterzwaag.

On 2mtr, 145,650 Digi Meppel and 145,700 Digi Joure can one to instruct leave themselves. Inlet is from 09:00 to 16:00 MESZ, into which Cafeteria one also boarded into this time.

This whole is organized of VERON FRIESE WOUDEN. Cordially Welcome in Friesland on the FRM!

527. FS: Yaesu FT-767

Newsgroup: rec.radio.amateur.swap
Date: 2001-05-09 01:29:03 UTC
From: "Marvin K. Jones" <mkjones@usit.net>
Message-ID: <z01K6.96$Dz.34708@nntp2.onemain.com>
Source record: 5604

I have for sale a Yaesu FT-767 from the estate of Eli, K4FHG. All proceeds from this sale go to his widow. The radio has modules for 2 meters and 430-440 mhz installed. Power output is 100 watts on HF and 10 watts for 2 meters and 70 cm. It has a built in antenna tuner for HF. Eli was using this radio shortly before he passed away. I have also checked it out since I received it, and it seems to be working 100% on HF,VHF, and UHF. Cosmetically, I would rate it a 9 out of 10 with only minor wear and no major scratches visible.

The price is $875 plus shipping, or I could deliver to Dayton (this radio is heavy). If you have any questions, e-mail or phone at 423-745-2451.

Thanks for reading this item,
Ken, W4ZUG, EM75

528. FS: HyGAIN QUAD Tri BAND Tennessee $300

Hey folks,

We have a NEW address for the Allied - Knight Kit Bulletin Board!

The old BBS over at BESEEN.COM was being trashed repeatedly by
annoying Taiwanese spammers with totally off-topic ads.

This new Board lets me delete spam, and al;so ban spammers if they try
to register and use the board. The registration is free and takes like
20 seconds. A small price to pay for getting our privacy back!

Many Knight and Allied enthusiasts are out there. Please forward this
to your friends, and to other Search engines, lists, reflectors, clubs
etc.

So please pass the word. KNIGHT KIT LIVES!

I have for sale four 70cm 22 element FO style antennas and four way power divider. These were homebrewed several years ago, not commercial, but all four work well. Also have 4 port power divider and hardware for an H-frame. I was going to install these myself and play around with moonbounce, but have reconsidered and decided to part with the setup. Sorry, no phasing lines.

I am asking $200 for the entire array. I am in Northwest Indiana and will not ship these, they must be picked up.

ngwd@ngwd.com

MFJ-1270C Super TAPR TNC clone has a world wide reputation as the most reliable packet TNC in the world! Thousands used as digipeaters, nodes, BBS and in all kinds of commercial applications working 24 hours a day -- many work for years without a single failure . . .

Features

ROM expands to 512K
External accessible reset
Built-in monitor ampifier
Front panel ON/OFF switch
Enhanced DCD circuit for HF
Supports 19,200 baud terminals
64K RAM expands to 128K or 512K

The MFJ-1270C super TAPR TNC clone has a world wide reputation as the most reliable TNC in the world!

Thousands are dedicated as digipeaters, nodes, BBS and used in all kinds of commercial applications working 24 hours a day -- many work for years without a single failure.

The Most for Your Money
The most reliable TNC in the world gives you the most for your money. See for yourself . . .

Fully TAPR TNC-2 Compatible
You get full TAPR TNC-2 compatibility -- all software and hardware designed for the TAPR TNC-2 standard works without modification. You get X1J, NETROM, theNET and Rose Switch compatibility that turns your MFJ-1270C into a Layer Three and Four networking node.

VHF and HF Operation
You get high performance VHF and HF modems as standard equipment -- for double fun.

You get a true DCD circuit that dramatically reduces sensitivity to noise and dramatically increases complete QSOs.

Free AC Power Supply
You get a free 110 VAC power supply at no extra cost. With other brands, the AC power supply could cost you an extra $20.95.

New enhanced Personal Mailbox
The enhanced Easy MailT personal mailbox lets you use a dedicated call-sign for your mailbox. Your mailbox can stay on while you operate packet. It will also auto forward or reverse forward mail to and from other BBSs. A check mail LED blinks when you have mail. More features: remote sysop access, sysop paging, mailbox C-text, chat mode and many other features not available in other TNCs. The mailbox memory is expandable to 128K or 512K.

WeFAX gives you Weather Maps
You get a WeFAX mode that lets you print full-fledged weather maps from your HF radio to screen or printer or save to disk using an MFJ Starter Pack.

Plug-in Modem -- 2400 or 9600 Baud
You can add MFJ's optional internal 2400 baud or 9600 baud modem just by plugging it in and making a few simple connections.

KISS interface and MFJ Host Mode
You get a KISS interface that lets you run TCP/IP and MYSYS and MFJ's Host Mode that makes it easy to write efficient application programs.

MFJ Anti-CollisionT Technology
You get MFJ's Anti-CollisionT technology that prevents packet collisions and improves performance on busy channels.

Plus More . . .
You also get 32K RAM, IC sockets for easy service, 256K ROM, speaker jack, lithium battery backup, RS-232 and TTL serial ports, radio cable (you have to add a connector for your radio), Fast-StartT Manual plus much more. Use 12 VDC or 110 VAC. 9" x 1" x 7" inches.

Like new TS450/SAT with YK-88C filter (500 Hz CW, $130 new) installed. All functions are perfect and cosmetics are 9.5 out of 10. Includes factory packing, mike, power cord, manual. Never been "tampered with". Also includes mobile bracket (but rig has never gone mobile).

Asking $650 plus shipping to ConUS by way of your choice.

Also have matching Kenwood MC-60A desk mike ($140 new), $95.

$725 for both radio and desk mike.

I need a smaller rig for the dash of the RV.

I'll consider a trade for a "like new" 706MkIIG.

Will ship on receipt of US Postal Money Order, or when your personal check clears. Will "double box" the original packing to keep it safe.

Email me if you have questions.

73s.....Rudi - WA6RW

From: Marc Webb <kb1d@bellsouth.net>
Message-ID: <1FIM6.43$dL5.295176@news2.mia>
Source record: 5622

I have an ICOM-735 with an AH-2 wire antenna tuner for sale. The S/N of the 735 is 010341, purchased at the Dayton hamfest
04-26-87. have the original recp't. The AH-2 was purchased several years later. They are both in mint condition and work perfectly according to specifications. It was in the car for about 2 weeks. International Radio installed a 2.1 kHz SSB filter with narrow skirts and a narrow skirted CW filter. The all band transmit modification as well as the split frequency logic correction was done. (sorry, no documentation is available).
I have the internal ICOM CW electronic keyer. It is not working but I will include it not installed.
The transceiver was recently repaired by ICOM. The chopper behind the main tuning knob was electrically rebuilt. The radio was tested and met all ICOM specifications.
I am asking $500.00 for the transceiver and $150.00 for the tuner (plus shipping). If I sell the tuner first, I will sell them separately.
As a package I will pay for the first $20 shipping cost.

I live in West Palm Beach, FL. I can deliver or meet ½ way for a reasonable delivery distance.

576. FT: New Yaesu FT-840

Newsgroup: rec.radio.amateur.swap
Date: 2001-05-21 02:57:28 UTC
From: mrbill@mrbill.net
Message-ID: <2b57d96f.0105201857.398a1fd9@posting.google.com>
Source record: 5702

I've got a new (used one week for SWL) FT-840 for trade.

Bought it at the end of February when I got my
bonus from work, in a moment of weakness (and
a sale at the local ham shop). Used it (only
for SWL; I dont have General upgrade yet) for
about a week before I left for my honeymoon;
never even plugged the mic in.

The AM/N mode switch started getting flaky, so I
sent the radio back to Yaesu, who fixed the problem
and sent the unit back to me. I got it back a couple
of weeks ago, and its been in the box here ever since;
been too busy to unpack it and set it back up.

I've realized that I dont really *need* a transceiver
right now, since its going to be at least six months before
I can get around to upgrading to General.

So, the FT-840 (complete in box, all original manuals,
receipts, etc) is up for trade.

I'd like to swap for a comparable transceiver (IC718, older
Icom, maybe a Kenwood) with general coverage receive, or for
a nice receive-only unit (IC-R75, etc). Will consider any
offers of radio equipment; I'd just like to get something
different than what I have now.

If anybody's interested, please email me at the address below
and we can work out a deal.

Bill

Source record: 5703

Hello there, my wife and I are just getting into ham (finally talked her into it, lol). We are looking for some hf gear. We're kind of short of cash because of a transfer, but we have other toys to trade. I'd like to get a nice rig like a Kenwood 940, or along the lines of an Icom 706MKIIG, or Yaesu 100D, or ??? Please check me out on www.grz.com, KD7MXN, or my ebay profile, I have over 90 positives, username gr8rdayz, or see our mugs on our homepage, www.come.to/townsend.com . Here's a list of what we have, PLEASE make offers:

Compaq 1900 Laptop NEW, 3 WEEKS OLD, Pentium III 500 w/256k cache, 192MB Ram, 6.4 GB HD, 13.3 Active Matrix Screen, DVD, Floppy, 56K modem, Ethernet. Windows ME, Office 2000 Premium, Publisher 2000, Painshop Pro 7. We just paid 2 GRAND for this thing (hmmm, maybe that why no money, lol)

S&W 6645 .45 Stainless Semi-Auto, 2 mags, holster, box, 3 dot sights

Kenwood TH75A Dual Ban HT, Almost New Condition, Dual Scan, MARS/CAP modified by Electronics Tech, BP6 and BP8 rechargeable batteries, drop in charger, case, and Speaker/Mic. BOXES FOR EVERYTHING!

Anyhow, that's it. Please send emails to gr8dayz@home.com

Take Care, Ken & Sallie

We finally took the advice of several hams and made a bulk purchase of transmitting crystals from Jan's in order to include them with our Peanut Whistle Two 40 meter QRP CW transmitters for those who don't have a junk box of assorted crystals. We chose the internationally recognized QRP frequency of 7.040 MHz. And we are selling the crystals to you AT COST with the purchase of a Peanut Whistle Two transmitter. Sorry! No individual crystal sales. They are exclusively for PW-2 purchasers. The cost of the Peanut Whistle 2 without crystal is $19.95 plus s&h. For the Peanut Whistle Two that includes the 7.040 MHz transmitting crystal...ONLY $29.95 plus s&h. You're invited to look at photo's of the PW-2 and see further details at our website: http://qth.com/dwm

We were unable to go to Dayton because of prior family and outpatient medical obligations...but our good friends at WORLDRADIO magazine were very kind enough to "pinch hit" and demonstrate/pass out fliers at Dayton regarding our new *Yo-Yo-Tenna Deluxe* Portable Dipole Antenna System. The fliers and the WORLDRADIO ad don't quite match up...yet. The magazine ad still states that this dual wind-up reel antenna is $29.95...POSTPAID. We typeset that ad back before the post office upped its rates. After we found out that they upped not only Priority Mail...but insurance too...we had to add shipping and handling. But currently...at least for a few more days...we will honor the May and June issues advertising the *Yo-Yo-Tenna Deluxe* for just $29.95...POSTPAID.

If you haven't seen the photos in WORLDRADIO, or didn't get our flier at Dayton, you can get an image of what the Yo-Yo-Tenna Deluxe looks like at our website. Just visit the Yo-Yo-Tenna page...imagine two of these wind-up "fishing reel" antennas connected to a piece of insulated tubing/reducer combination (for strain relief) attached to a PL-259. Can connect directly to your rig or your tuner. Works from 2 thru 40 meters. You can purchase additional individual reels to get coverage for 75/80 & 160 by connecting them in series. Great for traveling, camping, vacations, portable & Field Day. Because of its easy-up/easy-down hook-up, its great for apartments and condos. Also great for SWL's!

If you want to order...or have questions...you can call me at 1.517.563.2613. Or e-mail me.

Source record: 5720
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.swap

Yaesu FT-101EE HF transceiver with original manual, microphone and AC power cable.
160 through 10m plus 11m SSB, CW, AM and digital modes. Has built-in 120V AC and 12V DC power supplies, MOX, VOX, PTT, NB, RF ATT, RIT and calibrator for 25 kHz and 100 kHz markers. Metering for plate current, ALC and power output level. This radio also has phone patch connectors in back.

This rig sparkles! It still has the original plastic on the faceplate and the front panel is completely mint. Handle is intact. There is a little dirt on the top but no scratches anywhere on the cabinet.

This is, without a doubt, the best looking, and best working FT-101EE I have seen in years. Looks like it has hardly been used since new. Plastic is still on the front panel which is immaculate.

Works fine on all bands, and all functions are working properly.

Will sell for $325.00 plus shipping

Picture and details available on my web site at:

I have for sale a used Force12 EF-320x/240s. 28' boom, 3 el on 20m, 2 el on 40m, dual feed. Antenna has only been up for about 2 years, has been stored since then. I just re-did
all the hardware, antenna is in excellent shape. Was going to put up but is too big for present tower. Asking $450 plus shipping. I also have a Cushcraft A3S that I retuned to 10/15/17m, can be tuned back to 10/15/20m. I'm asking $200 plus shipping. Both antennas' for $600 plus shipping. I'm in the Atlantic City New Jersey area.

617. Selectronics SB100 "Sound Bridge" Mini FM Transmitter (need mfr. contact info or schematics)

Newsgroup: rec.radio.amateur.swap
Date: 2001-05-28 20:25:21 UTC
From: prototech@usa.net
Message-ID: <9euc7h$6hn$1@news.netmar.com>
Source record: 5742
Cross-posted to: sci.electronics.equipment,sci.electronics.misc,rec.audio.marketplace,rec.audio.tech,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.swap

There used to be a mini FM transmitter made by Selectronics called the "Sound Bridge" model SB100.

I would like to know if anyone might have any contact information from that company or the company from whom these units may have been obtained?

At one point in time, they were sold by All Electronics and by Parts-Express. I have written to both of these companies with no luck.

At some point in time, these units were also given away free to customers ordering a certain CD player or players. If that rings a bell with anyone who might remember which company offered them as a free bonus, that might help me track them down.

I'm looking to either order some in quantity, find a company who made them or distributed them, or find a schematic.

You can see a photo of the SB100 at:
http://mem.tcon.net/users/5010/5491/sb100.gif

Thanks very much,

William E. Miller, ASEET
Chesterfield, Indiana US

Hi all. I have a Yaesu FT-50RD for sale. The unit works fine and
has never been abused. I have ALL the original packing, manual,
antenna and wall charger.

I'll even include the following battery packs, all tested good:

Quantity 2 FNB-47XH: 7.2V 1800MAH NIMH
FNB-49: 6V 600 MAH NICAD (original with radio)
FBA-15: AA cell holder for use with radio, looks like FNB-41

The reason for selling is that my aging eyes just can't read the tiny
print any more (sigh). Price is $225 plus shipping, firm. With the
included battery packs, this is a very good value.

I'm sure you'll like this tiny little powerhouse, don't miss out.
First money buys it.

Neil, K1VY

Message-ID: <3B1408E1.84608374@localnet.com>
Source record: 5749

This FT-847 is one of my 3 rigs, one has to go. Is a late series 8 and late serial #, has 500hz CW filter (455khz) and NEW IN THE BOX FC-20 auto-tuner....never used. Primary use has been SSB-CW on 50-144-432 mhz, but it has been used rarely on HF bands. I recently replaced the POWER switch (a norm for the 847's). No other problems ever, it works as it should, is clean with no dings / scratches etc. I also have IC-756 and IC-706 'G'. Am going to build portable set up for my van to get away from city dwellers and TVI & so on.

FT-847 / CW fil / new FC-20 tuner $1500.
FT-847 & CW fil $1250.
FC-20 only $250.
All above ----plus shipping , unless 'complete set' purchased, I'll split the ship cost. AL K2ERG Rochester,NY

okay looking for a new HT (only had license for 6 months so I am learning still) can't decide between an ICOM IC-T81A or the YAESU VX-5R. The Icom has more transmit but the Yaesu has a larger receive so I wanted to hear oppinions on them both.

Thank You

I "think" the ICOM t81 was pulled from sales, but can't confirm it
yet. O also am looking for T81 quad-band I 'hear' comments
saying they are great 4 bands, but some problems....no idea 'what'
problems. Someone locally said noisey tx and ICOM re-called them. I
have heard good from the VX series unit, but you might want more power
and features. AL

The IC-T81A has not been pulled from the market.

Your choice of HT depends on what you'd like from it. The Icom has 6m/2m/440mHz and 1.2gHz capabilities, the VX5R has 6m/2m and 440mHz with wideband RX. Both rigs offer 5 watts on the bands they share and the Icom gives you 1 watt on 1.2gHz. Both rigs also allow you to listen to the public service frequencies around 2m and 440mHz as well as the FM broadcast band.

If you'd like to experiment with 1.2gHz and there is activity in your area, then by all means go with the T81A. If you'd prefer wideband RX, then your choice would be the VX5R.

I've never heard of any "noisy transmit" problems with the T81A and Icom has not recalled them. The only problems with this rig have been with the battery retaining clip, which would break on early models, as well as the T8. The Yaesu VX5R did suffer from howling audio at high volume levels (which has been corrected) and because of the die cast aluminum case, it gets VERY hot if you transmit on high power for long periods of time. (The T81A also gets pretty hot, but since the case is plastic [but the chassis is aluminum], your hand is insulated.)

I've got a T81A and like it. I was lucky enough to get an early model with wideband RX (50-1000mHz, cell blocked), so I did get a "bonus" with mine. Unfortunately, this feature has been disabled on post April 2000 models.

Hope this helps.

73,
Scott

I have the T81A and most reports are that I am full-quieting if I am within reasonable repeater-range. Works well on 2M and 440, not much on 6M and the 1.2 is most in more urban locales. My ICOM's T81A and R2 make a great team for traveling. NOW, to save money, you may wish to consider the Q7A, which gives you wide receive, 2M and 440 xmit, and makes a good scanner (if you don't care about 6m and 1.2). Can't help you on the VX-5R, but when I was first licensed, I was making the same choice as you are making now.

well it does sound good...but the low power 300mw would be restrective in
range wouldn't it?
I live 70 miles from chicago so would a 6 meter be worth it?
I have a 2 meter now (midland 73-005a) and often have to use 3 watts to hit
repeaters in this area.

Why get "cheap" when you can get the best !!
Tektronix R7603 100 MHz Mainframe, comes with
(1) Vertical Amp (7A18) and (1) Time Base (7B53A),
has room for one more plug-in.
Just released from Cal Lab, works fine, can demo
(with PG-506/TG-501 cal setup).
$125, pickup in Lexington, MA
Packing and shipping extra if you want it shipped.
Thanks, Dick, W1KSZ

I am selling a Kenwood TS-430 that is part of an estate of a Silent Key. The rig was checked out by another ham (as well as myself) and works fine. Cosmetically the radio is in fair to good condition. It has a standard SSB filter also.

It doesn't have a power cord or a mic (apparently it didn't come with a mic originally) however, I just discovered that several auto manufactureers use the exact same power connector in their wiring harnesses. While I haven't gone down to the chevrolet dealership to get the part number, I just located one for my Kenwood TS-440SAT and made a second wiring harness for that.

I have a certian amount of discretion on the selling price however, we are asking $350 plus shipping which appears to be a fair price for the condition.

I hope to have pictures up by 8 PM PDT on 6-7-01. The URL will be:

http://www.eskimo.com/~ghopper/ts430f.jpg for the front

I have some parts left over from the repair and upgrade of my TM-742 and
decided that rather than let them gather dust, I would sell them to
facilitate other peoples repair of their 742(s). I will consider offers.

I have the RF deck case and fan. This is where the two or three band
modules go. I have no band modules for sale. I am asking $100.00 for
this part.

picture: http://www.eskimo.com/~ghopper/tm742deck.jpg

I have the display and control unit avalible. These two parts are in
good to very good condition. I would like to sell them together, however
I would consider selling one or the other piece if the offer was right.
I am asking $175.00 for these two parts together.

picture: http://www.eskimo.com/~ghopper/tm742disp.jpg

I have the backlit, DTMF mic with the RJ-45 connector, model number
MC-53DM. This mic is in like new condition. I am asking $50.00

picture: http://www.eskimo.com/~ghopper/mic.jpg

I have the mobile mount. it is in good condition. I am asking $20.00

picture: http://www.eskimo.com/~ghopper/tm742mount.jpg

I also have the manual which I will sell for $15.00

To summarize, I have the RF deck sans the modules, the mic, the front
display and controls, the mobile mount and the manual.

All items are plus shipping, I ship via USPS priority mail and insurance
will be at your option. All parts are in good condition and they were
all working parts before the great dissassembily!

I have an Icom IC-03AT for sale. It is in good condition and includes the radio, antenna, BC-25U battery charger, an Icom leather case, a photocopy of the manual, and a BP-03 battery. I may have some other batteries for sale as well.

The radio works well and has basiclly been replaced by and IC-3SAT and an IC-38A so the 03AT is surplus to my needs.

Here is a picture: http://www.eskimo.com/~ghopper/ic03at.jpg

I would like to get $150.00 plus shipping but will consider reasonable offers.

I also have a Mirage C-22 amp for the radio. The specs: Freq. range 220-225 Mhz, Power input 0.1 to 5 watts max, output "20 watts or more with 2 watt input and intermittent duty cycle", receive preamp has 10db gain with .5db noise figure. the unit worked very well, but is surplus to my needs now that I have the 38A.

I'd like $120.00 plus shipping for the amp.

I have a 2 meter amp for sale. It is new-in-box as I never got around to using it. It was made for Radio Shack and by all accounts was a good amp and did a superior job of rejecting intermod due to its good receive filter (that's why I bought it). It has all the mounting hardware, etc.

Specs are 1-5 watts in 30 watts out, has receive preamp.

Here's a picture: http://www.eskimo.com/~ghopper/2Mamp.jpg

I'd like $95.00 plus shipping but will consider offers.

This is a wonderful setup for the 1st time ham. Everything that you need to get started in the hobby. I have for sale the following package. (YAESU FT-840) this radio is in mint condition and is only 3 months old. I only have about 3 to 4 hours transmit time on it. Comes with box and manual. (DAIWA swr & power meter 1.8 ~ 150 1500 watts) This meter is in mint condition except for a small scratch on the top of the meter. It has 3 setting for power 15w 150w and 1500watt. (MFJ-941E MFJ Versa Tuner) this tuner is in good condition there are a few scratches. The meter doesn"t work but with the Daiwa swr & power meter you can tune any antenna down to 1 to 1 swr. (MFJ Grandmaster memory keyer Model MFJ- 482B) This keyer is is good shape for its age. There are a few scratches on it but I would give it a 8.5 out of 10. There are 4 memory address so it will free up your hands for these repeated messages. I will send all cables for this item so you will not have to worry about finding the right cables. (MFJ Iambic Key Paddle Modle MFJ-564B) This key has a black base and crome everywhere else. It is in good working order. From a scale of 1 to 10 I would give this item an 8. Buyer to pay... $650.00... for the hole setup..... Will except money order or PayPal only for payment. P.S if you would like a picture of the setup emailed to you just ask.

Like magic, these things keep being uncovered in my shack. Another rig
I'm selling to clear out some of the old, unused, and extra stuff.

The radio is in good condition and I just checked it for function and
power output (which are both just fine.)

I would like $100 plus shipping.

I also have an Astron RS-12A, used with the radio, that I will sell for
$40.00 plus shipping.

Email with questions.

By popular demand, we decided to purchase a bulk quantity of new transmitting crystals from JAN Crystals in Florida to offer along with our *PEANUT WHISTLE TWO* 40 meter QRP CW transmitter. We've chosen the internationally recognized QRP frequency of 7.040 MHz. We are selling these crystals AT COST with the purchase of any "Peanut Whistle Two" transmitter. These are assembled transmitters and more details along with a photo can be seen at our website address below. The cost of a PW-2 with crystal is only $29.95. (Plus $6.95 shipping and handling.) Sorry - no individual crystal sales.

Sorry we don't have it up on the website yet, but we're still looking for a replacement webmaster.

This radio is in perfect working order and has a brand new frequency display. It has a built-in antenna tuner and the 500Hz narrow (CW) filter.

I have used it very little since I live in a townhouse with restrictive covenants. I'd much rather the rig be on the air than sitting in my guest bedroom unused!

You can see a picture at http://www.mindspring.com/~mrmath/pics/radio.jpg.

The rig will include the DC power cable and mic with up/down frequency buttons. Also included are the Service Manual and Instruction Manual. The power supply in the picture is NOT included.

I am asking $575 for the aforementioned radio and accessories. PayPal is preferred method, but I'll also take a Cashier's Check or a Money Order.

Please e-mail mrmath@mindspring.com with any questions about the rig.

Thanks for your interest!

Equipment List
GE Master II Repeater UHF 40 watt. In deskmate case with Power supply but no duplexer.
$500.00
Uniden desktop Repeater. ARN-251 I think. No duplexer. Has CW id installed ready to go on 444.425 and 151.4 PL. $300.00
GE Master II UHF 75 watt with Pre-amp. No crystals (Icoms) No accessories, Painted handle. $75.00 each
GE Delta VHF narrow band 110 watt. With cables, head, speaker, Mic and base mount. $95.00
Motorola Mitrek VHF 110 watt mobiles. With all accessories and 1 set of channel elements. $75.00 each
Motorola Micor VHF 110 watt Mobile. 1 set of channel elements no accessories. $30.00
GE PCS VHF 136. - 150. MHz. 2 channel with battery and charger. $85.00
GE Monogram VHF 157- 170 10 channel. With charger battery bad but tested radio and it is good. (ex CSX radio with CSX engraving on front). $75.00
GE MPI II UHF pair. With chargers and batteries. Programmed on GMRS. $125.00
GE MVS UHF 16 channel scan. Will do ham - GMRS. Works great as I was using this in my van until I installed my Delta. $150.00
GE MPA VHF System model with Aegis encryption. My last MPA and my personal radio. Programmed for ham and scanning public service. 160 channels (the encryption takes away some memory for channel storage). With good battery and rapid charger $350.00
GE Delta control cable. Downloading type. $35.00 each
GE Master II control cable. 8 channel type (plenty of extra wires). $20.00 each
Video recorder lock boxes. These came out of the trunks of police cars and were the box the video recorder was locked in. Have a hasp for padlock and a separate door for inserting the tape. $25.00 each.
GE Master Executive II mobile extender VHF. No Icoms. $20.00 each
Cables for above radio to a master II or Delta. $10.00 each
GE Voice guard box for Delta or Ranger (19A148909P10). $20.00 each
GE Master II Microphones. Will work on Delta or Ranger as well. $5.00 each
Sinclair UHF Duplexer. 4 can 50 watt and on the ham band now. $100.00 or $75.00 if you buy it with a repeater.
I am always happy to consider trades or offers. Shipping is over and above the stated price and I take Paypal as well as cash. Checks have to clear before I ship.

I thought I had a buyer for this rig but, he hasn't answered any emails
in four days so I'm putting the rig back out on the market.

I am selling a Kenwood TS-430 that is part of an estate of a Silent Key.
The rig was checked out by another ham (as well as myself) and works
fine. Cosmetically the radio is in fair to good condition. It has a
standard SSB filter also.

It doesn't have a power cord or a mic (apparently it didn't come with a
mic originally) however, I just discovered that several auto
manufactureers use the exact same power connector in their wiring
harnesses. While I haven't gone down to the chevrolet dealership to get
the part number, I just located one for my Kenwood TS-440SAT and made a
second wiring harness for that.

I have a certian amount of discretion on the selling price however, we
are asking $350 plus shipping which appears to be a fair price for the
condition.

Hello there, my wife and I are just getting into ham, and are looking for a good HF Rig. We're kind of short on cash because of a recent transfer. However, I'm also an NRA Instructor, and as such usually have an excess firearm. We currently have a Smith & Wesson 6645. It's a Stainless Steel .45 Semi-Auto, 2 mags, box, and paddle holster. We'd trade that for the best HF Rig offered. We're not looking for a 706MKIIG or anything, just something with digital readout, and in nice condition with whatever accessories you might have. We have Numerous references, ebay, qrz, other hams, etc. etc. Thanks for looking.

Take Care, Ken & Sallie

FS: Beautiful Condition Alpha 89 HF Linear Amplifier - this is an ALPHA 87A which is a manual-tuned version amplifier, while the 87A is fully automatic.
Amplifier is excellent, covers all individual amateur bands from 160 through 10-Meters. I originally got it to be able to run full break-in CW with my TenTec Omni 6+ transceiver, but now I've picked up an 87A at a price that I couldn't pass up and the 89 is just too expensive a rig to have just sitting around doing nothing. $2950 plus shipping. The amp was checked out by Alpha within the last year, and has full output - 40 to 50 watts gives a full 1500 Watts output on all bands. Factory boxes, manual included. The amp is in Portland, Oregon.

Tis a bit late for posting, but the Midland Amateur Radio Club is holding their annual swap at the Midland county fairgrounds (Midland Michigan) Saturday the 16th of June from 8 till noon, or so. The farigrounds are just West of the US-10 and Eastman road interchange.

Westbound take the eastman exit, go straight across Eastman and you'll be on Airport Road. The fairground entrance is about a 1/3 of a mile west on the north side.
Eastbound, take the Eastman Road exit, turn right on Wackerley St, 1/2 mile to Sturgeon. Turn right, go over US-10, turn right on Airport Road and the fiarground entrance is about 2/3rds mile on the left. (airport Road and Wackerley run right along side the expressway)

We've sold over a hundred tables and it looks like it's going to be very well represented with sellers.

Trunk sales available...Everything from boat anchors to computers.

Come on up to enjoy the hospitality.

Talk in on 147.00.

704. New Auction and Classifieds website by W9RAT

Newsgroup: rec.radio.amateur.swap
Date: 2001-06-17 16:11:33 UTC
From: mike@theauctionblock.tv
Message-ID: <361c16bf.0106170811.63b61b75@posting.google.com>
Source record: 5531

www.theauctionblock.tv

My wife and I collect alot of stuff...antiques, dolls, glass,
electronics, ham gear. Like you, we registered for several of the online
auctions (ebay, yahoo, etc.), and then bought and sold several items.
We never liked the complicated ebay fees (you need an accountant to
figure out what you owe), and then they added a fee for a reserve price?..
that was the last straw for us.

I recently started an online auction and classifieds site as an
affordable alternative to the "auction madness" being practiced by the
large online auction sites. It's a general auction, with a free classifieds
section. Never a commission or final valuation fee. We have all the
important features (several types of auctions, proxy bidding, auto-notification
email, search engine, user ratings system, and more),free membership, and
you don't need a credit card.

We'd love for you to join, but even if you don't, please take a look and
give us your thoughts, feedback, suggestions, etc. We don't believe in the
"high pressure" or "heavy handed" tactices of the "big boys"!

Mike

You may have seen it featured in WORLDRADIO or demonstrated for you at Dayton by them. It's the NEW Yo-Yo-Tenna Deluxe. TWO wind-up "fishing reel" antennas connected to a silver-teflon PL-259 with reducer and shrink tubing for strain relief. Connects right to your rig or your tuner! Covers 2 thru 40 meters with or without tuner! Use it with or without coax!!

I don't have the DELUXE model up on the website. I'm still searching for a new webmaster. However, a photo and description of the regular model is there. So just imagine two of these together to make a Portable Dipole Antenna System! Cost is ONLY $29.95 plus $6.95 shipping, and I can ship them out Priority U.S. Mail so they get there by Field Day. (If you order by today or tomorrow.)

If you want to add more individual reels for coverage of 80/75 and/or 160 dollars, I can do that without adding any additional shipping. For more details visit - http://qth.com/dwm

I am selling a Kenwood TS-430 that is part of an estate of a Silent Key. The rig was checked out by another ham (as well as myself) and works fine. Cosmetically the radio is in fair to good condition. It has a standard SSB filter also.

It doesn't have a power cord or a mic (apparently it didn't come with a mic originally) however, I just discovered that several auto manufacturers use the exact same power connector in their wiring harnesses. While I haven't gone down to the Chevrolet dealership to get the part number, I just located one for my Kenwood TS-440SAT and made a second wiring harness for that.

I have a certian amount of discretion on the selling price however, we are asking $350 plus shipping which appears to be a fair price for the condition.

I have a 2 meter amp for sale. It is new-in-box as I never got around to using it. It was made for Radio Shack and by all accounts was a good amp and did a superior job of rejecting intermod due to its good receive filter (that's why I bought it). It has all the mounting hardware, etc.

Specs are 1-5 watts in 30 watts out, has receive preamp.

Here's a picture: http://www.eskimo.com/~ghopper/2Mamp.jpg

I'd like $75.00 plus shipping but will consider offers.

I have an Icom IC-03AT for sale. It is in good condition and includes
the radio, antenna, BC-25U battery charger, a photocopy of the manual,
and a BP-03 battery.

The radio works well and has basicly been replaced by and IC-3SAT and
an IC-38A so the 03AT is surplus to my needs.

Here is a picture: http://www.eskimo.com/~ghopper/ic03at.jpg

I would like to get $135.00 plus shipping but will consider reasonable
offers.

I'm cleaning out the shack in preparation for a remodeling project.

I have a Mirage C-22A amp that I was using with my old IC-03AT.

The specs: receive preamp has 10db gain with .5db noise figure. Freq. range 220-225 Mhz, Power input 0.1 to 5 watts max, output "20 watts or more with 2 watt input and intermittent duty cycle". The unit worked very well, but is surplus to my needs now that I have a 38A.

I'd like $85.00 plus shipping for the amp.

Another shack cleaning special!

I have a Yeasu FT-270RH that I bought receintly as a part of a collection of other gear. I really don't need another 2 meter radio so I'm selling this one. I tested the radio's function and power output and everything seems to operate the way it should. I used the radio for about 4 days last week and had no problems programming, accessing repeaters and having lengthy QSOs.

I would like $100 plus shipping for the radio. If you need a picture, I can take one and upload it to my webspace for your viewing.

Here we have another spammer. It misleads
in the subject line by saying this item
is FS "OR" For Sale "OR" misleads and
indicates said item is for sale when it
is actually FA = For Auction. The FA is
used by those of us that do not Do Auctions.
We set our spam filters for FA in the subject
line and we do NOT have to see the auction
spam. Do not trust this person.

"If they Lie in the subject line"
They will have no problem misrepresenting
the JUNK they have at the Auction..

If you have received this message it is
because I saw a subject line that interested
me and when I downloaded the message
It was nothing more than your auction SPAM
and was NOT what the subject line said it was.

Some of the Real Sleazy people will make
it look like a reply to another message.

Easiest way to avoid this message?
Do NOT LIE in the subject line..

Just My Opinion..

I am selling a Kenwood TS-430 that is part of an estate I receintly acquired. I was primarily interested in other equipment but, it was an "all or nothing" type of deal.

The rig was checked out by another ham (as well as myself) and works fine. Cosmetically the radio is in fair to good condition. It has a standard SSB filter.

It doesn't have a power cord or a mic (apparently it didn't come with a mic originally) however, I just discovered that several auto manufacturers use the exact same power connector in their wiring harnesses. While I haven't gone down to the Chevrolet dealership to get the part number, I just located one for my Kenwood TS-440SAT and made a second wiring harness for that.

I am asking $350 plus shipping which appears to be a fair price for the condition, however I would like to sell this radio so I will consider reasonable offers. I have two pictures.

Date: 2001-06-20 17:52:20 UTC
From: GaryH <garyhendricks@hotmail.com>
Message-ID: <Yj5Y6.18095$9r1.1627667@e3500-atl1.usenetserver.com>
Source record: 5455

I have had a situation arise that requires me to sell my entire
station.

Items are:

Ameritron ALS-600 solid state amplifier and power supply. In good
condition with some light scratches on the covers. Was back to
Ameritron for a new final and check out. $800.00 (quite heavy)

Icom IC-746 About two months old. In NEW condition and works
great. No filters or options. $1090.00 (Shipping weight 26 lbs)

W9INN Balun (MFJ model 912) $30.00

MFJ model 817 VHF/UHF SWR Wattmeter $50.00

MFJ Model 264 1 Kw dry dummy load 1-650 Mhz. 45.00

Daiwa RS-40XII 40 Amp adjustable power supply. This thing
is a brute and performs and looks good. $100.00

I also have an old LUNAR 2 meter amplifier. The RF preamp section
does not work but amp has good power output. it's a model 2M30-160P.
Make me an offer.

I have an extra BC-35 rapid charger, in it's box, that is surplus to my needs. The charger works great and and is in great physical condition (case not cracked, metal not bent, no excessive wear.)

I'd like $55.00 plus shipping, but I will consider all reasonable offers because I would like to sell it.

I have an Icom IC-03AT for sale. It is in good condition and includes
the radio, antenna, BC-25U battery charger, a photocopy of the manual,
and a BP-03 battery.

The radio works well and has basicly been replaced by and IC-3SAT and
an IC-38A so the 03AT is surplus to my needs.

Here is a picture: http://www.eskimo.com/~ghopper/ic03at.jpg

I would like to get $135.00 plus shipping but will consider reasonable
offers.

I'm cleaning out the shack in preparation for a remodeling project.

I have a Mirage C-22A amp that I was using with my old IC-03AT. The amp is clean and works fine.

The specs: receive preamp has 10db gain with .5db noise figure. Freq. range 220-225 Mhz, Power input 0.1 to 5 watts max, output "20 watts or more with 2 watt input and intermittent duty cycle". The unit worked very well, but is surplus to my needs now that I have a 38A.

I'd like $85.00 plus shipping for the amp but, I will consider reasonable offers and trades.

I am selling a Kenwood TS-430 that is part of an estate I receintly acquired. I was primarily interested in other equipment but, it was an "all or nothing" type of deal.

The rig was checked out by another ham (as well as myself) and works fine. Cosmetically the radio is in fair to good condition. It has a standard SSB filter.

It doesn't have a power cord or a mic (apparently it didn't come with a mic originally) however, I just discovered that several auto manufacturers use the exact same power connector in their wiring harnesses. While I haven't gone down to the Chevrolet dealership to get the part number, I just located one for my Kenwood TS-440SAT and made a second wiring harness for that.

I am asking $350 plus shipping which appears to be a fair price for the condition, however I would like to sell this radio so I will consider reasonable offers. I have two pictures.

FOR SALE:

Hallicrafters SX-110 Receiver - extra sharp. Works well.
Face plate is in excellent shape.

All knobs original. Even the TUBES are original and marked
"Hallicrafters" in red!

For its age this radio does not have a lot of time on it. You can
tell. There is no rust or crud. Somne very minor pitting a couple of
places on the chassis but hardly noticeable.

The case is in great shape. It has a few superficial scuffs on
the top but I think these would easily polish out.
The dial is immaculate. Every control and function works properly
and the receiver is at least a 9 out of 10. Included is a
reprint manual, that includes all instructions and
the schematic diagram.

Will sell for $165.00 plus shipping

(Picture available)

Hello all, I have up for auction on ebay a Yaesu FT 301 S, QRP rig, in very good condition.

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1249418528&r=0&t=0&showTutorial=0&ed=993967526&indexURL=0&rd=1

There's 3 pics of the unit posted on ebay. Please check it out, I have over 90 Positives and NO negatives. If someone came up with interesting trades BEFORE someone bids on ebay, I'd consider a trade. Some of the things I'm looking for are a ham accessories, ie. mics/spkrs, etc. mostly for Kenwood. A dual band handheld. Possibly another 2 Meter mobile rig. An HF mobile antenna setup, etc.

Take Care, Ken & Sallie

FS - UHF Repeater

WR Communications WR-90 UHF repeater. Looks identical (less color) to Glenayre. Even the part numbers are the same (OEM???)

Unit is a rack mount Chassis complete with the following modules

9T90B4 UHF TX (4W 406-512Mhz)
9R90C UHF RC (406-512Mhz)
RCL-54B Repeater Control Module
RTC-54B CTCSS Tone Control Module
RTA-54B CTCSS Encoder/Decoder (programmable - enc/dec may be different)

***** INCLUDES FULL SERVICE MANUAL PHOTOCOPY FOR ALL MODULES *******

Manual includes operating and alignment instructions, schematics, parts lists, etc.

Unit is in good condition and was working when removed from service ~2 years ago. It has been stored inside since then. We're moving and the XYL says some gear has to go!! This item sold AS-IS. Add a power amp and duplexer and you're on the air!

Price: $250US + Shipping to US addresses only

SPECIAL!! - Pay via PayPal and receive free UPS ground shipping/insurance. Other payment methods add fixed $25 shipping.

********** Panel Meters **********

Analog Devices AD2004 4½ Digit LED 2 (1.9999) volt Panel Meter; NOS w/ data sheet $40

Datel DM-3100L-7089 3½ Digit LED Panel meter; range & condition unknown. $10

FLW Model 204B2, ER2 & model 204B-2D1,ER2,01 digital panel meters w/internal 120VAC power supply. 4 digit display plus a minus sign; 3½ or full 4 digits ?? Full scale unknown-- $25 pair

GE 50-283013MTMT1 3" thin edgewise panel meter 10V scale NOS in old box -- $15

GE DW-44 2" round 8A RF Ammeters w/ internal thermocouple $15 ea
2" round 3A RF Ammeter w/ internal thermocouple $15

GE 50-240001AAAA1 2" round 100000 Hour Running Time meters 120VAC 60Hz NOS $20 ea

A.W. Haydon miniature 10000 Hour running time meter. Case is about 1/2" square (except for mounting flange) by 1" deep. 115VAC 400Hz NOS $15

Hobbs 120 VAC 60Hz 100000.00 (Yes, displays down to 100th's!) Hour running time meter about 1" high by 2" wide rectangular with triangular shaped mounting ears. NOS $20 ea

Motorola 52B892096 3½" Square Meter (movement actually made by Simpson). This is some kind of tuning (or deviation?) meter with a 12 pin connector (like a 9 pin miniature tube outline plus 3 extra pins in the center) wired to the meter. $15

Simpson Model 45 3" round VU meter $20
3" sq modern plastic 500-0-500ua movement w/ 50-0-50 scale -- $10

Triplett 320-G 3½" rectangular. 50-0-50 ua -- $15

Triplett 321T 1 Amp 3.5" Round meter NIB -- $20

Triplett 327T 10 Volt 3" Square meter NIB -- $20

Westinghouse 3½" Square RX-35 series meters, used -- $10 each

15 VDC 20 VAC 35KV (2mA full scale on this last unit)

Westinghouse 2" round 9A RF Ammeters w/ internal thermocouple $15 ea

Weston 507 2" round 3A RF Ammeters w/ internal thermocouple $15 ea

Weston 301 3" square 3A RF Ammeter (requires external thermocouple that I don't have) $7

All of the above plus shipping, if necessary, naturally.

762. FS: Coax Connectors & Coax Relays

Newsgroup: rec.radio.amateur.swap
Date: 2001-06-26 17:40:19 UTC
From: Marv_E_Ads@Juno.com
Message-ID: <9hahe3ink1@news.netmar.com>
Source record: 5491
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

******** Used Coax Connectors *************

These are mostly used, fairly clean, (at least 80%) Amphenol parts.
There are anywhere from about 4 to 25 of each type available.

PL259's UHF male cable connectors (new) -- $1 ea
UHF female - UHF female barrel connectors -- $1 ea

UHF male - BNC female adapters -- $2 ea
UHF female - BNC male adapters -- $2 ea
UHF elbows -- $2 ea
UHF F-M-F Tees -- $2 ea
UHF female - N male adapters -- $2 ea

Andrews Heliax UHF connectors 1/2" 44AP male -- $10 (last one)

UG-57B/U N Male-Male connector -- $4 ea

UG-635/U C Female - BNC Male adapter -- $5 ea

UG-636A/U BNC Female - C Male adapter -- $5 ea

UG-259A/U 91836 -- HN female to LC female bulkhead adapter -- $30

SMA Female-Female Bulkhead connector -- $1 ea

********* New Coax Connectors ***********

UG-1213/U HN Male Cable connector NOS -- $10

Kings KH-39-11 HN Female Cable connector NOS -- $10

Below are all new crimp on connectors, with all hardware, in individual
plastic bags; early-mid 1990's date codes.
I believe that they are all for RG-59 size cable.

Kings Electronics

KC-59-642-M06 BNC Cable Male -- $1 ea

KA-59-385-M06 TNC Cable Male -- $1 ea

KA-19-43 TNC Bulkhead Female -- $1 ea

********* Coax Relays **********

These all have (3) UHF connectors. They are somewhat old looking on the
outside but,
I popped the inspection port on each and all the contacts are all happy.

And they all go "clunk" upon application of the appropriate voltage.

Dow-Key DK-60 style
110-115 VAC coil -- $30

Advance (same style but, heavier contacts & construction)
115 VAC coil -- $30

All of the above plus shipping, if necessary, naturally.

764. FS: Old Radio Books & Catalogs

Newsgroup: rec.radio.amateur.swap
Date: 2001-06-26 17:43:09 UTC
From: Marv_E_Ads@Juno.com
Message-ID: <9hahjdivg1@news.netmar.com>
Source record: 5489
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

********** Old Radio Books & Catalogs **********

Radio Amateur Callbook V62 #1 -- US & DX listings 1984. Just a bit of wear at the corners. $20 (2 books)

Handbook of Electronic Communication by Gary Miller, Prentice Hall 1979. Hardbound, very good condition, owners name written on frontleaf, 339 pages. $15

Understanding Amateur Radio by George Grammer, ARRL. Second Edition, Second Printing, 1976. Excellent condition, 300 pages. $8

Radio Amateur Callbook V41 #2 -- DX listings only 1963 Front cover a bit torn up and it looks like something heavy was resting on it for 20 years. Insides OK. $7

RCA HB-3 Tube Handbook
Loose leaf 6 ring binder style data sheets starting in the late '40's with additions and
updates through October 1966. Sepatate sections cover Transmitting Tubes, Receiving Tubes (Part 1 & 2),
Industrial receiving tubes, Photosensitive devices, Thyratons & such, CRT's & Picture tubes,
Miscellaneous types, & semiconductors. The updates appear to have been made in all
these sections except Picture Tubes which is somewhat disorganized. It also appears that the
obsolete data sheets were kept for reference. The whole collection is about 30" wide on a shelf.
Shipping weight will be 20 lbs. Excellent condition; mostly never read! One gotcha - No binders. $250

Amateur Single Sideband by Collins Radio. 1962 Hardbound. Excellent condition except owners name in ink on p.106. 143 pages. $50

Heathkit Catalogs
1954, 55, 56, 57, 58, 59 &
Fall-Winter '62-63,
Xmas '89 + Winter, Spring, Summer '90 $100 all

Handbook of PREFERED CIRCUITS
Navy Aeronautical Electronic Equipment
vols. 1&2 (1955 tubes & 1962 transistors)
very good condtion $40

Electrical Fundamentals (AC) TM11-681 US ARMY Technical manual. December 1951. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 231 pages. $10

A Course in Radio Fundamentals by George Grammer, ARRL. Third edition, 1948. Good condition except cover taped at spine, owner's name written on front. 300 pages. $8

Surplus Radio Conversion Manual Vol. 2 1948 Good condition, 125 pages. $25

Radar Electronic Fundamentals T.O.16-1-195 US Navy Technical manual. June 1, 1944. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 474 pages. $20

Tuned Circuits by J.M. Quinn, 1943. Small hardcover book 52 pages. Very Good condition, one page is punched with Los Angeles Public Library ID. $15

Most Often Needed 1926-1938 Radio Diagrams, originally published by Supreme Publications 1941. This is a REPRINT, by Vintage Radio.
240 pages, solid schematics! Like new, $20

Radio Television Supply Company catalog #15 (1940?) (they used to be in downtown Los Angeles). Small tear at the top of the spine, otherwise in very good condition.
256 pages. $25

RCA RC-14 Receiving Tube Manual 1940. Front cover rough and half of spine cover missing. Insides good. 255 pages, $15

RCA TT-3 Air-Cooled Transmitting Tubes 1938 copyright
overall good condition w/slight damage at top & bottom of
spine & first 20 pages of lower right corner. 192 pages -- $25

Radio Supply Company catalog #10 1938? (they used to be in downtown Los Angeles) Front cover loose, back cover missing. 160 pages $15

Radio Television Supply Company catalog (1937?) (they used to be in downtown Los Angeles). A couple of spots on the cover otherwise in very good condition.
172 pages. $25

Advanced Laboratory Practice in Electricity and Magnetism by Earle Terry, McGraw Hill, Third edition, 1936. Hardbound, 318 pages. $15

Radio Supply Company catalog 1934 (they used to be in downtown Los Angeles) -- a little smudging on the back cover and two middle pages torn on the edge but, otherwise in fine condition. There is a sticker from the (original?)
owner on the first inside page. 85 pages, the last 10 or so of which are receiving and transmitter tube data from the era. $20

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet Excellent condition 20 pages or so $10

Elin company overview book 1932
very good condition except cover is almost loose

Text is in GERMAN. Lots of photographs of electrical equipment,
tools, machinery, and construction projects.
128 pages $10

Radio Amateur's Handbook Ninth Edition 1931. Has a typewritten note glued to the frontspiece stating that it belongs in the radio room of the USS Maryland (which was moored just inshore of the USS Oklahoma on the first Pearl Harbor Day). Cover somewhat rough, torn at spine, index and first two chapters missing up to page 24, otherwise good, no writing nor torn pages. Softbound, about 200 pages left. $500

Radio Doings Call Book Spring 1931 edition
cover taped at spine, otherwise very good
50 pages $15

Radio Amateur's Handbook Sixth Edition 1929. Cover a little worn at edges and on spine otherwise excellent, no writing nor torn pages. Softbound 225 pages. $125

Radio Doings Vol 15, #1 June 1929 edition
cover, first two & last two sheets missing otherwise o.k.
pages 5-62 remain $10

Official Radio Service Manual 1930, originally published by Gernsback Publications. This is a REPRINT by Vestal Press, 1984. Schematics & some service info. 352 pages, like new $20.

All of the above plus shipping, if necessary, naturally.

********** Four straight Keys **********

A SpeedX with a rectangular base. Note crack in left pillar casting does not affect functionality. $15
Photo on display at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Speedx1.jpg&.src=bc&.view=t&.hires=t

A SpeedX with an oval base; Note, the tune lever is missing its knob. $15
Photo on display at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Speedx2.jpg&.src=bc&.view=t&.hires=t

A Military Key marked SC1184A on the bottom. Color is not really as "brassy" as in the photo. $15
Photo on display at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Milkey.jpg&src=bc&.view=t&.hires=t

A Key made in Japan. $15
Photo on display at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Jkey.jpg&.src=bc&.view=t&.hires=t

********** Two Old Bugs **********

The first is an old Vibroplex Original, sn 144779, complete and working. It looks kind of bad in the photo. It looks just about as bad in the real world. I think the base would buff up fairly well if the superstructure was removed for the operation. It is otherwise complete & working. I believe It dates from 1945... per a web site list. Asking $100.

The Vibroplex may be seen at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Vibroplex.jpg&.src=bc&.view=t&.hires=t

The second bug is of unknown manufacture on a brass base. I've checked with several bug experts on the web and none seem to know its origin. There is at least one other unit of its style in existence so it is not some one-of-a-kind homebrew. It is compete and working. Asking $200

This Bug may be seen at:

http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Bug.jpg&.src=bc&.view=t&.hires=t

********* And two electronic keyers... *********

These both seem to work, at least as far as the internal monitor speaker.
I didn't take the time to hook them up to transmitter.

Hallicrafters HA-1, "T.O." keyer, with original manual. $60.
Photo on display at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=TO-1.jpg&.s
rc=bc&.view=t&.hires=t

Ham Radio Center, Ham Keyer model HK-5A (uses Curtis chip) batteries not
included -- uses 4 C cells. $30
Photo on display at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=HK5A.jpg&.s
rc=bc&.view=t&.hires=t

All of the above plus shipping, if necessary, naturally.

Cushcraft A3S 10/15/20 meter 3-element yagi. New partially assembled
and put back in the box.New condition asking $200 for the A3S plus $100
for A-743 kit shipping will be free of charge!

768. FS: Diamond RH77CA dual-band HT antenna

Newsgroup: rec.radio.amateur.swap
Date: 2001-06-27 04:54:02 UTC
From: wvfr@hotmail.com
Message-ID: <fe266342.0106262054.3d7b2497@posting.google.com>
Source record: 5495

I'm selling a mint condition Diamond RH77CA dual-band 2m/70cm HT antenna. It's a quarter wave on 2 meters and a half wave on 70 centimeters. It's black in color and about 15 inches long. Reason for selling: I didn't like a longer whip antenna on the HT. If you want a high-gain, high efficiency antenna for your HT, this works great, very little use. Worked UO-14 mobile with it, so it works! It also works as an 8-band wideband scanner antenna. I'll sell it in the original packaging for $25 shipped to any QTH in the CONUS.

If you're interested, email me @ tek_guy@hotmail.com.

73s,

Jim
KG4NEL

769. WTT Video/Surveillance Gear for Radio Gear

Newsgroup: rec.radio.amateur.swap
Date: 2001-06-27 16:06:47 UTC
From: Ken & Sallie Townsend <gr8dayz@home.com>
Message-ID: <rwn_6.257114$p33.5173988@news1.sttls1.wa.home.com>
Source record: 5496

Hello everyone. We're looking for more radio gear (newbie, so just about anything). Unfortuneately, cash is not at an all time high. I'm taking my General on the 11th, and my wife is taking her tech. So, WE WANT MORE GEAR. What I have to offer is a Commercial High End Color Surveillance system. When I say high end, I mean gear that is federally approved for financial institutions. I have a set that we pulled from service recently that sold 4 years ago for over $10,000. Used I would sell it for about $2,000. HOWEVER, I'm willing to deal way less than that for some nice gear if you're willing to trade. Here's what I'm offering:
Navco SVHS Time-Lapse VCR w/s-video
Navco Color Monitor w/s-video in/out
6) Navco Hi-Res Color Cameras w/lenses and PS's
6) Camera Wall Mounts
Pelco 8 Position Camera Switcher
Detailed intructions on how to hook up. Very simple really.

Anyhow, we're open to ANY offers. I'll pay shipping on this end, which won't be cheap because of the weight of all combined. You pay shipping on yours. PLEASE CHECK MY REFERENCES. I have numerous HAM references, and you can also check me out on ebay. I have over 90 Positives, and NO negatives, username gr8rdayz.

Thanks for your time.

Hi all. I have a LOADED Drake TR-7 with PS-7power supply and external MS-7 speaker in excellent, no-compromise condition that I'd like to trade for a like condition ICOM IC-706 MKII G transceiver.

This TR-7 is cosmetically and functionally outstanding, and has the full complement of 4 filters, NB-7 noise blanker and Aux-7 range module. Manual included.

The TR-7 was the ultimate Drake transceiver; easy to operate and very high-quality construction throughout. On Ebay a TR-7 with these options would fetch upwards of $1000.

Give me a call, let's see if we can do a trade.

Thanks!

Neil, K1VY

I have a rohn 25 tower. 3 full sections 1- 5' section.
the Glen Martin Hazer H-2 with the roller bearing wheel kit installed.
1- 7 element 5 band beam 20-10 meter beam 40' long built by KMA Antennas

in New London N.C.
1- 40 meter rotatable HI-Gain Antenna
1-AR-10 Ringo 10 meter vertical.
1- Hy-Gain IV rotor and control box.
Everything in still in the air but with the hazer on the tower no
problem to take antennas down.
Reason for selling relocating.
Buyer must pick-up local Greensboro north carolina and take down I will
help with the take down and loading on your truck or trailer.

Thanks for reading my post.

I have a MINT condition ICOM IC-737 General Coverage HF Transceiver, includes built-in antenna tuner, wiring harness, owners manual, no mic (MIGHT have a stock mic around).

Would like to trade for a MINT condition Kenwood TS-940SAT. If your looking to UPGRADE to a NEWER HF rig, here is the perfect rig! Nothing at all wrong with my IC-737, had the Kenwood TS-940SAT as my first rig, and would like to have another!

73 Daniel KC4OXP

If interested, please email me directly at ngwd@ngwd.com

811. LOOKING FOR RADIO GEAR, I'll make you an AWESOME Deal

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-07 17:54:43 UTC
From: Ken & Sallie Townsend <gr8dayz@home.com>
Message-ID: <D1I17.313270$p33.6243969@news1.sttls1.wa.home.com>
Source record: 5438

Hey all, the wife and I are looking for radio gear. Cash isn't at an all time high, if you know what I mean. So, I'm willing to make someone an AWESOME deal, if you could use any CCTV gear. Maybe for surveillance, ATV use, whatever. That's what I do by trade, and I have about $12,000 worth of excess gear, ie. color cameras, b&w cameras, switcher, monitors, time-lapse vcr, etc. I'll trade it ALL for some radio gear. I could use just about everything. Would really like a nice base rig, but any is considered. The gear is just taking up space. I have LOTS of references, including over 90 Positives on ebay, and NO negatives. Please, make offers on what you have.

Take Care, Ken & Sallie

UseNet Policy

eBay users may not post on Usenet groups (Internet newsgroups) to
advertise eBay or an eBay
listing that is inappropriate or violates the Usenet board policy. If
Usenet abuse is reported to eBay,
we may among other remedies) remove the listing, issue a warning,
temporarily suspend or
indefinitely suspend the offender's eBay account.

We have no tolerance for UseNet abuse and will take action as
appropriate. Please note that we
can only take action in cases where it is clear that an eBay member has
posted to the Usenet
inappropriately.

Usenet abuse should also be reported to your ISP (Internet Service
Provider) and the email
provider of the person posting on the Usenet. Both of these
organizations are in a much better
position to prevent future Usenet abuse. Generally, you can send email
to abuse@"ISP".com to
properly report perceived violations.

Bob,

Ebay is not posting so it is not an ebay ad. It is the individual amateur radio operator posting that their equipment is up for sale and the sale is being conducted through ebay. It's ham radio equipment being offered for sale. I just do not understand what peoples' hangups are with this. Just ebay bashing and punishing the amateur as a way to "get back at them"? Why people get so upset of auction or for sale postings is beyond me. Ham radio is about communication among other things. Let people communicate.

JMHO

Bob,

When you say "they" in the context of newsgroups, who are "they"? I have never seen a survey conducted in any of the 30+ newsgroups that I read that asks me what are appropriate postings. Many of the ham radio newsgroups were around before ebay was even started. So it is inconceivable that some mysterious policy on ebay postings was placed in the FAQ when the newsgroup(s) started. Seems to me all the users should decide, not just one individual.

Again, MHO

So Bob. In those 25 newsgroups do read EVERY post online?

Also you would rather spend the time on these 25 newsgroups sending
complaints about what BOB doesn't like rather than take a few seconds
with FreeAgent and set up a filter to eliminate from your eyes ALL FA
posts?

Oh...I see what you are now.

This is the criteria I use to Inform people when they are off topic
by posting ads about ebay. I think it is fair, the Liars do NOT..

"If you have received this message it is
because I saw a subject line that interested
me and when I downloaded the message
It was nothing more than your auction SPAM
and was NOT what the subject line said it was.

Some of the Real Sleazy people will make
it look like a reply to another message.

Easiest way to avoid this message?
Do NOT LIE in the subject line"

Don't you think this is fair???

I do and I live by it...

Just my opinion..

Bob

823. FS: Grundig YB400-PE comm receiver - $140 shipped

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-09 18:22:00 UTC
From: tek_guy@hotmail.com
Message-ID: <cbf4a67d.0107091022.72265809@posting.google.com>
Source record: 5450
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.swap,rec.radio.amateur.equipment

I'm selling a Grundig YB-400 PE communications receiver in very good condition. It has some normal use wear marks on the top part of the cabinet, but nothing that is obvious or noticeable. It comes with accessories; Koss earphones (better than the Grundig ones that came with it), 23 foot reel antenna for improved shortwave reception, and an AC adapter.

I'll sell it with all accessories for $140 shipped to any location in the CONUS, AK extra. I'd like payment in a postal money order...no checks.

It works excellent; I've been able to tune the major international broadcasters, plus a pirate or two...it also has great SSB detection for hams. I'm selling it because I'm getting a FT-840 and I'm low on cash, so the Grundig has to go. Too bad, because it's a great portable.

If you're interested, email me at tek_guy@hotmail.com

Here's the problem & what I have changed & checked...
Unit receives & shows signal, I can faintly here a tone when injected
with signal generator, but there is no volume adjustment.
I have checked the following and all are in working order...
Replaced audio amp, replaced volume switch, checked speaker and wires,
Also have the same results when using an external speaker.
This is the odd part..
When roger beep is enabled, I can hear it and adjust the loudness of
the tone as heard through my internal speaker with the volume control.
I don't recall being able to hear the roger beep prior to this volume
problem.
If you have any serious solutions or can help me out, please contact
me direct at...
tramd300@goingplatinum.com

Thank you in advance...

Hi folks.

I guess I just got one too many linears, so here's your chance to pick up a beaut. It's a really nice L4B that's clean, works right, and your satisfaction is guaranteed. The power supply has been updated (by someone before me) with new diodes with bypass resistors, new capacitors plus a new glitch resistor, the right kind of course.

The amp itself has a pair of genuine well-matched Eimac 3-500Z tubes, and they test out great on all bands, 80-10. The front panel is the newer design, and all of the controls work smooth and perfectly, including (of course) the power switch.

I don't plan to make a cent on this one, I just hate to see it sit unused. I would prefer a local pickup in Southern NH, but I will ship if needed at your cost. I've got $725 in this thing, and that's my price. You get all the cleanup, testing, etc that I did FREE, plus 10 days to make sure you like it. Manual included.

Please contact me at (800) 962-2949 or (603) 465-2788

Thanks!
Neil, K1VY

I am looking for a replacement battery pack(s) for a Heath HW24HT radio.
The battery pack says: (exactly as it is on the label)

HEATH
NICAD BATTERY PACK
HWA 110
9.6V 450mAh

I would be looking for an exact replacement battery or even more powerful one and also it would be nice to know if there is a battery pack where standard AAA or AA batteries could also be used too. I am interested in also finding a better antenna for this 2meter/70cm radio than the rubber ducky it has.

I am also looking for battery packs for the ICOM IC-T7H HT and also dual band antennas better than the rubber ducky antenna too.

Heath originally sold the standard battery pack and a higher voltage battery pack which was taller, plus they had a shell to hold six AA batteries. I don't have my old HW24HT or manual handy to check for part numbers. The radio itself and the batteries packs were made by Standard. Some of the ham battery dealers probably still have packs for the radio. You might try somewhere like Mr NiCad.

As for the antenna, the HW24HT uses a standard BNC connector so you should be able to get just about any sort of antenna you'd like. The original antenna used a loading coil in a rigid plastic base and a thin flexible "rubber duck" element about 6" long. The radio isn't terribly fussy and will transmit into just about anything resembling an antenna - I think it would probably work into a piece of wet string if you cut it near a quarter-wavelength.

FOR SALE:
Lafayette HA-225 Receiver in very good condition.

Has general coverage and also bandspread for the amateur bands.
1966 era. Has Five (5) bands: 150-400kHz, 1.6-4.8MHz, 4.8-14.5MHz,
10.5-30Mhz, 48-54MHz

Additional bands for bandspread on the amateur radio bands.

14 tubes: 6AQ8 (6m rf), 6BL8 (6m mix/osc), 6BA6 (rf), 6BE6 (mix), 6AQ8
(Q-Mult/Calib), 2
6BA6 (if), 6AL5 (det, anl), 6BE6 (pro det.), 6AQ8 (af,bfo), 6AQ5 (af
out),
0A2 (reg),
6CA4 (rect)

Interesting design in that it covers all the way up through 6 meters,
and it has the output transformer mounted diagonally to minimize
hum from power transformer.

See: http://member.nifty.ne.jp/hanazawa/radio/lafayette/

Will sell for $95.00 plus shipping

Also have a Lafayette external speaker to go with it.
Model 99-2521 - matches their classic receivers. Excellent condition.

Will sell for $20.00 plus shipping

Pictures available

Takk about memories. For those interested in trivia this
radio was good on 6 meters.. The one I had was like
the picture and the two tube sub chassis (right front in pic)
is an International crystal 6 meter converter. at least the
earlier ones were.They may have made their own later.

Here we have another spammer. It misleads
in the subject line by saying this item
is FS "OR" For Sale "OR" misleads and
indicates said item is for sale when it
is actually FA = For Auction. The FA is
used by those of us that do not Do Auctions.
We set our spam filters for FA in the subject
line and we do NOT have to see the auction
spam. Do not trust this person.

"If they Lie in the subject line"
They will have no problem misrepresenting
the JUNK they have at the Auction..

If you have received this message it is
because I saw a subject line that interested
me and when I downloaded the message
It was nothing more than your auction SPAM
and was NOT what the subject line said it was.

Some of the Real Sleazy people will make
it look like a reply to another message.

Easiest way to avoid this message?
Do NOT LIE in the subject line..

Just My Opinion..

Bob

KMA makes log periodics, but their 13 to 30 MHz is 8 elements
on an 18 foot boom. He may have a custom made antenna.
Nothing on the KMA website matches it.

Pete

Hi
it is a hi-gain
the kma is a custom built. he designed it for me. i have since moved and since
no one wanted it before i moved i took it down and brought it with me i will
put it up here.
chris

*** Homebrew Radio things ***

Many hams build things with a large investment in time & parts that are worth far less... later. Here are some items from the estate stuff I've been selling that fit that description -- priced accordingly.

Unless noted, most of the items below are built on PCB material and most of the enclosures are made by soldering pieces of PCB material into a box -- not all sides may be present! Batteries not included! A few of these devices come with schematics, mostly not. The wiring is all open enough that you can generally see what is going on.

Battery drainer -- LM317K (TO-3) plus a pot wired as a current sink to drain batteries -- 4" x 3" x 1.5" -- $2

PL Tone generator -- Wein Bridge Oscillator powered by two 9 volt batteries. - $3

Touch Tone Encoder -- Western Electric Touch Tone Dial mounted in a 4"x4"x2" metal enclosure with power switch. Has a 4 pin DIN connector plus matching cable terminated in a 1/8" mini plug. $5

Two Tone generator -- Two Wein Bridge Oscillators powered by two 9 volt batteries on perf board. - $5

Some kind of test oscillator with a 556, two pots with anodized gold (colored) knobs, pwr. sw.. LED,. & Banana jack outputs -- $5

60dB Sampling Tap -- HN female connectors for the main line and a BNC for the tap. 1KW in the line puts 1mW to the tap. -- $10

435 MHz power splitter with (3) N connectors. This is made out of brass sheet stock and is about 15" long by 1" square. $10

Varactor multiplier (unfinished) -- looks like it's designed for 144 to 440. Built in a 3.5" x 2" x 7/8" extruded aluminum case -- top plate missing. Silver plated coils, Johnson 189-6-4 caps. It think it is complete execpt for the input and output leads. $10

Some kind of VHF thing just started. Pomona 4"x2.5"x1.5" cast box with a couple 160-104 capacitors, BNC connectors, a miniature 50K bourns pot., 6 capacitors mounted to gold plated terminals with a very pretty gold flashed internal shield structure. Nothing is soldered -- this was just started. $10

Antenna Noise bridge? -- Pot & Cap plus 4 transistor circuit mounted in a 5" x 4" x 2" enclosure. BNC connectors marked ANT & RX. Pwr SW. & Led Powered

by a single 9 volt battery. - $10

VLF Up converter -- Converts 30KHz - 530KHz up to the 3MHz Range -- 6" x 4.5" x 1.25", requires external +12V -- $10

Two Meter to 24-28 MHz converter (I think!) -- 5" x 4" x 1.75" -- $12

A VHF thing -- Two trombone lines adjustable between 4-6" with a transistor connected between them plus a Phasotron 50 ua 2" round meter on a BNC cable with a small loop w/a diode. -- $12

NTSC Frequency reference -- I think this was a QST project in the early 1980's. PCB in 4"x5"x8" metal case (top missing) w/feet, AC line powered. -- $20

144-148 MHz to 24-28 MHz Transverter -- 5" x4" x 4" overall -- 2N3866 Output transistor, probably runs about a watt on transmit. Barrier strip for power (12V?) and an 8 pin Japanese style Mike connector for ?. Transmit & receive sections are each 5" x4" x 2" and only interconnected with a few wires -- $30

*** An Old Electronic Keyer, An old Vibroplex & 4 straight keys ***

Hallicrafters HA-1, "T.O." keyer, with original manual. Seems to work, at
least as far as the internal monitor speaker. I didn't take the time to hook
it up to a transmitter. $60.

The Keyer may be seen at:

http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=TO-1.jpg&.src
=bc&.view=t&.hires=t

Vibroplex Original, sn 144779, complete and working. It looks kind of bad in
the photo. It looks just about as bad in the real world. I think the base
would buff up fairly well
if the superstructure was removed for the operation. It is otherwise complete
&
working. I believe It dates from 1945... per a web site list. $100.

The Vibroplex may be seen at:

http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Vibroplex.
jpg&.src=bc&.view=t&.hires=t

A SpeedX with a rectangular base. Note crack in left pillar casting does not
affect functionality. $15
Photo on display at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Speedx1.jpg
&.src=bc&.view=t&.hires=t

A SpeedX with an oval base; Note, the tune lever is missing its knob. $15
Photo on display at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Speedx2.jpg
&.src=bc&.view=t&.hires=t

A Military Key marked SC1184A on the bottom. Color is not really as "brassy"
as in the photo. $15

850. FS: Coax connectors & Coax relays

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-14 16:49:18 UTC
From: Marv_E_Ads@Juno.com
Message-ID: <9ipt6eehg1@news.netmar.com>
Source record: 5384
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

***** Used Coax Connectors ****

These are mostly used, fairly clean, (at least 80%) Amphenol parts.
There are anywhere from about 4 to 25 of each type available.

PL259's UHF male cable connectors (new) -- $1 ea
UHF female - UHF female barrel connectors -- $1 ea

UHF male - BNC female adapters -- $2 ea
UHF female - BNC male adapters -- $2 ea
UHF elbows -- $2 ea
UHF F-M-F Tees -- $2 ea
UHF female - N male adapters -- $2 ea

Andrews Heliax UHF connectors 1/2" 44AP male -- $10 (last one)

UG-57B/U N Male-Male connector -- $4 ea
UG-635/U C Female - BNC Male adapter -- $5 ea
UG-636A/U BNC Female - C Male adapter -- $5 ea
UG-259A/U 91836 -- HN female to LC female bulkhead adapter -- $30

SMA Female-Female Bulkhead connector -- $1 ea

***** New Coax Connectors *****

UG-1213/U HN Male Cable connector NOS -- $10

Kings KH-39-11 HN Female Cable connector NOS -- $10

Below are all new crimp on connectors, with all hardware, in individual
plastic bags; early-mid 1990's date codes.
I believe that they are all for RG-59 size cable.

Kings Electronics
KC-59-642-M06 BNC Cable Male -- $1 ea
KA-59-385-M06 TNC Cable Male -- $1 ea
KA-19-43 TNC Bulkhead Female -- $1 ea

*** Coax Antenna Relays ****

These all have (3) UHF connectors. They are somewhat old looking on the
outside but,
I popped the inspection port on each and all the contacts are all happy.
And they all go "clunk" upon application of the appropriate voltage.

Dow-Key DK-60 style
110-115 VAC coil -- $30

Advance (same style but, heavier contacts & construction)
115 VAC coil -- $30

All of the above plus shipping, if necessary, naturally.

******* Panel Meters ********

Analog Devices AD2004 4½ Digit LED 2 (1.9999) volt Panel Meter; NOS w/ data
sheet $40

Datel DM-3100L-7089 3½ Digit LED Panel meter; range & condition unknown.
$10

FLW Model 204B2, ER2 & model 204B-2D1,ER2,01 digital panel meters w/internal
120VAC power supply. 4 digit display plus a minus sign; 3½ or full 4 digits
?? Full scale unknown-- $25 pair

GE 50-283013MTMT1 3" thin edgewise panel meter 10V scale NOS in old box --
$15

GE DW-44 2" round 8A RF Ammeters w/ internal thermocouple $15 ea
2" round 3A RF Ammeter w/ internal thermocouple $15

GE 50-240001AAAA1 2" round 100000 Hour Running Time meters 120VAC 60Hz NOS
$20 ea

A.W. Haydon miniature 10000 Hour running time meter. Case is about 1/2"
square (except for mounting flange) by 1" deep. 115VAC 400Hz NOS $15

Hobbs 120 VAC 60Hz 100000.00 (Yes, displays down to 100th's!) Hour running
time meter about 1" high by 2" wide rectangular with triangular shaped
mounting ears. NOS $20 ea

Motorola 52B892096 3½" Square Meter (movement actually made by Simpson).
This is some kind of tuning (or deviation?) meter with a 12 pin connector
(like a 9 pin miniature tube outline plus 3 extra pins in the center)
wired to the meter. $15

Simpson Model 45 3" round VU meter $20
3" sq modern plastic 500-0-500ua movement w/ 50-0-50 scale -- $10

Triplett 320-G 3½" rectangular. 50-0-50 ua -- $15
Triplett 321T 1 Amp 3.5" Round meter NIB -- $20
Triplett 327T 10 Volt 3" Square meter NIB -- $20

Westinghouse 3½" Square RX-35 series meters, used -- $10 each

15 VDC 20 VAC 35KV (2mA full scale on this last unit)

Westinghouse 2" round 9A RF Ammeters w/ internal thermocouple $15 ea

Weston 507 2" round 3A RF Ammeters w/ internal thermocouple $15 ea
Weston 301 3" square 3A RF Ammeter (requires external thermocouple that I

don't have) $7

All of the above plus shipping, if necessary, naturally.

***** Roller Coils ******

B&W 3853 72 uH NOS but, a mite tarnished from age. $60

Johnson 229-202 18uH used good, $50

La Pointe L-0201 406-1 (identical to a Johnson 229-201) 10 uH. used good, $30

***** B&W Air Dux coils *****

These are all shiny NOS, 10" lengths, unless noted otherwise

#2408T 3" dia, 8TPI, #14 wire -- $30

#2008T 2.5" dia, 8TPI, #14 wire -- $30
#2008-31 2.5"dia x 4" long , 8TPI, #14 wire with 2 turn #14 link at center.
NIB $25

#1604T 2" dia, 4TPI, #12 wire, slight tarnish $20

#1208T 1.5" dia, 6TPI, #12 wire, slight tarnish $20
#1216T 1.5" dia, 16TPI, #16 wire, somewhat tarnished $20

#1006T 1.25" dia, 6TPI, #14 wire, somewhat tarnished $15

These are all somewhat tarnished NOS partial lengths

#1008T 1.25" dia, 8 TPI, #16 wire, 8" long -- $12
#1016T 1.25" dia, 16 TPI, #20 wire, 8" long -- $12
#1032T 1.25" dia, 32 TPI, #24 wire, 5" long -- $10

a couple of miniductors (lighter construction)

#3035 3" dia, 10TPI, #16 wire, slight tarnish 10" long -- $25
#3027 2" dia 10TPI, #16, 7" long shiny -- $20

and a couple of Illumintronic Engineering parts

375 7367-P1 -- 1.5" dia.x 5.75" winding w/ indented turns, 14 TPI, #17, 7"
overall
including plastic center support, un-used somewhat tarnished $25

980-0121-000 -- 2.5" dia. x 7.5" winding w/ indented turns, 8 TPI, #14, 9.5"
overall
including plastic center support, used somewhat tarnished but, no turns
soldered $30

All of the above plus shipping, if necessary, naturally.

******* MICROWAVE *******

Micromega 28450-1265 Solid State sources.
I believe that these are on 12.65 GHz and can be tuned but,
I don't know how far. And these are also phase lockable but,
I don't know the reference frequency input. WR-75 output flange.
Terminals are marked. $50 ea

Hughes M-band balanced mixer assemblies which have WR-75 flanges
on the RF & Oscillator inputs and wire terminals on the IF outputs. $30 ea

Avantek SD7-0738N GaAs Fet Preamp. 3.7-4.2 Ghz WR-229 input flange.
N output connector. 4 pin AN type power connector -- pin assignments
noted on label. $50

Rantec FU-301 Filter? or Delay Line?? at some GHz ...I don't know.
N connectors -- 7 3/4" x 3 3/4" x 1" overall. $10

Display (or paperweight) Traveling Wave Tube. The tube was cut in half and
encased in clear resin. 15" x 4" x 1.5" thick. There are some scratches on
the resin surface which I think could be buffed out. $50

And a similar display piece of just the cathode assembly from a
larger Traveling Wave Tube. 3.5" x3.5" x 1.25" thick $25

Hewlett Packard 930A Switch WR-90 X - band $30
Note: this is a waveguide part

WR75 terminations $3 ea

IMPATT Diodes -- NOS individually packaged with test data
NEC ND8P15-5H-C 1W @ 14.8 GHz $50 ea
NEC ND8V12TU 2.5W @ 12.6 GHz $75 (one only)
Loral GC-5831E 300mw @ 12.5 Ghz $30 ea

Microwave Mixer Diodes (I think!) -- NOS in original capsule packaging
Sylvania D5163 4 pcs $30 all

All of the above plus shipping, if necessary, naturally.

***** Mechanical Things & tools *****

National Type A Velvet Vernier dials-style 2 (marked 0-100 over 180 degrees)
3-3/8" or 4" diameter -- $25 ea

Sanyo-Denki 103-775-0611 Stepper Motors -- 1/4" dia. shaft extends about 3/4"
out each end. Outer Case is about 2.2" round, with a square flange on one
end, by 1.5" deep.
1.8Deg (200 step/rev) 2.25V, 1.25A, 8 lead configuration presently wired as 4
lead units
(I think the coils are wired in series for bi-directional drive) to "Molex"
connectors.
RFE 10 pieces, $100 all

NOS fan that fits some Japanese radio...marked: 57 10.01 100V
The wires from the motor are about 4' long and are terminated in a 2 pin JST
connector.
The impeller has 8 blades and is 7 cm in diameter.
It is mounted to a U shaped metal frame with four mounting holes spaced 5cm
by 9cm
$10

Craftsman 335.25926 "Drill Press" -- adapts a 1/4" electric drill (not
included)
to function as a small drill press. Used, but not much! $20

Trav-A-Dial bidirectional counter -- I think this was originally for use with
a mill or lathe in conjunction with a 200 count/rev quadrature encoder to
read displacement in .0005" increments up to 200 inches. These use Hewlett
Packard dot matrix decimal readouts for a very pretty display. Switches for
direction control and reset. Nice cast metal case, requires +5V. $75

Prototype or reject circuit boards from the above -- the readouts are
either all good or one bad one per board -- which is probably why they were
removed from service. $15 ea

Pulled and tested HP 5082-7300 RHDP decimal readouts -- $5 ea
Pulled and tested HP 5082-7304 +/-1 decimal readouts -- $3 ea

NOS 5082-7302 LHDP decimal readouts, still in HP packaging, $10 ea.

Listed below are all serious squirrel cage type fans:

Redmond Model BL-6 115 VAC .8A 60Hz 3000 RPM 4" round intake, 2.5"
square output flange, weighs 6lbs. used -- $20

ILG Electric Ventilation 17-18-022A encased motor with 181-009-EA fan
115/230 VAC 1.6A/.8A 50/60Hz 3000 RPM 4&#65533;" round intake, 3&#65533;" x 4-3/4"
rectangular output flange, weighs 25lbs. used -- $30

Kooltronic Model DF1F016N Dual fan style 230 VAC 1.2A 60Hz 3000 RPM
3&#65533;" round intakes, 2.5" x 5" rectangular output flanges, 16" long by
about 7" diameter overall, weigh 15lbs. These look like NOS but,
they are a mite dusty from storage -- $50 ea (3 available)

All of the above plus shipping, if necessary, naturally.

*** SWITCHES ***

Radio Switch 86 series 6PDT (3 DPDT wafers) RF style switch used good -- $30

General Electric WW2 vintage (has that BC-375 look) 6 position RF style
switch.
Very solid detents! Used, excellent. $10

Switchcraft lever switches -- all have black round knobs unless noted
8PDT (#60024L) NIB -- $5
4PDT (#160012L) NIB -- $3
DPDT (#3006L) used -- $2 ea
DPDT plus 2 form A contacts (41000 series) barely used (a single pair of
contacts) - $2

Three pos. 2 form B momentary (#3035) NOS -- $2
Three pos., 2 form F momentary (3000 series) used -- $2ea
Three pos., 3 form A momentary each side (3000 series) NOS, white rect.
knob -- $3

Three pos., 2 form C momentary (#130312) NOS -- $2ea
Three pos., 2 form C (#130312L) NOS -- $3
Three pos., 3 form A momentary each side (13000 series) NOS, red rect.
knob -- $3
Three pos., 2 fom C (DPDT) each side (#160312) NOS -- $3

Mossmann 3PDT lever switch (4803Z1P2) NOS -- $2

C&K 8121 SPST miniature pushbutton switch -- 1A 120VAC silver contacts NOS
$2 ea

Dialight 570-31 3PDT miniature toggle switch with 5/8" long handle -- 5A 125
VAC NOS $5 ea

Grayhill 46YY2159 Sealed Pushbutton switches, RFE -- These were SPDT but, the
NC lead has been cut off flush with housing. The NO & COM terminals are cut
short like they were removed from a PCB. Nice metal shaft has about .2"
travel. No button nor hardware, 1/4" mounting thread. And there are a bunch
of them -- 4/$1

All of the above plus shipping, if necessary, naturally.

860. FS: Variacs, Power resistors, Filter caps, more...

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-14 16:57:20 UTC
From: Marv_E_Ads@Juno.com
Message-ID: <9iptlg$em8$1@news.netmar.com>
Source record: 5395
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

*** MISCELLANEOUS ***

Filter Cap Assemblies: Eight CDE 80 uF/450V axial electrolytics mounted to a 5"x8" fiberglass PCB -- these are currently wired sort of series-parallel but, could be reconfigured by cutting & jumping a couple PC traces. $20 ea. (2 available)

Large (uncased) display unit. 256, T-1 3/4, LED's arranged in a 16 x 16 pattern that is about 5" square. There is a 6" x 6" mother board plus 16 daughter boards holding the LED's. The LED's are driven by latches so any/all of them can be lit. There is a 14 pin DIP interface connector -- pin out provided. $75.

DPDT Crystal Can relays with 600ohm 28V coils and 2A 28V contacts made by Leach, Datron and other manufacturers. They have small solder hook pins for connection and a pair of ears on the sides to mount the relay. These are old but, as they are hermetically sealed, they should be like new inside! NOS $3 ea (a dozen or so available)

Red & Black Five Way Binding Posts -- NOS, look like HH Smith 459, requires 1/2" mounting hole up and will fit up to 3/8" thick panel. $1/ pair (one ea red & black)

Late '70's vintage likely Military, probably airborne, VHF power amplifier assembly. It consists of 7 almost identical amplifier assemblies clustered around a
central housing that has splitter combiner networks which are plugged onto each end with a bunch of SMB connectors. There are TNC's for the main in's & outs. I think it was originally configured as one amp, driving two, driving four boards. The complete assembly measures 7.5" x 5" x 3.5" overall -- the individual RF amp boards are 4.5" by 2". The outer covers
are mostly missing. Each amplifier is a push pull design -- they appear to be
50 ohm in & out impedance with either PT6747 or PT6702 TRW transistors. I would
guess this unit operates on 28VDC. I don't know what frequency range it covers nor the power level though, just guessing, it probably puts out at least 100W. And there is no manufacturer name -- probably went with the outer cover. Six of the stages are marked OK and one, the input stage I think, is marked NO Good. The individual amps have integral heat sink plates so, they could be removed from the assembly and used separately. Think of it as 7 amplifier boards @ $10 ea --
Bare PCB's would cost as much! -- $70

200W (or so -- 10" long) 1500 ohm 10 tap (every 150 ohms) power resistors -- used good, $10 ea (2 available)

Ohmite 3K, 225 Watt power resistors used w/mounting clips -- $7 ea (8 available)

Ohmite 2K, 225 Watt power resistors used w/mounting clips -- $7 ea (10 available)

Four 37.5K 78W power resistors used w/mounting clips -- $15 all.

Carter Radio 500K ohm rheostat with 2" diameter skirted knob, calibrated 0-100 over 270 degrees -- $15

Motorola 4-pin Microphone connectors 28-16730 -- NIB $5ea

Motorola TLN6824A Vibrasender -- Freq. 1B, 107.2 Hz $2

Motorola TLN1361A Timeout Timer $4

Tunable CTCSS unit -- Part no. 1100-1609-000 -- 1" x 2" PCB with wires to an 8 pin SIP connector -- Includes double sticky mounting tape. NIB $10

Parasitic Supressors, large pair -- 2 Turns of 3/8" wide silver plated strap wound over Globar 25 ohm, 3" x 5/8" bulk ceramic resistors (rated 20-25 watts?). The strap extends 1.5" from one end and 2.5" from the other. The silver is heavily tarnished but should clean up with Tarn-X or similar. $20 for the pair

Powerstat Type 10 120V 1.25 A variable transformer (variac) used, no knob nor dial -- $15
Type 10B 120V 1.75 A variable transformer (variac) used, with dial, no knob -- $20
Later 10B 120V 2.25 A variable transformer (variac) used, with dial, no knob -- $25
Later 10B 120V 2.25 A variable transformer (variac) NOS, with dial, no knob -- $30

A couple old RF chokes:
#22 enameled wire space wound 24 TPI for 2.75 on a 1" diameter grooved fiberglass form 5" overall -- $10
#27 (green enameled) wire wound 40 TPI for 4.3" on a 3/4" diameter ceramic form which steps to a 1.3" diameter base tapped for two 6-32 screws, 5.5" long overall. Looks like winding has been cleanly spliced, twice -- $15

Pomona #2399 cast Aluminum Boxes (2&#65533;" x 1-1/8" x 7/8" o.d.) w/ gold plated SMA

female connector on each end. New (in factory sealed plastic bag) -- $15 ea

Thordarson 20A01 Input Transformer NIB! -- Single or double button microphone or line to single grid. Turns ratio 1:20 Includes original data sheet -- $25

Vibrafork 4 channel resonant reed relay. A real relic. NOS! $10

10uF 600 VDC "oil" caps, 5", 3.5" x 1" w/ mounting ears. $3 ea

All of the above plus shipping, if necessary, naturally.

***** Power Supplies *****

Open (L-shaped) frame linear power supplies 6" x 3" x 2" with attached 2 wire polarized line cord, 120V 60 Hz AC input; internal 1A line fuse. There is a relay that switches the 3 voltage outputs. They have a six-pin SIL output connector and come with a matching cable to pigtails. The wires are: GND, +5V switched, -5V switched, relay (gnd to operate), +12 switched, and +12 constant (for the relay). Just guessing from the 780X series regulators, I would think that the +12 and +5 outputs are good for about an amp. and the -5, which regulator is unheatsinked, perhaps a couple hundred mA.
$15 ea. (5 units available)

Lambda LM B0-60 -- 0-60V, .45A Linear Power supply with remote sense terminals, screwdriver voltage adjust, 5"x3"x7" -- used $25

Power General
Model 1035-2 -- 12V, 3A, Switching Power supply, uncased PCB 5"x3"x2" -- NOS $15

Model 3050-1 -- 5V@6A , 12V@1A & -12V@1A, Switching Power supply, uncased PCB 5"x4"x2" -- NOS -- $25 ea (4 available)

Model 3056-6 -- 5V@6A & 12V@3A, Switching Power supply, uncased PCB 5"x4"x1.5" -- NOS $25

Sierracin 5C12A -- 12V (5 Amp?) Switching Power supply with remote sense terminals -- open frame 5"x8.5" x2" -- used $15 ea (2 available)

All of the above plus shipping, if necessary, naturally.

***** Neon Lamps ****

NE-2 About 100 NOS
NE-2D 8
NE-15 1
NE-16 15
NE-17 3
NE-20 2
NE-32 6 Big
NE-42 3 Real Big
NE-45 12
NE-48 5
NE-51 22
NE-79 1
CM-81A 3

& an OSRAM N32 marked 380V
plus a couple other screw-in types on which I can't read the numbers

These are a mix of new and used, mostly made by GE, though I saw a few
Westinghouse and RCA -- they probably average 40 years old and most of the
bases are somewhat tarnished from age. I lit up a couple of the larger ones
and they seem to
work ok.

If anyone would like the whole bunch, I'll take $75 for them all.

All of the above plus shipping, if necessary, naturally.

865. FS: Old radio knobs

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-14 17:01:44 UTC
From: Marv_E_Ads@Juno.com
Message-ID: <9iptto$ep7$1@news.netmar.com>
Source record: 5400
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

********** Old Radio Knobs **********

These are all used, most have set screws, with nothing worse than minor scuffs and smudges and fit 1/4" shafts, unless noted.

Dakaware
1-1/16" Knurled Knob -- $3
1-1/16" Knurled Knob w/ 1.5" skirt w/ white indicator line -- $5ea
1-1/16" Knurled Knob w/ 2" skirt marked 0-10 -- $8
1-5/8" Knurled Knob w/ 2-1/16" skirt & unfilled indicator line -- $8
2-3/8" Knurled Knob w/ white vinyl pointer at skirt level -- $12 ea
2-3/8" Knurled Knob w/ 3" skirt & unfilled indicator line -- $12
2-1/16" skirt only -- $2

Short (1-3/16")pointer knob w/ white indicator line $1 ea
Long (2") pointer knob w/ white indicator line $1.50

Harry Davies
#1206 1-3/8" knobs -- $4 ea
Short (1-3/16")pointer knob unfilled indicator line -- Not sure if this is Davies... There are a box of these -- 2/$1 ea

Hewlett Packard (70's vintage)1-5/8" spinner knob w/ 3/8" bushing -- $10

Kenwood 5CM diameter knobs that look like they are from a Kenwood TS-830 (main tuning knob) or similar
"Stock" knob -- $7
One that's been backfilled with shot to give it some heft -- $7
The plastic spinner version -- $15

Kurz-Kasch
#308 1-1/8" knob -- $4
#308 1-1/8" knob w/ 1-3/4" brite metal skirt with 100 graduations and tens indicated in black -- $8
#309 1-5/8" knob w/ metal spinner and 2-1/4" black metal skirt with 100 graduations and tens indicated in white -- $12
#309? (may not be KK) 1-5/8" knob w/ plastic spinner and 2-1/4" metal skirt with 100 graduations and tens indicated -- $12

#310 2-3/8" knob -- hub drilled out to 3/8" -- $8
#310 2-3/8" knob w/metal spinner shaft -- $12 ea
#311 2-1/16" skirted knob (some of the white lines are need refilling on these) -- $8ea
#380 1.5" skirted knob -- $5

These look like what was on some '60's Hammarlund, Eico & Knight Kit
stuff
#642 1.5" skirted knob -- $5
#647 1" skirted knob w/indictor line -- $5 ea
#653 1.5" skirted knob w/indictor line -- $5 ea

Millen? (has a logo that looks like a "M" with an "I" superimposed at the
center) #309 3-1/2" Handwheel style knobs as seen on the SX-28, if I recall
correctly.
These are all in need of minor plastic surgery -- two have chips out the
skirt where the set screw goes and one has had it's center drilled through...
perhaps, to make a concentric assembly??
$10 ea.

National HRT 2-1/16" diameter
Black, trim rings somewhat tarnished -- $5 ea
Gray, trim ring shiny like new -- $10

National Type A Velvet Vernier dials-style 2 (marked 0-100 over 180 degrees)
3-3/8" or 4" diameter -- good condtion, $25 ea

There are also many knobs from 1960's Tektronix and Hewlett Packard
oscilloscopes, if anyone has any need, please inquire.

All of the above plus shipping, if necessary, naturally.

868. FS: Old Radio Books & catalogs

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-14 17:05:08 UTC
From: Marv_E_Ads@Juno.com
Message-ID: <9ipu44eqc1@news.netmar.com>
Source record: 5253
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

********** Old Radio Books & Catalogs **********

Radio Amateur Callbook V62 #1 -- US & DX listings 1984. Just a bit of wear at the corners. $20 (2 books)

Handbook of Electronic Communication by Gary Miller, Prentice Hall 1979. Hardbound, very good condition, owners name written on frontleaf, 339 pages. $15

Radio Amateur Callbook V41 #2 -- DX listings only 1963 Front cover a bit torn up and it looks like something heavy was resting on it for 20 years. Insides OK. $7

RCA HB-3 Tube Handbook
Loose leaf 6 ring binder style data sheets starting in the late '40's with additions and
updates through October 1966. Sepatate sections cover Transmitting Tubes, Receiving Tubes (Part 1 & 2),
Industrial receiving tubes, Photosensitive devices, Thyratons & such, CRT's & Picture tubes,
Miscellaneous types, & semiconductors. The updates appear to have been made in all
these sections except Picture Tubes which is somewhat disorganized. It also appears that the
obsolete data sheets were kept for reference. The whole collection is about 30" wide on a shelf.
Shipping weight will be 20 lbs. Excellent condition; mostly never read! One gotcha - No binders. $250

Amateur Single Sideband by Collins Radio. 1962 Hardbound. Excellent condition except owners name in ink on p.106. 143 pages. $50

Heathkit Catalogs
1954, 55, 56, 57, 58, 59 &
Fall-Winter '62-63,
Xmas '89 + Winter, Spring, Summer '90 $100 all

Handbook of PREFERED CIRCUITS
Navy Aeronautical Electronic Equipment
vols. 1&2 (1955 tubes & 1962 transistors)
very good condtion $40

Electrical Fundamentals (AC) TM11-681 US ARMY Technical manual. December 1951. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 231 pages. $10

A Course in Radio Fundamentals by George Grammer, ARRL. Third edition, 1948. Good condition except cover taped at spine, owner's name written on front. 300 pages. $8

Surplus Radio Conversion Manual Vol. 2 1948 Good condition, 125 pages. $25

Radar Electronic Fundamentals T.O.16-1-195 US Navy Technical manual. June 1, 1944. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 474 pages. $20

Tuned Circuits by J.M. Quinn, 1943. Small hardcover book 52 pages. Very Good condition, one page is punched with Los Angeles Public Library ID. $15

Most Often Needed 1926-1938 Radio Diagrams, originally published by Supreme Publications 1941. This is a REPRINT, by Vintage Radio.
240 pages, solid schematics! Like new, $20

Radio Television Supply Company catalog #15 (1940?) (they used to be in downtown Los Angeles). Small tear at the top of the spine, otherwise in very good condition.
256 pages. $25

RCA RC-14 Receiving Tube Manual 1940. Front cover rough and half of spine cover missing. Insides good. 255 pages, $15

RCA TT-3 Air-Cooled Transmitting Tubes 1938 copyright
overall good condition w/slight damage at top & bottom of
spine & first 20 pages of lower right corner. 192 pages -- $25

Radio Supply Company catalog #10 1938? (they used to be in downtown Los Angeles) Front cover loose, back cover missing. 160 pages $15

Radio Television Supply Company catalog (1937?) (they used to be in downtown Los Angeles). A couple of spots on the cover otherwise in very good condition.
172 pages. $25

Advanced Laboratory Practice in Electricity and Magnetism by Earle Terry, McGraw Hill, Third edition, 1936. Hardbound, 318 pages. $15

Radio Supply Company catalog 1934 (they used to be in downtown Los Angeles) -- a little smudging on the back cover and two middle pages torn on the edge but, otherwise in fine condition. There is a sticker from the (original?)
owner on the first inside page. 85 pages, the last 10 or so of which are receiving and transmitter tube data from the era. $20

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet Excellent condition 20 pages or so $10

Elin company overview book 1932
very good condition except cover is almost loose
Text is in GERMAN. Lots of photographs of electrical equipment,
tools, machinery, and construction projects.
128 pages $10

Radio Amateur's Handbook Ninth Edition by the ARRL, 1931. Has a typewritten note glued to the frontspiece stating that it belongs in the radio room of the USS Maryland (which was moored just inshore of the USS Oklahoma on the first Pearl Harbor Day). Cover somewhat rough, torn at spine, index and first two chapters missing up to page 24, otherwise good, no writing nor torn pages. Softbound, about 200 pages left. $500

Radio Doings Call Book Spring 1931 edition
cover taped at spine, otherwise very good
50 pages $15

Radio Amateur's Handbook Sixth Edition by the ARRL, November 1929. Cover a little worn at edges and on spine otherwise excellent, no writing nor torn pages. Softbound 225 pages. $125

Radio Doings Vol 15, #1 June 1929 edition
cover, first two & last two sheets missing otherwise o.k.
pages 5-62 remain $10

Official Radio Service Manual 1930, originally published by Gernsback Publications. This is a REPRINT by Vestal Press, 1984. Schematics & some service info. 352 pages, like new $20.

All of the above plus shipping, if necessary, naturally.

Source record: 5373

Hello there, thought the 940 was sold, but looks like it isn't. It's in very good condition (except for the manual, well used, but still available new from Kenwood for $13.00 part # B50-8001-30). Also has a small hole on the back screen where someone had an attachment hooked on, but is not very noticeable. Has the AM and SSB filters, and WAY too many other features to list. Radio, hand mic, and manual for $800.00 plus shipping. I also accept Paypal for payments. Please feel free to check my feedback on ebay, username gr8rdayz. I have 100 Positives, and NO negatives.

Take Care, Ken.

I have a Kenwood MC-60 microphone that is surplus to my present needs.
The mic is in good condition and I get good audio reports when I use it.

Here are two pictures:

http://www.eskimo.com/~ghopper/MC-60a.jpg
http://www.eskimo.com/~ghopper/MC-60b.jpg

I would like to get $95.00 plus shipping but I will consider all offers.

I have an Icom IC-03AT for sale. It is in good condition and includes
the radio, antenna, BC-25U battery charger, a photocopy of the manual,
and a BP-03 battery.

The radio works well and has basicly been replaced by and IC-3SAT and
an IC-38A so the 03AT is surplus to my needs.

Here is a picture: http://www.eskimo.com/~ghopper/ic03at.jpg

I would like to get $135.00 plus shipping but will consider reasonable
offers.

I have a 2 meter amp for sale. It is new-in-box as I never got around to using it. It was made for Radio Shack and by all accounts was a good amp and did a superior job of rejecting intermod due to its good receive filter (that's why I bought it). It has all the mounting hardware, etc.

Specs are 1-5 watts in 30 watts out, has receive preamp.

Here's a picture: http://www.eskimo.com/~ghopper/2Mamp.jpg

I'd like $55.00 plus shipping but will consider offers.

I'm cleaning out the shack in preparation for a remodeling project.

I have a Mirage C-22A amp that I was using with my old IC-03AT. The amp is clean and works fine.

The specs: receive preamp has 10db gain with .5db noise figure. Freq. range 220-225 Mhz, Power input 0.1 to 5 watts max, output "20 watts or more with 2 watt input and intermittent duty cycle". The unit worked very well, but is surplus to my needs now that I have a 38A.

I'd like $75.00 plus shipping for the amp but, I will consider reasonable offers and trades.

Yes you do... The link takes you straight to Yahoo
log-in screen unless you already have a Yahoo account
AND your cookies turned on.

It screwed me up when I had different accounts with
e-groups, onelist and Yahoo and they all merged.

I have a distrust for media monopolies. This is why
your account information is not secure. If they can't
buy your information, they can damn sure buy the
company.

The upside is that you can open an account with placeholders
over most of the form. If they don't want your business,
they have the option to terminate.

Lafayette HA-225 Receiver in very good condition.

Has general coverage and also bandspread for the amateur bands.
1966 era. Has Five (5) bands: 150-400kHz, 1.6-4.8MHz, 4.8-14.5MHz,
10.5-30Mhz, 48-54MHz

Additional bands for bandspread on the amateur radio bands.

14 tubes: 6AQ8 (6m rf), 6BL8 (6m mix/osc), 6BA6 (rf), 6BE6 (mix), 6AQ8
(Q-Mult/Calib), 2
6BA6 (if), 6AL5 (det, anl), 6BE6 (pro det.), 6AQ8 (af,bfo), 6AQ5 (af
out),
0A2 (reg),
6CA4 (rect)

Interesting design in that it covers all the way up through 6 meters,
and it has the output transformer mounted diagonally to minimize
hum from power transformer.

See: http://member.nifty.ne.jp/hanazawa/radio/lafayette/

Will sell for $95.00 plus shipping

Also have a Lafayette external speaker to go with it.
Model 99-2521 - matches their classic receivers. Excellent condition.

Will sell for $20.00 plus shipping

Pictures available

Body handling: Binary attachment payload not displayed: josttech.vcf

This is from a SK and I am selling it for his XYL.

It is a Kenwood TM-241A with mic, bracket and manual. The power cable
from
the radio connector is not with the radio. It does have a few scratches
on the front
of the display but it still looks good. Overall the radio is a good 8++
out of 10. He had
gotten it for his car but she said he had never installed it. I have
tested it on the bench and
it seems to be doing just what it should. It runs 50/10 and 5 watts
output and the receiver
covers from 118 to 174 Mhz. I do not think there is any mods in the
radio. It is 5.5"x1.5"x6.25"
in size and is 2.65 lbs.

I think it should go for over $150.00 so, the first real offer over that
price has the radio.

Please email me direct and I would guess that the shipping should be
about $12.00 USPS.

YES, she gets all the money for you out there who have to make a
comment.

73, John w1hzh

891. Century/21 Model 570 with matching calibrator and keyer

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-20 00:41:52 UTC
From: Lynn Stolz <lstolz@columbus.rr.com>
Message-ID: <k7L57.2489$R5.1003286@typhoon.columbus.rr.com>
Source record: 5268

I have for sale an excellent condition Model 570 Century/21 transceiver with matching model 276 calibrator and model 670 keyer. If you are looking for one that not only looks good, but works good, consider this one. The PTO was rebuilt in 97, and a broken plastic bushing mechanism on the PTO repaired and again rebuilt in last year--both times by the factory. It is all original Ten-Tec, with clean panel, original-and working-zero and tune buttons. The front tilt bails are in good condition and the knobs are original and clean. The PTO is exceptionally stable. The serial number is 3190. The calibrator and keyer are also in excellent condition. I've made several contacts with it on 40M CW and it is an enjoyable experience. I've had Century/21's before; both the analog and the digital (model 574) versions and prefer the 570 its quieter receiver. Sorry no pictures, but I will guarantee it to arrive Not DOA and as described. Manual and service history included. $185 for the three pieces plus shipping/insurance from central Ohio or a flat $200 and I ship/insure anywhere in the continental U.S. via UPS.

Please email inquiries. Terms are PAYPAL or USPS Money Order. I ship immediately on confirmation or receipt of payment

Lynn, N8AJ

Thanks to comments like "Where have you been" and "Are you joking".
I love nice comments, don't you. I have put the price of this radio into
what folks say it should be.

Just for the fun of it, I have been here living a life outside of news
groups, and you?

Thanks in advance, John

897. For Sale Icom 756

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-21 03:00:49 UTC
From: w4th@webtv.net
Message-ID: <70ca6cd6.0107201900.4f84c240@posting.google.com>
Source record: 5274

Icom 756 (not the pro) This radio is in beautiful condition, and as far as I know it does not have a mark on it anywhere. It is in as new condition. I have owned this rig for 3 years. If you are looking for a dependable rig with all the bells and whistles this is the one for you. Power output is 113 watts on high power on all bands, and is of course variable.
I have all boxes, books, manuals, everything that came with the rig when it was new.
Price is firm at $1200.00 plus shipping of $25. If you would like to hear the rig I can get on the air with you, just drop me a line to make the arrangements.....Serious inquiries only, no tire kickers please.
73....Tom Hix....W4TH

898. FS: Icom IC-751A HF Transceiver

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-21 03:13:08 UTC
From: Alan Childress <na4i@home.com>
Message-ID: <8r667.59315$w5.6102863@news1.rdc1.ga.home.com>
Source record: 5275

This is an ICOM IC-751A HF transceiver. It covers 160 - 10 meters with a general coverage receiver covering 100Khz - 30 Mhz. It includes the TCXO option for high frequency stability. I'll also throw in an RC-10 frequency controller which allows direct frequency entry via keypad. It's a great unit for the digital modes. This unit includes ceramic trimmers in the PLL VCO so that potential problem area has already been covered. The alignment has been checked and the unit works like a new one. The physical appearance is very good. There are a few small scratches on the side where it was once rack mounted, but nothing significant in my own humble opionion. The unit had had very little one the air time over the course of it's life. It has the FL-80 and FL-44A (super crystal filters) installed as standard equipment. It also includes the 500Hz CW filter in the 9 Mhz I.F. It will include an HM-36 hand mic. Sorry, I'm keeping the SM-6 for my IC-746. <GRIN> I really wanted to keep the unit for myself, but I'm going to sacrifice it for a complete tower package that I simply can't refuse. I'm asking $475 firm plus shipping. If there are no takers here in a day or so, I'll list it on Ebay. Email me: na4i@home.com if you're interested. Hurry, I've got to sell this one quick.

Thanks,
Alan <NA4I>

899. Huge bunch of tubes

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-21 06:17:38 UTC

901. FS: Frequency Counter Kit $20

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-21 13:48:10 UTC
From: Dan Tayloe <dtayloe@home.com>
Message-ID: <3B59881B.86A514CF@home.com>
Source record: 5278

Our club is offering an inexpensive frequency counter kit for sale.

The stock counter is good to over 75 MHz, and with a minor parts substitution (a 74AC00), is typically good to over 150 MHz with a rf sensitivity of less than 100 mV, 10 mV at 7 MHz.

The kit is designed to fit in an Altoids mint tin which it uses as an acoustical resonator for the frequency readout.... which is in morse code. It also makes a great cw "numbers" trainer!

The kit is $20 which includes shipping. This is a very inexpensive way to pick up a nice piece of test equipment.

Further information including pictures, specifications, and ordering can be found at:

http://www.extremezone.com/~nk7m/cwafc.htm

and on Bob Hightower's website:

http://www.extremezone.com/~nk7m/

Bob is handling this. His email address is: nk7m@extremezone.com

I agree everybody has a right to freedom of speech and while they may not like the content (i dont particulary for that matter) switch it off or re-tune elswhere, how can all these people wine about thier rights and in the process want to stamp on other peoples.

It works two ways you know mate

915. Antennae for sale

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-24 17:45:14 UTC
From: Buzz Szarek <buzz@nospam.toast.net>
Message-ID: <3b5db33b$1@news.toast.net>
Source record: 5292

I've got a few antennae for sale:
KLM 7.2 dipole / 10-30 Mhz 7 element LPA ant
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1257080969

2 meter double folded dipole antenna
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1257087523

162-174Mhz Coaxial half wave omni antenna
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1257089423

6 meter folded dipole vertical antenna.
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1257091109

I'm helping a fellow ham clean out his garage in preparation for his move.
Thanks for checking this out.

FT: Computer gear for HF Rig

I have the following gear available for trade / sale on a "newer" HF
rig, specifically interested
in the following:

* Kenwood TS-50
* Yeasu FT-100
* ICOM IC-706
* Alinco DX-70 / DX-77
* or other smaller case HF mobile

What I've got.

// Compaq Deskpro Server
400 MHZ, 128 MB Ram, CD-ROM, 8GB HD, 10/100 NIC, AGP Video, Mouse +
Keyboard,
Windows 2000 Professional.
More ram is available.

// Compaq Deskpro Desktop
350MHZ, 128 MB Ram, CD-ROM, 5 GB SCSI-2 HD, 10/100 NIC, Adaptec Ultra
Wide SCSI Card,
AGP Video, Mouse + Keyboard, Windows 2000 Professional.
More ram is available.

// Compaq Deskpro Desktop
350MHZ, 128 MB Ram, CD-ROM, 6 GB HD, 10/100 NIC, AGP Video, Mouse +
Keyboard,
Windows 2000 Professional.
More ram is available.

// Compaq Deskpro Desktop - Small Form Factor
466MHZ, 128 MB Ram, 8 GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard,
Windows 2000 Professional.
More ram is available.

// Sun SparcSERVER 10
50-MHZ RISC processor, 96 MB Ram, 4 GB Hard SCSI Drive, CG 6 Color
frame buffer,
On-board fast SCSI controller, On-board 10-100 base T Ethernet,
On-board sound,
additional fast SCSI controller, additional 10-100 base T Ethernet
controller, Mouse + Keyboard.
Excellent webserver, file server and strong Unix operating system.

// Sun SparcSTATION 5
70-MHZ RISC processor, 64 MB Ram, 2 GB Hard SCSI Drive, CG 6 Color frame buffer,
On-board fast SCSI controller, On-board 10-100 base T Ethernet, On-board Sound,
additional fast SCSI controller, additional 10-100 base T Ethernet controller, Mouse + Keyboard.
Excellent webserver, file server and strong Unix operating system.

// Hewlett Packard Rack Mount Network Hubs
4 available, 2 14 port and 2 15 port hubs. All are in excellent condition and recently removed
from service. These are rack mount servers.

// Proxima LightBook LB20 DeskTop Projector
SVGA and RCA inputs, 200 ANSI lumens, Serial jack, Computer in jack, Monitor out jack, Video in jack,
Audio in & out, TV output, Twin Lamp, True SVGA compatibility (800 x 600), International power supply,
LightBoard drawing tool, Remote control, Lightweight (11 pounds - 13.5 x 9.25 x 5 inches),
Custom padded case.

This unit is in excellent condition and includes all
the original equipment (cables + books).

If you see something you like, please let me know. I am open to trades or sales on any of the
machines. Willing to trade multiple machines for the right gear. Sales always welcome ...

Thank you!

Here we have another spammer. It misleads
in the subject line by saying this item
is FS "OR" For Sale "OR" misleads and
indicates said item is for sale when it
is actually FA = For Auction. The FA is
used by those of us that do not Do Auctions.
We set our spam filters for FA in the subject
line and we do NOT have to see the auction
spam. Do not trust this person.

"If they Lie in the subject line"
They will have no problem misrepresenting
the JUNK they have at the Auction..

If you have received this message it is
because I saw a subject line that interested
me and when I downloaded the message
It was nothing more than your auction SPAM
and was NOT what the subject line said it was.

Some of the Real Sleazy people will make
it look like a reply to another message.

Easiest way to avoid this message?
Do NOT LIE in the subject line..

Just My Opinion..

Bob

FT: Computer gear for HF Rig / equipment

I have the following computer gear available for trade or sale on a
"newer" HF rig and equipment.
Specifically interested in the below units but open for other
suggestions

* Kenwood TS-50, TS-840, TS-847, TS-900
* Yaesu FT-100, FT-840, FT-847
* Icom IC-706 / 706 MKII / 706 MKII-G
* Alinco DX-70 / DX-77
* or ??

What I've got.

// Compaq Deskpro Server
400 MHZ, 128 MB Ram, CD-ROM, 8GB HD, 10/100 NIC, AGP Video, Mouse +
Keyboard,
Windows 2000 Professional. Tower case.
More ram is available.

// Compaq Deskpro Desktop
350MHZ, 128 MB Ram, CD-ROM, 5 GB SCSI-2 HD, 10/100 NIC, Adaptec Ultra
Wide SCSI Card,
AGP Video, Mouse + Keyboard, Windows 2000 Professional.
More ram is available. Desktop case

// Compaq Deskpro Desktop
350MHZ, 128 MB Ram, CD-ROM, 6 GB HD, 10/100 NIC, AGP Video, Mouse +
Keyboard,
Windows 2000 Professional.
More ram is available. Desktop case.

// Compaq Deskpro Desktop - Small Form Factor
466MHZ, 128 MB Ram, 8 GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard,
Windows 2000 Professional.
More ram is available. Small form factor case, very small footprint.

// Sun SparcSERVER 10 - Unix
50-MHZ RISC processor, 96 MB Ram, 4 GB Hard SCSI Drive, CG 6 Color
frame buffer,
On-board fast SCSI controller, On-board 10-100 base T Ethernet,
On-board sound,
additional fast SCSI controller, additional 10-100 base T Ethernet
controller, Mouse + Keyboard.
Excellent webserver, file server and strong Unix operating system.
Machine is running Sun

Solaris (preferred) or any flavor of Linux ported for the Sparc
platform. Aurora case.

// Sun SparcSTATION 5 - Unix
70-MHZ RISC processor, 64 MB Ram, 2 GB Hard SCSI Drive, CG 6 Color
frame buffer,
On-board fast SCSI controller, On-board 10-100 base T Ethernet,
On-board Sound,
additional fast SCSI controller, additional 10-100 base T Ethernet
controller, Mouse + Keyboard.
Excellent webserver, file server and strong Unix operating system.
Machine is running Sun
Solaris (preferred) or any flavor of Linux ported for the Sparc
platform. Aurora case.

// Hewlett Packard Rack Mount Network Hubs
4 available, 2 14 port and 2 15 port hubs. All are in excellent
condition and recently removed
from service. These are rack mount servers.

// Proxima LightBook LB20 DeskTop Projector
SVGA and RCA inputs, 200 ANSI lumens, Serial jack, Computer in jack,
Monitor out jack, Video in jack,
Audio in & out, TV output, Twin Lamp, True SVGA compatibility (800 x
600), International power supply,
LightBoard drawing tool, Remote control, Lightweight (11 pounds - 13.5
x 9.25 x 5 inches),
Custom padded case. This unit is in excellent condition and includes
all the original equipment
(cables + books).

If you see something you like, please let me know. I am open to trades
or sales on any of the
machines. Willing to trade multiple machines for the right gear.
Response via Email is preferred.

Sales always welcome ...

Thank you!

928. FS/FA: AUL Signal Generator, 50 kHz to 90MHz, AM/FM/CW

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-26 21:02:13 UTC
From: tomg@fullnet.com
Message-ID: <11915d6.0107261302.4207a2c4@posting.google.com>
Source record: 5305

FA: AUL Signal Generator, 0.05 to 90MHz, AM/FM/CW

See photos and bid at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1620922189

You will be bidding on an AUL Instruments, Inc. SG-1144/U Signal Generator. Auction ends on Tuesday, Jul-31-01 13:34:09 PDT.

This is a good signal generator, completely functional and ready to go to work for you. It's a nice unit, covering from less than 50 KHz to 90 MHz or more, providing CW (sine) output and AM or FM modulated output, with output-level ranges from 0.3 microvolt to 1 volt RMS, with digital frequency display and two analog meters, for Modulation and RF Output.

It is in great condition, and has been tested, and works fine. It came with military surplus documents that show a condition-code of B, which means: serviceable and issuable without qualification. It ALSO included an inspection report that says NO FAULTS FOUND.

Everything is intact, and in very good used operating condition. There is no physical damage that I can see, except for minor signs of normal wear and tear.
I tried almost all of the settings of all of the controls, and everything I tried worked as expected. I did not notice any noisiness in any of the controls. I did not rigorously check the calibration (but it looked very, very close), did not test with external modulation, did not check the rear auxiliary output, and did not try running it on 230 volts. I also did not test the 100-Watt reverse power protection feature of the output.

The winning bidder will have a 10-DAY MONEY-BACK RIGHT-OF-RETURN if DOA.

The reserve price is only $99.00! (Or, "Buy It Now", for only $149 plus shipping.)

NOTE!!

(I have four more of these that are almost identical, for sale for
only $149 each plus shipping costs. Email me for photos, questions, or
a shipping quote, at tomg@fullnet.com. And, check my website for
many, many other great used test equipment bargains, at:
http://www.fullnet.com/u/tomg/gooteesu.htm)

Functional Description, AUL SG-1144/U Signal Generator:

50 kHz to 90 MHz Coverage, in Five Frequency Ranges
Digital Frequency Display, 4 digits, with "Display Test" button
Coarse and Fine Tuning Controls
Analog RF Output Meter: RMS Volts and dBm
Output Levels from 0.3 microVolt to 1 Volt, -120 to +10 dBm, in
Fourteen Ranges (maximum output: about 3.4 volts p-p)
Variable Output Level Control
Analog Modulation Meter: AM Percent and FM Khz Peak
AM Modulation: 400 Hz, 1 kHz, and External
FM Modulation: 150 Hz, 400 Hz, 1 Khz, and External
FM Meter Range Switch: 10 KHz or 75 KHz full scale
Variable Modulation Level Control
Overmodulation Indicated by Flashing Frequency Display
External Modulation Input, BNC, 600 Ohms
RF Output, BNC, 50 Ohms
Output has Reverse Power Protection, 100 Watt Max.
Auxiliary Output, BNC, on Rear Panel
Permanently-Attached Power Cord, Three-Prong, with Cord-Wrap Storage
Operates on 115V/230V, Selectable On Rear Panel
1 Amp Slo-Blo Fuse, Accessible on Rear Panel

See photos and bid at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1620922189

Thanks, everybody.

Best regards,

Tom

930. NEW Kenwood TS870 eGroup .. Please come and join

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-27 23:59:37 UTC
From: m0cke@btinternet.com
Message-ID: <ed60baec.0107271559.29d8a048@posting.google.com>
Source record: 5307

Hi All.

I've created a eGroup for the Kenwood TS870.
Join up and you can upload and files / programs related to the TS870
to the Files Area.
Got a problem? .. Maybe other TS870S owners have the same, try
asking through the messages.
Got an experience to share (Good or Bad) again share it via the
messages!

Please join, Let make the group helpful for the new user of a TS870S!

Why not make Sked with another TS870 User .. do it via the group
messages!

I hope to hear you on the air and see you posting on the group!

Does anyone have the CD key for the ARCP2000 control software for the Kenwood TS-2000 (I downloaded v1.1 from the Kenwood, Japan site)?

Or does anyone want to sell a copy or trade for some other control software?

FA: HP 4952A Protocol Analyzer, UNUSED, w/option 2

SEE IT and bid on it, here: (Auction ENDS on July 30, 2001...)

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1619851131

FOR AUCTION: Hewlett Packard 4952A Protocol Analyzer with Option 002 (extended memory). It is in excellent cosmetic condition. It also includes option 103, the HP 18179A RS-232C/V.24 Interface Pod with full breakout box, plus three data cables and the power cable. I tested the unit for power-up, and it appears to be fine (see pictures on ebay.com). I don't have the manual, so I didn't know how to test it any further. The paperwork that came with it from a mil-surplus auction says its Condition Code is *A*, which means new or unused. So, it is apparently unused. The HP serial number is 2726A 01189. If the unit is DOA, the buyer will have a 10-day right of return, with a full refund of the high bid amount. Reserve Price is $419.

TECHNICAL INFORMATION:
The 4952A Protocol Analyzer is a portable analyzer used for troubleshooting during installation, maintenance, and design of data communication networks and equipment. Protocols include Async, BSC, SDLC (NRZI), HDLC, X.25, SNA, DDCMP, and user-defined protocols, also tests X.21 and ISDN. Allows you to monitor and decode data transmission, test remote facilities from your location, simulate network components, and perform bit error rate tests. It can also be used as an asynchronous terminal or to install and maintain 3270 equipment, and to perform link level performance analysis.
Manufacturer's Options: Option 002 = Extended Memory, Option 103 = 18179A RS-232C/V.24 Interface Pod with full breakout box.

SEE IT and bid on it, here: (Auction ENDS on July 30, 2001...)

I'm posting this for my computer underpriveleged buddy John Soine, WB7WQK. He's looking to sell the below listed rigs, or trade a combination of the following for a 756 or 756 Pro. Here's the list:

Icom 751, just brought back from Icom (he lives within driving distance to them) ALL updates, repairs, and alignments done. With SM6 Mic, Manual, and built in PS35 Power supply. $650.00 O.B.O.

Kenwood TS930S/AT w/CW Filter, MC60 Mic., Matching Speaker w/filters, original double boxes. Needs power supply repaired, cosmetically a solid 9. $550.00 O.B.O.

Alinco DX70TH 6-160 meter, 100 watts out all bands, Mic, Manual, Box. Has matching EDX2 HF Autotuner. $700.00 O.B.O. for the pair.

Please contact John directly @ 360-428-5995

First is the Mirage B-55-G. This is new in the box. I got it about a
year ago
and just never used it. It is 1-10 watts in for 50+ watts out. Will
operate FM/SSB and CW.
Has a built in GaAsFET preamp. I am asking $85.00 shipped. It cost me
~$100.00 new.

The second is an RFC 4-32. 440Mhz, 200mWatts to 5 watts in for 20+
watts output.
Will operate FM/SSB and CW. Has built in GaAsFET preamp. It comes with
the manual
and is very clean. I am asking $65.00 shipped.

Please email direct as this is going to a few of the news groups.

Thanks in advance, John w1hzh

946. Old tubes for sale

Newsgroup: rec.radio.amateur.swap
Date: 2001-07-30 16:49:28 UTC
From: Buzz Szarek <buzz@nospam.toast.net>
Message-ID: <3b658f18@news.toast.net>
Source record: 5323

I've stumbled on a very large collection of Vaccuum tubes. Oscillators, amps, rectifier, RF PAs, you name it it's likely here.

This collection is in several large cabinets.

I would bet that there is at least $12,000 of tubes here. No offer too small. I cannot be insulted. These have to go.

If anyone's intereseted please contact me at buzz@toast.nospam.net (remove nospam).

Thanks,
-=-

947. FT: Computer gear for HF Rig / equipment

FT: Computer gear for HF Rig / equipment

I have the following computer gear available for trade or sale on a "newer" HF rig and equipment. Specifically interested in the below units but open for other suggestions. I am workable, will put money into it if your gear is worth more.

* Kenwood TS-50, TS-840, TS-847, TS-900
* Yaesu FT-100, FT-840, FT-847
* Icom IC-706 / 706 MKII / 706 MKII-G
* Alinco DX-70 / DX-77
* or ??

What I've got.

// Compaq Deskpro Server
400 MHZ, 128 MB Ram, CD-ROM, 8GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard,
Windows 2000 Professional. Tower case.More ram is available.

// Compaq Deskpro Desktop
350MHZ, 128 MB Ram, CD-ROM, 5 GB SCSI-2 HD, 10/100 NIC, Adaptec Ultra Wide SCSI Card, AGP Video, Mouse + Keyboard, Windows 2000 Professional. More ram is available. Desktop case

// Compaq Deskpro Desktop
350MHZ, 128 MB Ram, CD-ROM, 6 GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard,
Windows 2000 Professional. More ram is available. Desktop case.

// Compaq Deskpro Desktop - Small Form Factor
466MHZ, 128 MB Ram, 8 GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard, Windows 2000 Professional. More ram is available. Small form factor case, very small footprint.

// Sun SparcSERVER 10 - Unix
50-MHZ RISC processor, 96 MB Ram, 4 GB Hard SCSI Drive, CG 6 Color frame buffer, On-board fast SCSI controller, On-board 10-100 base T Ethernet, On-board sound, additional fast SCSI controller, additional 10-100 base T Ethernet controller, Mouse + Keyboard. Excellent webserver, file server and strong Unix operating system. Machine is running Sun Solaris (preferred) or any flavor of Linux ported for the Sparc platform. Aurora case.

// Sun SparcSTATION 5 - Unix
70-MHZ RISC processor, 64 MB Ram, 2 GB Hard SCSI Drive, CG 6 Color frame buffer, On-board fast SCSI controller, On-board 10-100 base T

Ethernet, On-board Sound, additional fast SCSI controller, additional 10-100 base T Ethernet controller, Mouse + Keyboard. Excellent webserver, file server and strong Unix operating system. Machine is running Sun Solaris (preferred) or any flavor of Linux ported for the Sparc platform. Aurora case.

// Hewlett Packard Rack Mount Network Hubs
4 available, 2 14 port and 2 15 port hubs. All are in excellent condition and recently removed from service. These are rack mount servers.

// Proxima LightBook LB20 DeskTop Projector
SVGA and RCA inputs, 200 ANSI lumens, Serial jack, Computer in jack, Monitor out jack, Video in jack, Audio in & out, TV output, Twin Lamp, True SVGA compatibility (800 x 600), International power supply, LightBoard drawing tool, Remote control, Lightweight (11 pounds - 13.5 x 9.25 x 5 inches), Custom padded case. This unit is in excellent condition and includes all the original equipment (cables + books).

If you see something you like, please let me know. I am open to trades or sales on any of the machines. Willing to trade multiple machines for the right gear. Response via Email is preferred.

Sales always welcome ...

Thank you!

956. FT-990AC Package Deal

Newsgroup: rec.radio.amateur.swap
Date: 2001-08-01 05:25:14 UTC
From: Bill Brannick <WmLB@prefer.net>
Message-ID: <_oM97.49164$135.9976939@typhoon.we.rr.com>
Source record: 5333

The following equipment and accessories are offered as a PACKAGE. I really have no interest in selling this stuff piece-meal and would rather just sell it at or very close to asking price. I would much prefer that this equipment goes to a local Southern California ham so that he can see exactly what he is getting for his money. Also allows me to avoid the packaging, shipping and insurance hassles

Item No. 1 - Yaesu FT-990AC. Functions perfectly. Purchased in 1992, has minor blemishes only (none on front panel), no deep scratches. Includes optional 2.0Hz and 250Hz filters which complement the stock 2.4 HZ and 500 Hz filters. A couple of years ago, I added the optional TXCO-2 High Stability Master Reference Oscillator. The ROM is Version 1.3 Includes stock microphone, power cord and manual. My manual had become pretty dog-eared over the years, so I recently bought a new one which is still in the mailer. Also will include a CAT interface cable which will enable you to use TRX - Manager or similar rig control software packages. I doubt that I have you original box for the FT-990AC

Item No. 2 - Kenwood TM-241 2m Mobile rig. Purchased in 1991 and still works perfectly. Includes microphone, bracket and the manual which is complete but has seen better days. Cover missing I think.

Item No. 3 - Kantronics Kam Plus with the Version 8.0 Eprom upgrade. VHF/HF ports which you can use concurrently. RTTY, Pactor, AMTOR, GTOR, HF/VHF Packet and GPS, etc. Includes manuals and interconnecting cables for both the TM-241A and the FT-990AC

Item No. 4 - ClearSpeech Noise Filer/Speaker. About a year old and works as advertised. Needs 12VAC and includes a mounting bracket.

All this would get a new ham up and running with significant capabilities.

One price for all... $1200.00 (FOB my house)

Okay
Let me explain
This guy purchased an AOR 8200B from us and decided he did not like it and asked if he could change it for an Alinco DJX-2000, Now he made all sorts of claims about this AOR being the biggest pile of trash ever made (strange there are so many satisfied people out there with them) anyway I agreed to send an alinco and charge him an additional $100 which he agreed to.
Anyway I sent out the Alinco before receiving the AOR back,,, now the AOR arrived in a copal of days and I had to sell it as used and heedless to say the new owner is completely happy...
Anyway, This guy gets the Alinco and states it smells of smoke and looks like the battery has a small mark on it, Now this was a brand new and unopened box, well I have offered to replace it with another new unit FREE of charge ad this guy will not send his original unit back until he receives a replacement from us, now I do not now of a company out there who will replace a unit without first receiving the other unit back.
Anyway he is now upset at me and I guess wishes to attempt for me to look bad, Well I have put across my version
So there you have it
For what it was worth
Thanks for reading
Best Regards
Martyn

I have a Cushcraft X7 H.F. antenna (7 element) which was installed for a year and the 40 meter add-on (X740). Both are in excellent shape except for some bird do-do. Original boxes and all hardware. $360 for the X7 and $190 for the X740. Prefer local pick-up in the Memphis, TN area, but will ship if you pay shipping.

thanks,

Just a quick ??
I know the mod requires the change of the UC 1251 to a UC1250.
Is the UC1250A the same as the 1250?
Where can I get the UC1250 & price?
Thank you in advance...

Martyn why don't you be honest and tell them it was your own personal radio and that you lied about the shipping charges and that you just dropped the radio in a box without any packing and that the battery pack was scratched badly and had a full charge that lasted only a very short time or that the packing on the accessories were packed in crumpled bags or that the whole package radio and box smelled like it was in a smokey bar for a year. I can go on and on. This will deceive you and claim you are the one that is full of crap. When I complained about the A)R he said he heard reports of exaxtly what I was complaining about. This is my side of the story. My intentions are only to let people know about him and is shady dealings. What I have done was pay full price for a used radio that has a deffective battery to boot along with $30.00 wrapped up in shipping.

And you sound like the kind of person that makes judgements with only one side of the story. Maybe someone someday will make a comment like that about you before you can explain. I paid over $600 for a radio I really wanted. $600 is not the issue. I expect to get what I paid for. That is not too much to ask. I am not looking for a jury here, my intent was to help others so they don't get the same treatment. Remember, I am the one who has spent the money and not the one who sold misrepresented merchandise.

Source record: 5347

The subject 'Alinco DJ-S111T VHF HT - $65' says it all execpt plus shipping. The rig works and comes with FULL documentation, including special order $25 Alinco service manual. Mods have been installed for extended Rx. I warranty it not to be DOA. Not the output power so you need to be in an area with good repeater coverage.

Dick, KD5VU
Austin, TX
kd5vu@qsl.net

DJ-S11T SPECIFICATIONS
144.000 ~ 147.995MHz Sub-Miniture Hand-Held VHF Transceiver
[Image]GENERAL

Frequency Coverage MHz (RX) 144.000-147.995 MHz
(TX) 144.000-147.995 MHz
Channel Spacing 5, 10, 12.5, 15, 20, 25KHz steps
Memory Channels 20 Channels + 1 Call Channel Memory
Antenna Impedance 50 Ohms Unbalance
Frequency Stability +/-5 ppm
Microphone Input
Impedance 2K Ohms Nominal
Signal Type F3E (FM)

Power Supply Requirements 3.6V ~ 4.5V DC
(4.5V standard with 3 AA batteries)

Current Consumption@4.5V Transmitting: Approx. 260mA (High Power
Receiving: Approx. 33mA Squelched)

Operating Tempature -10 to +60 Degrees Celsius 14 to 140
Degrees Fahrenheit
Ground Negative
Dimensions (Radio Only) 2-1/6(W) x 4(H) x 1-1/10(D) Inches Weight
Approx. 6.5oz. (Batteries Included)
Sub Audible Tones Encoder Installed (50Tones)
TRANSMITTER
Output Power High: Approx.340mW Low:Approx. 50mW
Emission Mode F3E (FM)
Modulation System Variable Reactance FM
Max. Freq. Deviation +/- 5KHz
Spurious Emission -60dB Or Under Below Carrier Level

Tone Frequency 67.0 to 254.1Hz
(50 Selections)
Microphone Electret Condenser

Operating Mode Simplex/Semi Duplex 5KHz Steps Minimum
Between 0-15.995MHz
CTCSS Encoder Built-In And IncludedAs Standard
RECEIVER
Receiver System Super Heterodyne Dual Conversion

Sensitivity 12dB SINAD : Less Than -15dBu at
145.000MHz
Squelch Sensitivity Less Than -15dBu
Intermediate Frequency 1st IF: 23.05MHz; 2nd IF: 450KHz
Selectivity More Than +/- 7.5KHz at -6dB
Audio Output More Than 100mW @ 10% THD
Speaker Impedance 8 Ohms

For sale, or possible trade, Gonset GSB100 transmitter. All new filters, 5U4 rectifiers, driver and final. A few caps and resistors have been replaced as needed. Front panel lettering great, some paint chips around the screws that mount the unit in the cabinet. The meter has a piece broken on the left side, but does not affect the meter movement. I had it on both 75 and 40 last week, and it worked well. Asking $225.00 plus shipping. JPG's available to serious enquires. May consider a trade for a receiver in the same condition. Hammarlund, Hallicrafter, ETC.
Please reply to : wb6vse@ipa.net
I am located in Arkansas, and can deliver to close by areas.
Thanks
Mike-K5VSE

This Homebrew GROUNDED GRID amp is in excellant condition. It has a NEW tube in it and an Eimac chimney with a very QUIET blower. Jennings VAC variable for final plate tuning and a very HEAVY band switch and is bandswitched - 160 - 80 - 40 - & 20 meters. With just 18 watts drive on AM I have been using it to the legal limit on AM and it just loafs along! Unit comes with solid state power supply and is controlled with a LARGE VARIAC. THE AMP OPERATES ON 240 vac. It is all installed in a rack cabinet 38" tall and is on casters. THIS IS A PICK UP ITEM ONLY IN MADISON, WI !! Picture via e-mail is available. Any 100 watt ssb transceiver will drive this thing beyond the legal limit and not be pushing it!! $650 or trade for ???

Kenwood TM-241A 2m Mobile rig. Functions perfectly with 50 watts out. Includes microphone (with function buttons, etc) , bracket, DC power cable and manual w/ diagrams. Does NOT include nor has it ever had the display problem that this specific rig has the reputation for having in some units. The power cable has been shortened and would need to be lengthened for a "battery direct" mobile installation. The rig has always been used "non-mobile" $75.00 plus shipping.

Functions perfectly. Purchased in 1992, has minor blemishes only (none on front panel), no deep scratches. Includes optional 2.0Hz and 250Hz filters which complement the stock 2.4 HZ and 500 Hz filters. A couple of years ago I added the optional TXCO-2 High Stability Master Reference Oscillator. The ROM is Version 1.3. Includes stock microphone, power cord and manual. My manual had become pretty dog-eared over the years, so I recently bought a new one which is still in the mailer. Also will include a CAT interface cable which will enable you to use TRX - Manager or similar rig control software packages. I doubt that I have you original box for the rig. MUCH PREFER LOCAL PICKUP in Southern California $1000.00(FOB Costa Mesa, CA)

Hi
I need my Motorola MSF5000 UHF Analog repeater
Aligned and tuned. Also duplexer prepost filter tuned.
I can send the eprom out if you don't have the programmer.
But still would need the repeater aligned and tuned.
Will pay the going rate, cash of course. :)
Anyone in NJ that knows how to do it?
I will bring the Repeater to you so you don't have to travel.
Really hoping to hear from someone here in the group.

Cross-posted to: alt.ham-radio.marketplace,rec.radio.amateur.boatanchors,rec.radio.amateur.swap

Gonset GSB100 with all new filter caps, some other caps and resistors as need. All tubes checked and replaced as needed. New 5U4's driver and final tube. Looks pretty good, with a few chips on the front panel where the screws hold the unit in the cabinet. JPG's available, just ask me.
Also looking for 2 of the small knobs for a Johnson Pacemaker, similar to Ranger and others.
wb6vse@ipa.net

Thanks, Mike-K5VSE

994. FS: Old Radio/ Electronics Books & Catalogs

Newsgroup: rec.radio.amateur.swap
Date: 2001-08-08 23:46:54 UTC
From: Marv_E_Ads@Juno.com
Message-ID: <9ksj1e$e0f$1@news.netmar.com>
Source record: 5240
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap,sci.electronics.equipment

********** Old Radio Books & Catalogs **********

Radio Amateur Callbook V62 #1 -- US & DX listings 1984. Just a bit of wear at the corners. $20 (2 books)

Handbook of Electronic Communication by Gary Miller, Prentice Hall 1979. Hardbound, very good condition, owners name written on frontleaf, 339 pages. $15

Radio Amateur Callbook V41 #2 -- DX listings only 1963 Front cover a bit torn up and it looks like something heavy was resting on it for 20 years. Insides OK. $7

RCA HB-3 Tube Handbook
Loose leaf 6 ring binder style data sheets starting in the late '40's with additions and
updates through October 1966. Sepatate sections cover Transmitting Tubes, Receiving Tubes (Part 1 & 2),
Industrial receiving tubes, Photosensitive devices, Thyratons & such, CRT's & Picture tubes,
Miscellaneous types, & semiconductors. The updates appear to have been made in all
these sections except Picture Tubes which is somewhat disorganized. It also appears that the
obsolete data sheets were kept for reference. The whole collection is about 30" wide on a shelf.
Shipping weight will be 20 lbs. Excellent condition; mostly never read! One gotcha - No binders. $250

Amateur Single Sideband by Collins Radio. 1962 Hardbound. Excellent condition except owners name in ink on p.106. 143 pages. $50

Heathkit Catalogs
1954, 55, 56, 57, 58, 59 &
Fall-Winter '62-63,
Xmas '89 + Winter, Spring, Summer '90 $100 all

Handbook of PREFERED CIRCUITS
Navy Aeronautical Electronic Equipment
vols. 1&2 (1955 tubes & 1962 transistors)
very good condtion $40

Electrical Fundamentals (AC) TM11-681 US ARMY Technical manual. December 1951. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 231 pages. $10

A Course in Radio Fundamentals by George Grammer, ARRL. Third edition, 1948. Good condition except cover taped at spine, owner's name written on front. 300 pages. $8

Surplus Radio Conversion Manual Vol. 2 1948 Good condition, 125 pages. $25

Radar Electronic Fundamentals T.O.16-1-195 US Navy Technical manual. June 1, 1944. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 474 pages. $20

Tuned Circuits by J.M. Quinn, 1943. Small hardcover book 52 pages. Very Good condition, one page is punched with Los Angeles Public Library ID. $15

Most Often Needed 1926-1938 Radio Diagrams, originally published by Supreme Publications 1941. This is a REPRINT, by Vintage Radio.
240 pages, solid schematics! Like new, $20

Radio Television Supply Company catalog #15 (1940?) (they used to be in downtown Los Angeles). Small tear at the top of the spine, otherwise in very good condition.
256 pages. $25

RCA RC-14 Receiving Tube Manual 1940. Front cover rough and half of spine cover missing. Insides good. 255 pages, $15

RCA TT-3 Air-Cooled Transmitting Tubes 1938 copyright
overall good condition w/slight damage at top & bottom of
spine & first 20 pages of lower right corner. 192 pages -- $25

Radio Supply Company catalog #10 1938? (they used to be in downtown Los Angeles) Front cover loose, back cover missing. 160 pages $15

Radio Television Supply Company catalog (1937?) (they used to be in downtown Los Angeles). A couple of spots on the cover otherwise in very good condition.
172 pages. $25

Advanced Laboratory Practice in Electricity and Magnetism by Earle Terry, McGraw Hill, Third edition, 1936. Hardbound, 318 pages. $15

Radio Supply Company catalog 1934 (they used to be in downtown Los Angeles) -- a little smudging on the back cover and two middle pages torn on the edge but, otherwise in fine condition. There is a sticker from the (original?)
owner on the first inside page. 85 pages, the last 10 or so of which are receiving and transmitter tube data from the era. $20

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet Excellent condition 20 pages or so $10

Elin company overview book 1932
very good condition except cover is almost loose
Text is in GERMAN. Lots of photographs of electrical equipment,
tools, machinery, and construction projects.
128 pages $10

Radio Amateur's Handbook Ninth Edition by the ARRL, 1931. Has a typewritten note glued to the frontspiece stating that it belongs in the radio room of the USS Maryland (which was moored just inshore of the USS Oklahoma on the first Pearl Harbor Day). Cover somewhat rough, torn at spine, index and first two chapters missing up to page 24, otherwise good, no writing nor torn pages. Softbound, about 200 pages left. $500

Radio Doings Call Book Spring 1931 edition
cover taped at spine, otherwise very good
50 pages $15

Radio Amateur's Handbook Sixth Edition by the ARRL, November 1929. Cover a little worn at edges and on spine otherwise excellent, no writing nor torn pages. Softbound 225 pages. $125

Radio Doings Vol 15, #1 June 1929 edition
cover, first two & last two sheets missing otherwise o.k.
pages 5-62 remain $10

Official Radio Service Manual 1930, originally published by Gernsback Publications. This is a REPRINT by Vestal Press, 1984. Schematics & some service info. 352 pages, like new $20.

All of the above plus shipping, if necessary, naturally.

****** VACUUM CAPACITORS & other Vacuum things **********

Jennings Vacuum Variables -- all used (or at least aged)

UCS-300-15S 300pF 15KV $200 with standard puller, later manufacture (blue)

UCSL-750 750pF 3KV $125 with standard puller
UCSL-1000 1000pF 3KV $125 with standard puller

R1G SPST 20KV 20Amp Vacuum Switch $80

---Fixed vacuum caps--

Jennings VC-12 12pF 20KV $20
Jennings 50pF 86KV $86
Western Elec 100pF 5KV $30 (This one hi-pot checked @ 14KV)

--- Vacuum Relays --

Old "T" style vacuum relays, the coil slips over one leg
of the glass enclosed contact assembly -- One of the contacts has a Penta
Labs
part number: 420 53 3875. The coils are 28V. $10 ea

Struthers Dunn Type 78CCA109 "Keying Relay" which consists of a vacuum
relay mounted on top of a small (2"x3"x4") metal enclosure. There is a
15 pin Jones connector on the side of the box. I believe that there are
some auxiliary contacts in the box in addition to the vacuum relay.
28VDC. $15

********** Air Variable Capacitors ********

Johnson T9-5 minature vertical PC mount trimmers 1.9-15.7 pF, Silver Plated
machined plates -- NOS 2/$1

G.I. Corp 70 pF, .080" air spacing, about 3.5"x3.5"x3" overall, ¼" shaft $2ea
(2 available)

National Type DX 500pF variable capacitors, approx. 3" X 3" x 3" overall
fairly good condition. $10 ea.

Remler "scissors" variables. Type 630 350pF $25
Type 631 500pF $25

Hammarlund NZ-10 Neutralizing capacitors, shiny NOS, $20 pair

..and a whole bunch of Neutralizing capacitors as listed below $7 ea

Bud NC-853 (2 available)
NC-1000 (2 available)

Hammurlund N-10 (ceramic repaired)

National NC-800 (old version - ceramic repaired)
NC-800 (later version)
NC-150

Johnson 150-375

Millen (part no. unknown) w/ 2-5/32" disks
(part no. unknown) piston style

Unknown Mfgr w/ 2" disks

**** Ceramic Doorknob & Disk caps ***

These are used Centralab or similar -- $5 ea or 5/$20

500pF 10KV "TV" style
68pF 5KV 850 series

These are NOS disks by KD & Erie $3ea or 4/$10

1500pF 7.5KV
.01uF 4KV

And a couple NOS Silver Mica caps.

2200 pF 500V CM06 $1 ea
5100 pF 500V CM07 (high current rating) $2 ea

All of the above plus shipping, if necessary, naturally.

997. FS: Coax Connectors & Coax Relays

Newsgroup: rec.radio.amateur.swap
Date: 2001-08-09 00:01:10 UTC
From: Marv_E_Ads@Juno.com
Message-ID: <9ksjs6$e8m$1@news.netmar.com>
Source record: 5239
Cross-posted to:
rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap,sci.electronics.components

***** Used Coax Connectors ****

These are mostly used, fairly clean, (at least 80%) Amphenol parts.
There are anywhere from about 4 to 25 of each type available.

UHF female - UHF female barrel connectors -- $1 ea

UHF male - BNC female adapters -- $2 ea
UHF female - BNC male adapters -- $2 ea
UHF elbows -- $2 ea
UHF F-M-F Tees -- $2 ea
UHF female - N male adapters -- $2 ea (last one)

Andrews Heliax UHF connectors 1/2" 44AP male -- $10 (last one)

UG-57B/U N Male-Male connector -- $4 ea
UG-635/U C Female - BNC Male adapter -- $5 ea
UG-636A/U BNC Female - C Male adapter -- $5 ea
UG-259A/U 91836 -- HN female to LC female bulkhead adapter -- $30

SMA Female-Female Bulkhead connector -- $1 ea

***** New Coax Connectors *****

UG-1213/U HN Male Cable connector NOS -- $10

Kings KH-39-11 HN Female Cable connector NOS -- $10

Below are all new crimp on connectors, with all hardware, in individual
plastic bags; early-mid 1990's date codes.
I believe that they are all for RG-59 size cable.

Kings Electronics
KC-59-642-M06 BNC Cable Male -- $1 ea
KA-59-385-M06 TNC Cable Male -- $1 ea
KA-19-43 TNC Bulkhead Female -- $1 ea

*** Coax Antenna Relays ****

These both have (3) UHF connectors. They are somewhat old looking on the
outside but,
I popped the inspection port on each and all the contacts are all happy.
And they all go "clunk" upon application of the appropriate voltage.

Dow-Key DK-60 style
110 VAC coil -- $30 (last one)

Advance (same style but, heavier contacts & construction)
115 VAC coil -- $30 (last one)

All of the above plus shipping, if necessary, naturally.

Hi to the list,
I am in need of two of the small knobs with the white inserts for my Pacemaker, and a plug for both the 9 pin "Octal" type socket, and a plug for the xtal socket on the rear apron to supply the AC to a Dow Key relay. Any help out there? Check your junk boxes and let me know.

wb6vse@ipa.net

Thanks
Mike-K5VSE

Source record: 5228

Well, was going to use the TS50 Mobile, but the guy I was suppose to be getting a 767 w/2 meter from for our base unit backed out of our deal. SO, I'm looking to trade the TS50, or the TS50 Plus cash for a base or base/mobile rig that has 2 Meter on it. My wife and I are currently techs, but going for our Generals, and would like an HF rig that has 2 meter. The Yaesu 767 w/2 meter was looking good. I have a 986 tuner, so dont' really need a tuner, but WHAT DO YOU HAVE?? Open to offers. Not sure what all else has 2 meter on it, 706, 746, ? Or maybe even an hf rig like the 767 that can have modules added. TS50S has been mobile, so it's not new, a few scuffs, but functions like new. Comes in Original Box, has Mic, Mounting Bracket, Manual (copy), and Cables that came with it new. Will sell outright for $500 shipped anywhere in the US. Thanks for looking.

Take Care, Ken & Sallie
KD7MXN & KD7NVZ

PS. Have Numerous Ham references, and over 100 Positives on ebay with NO negatives. Also we take Paypal for Payments.

***** Used Coax Connectors ****

These are mostly used, fairly clean, (at least 80%) Amphenol parts.
There are anywhere from about 4 to 25 of each type available.

UHF female - UHF female barrel connectors -- $1 ea

UHF male - BNC female adapters -- $2 ea
UHF female - BNC male adapters -- $2 ea
UHF elbows -- $2 ea
UHF F-M-F Tees -- $2 ea
UHF female - N male adapters -- $2 ea (last one)

Andrews Heliax UHF connectors 1/2" 44AP male -- $10 (last one)

UG-57B/U N Male-Male connector -- $4 ea
UG-635/U C Female - BNC Male adapter -- $5 ea
UG-636A/U BNC Female - C Male adapter -- $5 ea
UG-259A/U 91836 -- HN female to LC female bulkhead adapter -- $30

SMA Female-Female Bulkhead connector -- $1 ea

***** New Coax Connectors *****

UG-1213/U HN Male Cable connector NOS -- $10

Kings KH-39-11 HN Female Cable connector NOS -- $10

Below are all new crimp on connectors, with all hardware, in individual
plastic bags; early-mid 1990's date codes.
I believe that they are all for RG-59 size cable.

Kings Electronics
KC-59-642-M06 BNC Cable Male -- $1 ea
KA-59-385-M06 TNC Cable Male -- $1 ea
KA-19-43 TNC Bulkhead Female -- $1 ea

*** Coax Antenna Relays ****

These both have (3) UHF connectors. They are somewhat old looking on the
outside but,
I popped the inspection port on each and all the contacts are all happy.
And they all go "clunk" upon application of the appropriate voltage.

Dow-Key DK-60 style
110 VAC coil -- $30 (last one)

Advance (same style but, heavier contacts & construction)
115 VAC coil -- $30 (last one)

All of the above plus shipping, if necessary, naturally.

Contact: Marv WC6W 310 649 3111 (reasonable hours Pacific Time please)

FS: Signal Generator .05-90MHz AM/FM/CW w/service manuals!

AUL Instruments, Inc., Model SG-1144/U

Excellent Condition!

(Several for sale, and one for auction on Ebay.com.)

NOTE!!

(I have a few more of these that are almost identical, for sale for
only $159 each plus shipping costs. Email me for photos, questions, or
a shipping quote, at tomg@fullnet.com. And, check my website for
many, many other great used test equipment bargains, at:

http://www.fullnet.com/u/tomg/gooteesu.htm)

See photos (and bid on one of them, on Ebay) at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1625673519

Auction ends on SUNDAY, Aug-12-01 12:30:42 PDT.

You will be bidding on or buying an AUL Instruments, Inc. SG-1144/U
Signal Generator, INCLUDING the two SERVICE MANUALS on a CD!

This is a good signal generator, completely functional and ready to go
to work for you. It's a nice unit, covering from less than 50 KHz to
90 MHz or more, providing CW (sine) output and AM or FM modulated
output, with output-level ranges from 0.3 microvolt to 1 volt RMS,
with digital frequency display and two analog meters, for Modulation
and RF Output.

It is in great condition, and has been tested by me, and works fine.
It came with military surplus documents that show a condition-code of
B, which means: serviceable and issuable without qualification. It
ALSO includes an inspection report that says "NO FAULTS FOUND"!

Everything is intact, and in very good used operating condition. There
is no physical damage that I can see, except for minor signs of normal
wear and tear. I tried almost all of the settings of all of the
controls, and everything I tried worked as expected. I did not notice
any noisiness in any of the controls. I did not rigorously check the

calibration (but it looked very, very close), did not test with external modulation, did not check the rear auxiliary output, and did not try running it on 230 volts. I also did not test the 100-Watt reverse power protection feature of the output.

The winning bidder or buyer will have a 10-DAY MONEY-BACK RIGHT-OF-RETURN if DOA.

The Ebay reserve price is only $119.00! You might get a deal! (Or, "Buy It Now", for only $159 plus shipping.)

Functional Description, AUL SG-1144/U Signal Generator:

50 kHz to 90 MHz Coverage, in Five Frequency Ranges

Digital Frequency Display, 4 digits, with "Display Test" button

Coarse and Fine Tuning Controls

Analog RF Output Meter: RMS Volts and dBm

Output Levels from 0.3 microVolt to 1 Volt, -120 to +10 dBm, in Fourteen Ranges (maximum output: about 3.4 volts p-p)

Variable Output Level Control

Analog Modulation Meter: AM Percent and FM Khz Peak

AM Modulation: 400 Hz, 1 kHz, and External

FM Modulation: 150 Hz, 400 Hz, 1 Khz, and External

FM Meter Range Switch: 10 KHz or 75 KHz full scale

Variable Modulation Level Control

Overmodulation Indicated by Flashing Frequency Display

External Modulation Input, BNC, 600 Ohms

RF Output, BNC, 50 Ohms

Output has Reverse Power Protection, 100 Watt Max.

Auxiliary Output, BNC, on Rear Panel

Permanently-Attached Power Cord, Three-Prong, with Cord-Wrap Storage

Operates on 115V/230V, Selectable On Rear Panel

1 Amp Slo-Blo Fuse, Accessible on Rear Panel

See photos and bid at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1620922189

FT: Computer gear for HF Rig / Equipment

I have the following computer gear available for trade or sale on a "newer" HF rig and equipment. Specifically interested in the below units but open for other suggestions. I am workable, will put money into it if your gear is worth more.

* Kenwood TS-50, TS-840, TS-847, TS-900
* Yaesu FT-100, FT-840, FT-900, FT-847
* Icom IC-706 / 706 MKII / 706 MKII-G
* Alinco DX-70 / DX-77
* or ??

What I've got.

// Compaq Deskpro Server
400 MHZ, 128 MB Ram, CD-ROM, 8GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard, Windows 2000 Professional. Tower case.More ram is available.

// Compaq Deskpro Desktop
350MHZ, 128 MB Ram, CD-ROM, 5 GB SCSI-2 HD, 10/100 NIC, Adaptec Ultra Wide SCSI Card, AGP Video, Mouse + Keyboard, Windows 2000 Professional. More ram is available. Desktop case

// Compaq Deskpro Desktop
350MHZ, 128 MB Ram, CD-ROM, 6 GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard, Windows 2000 Professional. More ram is available. Desktop case.

// Compaq Deskpro Desktop - Small Form Factor
466MHZ, 128 MB Ram, 8 GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard, Windows 2000 Professional. More ram is available. Small form factor case, very small footprint.

// Sun SparcSERVER 10 - Unix
50-MHZ RISC processor, 96 MB Ram, 4 GB Hard SCSI Drive, CG 6 Color frame buffer, On-board fast SCSI controller, On-board 10-100 base T Ethernet, On-board sound, additional fast SCSI controller, additional 10-100 base T Ethernet controller, Mouse + Keyboard. Excellent webserver, file server and strong Unix operating system. Machine is running Sun Solaris (preferred) or any flavor of Linux ported for the Sparc platform. Aurora case.

// Sun SparcSTATION 5 - Unix
70-MHZ RISC processor, 64 MB Ram, 2 GB Hard SCSI Drive, CG 6 Color frame buffer, On-board fast SCSI controller, On-board 10-100 base T Ethernet, On-board Sound, additional fast SCSI controller, additional 10-100 base T Ethernet controller, Mouse + Keyboard. Excellent

webserver, file server and strong Unix operating system. Machine is running Sun Solaris (preferred) or any flavor of Linux ported for the Sparc platform. Aurora case.

// Hewlett Packard Rack Mount Network Hubs
4 available, 2 14 port and 2 15 port hubs. All are in excellent condition and recently removed from service. These are rack mount servers.

// Proxima LightBook LB20 DeskTop Projector
SVGA and RCA inputs, 200 ANSI lumens, Serial jack, Computer in jack, Monitor out jack, Video in jack, Audio in & out, TV output, Twin Lamp, True SVGA compatibility (800 x 600), International power supply, LightBoard drawing tool, Remote control, Lightweight (11 pounds - 13.5 x 9.25 x 5 inches), Custom padded case. This unit is in excellent condition and includes all the original equipment (cables + books).

If you see something you like, please let me know. I am open to trades or sales on any of the machines. Willing to trade multiple machines for the right gear. Response via Email is preferred.

Sales always welcome ...

Thank you!

I'm posting this for my computer underpriveleged buddy John Soine, WB7WQK. He's a very straight shooter, and will tell you exactly how it is, no BS. He's looking to sell the below listed rigs, or trade a combination of the following for a 756 or 756 Pro. Here's the list:

Icom 751, just brought back from Icom (he lives within driving distance to them) ALL updates, repairs, and alignments done. With SM6 Mic, Manual, and built in PS35 Power supply. $650.00 O.B.O.

Kenwood TS930S/AT w/CW Filter, MC60 Mic., Matching Speaker w/filters, original double boxes. Needs power supply repaired, cosmetically a solid 9. $550.00 O.B.O.

Alinco DX70TH 6-160 meter, 100 watts out all bands, Mic, Manual, Box. Has matching EDX2 HF Autotuner. $700.00 O.B.O. for the pair.

Please contact John directly @ 360-428-5995, let it ring, if he doesn't pick up it will go to his cell phone which he always has with him. He's open to offers, and loves to dicker, so give him a shout.

1023. Alinco DJ-S111T VHF HT - $60

Newsgroup: rec.radio.amateur.swap
Date: 2001-08-14 00:01:44 UTC
From: KD5VU <kd5vu@qsl.net>
Message-ID: <kd5vu-B603E6.19014413082001@news.tiac.net>
Source record: 5250

The subject 'Alinco DJ-S111T VHF HT - $60' says it all execpt plus shipping. It did not sell at $75 so I have reduced the price. The rig works and comes with FULL documentation, including special order $25 Alinco service manual. Mods have been installed for extended Rx. I warrant the HT not to be DOA. Note this HT has 50 mw output so you need to within repeater range or use it for short range simplex operatons. The Rx is great. Reason for selling is I have one too many HT's and this one has been sitting in a drawer.

I have a Cushcraft X7 H.F. antenna (7 element) which was installed for a year and the 40 meter add-on (X740). Both are in excellent shape except for some bird do-do. Original boxes and all hardware. $360 for the X7 and $190 for the X740. Prefer local pick-up in the Memphis, TN area, but will ship if you pay shipping.

thanks,
derf wk4dx

hello
i am in need of many old MFM and RLL type hard drives you know the old 5
1/4 width ones in either half or full hieght
i need the platers out of them
so if you have any of the old MFM or RLL drives working or dead dont
matter they will die when i take them apart anyways
i am a poor old blind ham so please dont try to make your car payment
with these if you want to clear out the closet and free up some space i
am interested in them
if you have any please email me at
mailto://k4oxg@tampabay.rr.com

I am not trying to start a flame fest or anything, but you might want to recheck your model number of your radio. the ICOM IC-228a is a 2 meter mobile radio, not a dual band hand held. Good luck on your search though. 73s Billy KE4PJR

Poor voltage supply or bad grounding. check voltage at the radio during keydown even at low power you probably will see voltage sag below 12 volts. Check for corrosion where the battery leads connect.

I am cleaning off my workbench again...

I have an Icom IC-02AT that has a bit of a problem with receive sensitivity. This unit came to me as a part of a whole junk box full of stuff. It had a few other problems I managed to fix, but alas I am loosing interest in repairing it any further (as it has taxed my skill and patience.)

It is just the radio, no battery, no antenna, and no charger.

$20.00 shipped to the lower 48.

I have a Kenwood TS-430 that is in very good condition, never been used by a smoker and ready to go to a good (or bad...) home. I got it used but didn't get the hand mic. The unit has a few minor wear spots, but nothing serious and no other damage/ dents, etc. I would like $350 for the unit but will consider reasonable offers.

I also have a Kenwood MC-60A that was used with the TS-430 and I will consider selling it seperately for $100, but not until the TS-430 is sold. The mic is in excelent condition and is the amplified version of the MC-60.

I will sell both for $450.

All prices are plus shipping and insurance. Email with questions ghopper@eskimo.com

FS: Beautiful ETO Alpha 89 HF 1.5 KW Amplifier. This is the same RF Deck, etc. as in the Automatic-tuned Alpha 87A HF Amplifier (about $6000 new), but is the manual-tuned version. Checked out by Alpha, easily puts out a full 1.5 KW with 40-50 watts input, all bands 160 through 10 Meters. Includes original boxes and manual.

I just recently picked up an Alpha 87A amplifier, and I will consider selling the 87A and keeping the 89. I just don't need two amps! $2700 plus shipping for this excellent condition ETO Alpha 89 Amplifier.

IC-38A 220 MHz FM Transceiver

I bought this radio at AES, Cleveland, as a trade-in about five years ago. I never used it for mobile and by don't think it was used as a mobile at all. I never had a base antenna so I used a mobile antenna on a piece of steel. I am offering the radio.

The IC-38A has virtually all the accessories supplied, including the box and the manual. My house is a nonsmoking area!

This item is sold AS IS.

Ground shipping will be $9.95 and will be paid by buyer.

They'll be rare if you find them. One possible avenue is to find an OLD
TV parts distributor and see if they might have an ECG 785 or NTE 785.
That too is a discontinued part number, but someone who's been in the
business for a really long time might have one in the cracks.

Help,

My trusty Radio Shack 144/440 SWR/Powwer Meter stopped working and they no longer carry this item or can provide information on the parts. Something tells me one of the two diodes has been zapped; however, I do not have parts list or schematic.

Does anyone have a schemitic or parts list that I could copy?

RS is willing to sell a service manual for $3 Plus $2.50 shipping and I am not sure it work spending the money on somehting may or may not be the correct item

10822591 MANUAL,SERVICE 19-320 MS1900320

I hope someone has the schematic and can tell me the part numbers for the two diodes.

Help,

My trusty Radio Shack 144/440 SWR/Powwer Meter stopped working and they no longer carry this item or can provide information on the parts. Something tells me one of the two diodes has been zapped; however, I do not have parts list or schematic.

Does anyone have a schematic or parts list that I could copy?

RS is willing to sell a service manual for $3 Plus $2.50 shipping and I am not sure it work spending the money on something may or may not be the correct item

10822591 MANUAL,SERVICE 19-320 MS1900320

I hope someone has the schematic and can tell me the part numbers for the two diodes.

Dick, KD5VU

Kenwood TS-50 with matching AT-50 antenna tuner. Both in excellent condition. Only very minor surface marks. Never mobile. This is an easy to use and very compact little rig and the tuner works like a charm - I've used it with dipole, G5RV, and delta loop and it works great.

Set includes manual (with plastic covered manual), mic, DC cable, AT-50 connector cable and mobile mount. Original boxes and packing included.

$725 for both.

I'll pay shipping anywhere in CONUS. Will consider trade for newer full-size, HF or multiband HF rig.

The "Yo-Yo-Tenna Deluxe" is going to be featured in the Nov. and Dec.
issues of CQ magazine. So you may want to get yours now...just in case
we get back-logged. Plenty in stock. They work 40 through 2 meters.
Operation on 75/80 and 160 can be accomplished by adding single reels.
A lot of fun! Many say it reminds them of the old "Hy-Gain tape
measure" antennas of the '50's. ONLY $29.95 plus s&h.

I have an Icom IC-2SAT ht for sale. The radio is in great shape and was part of another deal for several radios. I have too many 2m HTs so this one is for sale.

The IC-2SAT has an internal battery, 48 memories, 10 DTMF memories, CTCSS encode and decode (because this unit has the optional UT-50), and is in great condition.

The package includes: the IC-2SAT and antenna, a spare internal battery, the charger, a BP-83 battery pack, manual, a HM-46L hand mic that I picked up in another deal, and of course the UT-50.

I'd like $75 plus shipping.

Note: The YK-88S is just the stock sidband filter, no stock mic ?
$350 ...does it have the FM board, or a AM, CW filter ?
Joe

NEW never used air variable capacitor for sale or possible trade.
Sixteen rotors/stators with the rotors 3/8" apart and the stators are of
course in between. Do not know the manufacturer, but this thing looks
just like the air variable in the Palstar tuner
http://www.palstairinc.com/palmain.htm

I'm asking $50.00 or what to trade? I'm interested in PSK31 stuff now,
but what ever!

Butch KF5DE

My display is intermittant when I remove the nicad battery pack so I suspect
the internal lithium battery needs to be replaced.
1) I need to know how to locate it,
2) how to remove it
3) what number to replace it with.
Also, if you have a schematic and/or service manual or know where to get them, please let
me know.

FT: Computer gear for HF Rig / equipment

I have the following computer gear available for trade or sale on a "newer" HF rig and equipment.
Specifically interested in the below units but open for other suggestions

* Kenwood TS-50S, TS-840, TS-847, TS-900
* Yaesu FT-100, FT-840, FT-847
* Icom IC-706 / 706 MKII / 706 MKII-G
* Alinco DX-70 / DX-77
* or ??

What I've got.

// Compaq Deskpro Server - $400
400 MHZ, 128 MB Ram, CD-ROM, 8GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard,
Windows 2000 Professional. Tower case. More ram is available.

// Compaq Deskpro Desktop - $375
350MHZ, 128 MB Ram, CD-ROM, 5 GB SCSI-2 HD, 10/100 NIC, Adaptec Ultra Wide SCSI Card, AGP Video, Mouse + Keyboard, Windows 2000 Professional. 400 MHZ processor available. More ram is available. Desktop case

// Compaq Deskpro Desktop - $375
350MHZ, 128 MB Ram, CD-ROM, 6 GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard,
Windows 2000 Professional. 400 MHZ processor available. More ram is available. Desktop case.

// Compaq Deskpro Desktop - Small Form Factor - $350
466MHZ, 128 MB Ram, 8 GB HD, 10/100 NIC, AGP Video, Mouse + Keyboard, Windows 2000 Professional. More ram is available. Small form factor case, very small footprint.

// Sun SparcSERVER 10 - Unix - $325
50-MHZ RISC processor, 96 MB Ram, 4 GB Hard SCSI Drive, CG 6 Color frame buffer, On-board fast SCSI controller, On-board 10-100 base T Ethernet, On-board sound, additional fast SCSI controller, additional 10-100 base T Ethernet controller, Mouse + Keyboard. Excellent webserver, file server and strong Unix operating system. Machine is running Sun Solaris (preferred) or any flavor of Linux ported for the Sparc platform. Aurora case.

// Sun SparcSTATION 5 - Unix - $275
70-MHZ RISC processor, 64 MB Ram, 2 GB Hard SCSI Drive, CG 6 Color frame buffer, On-board fast SCSI controller, On-board 10-100 base T Ethernet, On-board Sound, additional fast SCSI controller, additional 10-100 base T Ethernet controller, Mouse + Keyboard. Excellent webserver, file server and strong Unix operating system. Machine is running Sun Solaris (preferred) or any flavor of Linux ported for the Sparc platform. Aurora case.

// Hewlett Packard Rack Mount Network Hubs - $75 (each)
4 available, 2 14 port and 2 15 port hubs. All are in excellent condition and recently removed from service. These are rack mount servers.

// Proxima LightBook LB20 DeskTop Projector - $425
SVGA and RCA inputs, 200 ANSI lumens, Serial jack, Computer in jack, Monitor out jack, Video in jack, Audio in & out, TV output, Twin Lamp, True SVGA compatibility (800 x 600), International power supply, LightBoard drawing tool, Remote control, Lightweight (11 pounds - 13.5 x 9.25 x 5 inches), Custom padded case. This unit is in excellent condition and includes all the original equipment(cables + books).

If you see something you like, please let me know. I am open to trades or sales on any of the machines. Willing to trade multiple machines for the right gear. Response via Email is preferred.

Sales always welcome ...

Thank you!

Here we have another spammer. It misleads
in the subject line by saying this item
is FS "OR" For Sale "OR" misleads and
indicates said item is for sale when it
is actually FA = For Auction. The FA is
used by those of us that do not Do Auctions.
We set our spam filters for FA in the subject
line and we do NOT have to see the auction
spam. Do not trust this person.

"If they Lie in the subject line"
They will have no problem misrepresenting
the JUNK they have at the Auction..

If you have received this message it is
because I saw a subject line that interested
me and when I downloaded the message
It was nothing more than your auction SPAM
and was NOT what the subject line said it was.

Some of the Real Sleazy people will make
it look like a reply to another message.

Easiest way to avoid this message?
Do NOT LIE in the subject line..

Just My Opinion..

Bob

1122. Oscilloscope for sale

Newsgroup: rec.radio.amateur.swap
Date: 2001-09-02 03:23:13 UTC
From: Bob <balbert@cnmnetwork.com>
Message-ID: <VChk7.36881$4b5.914483@news6.giganews.com>
Source record: 5148
Cross-posted to: la.forsale,rec.radio.amateur.homebrew,rec.radio.amateur.swap,rec.radio.swap

I have a great working Tektronix 547 50 MHz oscilloscope with a lovely assortment of plugins. I have dual trace, four trace, calibrated offset, and spectrum analyzer plugins plus a few spares. I also have some manuals but not sure what they cover.

The second unit needs a capacitor. It's an old Dumont 401R, about 100 kHz bandwidth, complete with manual. It only needs the resonating capacitor for the self regulating power transformer, I believe 0.84 microfarads or so at a few hundred volts. The tubes alone in this baby make it worth its weight (which is considerable) in parts.

The third unit is a fine working Tektronix 316 portable unit (well, the carrying handle is broken). This one is good to 5 MHz and has the usual Tektronix quality and performance. No manual.

I'd rather not ship these. I am in the Los Angeles area. All reasonable offers considered.

73, Bob K6DDX

If you are serious about 432mhz, then these antennas are just what you need.
For sale - Four K1FO 25 element 432mhz yagis, two are new in the box and two
are excellent condition used. Also included is a 6 ft by 6 ft "H" style
frame for mounting them. Here's your chance to have 100 elements on 432 for
weak signal work, CW, SSB or EME !!
You can compare my prices to C3I at their Website address of:

c3iusa.com

Due to the size of all this, it is a pick up only.

$400 tnx de N&#65533;KO

No! It is the result of overwhelming LEGITIMATE complaints by Usenet users about the abusive practice of off-topic postings of eBay auctions to newsgroups where such postings are contrary to the newsgroup charter.

You will note that eBay does not have a policy against posting information about auctions or links to auctions in Usenet newsgroups were such postings are proper. The policy only prohibits postings that are contrary to the group charter and thereby abusive.

Of course if you can't tell the difference I guess we know the kind of person the policy was designed to reign in.

What I want to know is, what gives Ebay the right to deny rights
delegated to us by our Constitution?

Before you can know that, you need to know more about the Constitution itself.

Whatever gave you the idea that the Constitution says anything even remotely related to what E-bay is doing? The Constitution prescribes what *government* can and cannot do. It doesn't give you any particular rights vis-a-vis E-bay.

Dear Nitwit:

Since when do you suppose the constitution gives you ANY "right" to use someone else's private property?

Last time I looked you do not own eBay, and you do not own Usenet, etc. When you want to use something that belongs to others you have two choices - play by their rules or go play somewhere else.

Another shack cleaning special!

I have way too many 2M radios and so the Yeasu FT-270RH must go! The radio is about an 8.5 cosmetically. The radio has given flawless service. The LCD is clear. It has the DTMF mic and does ctcss tones. It comes with the radio, mic, power cord, and the mobile mount with quick release.

I would like $95 plus shipping for the radio. If you need a picture, I can take one and upload it to my webspace for your viewing.

I am going to try to save myself the headache of selling these on eBay where they will surely command a higher price than I expect (I am constantly suprised by what stuff sells for there.)

I have two Motorolla remote handset/monitors in fair to good condition. They show wear but are not damaged. That is why only fair to good. They are black bakelite and very heavy construction. There is a red transmit light on the side and volume and PL controls on the front.

Both units were working when removed from service several years ago.

I'll take the best offer including shipping and please indicate if you want both, or just one.

A picture of one unit (they are pretty much the same) is located at http://www.eskimo.com/~ghopper/mphone1.jpg The photo shows the unit in all it's dusty glory! It was manufactured in 1963 but still looks like the height of Motorolla technology. Actually the units are pretty cool and I was going to use them for a remote in my office for a 2m rig I keep in our wiring closet but I ended up buying a rig with a remote head that uses a 4 wire interface and decided I liked that option better.

I have a 2 meter amp for sale. It is new-in-box as I never got around to using it. It was made for Radio Shack and by all accounts was a good amp and did a superior job of rejecting intermod due to its good receive filter (that's why I bought it). It has all the mounting hardware, etc.

Specs are 1-5 watts in 30 watts out, has receive preamp.

Here's a picture: http://www.eskimo.com/~ghopper/2Mamp.jpg

I'd like $40.00 plus shipping but will consider offers.

Actually, as a regular reader/poster on several of the NGs this thread is
running on, I enjoy reading selected FA posts, if the item sounds
interesting and IF it is properly listed as FA. Reading these has resulted
in several spur of the moment ebay purchases. I brouse ebay on an irregular
basis, and might have missed some of the items had they not been mentioned
on the NGs. I will not buy any item when the subject line says For Sale or
FS, and it turns out to be on ebay.

> just me two cents folks ;)

Yeah, I just can't understand what gets these people so worked up about them. I pick and choose which items I read in the NGs, if the subject line doesn't interest me, I don't read it. It's as simple as that. I only use the filters on the commercial sellers that continually post FS items. I wonder if these same people complain about going into a library and finding books on the shelf they don't want to read.

Just my two bits' worth (inflation)

1150. FT/FS Metal Detector Whites Spectrum XLT for VHF Repeater

Newsgroup: rec.radio.amateur.swap
Date: 2001-09-04 13:53:09 UTC
From: Kim <none@none.com>
Message-ID: <j0l9pt0v3aa55p61jta724uiuf9rg96ddh@4ax.com>
Source record: 5075

I would like to offer my metal detector in excellent shape for a vhf repeater that is virtually plug and play on the ham bands... Detector comes with all manuals, video, recharger and original box,

Extras include:
Whites Blue Max 800 10" coil with extra rod for quick change. (never used)
battery case for AA batteries
Calrad detector headphones
Coil covers for both coils (saves the coils from wear)

Repeater must be in great working condition with duplexors and not look like crap. Let me see what you have..

Please remove the .nospam from my email to reply.

Will sell outright for $675 + Shipping

Please remove the .nospam from my email to reply.

1152. Dust that filthy rig!!

Newsgroup: rec.radio.amateur.swap
Date: 2001-09-05 02:16:42 UTC
From: Dave Edwards <kd2e@home.com>
Message-ID: <eWfl7.706547$K5.75778330@news1.rdc1.nj.home.com>
Source record: 5078
Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.swap

The tabletop (particularly behind my rig) gets very dusty. Left alone,
little spiders will make there homes there.
I always figured old T shirts with some endust was the best duster.
I found something better!
Pull-out dusting sheets called SWIFFER.
At the grocery store with cleaning junk.
They work GREAT! They actually do what they say they do. They pick up
the dust and do not just push it around. Totally dry, so no smears. Even AOK
for front panels. Does a good job on wrinkle paint rigs also.
I don't usually plug stuff like this, but if you give it a try, you will see
why I did.
Regards....Dave

You're right Dave....I have been using the same kind of product but made by Endust instead of Swiffer. Very effective .... on the front of my TS450 I just switch off the power and vigorously wipe down the front about once a week. Keeps this 6 yr old rig looking new...I also use them on my AL-811H....

Oh dear, I was afraid you'd say that. I'm looking for a new front panel
for a Icom 745, btw, if somebody has one. I tried like the dickens to
minimize the effects of the Caribbean salt air with careful maintenance
and lots of tender rubbing but I'm afraid that the lettering finally
wore off...moreso from regular cleaning.
What I want to see is a product that PREVENTS cobwebs under my BA
chassis...not just something to sweep them away.

What I do to reduce "cleaning" wear is to use a small fine bristle
paint brush to dust off my rigs. Works great and makes no wear on the
lettering etc. If I have to actually clean a front, I use a small wad
of toilet paper tissue and either a small amount of plain water or
windex. Windex works great normally, but I would always want to test
it first on a new rig. So far I've never seen it hurt paint. If in
doubt , I would use plain water. The toilet paper if wet makes very
little wear. I never use a course towel like a kitchen paper towel.
Those can scratch in some cases. I had to clean the front of my 830
after field day this last year. Windex and a toilet paper made it look
like new on the front. P.S. I don't actually spray the windex on the
radios, I just spray a little dab on the toilet paper wad to get it
wet. I go back over it with my paint brush to clean the "paper lint"
off if needed. MK

Normally, I don't like "me too" posts, but MK is right on with this one
and deserves some support. I have done everything he says for years and
the results are excellent. The only minor difference is I use a "large"
bristle brush instead of a small one. :-)

Hi Folks..
Anyone have the pinout for the MCS2000 RIB --> Radio programming cable?
Or better yet does anyone know if it's the same one as the RIB --> GTX
cable ? The Motorola part# is RKN4063 but they want $139.00 for it !!
I *think* batlabs had it but sadly batlabs seems to be gone :(

We took the advice of customers and are now selling our PEANUT WHISTLE TWO 40 meter QRP CW transmitters with transmit crystal, if you are in need of one. We've got them in stock for the internationally recognized QRP hangout frequency of 7.040 MHz.

These transmitters are ASSEMBLED. NOT a kit! And they are a blast to operate! ONLY $19.95 plus shipping if you don't need a transmit crystal. ONLY $29.95 plus shipping WITH a 7.040 MHz transmit crystal. At these prices, they're far less expensive than many kits! Many in stock for immediate shipment.

Hi Ladie/Gents. Sallie and I found a v/uhf all mode we want, so here's the deal. We have a PROwatt 2,500 Inverter, specs can be found here, http://www.statpower.com/pw2500.htm, We paid $900, it's got about 3 hours use. It'll run just about anything you want to plug into it. Even has a 1 Horsepower surge capacity. We'll take $450 SHIPPED, anywhere in the US. That's $250 less than I was asking in a previous post. Thanks for looking. Take Care. 73s

The one I use is a 1.5 inch wide model with about 2 inch long
bristles. I use it for nothing but dusting radios to keep it clean.
It's not real small. I actually should have said to use soft bristles.
Thats more important. You wouldn't want to use stiff hard bristles as
they could scratch.

MK

And just because the bristles feel soft to you, doesn't mean they
are soft. Some synthetic fibers (polyester, nylon, etc) used in
brushes feels soft because it is so fine. However it is actually a
very hard material and the ends can be sharp and hard enough to
scratch plastic. I tend to prefer a horse hair brush, but pig
bristle (cheap "natural fiber" brushes from asian countries) are
usually OK as well.

Here we have another spammer. It misleads
in the subject line by saying this item
is FS "OR" For Sale "OR" misleads and
indicates said item is for sale when it
is actually FA = For Auction. The FA is
used by those of us that do not Do Auctions.
We set our spam filters for FA in the subject
line and we do NOT have to see the auction
spam. Do not trust this person.

"If they Lie in the subject line"
They will have no problem misrepresenting
the JUNK they have at the Auction..

If you have received this message it is
because I saw a subject line that interested
me and when I downloaded the message
It was nothing more than your auction SPAM
and was NOT what the subject line said it was.

Some of the Real Sleazy people will make
it look like a reply to another message.

Easiest way to avoid this message?
Do NOT LIE in the subject line..

Just My Opinion..

Bob

I was interested in Buying it NOT Bidding on it. It said
FS. = For Sale.. If it had CORRECTLY IDENTIFIED
ITSELF IN THE SUBJECT LINE, AS An "FA" I WOULD
NOT HAVE DOWNLOADED THE MESSAGE. You dumb F***.

Like it say's

If you have received this message it is
because I saw a subject line that interested
me and when I downloaded the message
It was nothing more than your auction SPAM
and was NOT what the subject line said it was.

Now F.O.A.D.

Just my opinion..

Yaesu FT 1000D Excellent condition with original manual and carton. Make me a fair market value offer. Remember what you would pay if you purchased this new. Anything I feel to be an insult will not warrant a response. I am located on Long Island and prefer not to ship.

I suppose you'd rather protest than actually buy anything, but in case
you are actually trying to buy, I happen to have a extra TS440S/AT
that I'd be willing to sell. A civil email would elicit more
information.

Because although we loathe what they might say, we defend their
right to say it. The first ammendment essentially agrees with
the old saying, "Sticks and stones may break my bones but words
can never hurt me." And freedom is always better than fascism.

All are tested good. $20 for all 14 35LR6 sweep tubes plus postage. E-mail if interested.

Thanks,

Kelly

1185. Syntor X Radio Programing

Newsgroup: rec.radio.amateur.swap
Date: 2001-09-09 05:01:48 UTC
From: Brad <ka8tok@ameritech.net>
Message-ID: <9vtlptsuunriu71cgoh00bnot651j70hsm@4ax.com>
Source record: 5012
Cross-posted to: alt.ham-radio.vhf-uhf,rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.swap

Syntor X Programming

We can program your Syntor X EEPROM memory modules for $30.00
each plus shipping and handling to and from your location. We however
do not supply the memory modules you must provide your own. We
guarantee our work and can program the following ranges.

800 MHz

UHF 406 - 420 MHz
450 - 470 MHz
470 - 488 MHz
482 - 500 MHz

VHF 136 - 154 MHz
HI 148 - 172 MHz
150 - 174 MHz
148 - 174 MHz

VHF 30 - 50 MHz
LO

You must know which range your radio covers for the programming to
work correctly.

We need to know the following information for each channel
programmed.

If the radio is 8 / 16 or 32 channel
Transmit frequency and Transmit PL/DPL or blank for each
channel.
Receive frequency and Receive PL/DPL for each channel.
Duration of the TOT (time out timer) or disabled for each
channel.
Scan list for each channel.
I.e. Channel 1 selected (scan 3 6 8)
Or Channel 5 selected (scan 1 4 7 9 15)
Your radio must support scan on the control unit to use this
feature. If there is no scan button on your control unit then don't
bother with a scan list.

If you don't know the information or don't understand the
information being requested then ask your local radio dealer for the
correct info or don't bother. I am not psychic just psycho. We can not
guarantee misinformation provided by you.

If you pay the shipping and handling round trip to us we can
test the radio with the EEPROM in it to make sure every thing works.

For More info contact Brad Kellison KA8TOK by E-Mail:
KA8TOK@Ameritech.net
or KA8TOK@juno.com .

I have a complete Motorola Syntor X High power, lowband unit. This package as the 100 (110 ?) watt drawer unit with the 16 chan. pushbutton control head and mounting bracket, brand new speaker and bracket, mic and hanger with the PL decode control, complete cable, drawer unit with the mounting tray, and copy of the very complete manual.

This is one of the units that will cover both the 10 meter band and the 6 meter band.

The whole thing is in great condition.

I would like $195 plus shipping. Questions? email ghopper@eskimo.com

I have a mint JRC JST-145 HF radio with original box, manual and optional service manual. It comes complete with the hand-mic, optional desk-mic and the optional 2.7kHz SSB filter with bandwidth control. This radio was just aligned and checked out. I also have a home-brewed PSK31 interface I will throw in as well. I have the QST review if anyone is interested. I am looking to buy a new FT-1000MP MkV or trade for ??. I am also looking for a plain FT-1000MP for possible trade.

Darren

Why get "cheap" when you can get the best !!
Tektronix R7603 100 MHz Mainframe, comes with
(1) Vertical Amp (7A18) and (1) Time Base (7B53A),
has room for one more plug-in.
Just released from Cal Lab, works fine, can demo
(with PG-506/TG-501 cal setup).
$125, pickup in Lexington, MA
Packing and shipping extra if you want it shipped.
Thanks, Dick, W1KSZ

1214. WTB: Late Racal RA-117 receiver

Hi,
I am looking to buy a later Racal RA-117 receiver. It needs to be unmodified
and in
excellent condition, both electrically and cosmetically. I am looking for a
rack mounting version without the desktop cabinet. I am (needless to say)
quite happy to pay freight costs to New Zealand and indeed could arrange
shipping from here.
I wonder whats is out there.
Thanks
Ted

I have for sale an absolutely mint Kenwood TS-850SAT. I am the original non smoking owner. I have both shipping boxes, hand mic, owners manuals and unopened accessory bag. The radio is a 10 out of a 10 functionally and cosmetically. The radio includes the SO-2 TCXO unit which is a $180.00 option. This is one of the last 850's manufactured. The serial number is 80200024. This is most likely one of the finest 850's you will find. I am asking $1,000 plus shipping from 48026.

Model SP-101PB includes manual, very clean condition.

Works as good sounding external speaker for any rig and includes hybrid telephone patch with balance meter, etc.

$75 or trade.

For sale my Phoenix SX 440mHz 2 channel rig. I started the 9k6 baud conversion over a year ago and never got to finish it.Since packet is dying out here in W.N.Y. I might as well put it up for sale.This rig can be programed for any 2 freqs,either simplex or repeater.I wired a mic to the outputs on the back of the rig and it works,so this unit will not be DOA,just the finishing touches for 9k6 baud packet,or un-converted for repeater use.$125.00 plus shipping in U.S.A. dollars from 14120 zip.

Hello,

i have a motorola ASTRO mobile radio for sale, in Canada,

it is a model T99DX+138W with remote control head model 9000.

It is mint condition, the data cable linking the control head to the
radio is in perfect condition, full lenght.
I live in Canada, close to Montreal, and would prefer local buyers, to
avoid the problems of having to exchange money and merchandise.

Any question is welcomed...

Thanks...

Hi,
Selling a nice Gonset GSB100, SSB,CW, and AM transmitter. New Peter Dahl power transformer, filter capacitors. We all know how these have problems with the power transformers. The rectifiers have been replaced. (5U4) New driver and final tubes. Several capacitors and resistors have been replaced as needed. Front panel is very good, all lettering great. Tested on 75 and 40. Now the bad part. The string for the band selector slips, causing the drum to be off a little. Will need to be replaced. Also, it needs a 9006 tube in the "Relative RF" output meter circuit. Asking $425.00 plus shipping from Arkansas. Includes a W7FG manual. Also included, is a small card, indicating that this was number 29 of 250 made in this particular run from Gonset. There are quality control stamps and names on the tag. Pictures available to serious folks. I have a nice double box to ship to your QTH safely. Please reply to me direct, as I sometimes miss reading the list for a few days at a time. I can be reached during the day at 1-501-394-5589. Will list on the bay if it doesn't go here.

Thanks
Mike-K5VSE
God Bless America

My favorite brother-in-law is being called up to active duty. He's a U.S. Army Drill Sargent. I've had a dormant DX-375 collecting dust on my shelf for many months. So I've decided to send it down to him along with a portable antenna.

Might I suggest that if you have a friend or loved one who is or will be participating in active military duty, that you consider getting them a shortwave receiver as a gift. There are many inexpensive units available at Radio Shack or many mail order companies. It will give them the opportunity to listen to programming from home as well as from our allies.

May God Bless America.

I have for sale an absolutely mint Kenwood TS-850SAT. I am the original non smoking owner. I have both shipping boxes, hand mic, owners manuals and unopened accessory bag. The radio is a 10 out of a 10 functionally and cosmetically. The radio includes the SO-2 TCXO unit which is a $180.00 option. This is one of the last 850's manufactured. The serial number is 80200024. This is most likely one of the finest 850's you will find. I am asking $1,000 plus shipping from 48026.

Command discretion (maybe). It pretty much depends on things they don't know about yet.

Well, when my brother's squadron was called up for Desert Storm duty, he took a Radio Shack multi-band portable with him, in fact he bought it just to take with him. He didn't have any problems. Of course, a Major (Command Pilot) in the Air Force might not be hassled as much as a PFC in the Army. Like my brother said "It sure beats walking!"

Here we have another spammer. It misleads
in the subject line by saying this item
is FS "OR" For Sale "OR" misleads and
indicates said item is for sale when it
is actually FA = For Auction. The FA is
used by those of us that do not Do Auctions.
We set our spam filters for FA in the subject
line and we do NOT have to see the auction
spam. Do not trust this person.

"If they Lie in the subject line"
They will have no problem misrepresenting
the JUNK they have at the Auction..

If you have received this message it is
because I saw a subject line that interested
me and when I downloaded the message
It was nothing more than your auction SPAM
and was NOT what the subject line said it was.

Some of the Real Sleazy people will make
it look like a reply to another message.

Easiest way to avoid this message?
Do NOT LIE in the subject line..

Just My Opinion..

Bob

All,

I've read all the threads associated with this post, and agree it's a good idea. For those soldiers staying in the US, there really is no need for a SW receiver - soldiers today have easy access to cable TV and the internet in their barracks, so staying informed is no problem. However, for soldiers deploying for "points unknown" a good AM/FM/SW radio with a simple wire antenna can be a godsend. During Desert Storm I remember laying in my bunk in the middle of the Saudi desert the night the bombing campaign started and listening to a faint BBC AM broadcast on my old pocket radio - and hearing a live report from Israel that Iraq had fired SCUD missiles at Tel Aviv and that the Israeli military had detected nerve gas! (Fortunately this report was later retracted - the SCUDs did hit, but no nerve gas). Talk about immediate reporting!

There is little chance that the military will confiscate personal radios. Once a significant US military presence is established in an area (and the host nation agrees), Armed Forces Radio will establish a broadcast site, usually low power FM. This will bring servicemembers music, live feeds from stateside radio news and 'offical' information, so the military sees radio as a valuable way to distribute information and keep the troops entertained. However, until this service is established SW is about the only reliable way to get 'western' news and information. If you have a service member who is deploying my strong recommendation is to provide him/her with a good, small, inexpensive AM/FM/SW receiver that uses AA batteries (so they can also use them in their cd player), LOTS of spare batteries, a switchable (110/220) 'wall wart' power supply with interchangable plugs (RS sells them), headphones (ear buds are best) and a long wire antenna (a simple length of wire with an alligator clip works just fine). Pack it well and keep it small (remember, if it can't fit in a duffle bag it can't go!).

73!

1265. Syntor X Radio Programing

Newsgroup: rec.radio.amateur.swap
Date: 2001-09-19 13:57:23 UTC
From: Brad <ka8tok@ameritech.net>
Message-ID: <l39hqt4cesncebs7cr27d8vmskt7vrm8gf@4ax.com>
Source record: 4991
Cross-posted to: alt.ham-radio.vhf-uhf,rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.swap

Syntor X Programming

We can program your Syntor X EEPROM memory modules for $30.00
each plus shipping and handling to and from your location. We however
do not supply the memory modules you must provide your own. We
guarantee our work and can program the following ranges.

800 MHz

UHF 406 - 420 MHz
450 - 470 MHz
470 - 488 MHz
482 - 500 MHz

VHF 136 - 154 MHz
HI 148 - 172 MHz
150 - 174 MHz
148 - 174 MHz

VHF 30 - 50 MHz
LO

You must know which range your radio covers for the programming to
work correctly.

We need to know the following information for each channel
programmed.

If the radio is 8 / 16 or 32 channel
Transmit frequency and Transmit PL/DPL or blank for each
channel.
Receive frequency and Receive PL/DPL for each channel.
Duration of the TOT (time out timer) or disabled for each
channel.
Scan list for each channel.
I.e. Channel 1 selected (scan 3 6 8)
Or Channel 5 selected (scan 1 4 7 9 15)
Your radio must support scan on the control unit to use this
feature. If there is no scan button on your control unit then don't
bother with a scan list.

If you don't know the information or don't understand the
information being requested then ask your local radio dealer for the
correct info or don't bother. I am not psychic just psycho. We can not
guarantee misinformation provided by you.

If you pay the shipping and handling round trip to us we can
test the radio with the EEPROM in it to make sure every thing works.

For More info contact Brad Kellison KA8TOK by E-Mail:
KA8TOK@Ameritech.net
or KA8TOK@juno.com .

Don't know what your problem is. Obviously you didn't
look at the ad. They are in fact not FA they are FS and below
wholesale to boot! I wanted to make an antenna entrance and
patch panel once, and the price of these items stopped me.
It took me a couple of years to happen across a couple at the
swap meet or I would buy a few now.

In lashing out like you do, you actually make a pretty good
recommendation for those who can read and think for themselves.

Unless you have personal experience???

Well put Brian.
I've never heard of a commander confiscating radios. They usually have better things to do and they have MUCH bigger problems if they're concerned with troops hearing about military operations via open source, global broadcasts:)
Can't stress how right you are about AA batteries. Sure, the military has better resources for cable tv and internet but it's a misperception that a soldier, sailor, airman, marine conducts business from a barracks. All the services are familiar with the luxury of canvas, whether it's to prevent heat stroke in the desert or frostbite in the balkans.
What it all boils down to is this: If a serviceman is deployed, ONE luxury is probably the only thing he can squeeze in. Some carry a deck of cards, others carry a walkman (I used to carry a hairbrush because a cargo pocket was my personal refuge).
Help a brother out and ensure that he's got at least ONE thing to remind him he's still human and deserves something just for him. It'll keep him closer to home.

Freedom is about making your own choices and
taking personal responsibility for those choices.
We cannot legitimately blame others for our own actions.

"Loonies" are not censored in our free land because:

People are not forced to listen to what some loony says.

Therefore, people are not harmed by what some loony says.

Therefore, if people listen, they do so willingly,
are actively seeking something about which to be offended,
and have only themselves to blame.

This is common sense and
taking responsibility for one's own choices.

Too bad the rest of the world doesn't get it.

LET FREEDOM RING

I remember fondly listening for hours to SW on a Hallicrafters S-38(?)
in the barracks in a foreign country (Arkansas). That was what
originated my interest in Ham radio.

My father told me he and the rest of his unit used to listen to the SW radio to hear news/music and ball games back home in the U.S. during the Korean War. The radio was a link home. Stuart

A bit pricey. I bought mine for $299 4 years ago brand new.

Actually, in most places in the world GI's don't need a SW radio to listen to news and programming from back home, thanks to the fact that AFRTS has AM, FM and TV outlets in anyplace they have a presence. I'm sure that if we are in Afghanistan for any length of time, there will be at least an FM station set up with a satellite feed from AFN in the states. Here in Korea, we have an AFN TV transmitter in every city of over 500,000 that covers most of the populated area... I would guess the main AFN TV transmitter in Seoul, plus perhaps 8 others, and an AM and FM outlet in each of these localities as well.

The problem with that is simply that the programming is
edited/filtered to what the regional agencies think is appropriate. A
SW receiver allows the listener to get stuff from around the world.

I'll second that opinion. A-FaRTS is a real joke.

I worked in SITE-TV shops when in the Navy during the 80's,
running the ship's entertainment and instructional TV and
audio systems. News coverage was a real joke. The Army
and Air Force got the same tapes as we did...

Hmmm... I think a real ironic sign of the end of the
Cold War might be to set up a Non-Profit to purchase
cheap COBY's and distribute them to the Armed Forces.

A large percentage of 'em were actually forced to do it, weren't they?...
Not that they shouldn't have been willing, but they weren't there for
patriotic reasons or even to protect their loved ones... They were there
simply because they were forced to be. Most would have probably been at home
watching it on tv if they'd been a few yrs older or younger, had some
medical excuse, could get a ride to canada, etc...
Not that I'd have the guts to volunteer for such, but I'm not anti what you
were saying.. just being realistic...

Horseshit. Even in the days when courts would condemn a juvenile
delinquent to military service, that wasn't the mindset. Those who
volunteered would have liked to be home watching the TV too. When it
comes to being shot at, there were no polls taken as to who wanted to be
there.
Stop your 'realistic' teenage diatribe.

So just how do you define being drafted, if not forced-fighting, sir?...
I don't recall it exactly being a voluntary thing...
And if you'll notice, I did say that I *didn't* agree with what I said.. It
was pretty much a "devils' advocate" post, iow...

For the first 6 days following the attacks in NYC and DC, all AFN Korea carried was news from Fox News, ABC, CBS, NBC, MSNBC.. the only thing had that was of AFN origination were the crawl lines announcing the FP levels. I agree that AFN's own new IS a joke.. highly filtered and definately lacking.

I would like to add my 2 cents to this 'discussion' --

eBay stores are NOT auctions - they are fixed-price and therefore
the use of FS instead of FA is accurate. However, the store format
does display all items the seller is offering, both the fixed-price items
and the auction items. You can always tell the difference because
the auction items have a date shown in the 'Auction Only' column. <Grin>

Perhaps if one would just look at the subject being 'discussed' before
expounding on it, one could save themselves from being embarrassed
by displaying their lack of knowledge.

If you had been reading the msg and paying attention, you would have
noticed the following.

>"If interested, please check out the following eBay STORE (not auction) listing:"

This is an auction, NOT the Store...
>http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1638921967

What he should have left was the STORE URL.
http://www.ebaystores.com/id=1927549

Obveiously this was a thinly veiled attempt to SPAM the group
with the CRAP on the auction page. as that was the URL the
SPAMMER left.

Now, SFB, read and understand the complete post before
making an ass out of your self..

That's BULLSH*T. All of the sellers auction are shown
at the store and the current price AND a link to the page
where the auction is being conducted.

Perhaps you should practice what you preach, See Quote below..

>"Perhaps if one would just look at the subject being 'discussed' before
>expounding on it, one could save themselves from being embarrassed
>by displaying their lack of knowledge"

Get your head out of your SIX and Comprehend the post you are
replying to Do NOT just "read" it, UNDERSTAND it..

Some people talk about things they know.
Some people talk to hear there own Voice.

You are the latter...

Just another opinion..

Ok! so you are this guy's second banana shooting
flames around his adds for the very same items
FS and FA. Could it be that the FA is so stagnant
that you need to help him out? Perhaps I should
charge an advertising fee for the number of posts
where I include his url?

You SAMFCWSBP

Of course soldiers have nothing better to do than break dance
all day and get down with Tupac and the funky thumps from
their $1000, 100watt boom boxes... and yes I have seen radios
confiscated.

But then there are those whose sole function is to guard cleaning
supplies and swap answer sheets out of RTMs.

Thanks for reading my posting.

I have a ADI Sender-145 good condition, no bells and whistles, however it's solid state and does work excellently! No PL board (atleast none that I can find) nor does it come with a manual. Radio does RECEIVE out of band, to 169.990. Battery seems to be fine, it's a Nicad 12V 600mAH. I also have a wall charger (wall wart). Radio is sold as-is, however I will assure you it will not arrive DOA.

$80.00 + Shipping

Hi Howard,
Interesting. I'd have to ask where/what your neighbor does but of course I won't since this isn't the place to go into personal particulars. I wouldn't insist that it could never happen and believe those who say it has in the past. But, think of it: what good's AFRTS if you can't have a radio? "Damnit! I can't have my men listening to the news and Tupac and the Funky Thumps!" [Sorry, just had to do it:) though I've never heard Tupac on SW] We can believe the young Capt. Some might have some kind of funky restriction like that to accomodate the possibility of being prepositioned in a country that has a law against owning a radio but political correctness like that will fall along the wayside as soon the shooting starts and the hootch opens for business...

I'm a former sailor. Where is my radio? I want my damn radio! NOW!! I've
been out of the Navy for 40 years just think how much listening pleasure I've
missed, well additional listening pleasure. I coulda been listening with both
ears to two different things for yearz and yearz and,.....oh well, screwed
agin.

I need a working audio board for my Icom IC-24AT. I don't know, but suspect that one from an IC-2SAT is likely the same board. I am willing to buy a junk radio to get this part, if someone has one that maybe has a bad processor or PA or whatever but a good audio board. I don't do well with SMT, or I would simply repair the board I have. TIA

FS: Motorola MICOR VHF Mobile Radio Service Manuals:

1) This particular one covers the versions 132-174 MHz and has the special additional section that covers the Wide-Spaced transmitters (can be used for working simplex and/or repeat frequencies with full power output.) Complete schematics, theory of operation, parts lists, circuit board layouts, accessory info. Covers all transmitters 45/60/90/100 watts output versions. Complete info on parts needed to change any frequency to 2-Meters. The book is complete, in very good condition, in the original plastic Motorola 3-ring binder. This special Wide-split option VHF manual is quite hard to find. $30 plus postage.

I also have a standard VHF MICOR VHF mobile service manual - not optional wide-space transmitter version, but covers 132-174 MHz versions, all transmit power levels as above. Same book as above, other than no wide-space TX info. Complete, in good condition, except that the cover page has separated from the rest of the 3-hole punched book and it has no 3-ring binder (it's factory stapled together.) $20 plus postage.

150 what plus shipping? US dollars?

Have a look at http://www.rswww.com. For £103 (approx US $150) they will
offer you a new power supply with outputs:

+3.3V @ 23A
+5V @ 32A
+12V @ 12A
-12V @ 1A
-5V @ 0.5A
+5VSB @ 0.1A

RS are hardly the cheapest supplier around either...

I have for sale an absolutely mint Icom IC-746. This radio is as new
and includes the optional UT-102 voice board. The radio is all mode and
covers HF, 2M and 6M. The radio has a built in antenna tuner. I am the
original non smoking owner. I have the original box, owners manual,
hand mic, unopened accessory bag and sales brochure.
I am asking $1,050 plus shipping from 48026.

Hi Ladies/Gentlemen. There's a couple hours left on my auction for an awesome Icom 820H. Comes with 2, TWO tone boards, vhf/uhf both installed. The CW filter is also installed, and also comes with the mic, which isn't included when you buy the rig. It's in the box, with manual. This would cost you over $1,100 Used at AES. Lots of pics on the ad, so take a LQQK. Thanks for stopping by.

Take Care, Ken.

Will trade a mint Japan Radio Company JST 245 transceiver for a
Ten-Tec Omni VI+, or will sell outright including the matching
external speaker for $1700.00 including shipping conus. Rig has
monitor board option. Original documentation and cartons included.
Thanks AB8JN

1341. FS: PRO-2004 scanner w/HB232 Interface, numerous mods $350

Newsgroup: rec.radio.amateur.swap
Date: 2001-09-29 14:14:25 UTC
From: halligan@mediaone.net
Message-ID: <7490b6ed.0109290614.6e2b3596@posting.google.com>
Source record: 4868
Cross-posted to: rec.radio.amateur.swap,rec.radio.amateur.equipment

For Sale: Realistic PRO-2004 Scanner with External HB232
computer-control interface. Pictures available on request. Detailed
information follows:

The Radio: Radio is in very good condition. It has been through
numerous modifications:

1. Full coverage restoration.
2. Increase from 300 to 400 channel capacity.
3. Capability of 36 independent "banks" of 400 channels each,
controlled by toggle switches in rear of radio. Only one 400 channel
"bank" can be scanned at a given time but it affords for numerous
different scanning schemes selected by the switch positions.
4. Pushbutton control on rear of radio to select/deselect keyboard
beeps.
5. Removal of 120 volt power transformer to accomodate interface and
HB232 makings, radio runs on 12 volts only.
6. Front mounted large signal meter. Mounted to the left of the volume
control. As a result the headphone jack is not available.
7. FM discriminator tap on rear of scanner for data decoding.
8. Radio did suffer the infamous PRO-2004 "poor solder" syndrome and
has had such problems repaired.
9. Blue keyboard overlay exhibits 40 channel per bank setup.
10. LCD display is in good shape.
11. Radio has always been in an indoor environment; never used in a
mobile capacity.

The HB232 Interface: Mounted in 8"W x 6"D x 3"H project box. Connects
to radio through short DB25 male cable to DB25 connector mounted
vertically on rear of radio. Connects to computer via DB9 Female
cable. Original HB232 software burned onto CD will be included, as
well as the DEMO version of Redshift, a Windows 95/98/ME software
package for the 2004/HB232 combo.

Miscellaneous: PRO-2004 Owner's manual and PRO-2004 service manual.
Pictures are available on request and will be e-mailed to you
directly. Power supply is NOT included; I run the radio directly from
a custom power setup in my shack. There was never a "wall wort" type
supply included with this radio and as previously mentioned the 120V
transformer was removed to accomodate the DB25 connector and internal
makings of the HB232 interface. The power supply is a standard coaxial
type and is readily available for cheap $$ at Radio Shack.

Reason for selling: Not seeing much use in my shack these days; I'm
gathering money for other radio purchases.

Price: $350 O.B.O., including UPS COD shipping.

Method of payment: Advance payment by POSTAL money order only, or UPS COD with POSTAL money order only.

Please do not reply here, if interested E-Mail me at halligan@mediaone.net

Thanks for reading.

Scott

1342. FS: RS PRO-2050 Trunktracker $100 plus shipping

Newsgroup: rec.radio.amateur.swap

I have for sale a Radio Shack PRO-2050 TrunkTracker. Radio is in "used" condition. Some scratches on display. Body of radio has hole in each side as radio was mounted in a mobile environment. Operating condition is 100% sound. Trying to sell to gather money for new radio purchases. This radio is currently at work collecting dust in my shack. :). I have the original box and manual.

Asking $100 PLUS UPS ground shipping. Payable in advance or COD with Postal Money Order only. Please contact me at halligan@mediaone.net if interested. Thanks for reading.

1343. FS: Icom IC-2-GAT 2M H/T with extras $125

Newsgroup: rec.radio.amateur.swap
Date: 2001-09-29 14:56:38 UTC
From: halligan@mediaone.net
Message-ID: <7490b6ed.0109290656.4d3a0fb5@posting.google.com>
Source record: 4870
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.swap

I have for sale an Icom IC-2-GAT 2 meter H/T. This radio is approximately ten years old and is in good condition. Some minor blemishes; LCD display is clean. Radio has seen light use over the years and has currently been shelved in favor of a Yaesu VX5R.

Extras include high capacity battery, wall wort charger, and insert to allow radio to be powered from external 12VDC source. With original antenna.

Asking $125 plus UPS ground shipping. Either advance payment with POSTAL money order or UPS COD shipping with POSTAL money order only is fine.

If interested in a portable packet setup I also have a Kantronics KPC-3 with wiring for the IC-2-GAT. $170 takes the package, same payment plan as above.

Please contact me at halligan@mediaone.net if interested. Thanks for reading.

Here we have someone that doesnt READ the posts. The subject line is not in error, many people have ebay STORES in which they post regularly available or even one time items FOR A FIXED PRICE. I can understand your problem with people posting FA items as FS.. I don't much care for that either.. but this person clearly emphasizes the words PURCHASED and STORE, meaning that the item is not for auction, but for sale.

Don't automatically assume that when you see 'ebay' or an ebay link, that it's always an item for auction. This is no longer the case. I have bought things off of ebay both ways personally.

Brenda:

Don't tell us that Hawk is an abusive idiot -- tell his ISP and the service where he cross-posts his junk.

Just write them a polite note explaining that their customer is deliberately and repeatedly abusing multiple newsgroups with his cross-posted, off-topic, factually-incorrect rantings. You might also mention that several attempts have been made to resolve the problem by attempting to educated this abuser but he continues to send the same abusive form letter every time he finds anyone using eBay and posting a message indicating the item is "for sale." You should probably include a brief explanation of the fact that not all items listed through eBay are for auction - many items are fixed price and therefore clearly are "for sale" NOT for auction.

Be sure to include the full headers (it is best to use the show PAGE SOURCE function in your news reader then cut-&-paste the entire message into your complaint, as well as "forwarding" his abusive message. Also be sure that you send the complaint to both his own ISP and the service where he posts the abusive messages.

You are wrong. You can purchase it outright. READ the listing. It's a
plain sale and 15 are available. No auction involved.

NOTHING MORE THEN AN EXCUSE TO PIMP EBAY..

You forgot to mention that the store has a list of EVERYTHING
that person is having AUCTIONED on eBay

Just my opinion..

Bob

"Courier" and "Thunderbolt" do sound like CB amp's but they may well be too old to be illegal. They'd be useable on 10 meters and possibly other bands provided they don't generate too much harmonic power. I have zero knowledge of there particular units but most old tube amps date back to the days before 11m became CB and some are of decent quality. They're worth little $$ but if I had them I'd try them on 10m then other bands after checking harmonics and adding a low-pass filter if needed; especially if I also had an old SSB CB I could convert to 10m.

I hear the same about Harley Davidsons; mostly from folks who've never owned one.

About 20 years ago I "liberated" 2 RF amps from CBrs and made a lot of CW contacts driving them with a kit-built QRP rig. Both amps are as well made as any of the 2-meter bricks I've bought since, and neither made TVI, so I suspect that their rep for harmonic generation & distortion comes from CBrs and Appliance Hams over driving them; altho a good lo-pass filter makes good insurance.

A mod'd CB driving a "linear" followed by a filter may be junk compared to the latest & greatest digital off-the-shelf appliances but just might be more in the spirit of Amateur radio. My 250-watter claims to work on "all amateur bands". It plus a Yaesu FT-817 otta be FB if that were true and who knows? Maybe I'll dig them out, QRP my Kenwood and find out. Isn't that what amateur radio's all about?

I didnt know kenwood 741 and 3 antennas were that expensive. Around
here a 91 4runner around here is lucky to get $10k, usually 7-8

Sorry if these items are a little off topic, but I know that a lot of guys into ham radio and electronics may also have an interest in these kind of items:

I have for auction on ebay a B&K TV Tester, that is currently at $1:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1013677222

I also have for auction a TV Rejuvenator that can brighten dim picture tubes:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1013679879

For more pictures and info on these items, you can also take a look at my personal web-page:

http://i8mtm2.tripod.com/richardsjunk

Thanks for looking!
~Richard

I have for sale an absolutely mint Kenwood TS-850SAT. I am the original non smoking owner. I have both shipping boxes, hand mic, owners manuals and unopened accessory bag. The radio is a 10 out of a 10 functionally and cosmetically. The radio includes the SO-2 TCXO unit which is a $180.00 option. This is one of the last 850's manufactured. The serial number is 80200024. This is most likely one of the finest 850's you will find. I am asking $1,000 plus shipping from 48026.

1388. FS: ICOM IC_746

I have about 5 or 6 of the old tube AM and shortwave radio kits just waiting
for when my kid
gets a little older.
I am surprised they are still in business.
Use the website, and send them an email.
They sure should have manuals for the old stuff!!

The Courier and Thunderbolt amplifiers were made by E.F.Johnson before 11 meters was given to CB. I had a Courier for a while.

They are tube amplifiers intended for Class C (I think, maybe Class B) operation. As I recall, the Courier could run a few hundred Watts input; the Thunderbolt somewhat more, both well within legal limits. They covered 10 through 80 meters.

Today their best use would be to raise the output of a small CW rig to a serious level.

I believe they date to around 1960.

73, Bob K6DDX

While the Thunderbolt could be confused with the Johnson Thunderbolt, I doubt this one is the Johnson one. YOu did not give enough details for it. If is the Johnson one, then look here.

http://bama.sbc.edu/

Johnson also made a Courier modle but it is not a moble unit.

The Courier Mobile sounds like the one made for the business band around 30 mhz and was used by many CB operators. Courier was a big name in the comercial (well not really that big) and a bigger name in the CB market in the mid 1960s.
Should putout about 50 to 60 watts when driven by about 4 watts. Think it has a black front with a light that comes on when it is transmitting but not sure.

I have a radio for sale, it's a motorola Astro, model is
T99DX+138W_ASTRO with remote control head model 9000, it is
alpha-numeric display, can be programmed through software, works very
well, I have all data cable and mounting brackets for it. It looks brand

new.

Price is negociable, feel free to send in offers.

For any further info, feel free to contact me.

Thanks

Marc

1422. Input / possible trade for HT?

Newsgroup: rec.radio.amateur.swap
Date: 2001-10-11 02:02:55 UTC
From: Evan Platt <none@seebodytoreply.com>
Message-ID: <ifv9stg9f29ru1p1vqva3lirqegfe113l9@4ax.com>
Source record: 4849

Greetings.. I'm looking for advice on the choice of a HT. Let me give you some details:
This is by no means a first HT for me. I've been using 2 way radios starting with commercial use from both sides of the mike (dispatching and end user). I typically program my own gear when I had commercial equipment. Size DOESN'T matter. I'd rather have a more sturdy radio that's 2 1/2 feet tall than one that you can throw in your shirt pocket. My favorite radios were the Saber, Bendix King LPU/EPU, Icom U16, etc. Now the specs I'm looking for are:
Dual Band.
Extended recieve (at least to 155 or so, and 485 or so)
800 mhz rx (867.xxx and 856.xxx)
extended tx on VHF (at least CALCORD 156.075).

I think my only option may be the Yaesu FT-50, which doesn't meet the size criteria, but in all other respects it's a hands down winner. Can anyone confirm if it will recieve 856? Would anyone be interested in a trade for a VX5?

Any other radios out there that meet the other criteria?

Any help appreciated.

My e-mail is evan at espphotography period com.

:)

I have a PRO-43 and wondered what it's worth today. The belt clip is missing and I do not have the user manual, but do have a power supply. The unit is in very good to excellent cosmetic and 100% working. Yes, it can be modified, but that's illegal now.

Hi

I have a 1 week old Yaesu VR-500 scanner that id like to trade for a IC-R10, The VR-500 is clean, un-scratched, "great" condition, used not abused including manual, belt clip, hand strap. I'm looking for a R10 in the same condition as my radio, clean, belt clip and the manual, if you have this radio please email me for further info.

Thanks

Source record: 4752

Evan,
Your best choice for what you describe, would be the Kenwood TH-G71A.
It's not a "shirt pocket" radio like the VX-5, has EXCELLENT recieve up in
the 800 band (I have one, and did the mod to it. I can listen to a police
department 12 miles away, blocked by a hill at full scale). Very easy to
program, awesome audio, and quite easy to get apart to mod it. Granted, you
need to pull a couple of SMD's to do it, but with just a little skill, it
can be done easy. The program software is free, all you need to pay is
$29.95 for a cable. You can find all of the info here:

http://www.kenwood.net/products/index.cfm?AMA=open&ama_hheld=open&radio=TH-G
71A&selection=Amateur&ID=50

Hope this helps out with your search. Is the VX-5 too small for you? I
thought it could transmit up in to the VHF commercial band.
73/Mark/W4KSR

The vx-5 does do commercial. I might get one of the Icoms that can
recieve two bands at once.. I'll have to find the model # again. Or
possibly the vertex, as I have a vx10, I have parts for it already.

Alpha tags would be nice too.. ;)

1428. FS: KENWOOD TS-850SAT

Newsgroup: rec.radio.amateur.swap
Date: 2001-10-13 00:30:41 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3BC789F2.2E2658D3@home.com>
Source record: 4755
Cross-posted to: rec.radio.swap,rec.radio.amateur.equipment,rec.radio.amateur.swap,rec.radio.swap

I have for sale an absolutely mint Kenwood TS-850SAT. I am the original non smoking owner. I have both shipping boxes, hand mic, owners manuals and unopened accessory bag. The radio is a 10 out of a 10 functionally and cosmetically. The radio includes the SO-2 TCXO unit which is a $180.00 option. This is one of the last 850's manufactured. The serial number is 80200024. This is most likely one of the finest 850's you will find. I am asking $950.00 plus shipping from 48026.

1429. FS: ICOM IC_746

Newsgroup: rec.radio.amateur.swap

I have for sale an absolutely mint Icom IC-746. This radio is as new
and includes the optional UT-102 voice board. The radio is all mode and
covers HF, 2M and 6M. The radio has a built in antenna tuner. I am the
original non smoking owner. I have the original box, owners manual,
hand mic, unopened accessory bag and sales brochure.
I am asking $1,000 plus shipping from 48026.

1430. FS: ICOM IC_471H

Newsgroup: rec.radio.amateur.swap

For Sale: HF rig. TS-440S, built in antenna tuner. I'm the original
owner, non-smoking. Rig was never mobile. 9+ appearance, operates
100%.
Includes installed 500 cycle CW filter . Filter is fantastic when
operating PSK-31 or other digital modes.
$400.00 plus shipping from Florida 34446
Still have the original shipping box.
Contact: Joe, K4LL@ARRL.NET, (352)382-0809

Write me a note and I will e-mail a picture of it to you

P.S. I'm selling the above because I just received my brand-new rig with
all the bells and
whistles. I don't have room for the TS-440S in my shack, besides.....
I'm spending my retirement money on myself..... rather than letting it go
to my kids. They'd just party with the money !

1438. Reduced price ARC-5 rig

1440. FS ASAP: a few things to fund my Pacificon visit. :)

Newsgroup: rec.radio.amateur.swap
Date: 2001-10-15 05:14:43 UTC
From: Evan Platt <none@seebodytoreply.com>
Message-ID: <gaqkst8gvbidf4pp0kbd29tkqn00sd1omm@4ax.com>
Source record: 4767

I have to sell a few items to fund my visit to Pacificon. As
I'm under the gun so to speak, I'm requesting somewhat of a rush, to
get payment before Friday, and likewise, I will FedEx your item to you
(FedEx / UPS shipping included!) Pictures of any / all items
available upon request. All prices negoitable, feel free to give me an
offer, no matter what.

For Sale:

TrunkTracker II BC245 scanner. Radio, Antenna, Battery. wall charger.
I think I've used this a total of 30 minutes, if that. Could probably
use a new battery as the battery is 2+ years old (date code 9910), but
as it's barely been used, it might still be good.
Physically, radio is in great shape. Serial 96X. I don't think I have
the box or anything. $125/BO

Yaesu VX-5 tri band ham radio. Radio, aftermarket (ActiveHunter)
antenna, drop charger. I guess I kinda tossed the resale value down
the tubes when I 'installed' a aftermarket belt clip. It's the belt
clip from the old Motorola pagers. It's 'screwed' in and glued on. It
ain't pretty but it beats the cruddy stock clip. Radio is full open
for transmit and recieve via software mod. Radio hasn't been 'hard'
modified.$175 or best offer

Yaesu Vertex VHF VX-10. Radio, battery (aftermarket, brand new), stock
CA-15 charger, stock antenna, and after marker BC-601 rapid charger.
and brand new leather case with 'swivel' clip attachment. Radio is 99
(or 102? Can't remember) channels, has scramble board. Radio has a few
'problems' :
Missing PTT 'boot'. $2 part from Yaesu amateur (same part as FT-50). I
just haven't had chance to order it. Easy install.
Second problem is the receive. Per techs who have looked at it, the
radio needs to be opened, the 'keypad' needs to be dusted off, and
reinserted. Symptom is no receive audio, even with squelch full.
(radio does 'beep' and vertex tech support has confirmed this is a
known problem/sulutioon). Shows monor signs of wear, but a nice unit.
$200 / BO

Midland ICOM U-16 look alike. (I'll have the model # later, left radio
at work). Radio battery is dated 97, and won't hold a charge, but can
be re-celled. It's a high cap battery. Was powered up with a different
battery, and worked but exhibited 2 problems: randomly display would
flash on and off, and occasionally not power on. Known problem,
apparently something with the VCO. Sold as-is. Tech special, $75.
Radio, rapid charger, antenna, battery. Cosmetically, radio not bad.

Again, I _NEED_ money for Pacificon, so all prices negotiable. Make me an offer, as long as I get money by Friday. :)

Evan in Sunnyvale, California

(Of course, we can also meet at Pacificon).

e-mail me at evan at espphotography dot com

Beware of Vincent Caruso Jr. in Clifton, NJ. I purchased and paid for two Ebay listed items from him . After two months, nothing. I have filed fraud claims against him and have contacted the Clifton, NJ. Police Department.
I was told that he has a history of this type of activity...

Email me direct if you require additional information, remove the NOSPAMPLEASE from the reply to address above.

cheers
skipp

And what's wrong with the term "sodomite" ???
Named after the city "Sodom" (and Gomora)
where this (homosexual) and other abhorant
lifestyles were practiced.

> >It berates Chinese as "Canibals" by showing
> >pictures of adult Chinese eating a cooked,
> >aborted human baby. It calls the European Union

IMHO, any society that places so much more "worth"
on male children, to the point of murdering female
babies because they are only allowed (by their govt)
a certain number of children (total), deserves THIS
kind of label.... !

Most of the other stuff I don't necessarily agree 100%
with, but that's just a personal moral choice.

When it's all said and done, all this will be between God
and Hal - then the condition of his 'heart' will be seen.

nuf sed! :)

Bruce

1474. FOR SALE: Yaesu HF Radios

Newsgroup: rec.radio.amateur.swap
Date: 2001-10-20 19:52:04 UTC
From: SideValve <sabbatai_zvi@hotmail.com>
Message-ID: <l8l3ttgm3r427j5on4jqlok31b1u30601r@4ax.com>
Source record: 4702
Cross-posted to: alt.ham-radio.marketplace,rec.radio.swap,rec.radio.amateur.swap

For sale:

Yaesu FT-101EX HF transceiver. 260 watts p.e.p. SSB, 200 watts CW,
40 watts AM on 160 through 10m plus WWV, AUX, NB, VOX, CAL etc.
Radio comes with the AC power cord, manual, microphone all ready to
plug and play.

I made several QSOs on the rig today and it works fine. The function
switch needs a squirt of cleaner, but everything else is solid.
Will sell for $265.00 plus shipping

Also have a parts rig FT-101E (includes additional speech processor
and 12V power supply built-in) - case is a bit rusty, but rig is
complete and would make a great restoration project or spare parts rig
for the FT-101EX above.
Will sell for $100.00 plus shipping

For Sale:

Set of three plug in coils.

1) This is a BUD 4 pin "ribbed" coil form, brown, 1" diameter 2.25" tall.
It currently has about 90 turns of close spaced cotton covered wire with a center tap.

2) Stout 4 pin ceramic coil form 1.5" diameter, 2.5" tall. Has about 50 turns of cotton covered wire with a 3 taps. One is also connected to the base.

3) The last one is from Vintage radio Kit Company, and is designed for their CPCW5 transmitter, as the final tank used with a 6AQ5 on 80 meters. It is an octal base
and stands 3.75" tall. When you could still get them, these sold for $8.00

I will sell all three for $18.00 plus shipping

I have a Ic 910H I'm looking to trade or sell in the next month or so.

I'm looking to trade toward a IC 970a/h or ic 821H. plus cash

My 910H is less than 4 months old and I need a better rig because of vision problems.

The IC 910 H is a Multi-mode 144/440/1.2 satelitte rig. The 1.2 gig module has been installed. I payed over $ 2000.00 in July

1480. FT: My Kenwood TH-G71A for your ICOM W32A (modified)

Newsgroup: rec.radio.amateur.swap
Date: 2001-10-21 03:22:18 UTC
From: Evan Platt <none@seebodytoreply.com>
Message-ID: <4sf4tt8gockgo8l0tb8ehdmkeqeqlkt1sv@4ax.com>
Source record: 4707

Greetings.. I just picked up a Kenwood TH-G71A today at Pacificon, however my stupidity, didn't ask enough questions. I'm looking for a radio that recieves in the 480's and 800's, as I understand the older W32a's do. I already mod'ed my G71A but it doesn't include anything above 469.999.

As this is literally a brand new radio, I know I'm probably asking for much, but I'd like a excellent condition W32, with (am I pushing my luck?) a high cap battery and a drop in charger.

Any willing traders out there?

reply to evan at espphotography dot com.

Thanks.

Evan

1482. FS: Homebrew radio devices

Newsgroup: rec.radio.amateur.swap
Date: 2001-10-21 16:44:10 UTC
From: marv_e_ads@juno.com
Message-ID: <9quu0qmrh1@news.netmar.com>
Source record: 4710
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

*** Homebrew Radio things ***

Many hams build things with a large investment in time & parts that are worth far less... later. Here are some items from the estate stuff I've been selling that fit that description -- priced accordingly.

Unless noted, most of the items below are built on PCB material and most of the enclosures are made by soldering pieces of PCB material into a box -- not all sides may be present! Batteries not included! A few of these devices come with schematics, mostly not. The wiring is all open enough that you can generally see what is going on.

Battery drainer -- LM317K (TO-3) plus a pot wired as a current sink to drain batteries -- 4" x 3" x 1.5" -- $2

PL Tone generator -- Wein Bridge Oscillator powered by two 9 volt batteries. - $3

Touch Tone Encoder -- Western Electric Touch Tone Dial mounted in a 4"x4"x2" metal enclosure with power switch. Has a 4 pin DIN connector plus matching cable terminated in a 1/8" mini plug. $4

Two Tone generator -- Two Wein Bridge Oscillators powered by two 9 volt batteries on perf board. - $4

Some kind of test oscillator with a 556, two pots with anodized gold (colored) knobs, pwr. sw.. LED,. & Banana jack outputs -- $4

60dB Sampling Tap -- HN female connectors for the main line and a BNC for the tap. 1KW in the line puts 1mW to the tap. -- $10

435 MHz power splitter with (3) N connectors. This is made out of brass sheet stock and is about 15" long by 1" square. $10

Varactor multiplier (unfinished) -- looks like it's designed for 144 to 432. Built in a 3.5" x 2" x 7/8" extruded aluminum case -- top plate missing. Silver plated coils, Johnson 189-6-4 caps. It think it is complete execpt for the input and output leads. $10

Some kind of VHF thing just started. Pomona 4"x2.5"x1.5" cast box with a couple 160-104 capacitors, BNC connectors, a miniature 50K bourns pot., 6 capacitors mounted to gold plated terminals with a very pretty gold flashed internal shield structure. Nothing is soldered -- this was just started. $10

Antenna Noise bridge? -- Pot & Cap plus 4 transistor circuit mounted in a 5" x 4" x 2" enclosure. BNC connectors marked ANT & RX. Pwr SW. & Led Powered

by a single 9 volt battery. - $10

Two Meter to 24-28 MHz converter (I think!) -- 5" x 4" x 1.75" -- $10

A VHF thing -- Two trombone lines adjustable between 4-6" with a transistor connected between them plus a Phasotron 50 ua 2" round meter on a BNC cable with a small loop w/a diode. -- $10

NTSC Frequency reference -- I think this was a QST project in the early 1980's. PCB in 4"x5"x8" metal case (top missing) w/feet, AC line powered. -- $15

144-148 MHz to 24-28 MHz Transverter -- 5" x4" x 4" overall -- 2N3866 Output transistor, probably runs about a watt on transmit. Barrier strip for power (12V?) and an 8 pin Japanese style Mike connector for ?. Transmit & receive sections are each 5" x4" x 2" and only interconnected with a few wires -- $20

All of the above plus shipping, if necessary, naturally.

*** Test Equipment -- all functional!! ***

Data I/O Unipack 2, PROM progamming fixture for 29A/B programmers. $40

DataPulse (Systron Donner) Model 101, 10 MHz Pulse Generator,
10 Hz TO 10 MHz in 6 Ranges, 8.5" x 4" x 11" deep $40

General Radio 758-A 55-400 MHz Wavemeter. Dial in need of severe polishing
but, insides are clean. $25

Heathkit / Zenith ET-3100 Electronic Design Experimenter. Small protoboard
plus 200Hz-20KHz Sine & Squarewave generator, individually variable +/- 15 V
supplies, 30VCT AC source, 1K & 100K undedicated potentiometers. AC Line
powered. $75

Heathkit GD-1B Grid Dip Meter with coils in original box plus manual. $30

Heathkit IM-4180 FM Deviation meter. $150

Heathkit QM-1 Q-Meter w/ operation manual. $125

Hewlett Packard 141T Spectrum Analyzer system including mainframe, 8552B IF
section,
8553B, and 8555A RF sections plus 8443A Tracking generator.
All original knobs, terminators,etc. clean and working fine.
With manuals (or copies thereof...) for all units. $2200

Hewlett Packard 427A (transistorized) volt-ohmmeter with nice 4" mirrored
scale. Reads as low as 10 mV full scale on AC and up to 1000V AC or DC.
Including a spare battery and an original HP manual -- $75

Harrison (later HP) 865B 40V .5A Max. Constant Voltage-Constant Current
Laboratory Power Supplies $25 ea $45 pair

Hewlett Packard 4260A Universal Bridge -- measures resistors, capacitors and
inductors. Also checks inductor Q and capacitor D using either internal 1KC
source or external oscillator. Has "semi-auto" nulling feature in L&C
modes. 6" hi x 8" wide x 12" deep overall -- 115/230 VAC powered.
Cosmetically very good. $250

Kepco Dual PCX 15-1.5 MAT 15 volt 1.5 amp max lab power supply in Kepco
PC-4 cabinet. Individual voltage & current meters (4 total). Ten turn voltage

adjust -- $70

Kepco Dual PCX 40-0.5 MAT 40 volt .5 amp max lab power supply in Kepco
PC-4 cabinet. Individual voltage & current meters (4 total). Ten turn voltage

adjust -- $70

Polarad 1207A Microwave Signal Generator 3.7-8.4 GHz. $80

Pomona #2399 cast Aluminum Boxes (2" x 1-1/8" x 7/8" o.d.) w/ gold plated SMA

female connector on each end. New (in factory sealed plastic bag) -- $10 ea

Sierra Electronics model 164B Bi-Directional Power / SWR meter (looks just like a URM-120) with 181-A-1000 element -- covers 200-1000 MHz with four power ranges: 10W, 50W, 100W & 500W full scale. Case is in good condition finished in "Howard Hughes" (light) green -- leather carrying strap is in very good condition. N connectors (M&F) -- $100

Teaberry model TB 6503 HF SWR / Power meter. 100W / 10W ranges FWD & REF power plus SWR. UHF connectors. $7

Tektronix P6006 10X Scope Probe (used) $7

TEI model 28-200 relative power / SWR / Field strength meter -- screw in whip antenna is missing. UHF connectors. $10

All of the above plus shipping, if necessary, naturally.

I have for sale an absolutely mint Kenwood TS-850SAT. I am the original non smoking owner. I have both shipping boxes, hand mic, owners manuals and unopened accessory bag. The radio is a 10 out of a 10 functionally and cosmetically. The radio includes the SO-2 TCXO unit which is a $180.00 option. This is one of the last 850's manufactured. The serial number is 80200024. This is most likely one of the finest 850's you will find. I am asking $950.00 plus shipping from 48026.

I have for sale an absolutely mint Icom IC-746. This radio is as new
and includes the optional UT-102 voice board. The radio is all mode and
covers HF, 2M and 6M. The radio has a built in antenna tuner. I am the
original non smoking owner. I have the original box, owners manual,
hand mic, unopened accessory bag and sales brochure.
I am asking $1,000 plus shipping from 48026.

1491. FS: ICOM IC_471H

I might be interested. If you still have it let me know. I will go down the
local radio store and take fast look at the 910.
My 970H has been kept very well. I only is 2 meter and 70 cm. It does not
have any of the optional band mods. It does have decode.
I also sent email.

1500. FS: Coax relay, new & used coax connectors

Newsgroup: rec.radio.amateur.swap
Date: 2001-10-22 17:12:20 UTC
From: marv_e_ads@juno.com
Message-ID: <9r1k1keld1@news.netmar.com>
Source record: 4724
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

***** Used Coax Connectors ****

These are mostly used, fairly clean, (at least 80%) Amphenol parts.
There are anywhere from about 4 to 25 of each type available.

UHF female - UHF female barrel connectors -- $1 ea

UHF male - BNC female adapters -- $2 ea
UHF female - BNC male adapters -- $2 ea
UHF F-M-F Tees -- $2 ea

Andrews Heliax UHF connectors 1/2" 44AP male -- $10 (last one)

UG-57B/U N Male-Male connector -- $4 ea
UG-635/U C Female - BNC Male adapter -- $5 ea
UG-636A/U BNC Female - C Male adapter -- $5 ea
UG-259A/U 91836 -- HN female to LC female bulkhead adapter -- $30

SMA Female-Female Bulkhead connector -- $1 ea

***** New Coax Connectors *****

UG-1213/U HN Male Cable connector NOS -- $10

Kings KH-39-11 HN Female Cable connector NOS -- $10

Below are all new crimp on connectors, with all hardware, in individual
plastic bags; early-mid 1990's date codes.
I believe that they are all for RG-59 size cable.

Kings Electronics
KC-59-642-M06 BNC Cable Male -- $1 ea
KA-59-385-M06 TNC Cable Male -- $1 ea
KA-19-43 TNC Bulkhead Female -- $1 ea

*** Coax Antenna Relay ****

Dow-Key DK-60 style 110 VAC coil -- $30 (last one)

(3) UHF connectors. Somewhat old looking on the outside but,
I popped the inspection port and all the contacts are all happy -- goes
"clunk" upon application of the appropriate voltage.

All of the above plus shipping, if necessary, naturally.

1501. Re: Beware, Vincent Caruso Jr in Clifton, NJ

Newsgroup: rec.radio.amateur.swap
Date: 2001-10-23 23:06:20 UTC
From: Skipp follows up <skipp@pilotNOSPAMPLEASE.ucdavis.edu>
Message-ID: <9r4t5cjlm1@woodrow.ucdavis.edu>
Source record: 4728
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap

I'm back to report that today I received a money order from Mr Caruso's wife Nicole. True to her word, she mailed it out right away after my second phone call to their home phone.

Just for the record, Mr Caruso claimed FedEx lost the package. He provided me with a copy of his office shipping book, but that does nothing to prove FedEx ever picked it up. FedEx claims no record of any shipment that day from his Office. IMO the receipt is not truely accurate or made on the date claimed.

This deal stretched out over two months...

I tried numerous times by Email and phone calls to contact Mr Caruso about the status of our Ebay deal. His first replies came very few and late to my repeated requests for contact. Then his replies stopped near the 60 day Ebay limit. I did file my claim on the last day allowed by Ebay. His Ebay account is no longer active.

After no followup replies were received for some time, I pulled some strings to obtain his/their home phone number. My call came as quite a surprise to his wife and he when I informed her of the matter and status of our deal. After no reply initial replies from Vince to that first home contact call, I contacted the Clifton, NJ Police. My second call to Ms Caruso brought action... she straight away purchased a money order and sent it out US Certified Mail, it arrived today.

I received two other reports about Mr Caruso from people reading these posts. He failed to send money after making a deal to purchase equipment. If one checks his Ebay feed back, you see him doing the same actions there.

I'm very happy to have my money back. I'm happy to say Ms Caruso was very prompt to act when she learned of the problem. For that I am greatful.

"let the buyer beware..."

cheers
skipp@pilotNOSPAMPLEASE.ucdavis.edu

**** SEMICONDUCTORS ****

GE 1N2155 rectifiers, 25A, 100PIV, Used. Four for $5.

GE 1N3289 rectifiers, 100A, 200PIV, DO-8 large stud package. These look like
NOS --
(It doesn't appear that the anode leads have ever been bolted to anything.)
4 pieces -- $20 all

GE 4JA61C rectifiers, 50A, 300PIV, large stud package. A pair for $5.

GE 4JA63C rectifiers, 50A, 300PIV, large stud package. Four for $10.

GE A70B, 100A, 200PIV, DO-8 large stud package. Used. Four for $15.

GE C156D, 110A, 400V Inverter SCR's, used. $10ea.

Lambda FBH-24 Hybrid Regulators NOS -- $10 ea

Motorola NOS rectifiers, 50A, 100PIV, plate mounted. 2ea MR1201FL & MR1201FLR
(a bridge worth)-- NOS $10 all

Motorola NOS TIP34A 10A 60V TO-218 PNP Power Transistors. 4/$1

Sarkes-Tarzian Model 78D center-tapped Selenium Rectifiers. NOS! $5ea

Westinghouse 6-1-1B/1N1188 3 Phase 600V 35 Amp rectifier assembly
with heatsink. Unused but, tarnished from long storage $10.

Westinghouse NOS, 80A, 1000V house-numbered SCR's $15ea.

Westinghouse NOS, 20A, 1000V house-numbered Rectifiers $4ea.

All of the above plus shipping, if necessary, naturally.

*** SWITCHES ***

Radio Switch 86 series 6PDT (3 DPDT wafers) RF style switch used good -- $30

General Electric WW2 vintage (has that BC-375 look) 6 position RF style
switch.
Very solid detents! Used, excellent. $10

Switchcraft lever switches -- all have black round knobs unless noted
8PDT (#60024L) NIB -- $5
4PDT (#160012L) NIB -- $3
DPDT (#3006L) used -- $2 ea
DPDT plus 2 form A contacts (41000 series) barely used (a single pair of
contacts) - $2

Three pos. 2 form B momentary (#3035) NOS -- $2
Three pos., 2 form F momentary (3000 series) used -- $2ea
Three pos., 3 form A momentary each side (3000 series) NOS, white rect.
knob -- $3

Three pos., 2 form C momentary (#130312) NOS -- $2ea
Three pos., 2 form C (#130312L) NOS -- $3
Three pos., 3 form A momentary each side (13000 series) NOS, red rect.
knob -- $3
Three pos., 2 fom C (DPDT) each side (#160312) NOS -- $3

Mossmann 3PDT lever switch (4803Z1P2) NOS -- $2

C&K 8121 SPST miniature pushbutton switch -- 1A 120VAC silver contacts NOS
$2 ea

Dialight 570-31 3PDT miniature toggle switch with 5/8" long handle -- 5A 125
VAC NOS $5 ea

Grayhill 46YY2159 Sealed Pushbutton switches, RFE -- These were SPDT but, the
NC lead has been cut off flush with housing. The NO & COM terminals are cut
short like they were removed from a PCB. Nice metal shaft has about .2"
travel. No button nor hardware, 1/4" mounting thread. And there are a bunch
of them -- 4/$1

All of the above plus shipping, if necessary, naturally.

*** MISCELLANEOUS ***

NOS coily cable for a Yaesu MH-27 mike (may fit others). Later version with the RJ connector at the radio end. $10.

Filter Cap Assemblies: Eight CDE 80 uF/450V axial electrolytics mounted to a 5"x8" fiberglass PCB -- these are currently wired sort of series-parallel but, could be reconfigured by cutting & jumping a couple PC traces. $20 ea. (2 available)

Large (uncased) display unit. 256, T-1 3/4, LED's arranged in a 16 x 16 pattern that is about 5" square. There is a 6" x 6" mother board plus 16 daughter boards holding the LED's. The LED's are driven by latches so any/all of them can be lit. There is a 14 pin DIP interface connector -- pin out provided. $75.

DPDT Crystal Can relays with 600ohm 28V coils and 2A 28V contacts made by Leach, Datron and other manufacturers. They have small solder hook pins for connection and a pair of ears on the sides to mount the relay. These are old but, as they are hermetically sealed, they should be like new inside! NOS $3 ea (a dozen or so available)

Late '70's vintage likely Military, probably airborne, VHF power amplifier assembly. It consists of 7 almost identical amplifier assemblies clustered around a
central housing that has splitter combiner networks which are plugged onto each end with a bunch of SMB connectors. There are TNC's for the main in's & outs. I think it was originally configured as one amp, driving two, driving four boards. The complete assembly measures 7.5" x 5" x 3.5" overall -- the individual RF amp boards are 4.5" by 2". The outer covers
are mostly missing. Each amplifier is a push pull design -- they appear to be
50 ohm in & out impedance with either PT6747 or PT6702 TRW transistors. I would
guess this unit operates on 28VDC. I don't know what frequency range it covers nor the power level though, just guessing, it probably puts out at least 100W. And there is no manufacturer name -- probably went with the outer cover. Six of the stages are marked OK and one, the input stage I think, is marked NO Good. The individual amps have integral heat sink plates so, they could be removed from the assembly and used separately. Think of it as 7 amplifier boards @ $10 ea --
Bare PCB's would cost as much! -- $70

Carter Radio 500K ohm rheostat with 2" diameter skirted knob, calibrated 0-100 over 270 degrees -- $15

Motorola 4-pin Microphone connectors 28-16730 or Amphenol 01-MC4M -- NIB $5ea

Motorola 0180700T14, 4-wire coily cord mike cable assembly with a mike connector as above on one end and a spring strain relief on the other. There are some flat pins on the free wire ends -- NIB $15

Motorola TLN6824A Vibrasender -- Freq. 1B, 107.2 Hz $2

Motorola TLN1361A Timeout Timer $4

National Type A Velvet Vernier dials-style 2 (marked 0-100 over 180 degrees) 3-3/8" or 4" diameter -- $25 ea

Tunable CTCSS unit -- Part no. 1100-1609-000 -- 1" x 2" PCB with wires to an 8 pin SIP connector -- Includes double sticky mounting tape. NIB $10

200W (or so -- 10" long) 1500 ohm 10 tap (every 150 ohms) power resistors -- used good, $10 ea (2 available)

Ohmite 3K, 225 Watt power resistors used w/mounting clips -- $7 ea (8 available)

Ohmite 2K, 225 Watt power resistors used w/mounting clips -- $7 ea (10 available)

Four 37.5K 78W power resistors used w/mounting clips -- $15 all.

Parasitic Supressors, large pair -- 2 Turns of 3/8" wide silver plated strap wound over Globar 25 ohm, 3" x 5/8" bulk ceramic resistors (rated 20-25 watts?). The strap extends 1.5" from one end and 2.5" from the other. The silver is heavily tarnished but should clean up with Tarn-X or similar. $20 for the pair

Powerstat Type 10 120V 1.25 A variable transformer (variac) used, no knob nor dial -- $15
Type 10B 120V 1.75 A variable transformer (variac) used, with dial, no knob -- $20
Later 10B 120V 2.25 A variable transformer (variac) used, with dial, no knob -- $25
Later 10B 120V 2.25 A variable transformer (variac) NOS, with dial & knob -- $30

A couple old RF chokes:
#22 enameled wire space wound 24 TPI for 2.75 on a 1" diameter grooved fiberglass form 5" overall -- $7
#27 (green enameled) wire wound 40 TPI for 4.3" on a 3/4" diameter ceramic form which steps to a 1.3" diameter base tapped for two 6-32 screws, 5.5" long overall. Looks like winding has been cleanly spliced, twice -- $10

Pomona #2399 cast Aluminum Boxes (2" x 1-1/8" x 7/8" o.d.) w/ gold plated SMA

female connector on each end. New (in factory sealed plastic bag) -- $15 ea

Thordarson 20A01 Input Transformer NIB! -- Single or double button microphone or line to single grid. Turns ratio 1:20 Includes original data sheet -- $25

Vibrafork 4 channel resonant reed relay. A real relic. NOS! $10

All of the above plus shipping, if necessary, naturally.

***** Power Supplies, Inverter, UPS *****

Open (L-shaped) frame linear power supplies 6" x 3" x 2" with attached 2 wire polarized line cord, 120V 60 Hz AC input; internal 1A line fuse. There is a relay that switches the 3 voltage outputs. They have a six-pin SIL output connector and come with a matching cable to pigtails. The wires are: GND, +5V switched, -5V switched, relay (gnd to operate), +12 switched, and +12 constant (for the relay). Just guessing from the 780X series regulators, I would think that the +12 and +5 outputs are good for about an amp. and the -5, which regulator is unheatsinked, perhaps a couple hundred mA.
$15 ea. (5 units available)

Lambda LM B0-60 -- 0-60V, .45A Linear Power supply with remote sense terminals, screwdriver voltage adjust, 5"x3"x7" -- used $25

Power General
Model 1035-2 -- 12V, 3A, Switching Power supply, uncased PCB 5"x3"x2" -- NOS $15

Model 3050-1 -- 5V@6A , 12V@1A & -12V@1A, Switching Power supply, uncased PCB 5"x4"x2" -- NOS -- $25 ea (4 available)

Model 3056-6 -- 5V@6A & 12V@3A, Switching Power supply, uncased PCB 5"x4"x1.5" -- NOS $25

Sierracin 5C12A -- 12V (5 Amp?) Switching Power supply with remote sense terminals -- open frame 5"x8.5" x2" -- used $15 ea (2 available)

NPC Model 12-115. 12VDC - 115 VAC 200W Square Wave inverter. Black case w/ gold anodized front panel measures 7"x7"x5" high. 10 lbs. shipping wgt. $25

International Instrumentation Model PUP-200. 200W computer style UPS. Off white case measures 15"x8"x6" high. Requires 24V worth of lead acid batteries, not included. 18 lbs. shipping wgt. $30

SAFT Model SPS400-117. 400W computer style UPS. Light tan case measures 11"x12"x6" high. Requires 24V worth of lead acid batteries, not included. 20 lbs. shipping wgt. $50

All of the above plus shipping, if necessary, naturally.

NOS fan that fits some Japanese radio...marked: 57 10.01 100V
The wires from the motor are about 4' long and are terminated in a 2 pin JST connector.
The impeller has 8 blades and is 7 cm in diameter.
It is mounted to a U shaped metal frame with four mounting holes spaced 5cm by 9cm
$10

Listed below are all serious squirrel cage type fans:

Redmond Model BL-6 115 VAC .8A 60Hz 3000 RPM 4" round intake, 2.5" square output flange, weighs 6lbs. used -- $20

ILG Electric Ventilation 17-18-022A encased motor with 181-009-EA fan
115/230 VAC 1.6A/.8A 50/60Hz 3000 RPM 4" round intake, 3" x 4-3/4" rectangular output flange, weighs 25lbs. used -- $30

Kooltronic Model DF1F016N Dual fan style 230 VAC 1.2A 60Hz 3000 RPM
3" round intakes, 2.5" x 5" rectangular output flanges, 16" long by
about 7" diameter overall, weigh 15lbs. These look like NOS but,
they are a mite dusty from storage -- $40 ea (3 available)

All of the above plus shipping, if necessary, naturally.

Trav-A-Dial bidirectional electronic counter -- I think this was originally for use with a mill or lathe in conjunction with a 200 count/rev quadrature encoder (which I DON'T have but are available from many sources) to read displacement in .0005" increments up to 200 inches. These use Hewlett Packard dot matrix decimal readouts for a very pretty display. Switches for direction control and reset. Nice cast metal case, requires 5 volts power, 6 pin female Jones connector interface w/ pinout provided. $75

Prototype or reject circuit boards from the above -- the readouts are either all good or one bad one per board -- which is probably why they were removed from service. $15 ea

Pulled and tested HP 5082-7300 RHDP decimal readouts -- $5 ea
Pulled and tested HP 5082-7304 +/-1 decimal readouts -- $3 ea

NOS 5082-7302 LHDP decimal readouts, still in HP packaging, $10 ea.

All of the above plus shipping, if necessary, naturally.

********** Old Radio Books & Catalogs **********

Radio Amateur Callbook V62 #1 -- US & DX listings 1984. Just a bit of wear at the corners. $10 (2 books)

Handbook of Electronic Communication by Gary Miller, Prentice Hall 1979. Hardbound, very good condition, owners name written on frontleaf, 339 pages. $7

101 Ways to Use your VOM & VTVM by Middleton -- Howard W Sams. Good condition 144 pages. $5

Radio Amateur Callbook V41 #2 -- DX listings only 1963 Front cover a bit torn up and it looks like something heavy was resting on it for 20 years. Insides OK. $4

RCA HB-3 Tube Handbook
Loose leaf 6 ring binder style data sheets starting in the late '40's with additions and
updates through October 1966. Sepatate sections cover Transmitting Tubes, Receiving Tubes (Part 1 & 2),
Industrial receiving tubes, Photosensitive devices, Thyratons & such, CRT's & Picture tubes,
Miscellaneous types, & semiconductors. The updates appear to have been made in all
these sections except Picture Tubes which is somewhat disorganized. It also appears that the
obsolete data sheets were kept for reference. The whole collection is about 30" wide on a shelf.
Shipping weight will be 20 lbs. Excellent condition; mostly never read! One gotcha - No binders. $150

RCA Transistor Manual SC-13, 1967. Good condition 540 pages. $10

Having Fun with Transistors by Buckwalter -- Howard W Sams. Good condition 127 pages. $5

Amateur Single Sideband by Collins Radio. 1962 Hardbound. Excellent condition except owners name in ink on p.106. 143 pages. $50

Allied Electronics Data Handbook. Lots of formulas. Water damage on cover and about 1/2" into edges, no pages stuck. 1962. $2

Understanding Transistors by Allied Radio. 1962 First Edition, first printing. Good condition 96 pages. $10

Heathkit Catalogs
1954, 55, 56, 57, 58, 59 &
Fall-Winter '62-63,
Xmas '89 + Winter, Spring, Summer '90 $100 all

Handbook of PREFERED CIRCUITS
Navy Aeronautical Electronic Equipment
vols. 1&2 (1955 tubes & 1962 transistors)
very good condtion $25

40 Uses for Germanium Diodes by Sylvania Electric Products. First edition, first printing, 1951. Cover separated, some writing on cover & frontspiece, otherwise good condition. 47 pages. $7

Electronic Shortcuts for Hobbyists by Sylvania Electric Products. Second edition, first printing, 1951. Cover separated, otherwise good condition. 35 pages. $7

Electrical Fundamentals (AC) TM11-681 US ARMY Technical manual. December 1951. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 231 pages. $7

A Course in Radio Fundamentals by George Grammer, ARRL. Third edition, 1948. Good condition except cover taped at spine, owner's name written on front. 300 pages. $5

Surplus Radio Conversion Manual Vol. 2 1948 Good condition, 125 pages. $15

Radar Electronic Fundamentals T.O.16-1-195 US Navy Technical manual. June 1, 1944. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 474 pages. $15

Reference Data for Radio Engineers by Federal Telephone & Radio Corp. Lots of realllly useful info about tubes & formulas in this small format hardbound book -- Good condition small part of frontspiece, probably where owner's was stamped, missing. 200 pages. $25

Tuned Circuits by J.M. Quinn, 1943. Small hardcover book 52 pages. Very Good condition, one page is punched with Los Angeles Public Library ID. $7

Most Often Needed 1926-1938 Radio Diagrams, originally published by
Supreme Publications 1941. This is a REPRINT, by Vintage Radio.
240 pages, solid schematics! Like new, $15

Radio Television Supply Company catalog #15 (1940?) (they used to be in downtown Los Angeles). Small tear at the top of the spine, otherwise in very good condition.
256 pages. $15

RCA RC-14 Receiving Tube Manual 1940. Front cover rough and half of spine cover missing. Insides good. 255 pages, $15

RCA TT-3 Air-Cooled Transmitting Tubes 1938 copyright
overall good condition w/slight damage at top & bottom of
spine & first 20 pages of lower right corner. 192 pages -- $20

Radio Supply Company catalog #10 1938? (they used to be in downtown Los Angeles) Front cover loose, back cover missing. 160 pages $10

Radio Television Supply Company catalog (1937?) (they used to be in downtown Los Angeles). A couple of spots on the cover otherwise in very good condition.
172 pages. $15

Advanced Laboratory Practice in Electricity and Magnetism by Earle Terry, McGraw Hill, Third edition, 1936. Hardbound, 318 pages. $7

Radio Supply Company catalog 1934 (they used to be in downtown Los Angeles) -- a little smudging on the back cover and two middle pages torn on the edge but, otherwise in fine condition. There is a sticker from the (original?)
owner on the first inside page. 85 pages, the last 10 or so of which are receiving and transmitter tube data from the era. $15

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet Excellent condition 20 pages or so $4

Elin company overview book 1932
very good condition except cover is almost loose
Text is in GERMAN. Lots of photographs of electrical equipment, tools, machinery, and construction projects.
128 pages $4

Radio Amateur's Handbook Ninth Edition by the ARRL, 1931. Has a typewritten note glued to the frontspiece stating that it belongs in the radio room of the USS Maryland (which was moored just inshore of the USS Oklahoma on the first Pearl Harbor Day). Cover somewhat rough, torn at spine, index and first two chapters missing up to page 24, otherwise good, no writing nor torn pages. Softbound, about 200 pages left. $500

Radio Doings Call Book Spring 1931 edition
cover taped at spine, otherwise very good
50 pages $7

Radio Amateur's Handbook Sixth Edition by the ARRL, November 1929. Cover a little worn at edges and on spine otherwise excellent, no writing nor torn pages. Softbound 225 pages. $125

Radio Doings Vol 15, #1 June 1929 edition
cover, first two & last two sheets missing otherwise o.k.
pages 5-62 remain $4

Official Radio Service Manual 1930, originally published by Gernsback Publications. This is a REPRINT by Vestal Press, 1984. Schematics & some service info. 352 pages, like new $15

All of the above plus shipping, if necessary, naturally.

1516. FS: Old Radio Knobs

Newsgroup: rec.radio.amateur.swap
Date: 2001-10-25 23:28:03 UTC
From: Marv_E_Ads@Juno.com
Message-ID: <9ra763$u9$1@news.netmar.com>
Source record: 4743
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

********** Old Radio Knobs **********

These are all used, most have set screws, with nothing worse than minor scuffs and smudges and fit 1/4" shafts, unless noted.

Dakaware
1-1/16" Knurled Knob -- $3
1-1/16" Knurled Knob w/ 1.5" skirt w/ white indicator line -- $5ea
1-1/16" Knurled Knob w/ 2" skirt marked 0-10 -- $8
1-5/8" Knurled Knob w/ 2-1/16" skirt & unfilled indicator line -- $8
2-3/8" Knurled Knob w/ white vinyl pointer at skirt level -- $12 ea
2-3/8" Knurled Knob w/ 3" skirt & unfilled indicator line -- $12
2-1/16" skirt only -- $2

Short (1-3/16")pointer knob w/ white indicator line $1 ea
Long (2") pointer knob w/ white indicator line $1.50

Harry Davies
#1206 1-3/8" knobs -- $4 ea
Short (1-3/16")pointer knob unfilled indicator line -- Not sure if this is Davies... There are a box of these -- 50 cents ea

Hewlett Packard (70's vintage)1-5/8" spinner knob w/ 3/8" bushing -- $10

Kenwood 5CM diameter knobs that look like they are from a Kenwood TS-830 (main tuning knob) or similar
"Stock" knob -- $7
One that's been backfilled with shot to give it some heft -- $7
The plastic spinner version -- $15

Kurz-Kasch
#308 1-1/8" knob -- $4
#308 1-1/8" knob w/ 1-3/4" brite metal skirt with 100 graduations and tens indicated in black -- $8
#309 1-5/8" knob w/ metal spinner and 2-1/4" black metal skirt with 100 graduations and tens indicated in white -- $12
#309? (may not be KK) 1-5/8" knob w/ plastic spinner and 2-1/4" metal skirt with 100 graduations and tens indicated -- $12

#310 2-3/8" knob -- hub drilled out to 3/8" -- $8
#310 2-3/8" knob w/metal spinner shaft -- $12 ea
#311 2-1/16" skirted knob (some of the white lines are need refilling on these) -- $8ea
#380 1.5" skirted knob -- $5

These look like what was on some '60's Hammarlund, Eico & Knight Kit
stuff
#642 1.5" skirted knob -- $5
#S-645 .75" skirted knob w/indicator line -- $5
#647 1" skirted knob w/indicator line -- $5 ea
#653 1.5" skirted knob w/indicator line -- $5 ea

Millen? (has a logo that looks like a "M" with an "I" superimposed at the
center) #309 3-1/2" Handwheel style knobs as seen on the SX-28, if I recall
correctly.
These are all in need of minor plastic surgery -- two have chips out the
skirt where the set screw goes and one has had it's center drilled through...
perhaps, to make a concentric assembly??
$10 ea.

National HRT 2-1/16" diameter
Black, trim rings somewhat tarnished -- $5 ea
Gray, trim ring shiny like new -- $10

National Type A Velvet Vernier dials-style 2 (marked 0-100 over 180 degrees)
3-3/8" or 4" diameter -- good condtion, $25 ea

There are also many knobs from 1960's Tektronix and Hewlett Packard
oscilloscopes, if anyone has any need, please inquire.

All of the above plus shipping, if necessary, naturally.

*** Test Equipment -- all functional!! ***

Data I/O Unipack 2, PROM progamming fixture for 29A/B programmers. $40

DataPulse (Systron Donner) Model 101, 10 MHz Pulse Generator,
10 Hz TO 10 MHz in 6 Ranges, 8.5" x 4" x 11" deep $40

General Radio 758-A 55-400 MHz Wavemeter. Dial in need of severe polishing
but, insides are clean. $25

Heathkit / Zenith ET-3100 Electronic Design Experimenter. Small protoboard
plus 200Hz-20KHz Sine & Squarewave generator, individually variable +/- 15 V
supplies, 30VCT AC source, 1K & 100K undedicated potentiometers. AC Line
powered. $75

Heathkit GD-1B Grid Dip Meter with coils in original box plus manual. $30

Heathkit IM-4180 FM Deviation meter. $150

Heathkit QM-1 Q-Meter w/ operation manual. $125

Hewlett Packard 141T Spectrum Analyzer system including mainframe, 8552B IF
section,
8553B, and 8555A RF sections plus 8443A Tracking generator.
All original knobs, terminators,etc. clean and working fine.
With manuals (or copies thereof...) for all units. $2200

Hewlett Packard 427A (transistorized) volt-ohmmeter with nice 4" mirrored
scale. Reads as low as 10 mV full scale on AC and up to 1000V AC or DC.
Including a spare battery and an original HP manual -- $75

Harrison (later HP) 865B 40V .5A Max. Constant Voltage-Constant Current
Laboratory Power Supplies $25 ea $45 pair

Hewlett Packard 4260A Universal Bridge -- measures resistors, capacitors and
inductors. Also checks inductor Q and capacitor D using either internal 1KC
source or external oscillator. Has "semi-auto" nulling feature in L&C
modes. 6" hi x 8" wide x 12" deep overall -- 115/230 VAC powered.
Cosmetically very good. $250

Kepco Dual PCX 15-1.5 MAT 15 volt 1.5 amp max lab power supply in Kepco
PC-4 cabinet. Individual voltage & current meters (4 total). Ten turn
voltage

adjust -- $70

Kepco Dual PCX 40-0.5 MAT 40 volt .5 amp max lab power supply in Kepco
PC-4 cabinet. Individual voltage & current meters (4 total). Ten turn

voltage

adjust -- $70

Polarad 1207A Microwave Signal Generator 3.7-8.4 GHz. $80

Pomona #2399 cast Aluminum Boxes (2" x 1-1/8" x 7/8" o.d.) w/ gold plated SMA

female connector on each end. New (in factory sealed plastic bag) -- $10 ea

Sierra Electronics model 164B Bi-Directional Power / SWR meter (looks just like a URM-120) with 181-A-1000 element -- covers 200-1000 MHz with four power ranges: 10W, 50W, 100W & 500W full scale. Case is in good condition finished in "Howard Hughes" (light) green -- leather carrying strap is in very good condition. N connectors (M&F) -- $100

Teaberry model TB 6503 HF SWR / Power meter. 100W / 10W ranges FWD & REF power plus SWR. UHF connectors. $7

Tektronix 2225 Oscilloscope. Dual trace 50 Mhz 'scope in very good condition. No probes nor manual. $225

Tektronix P6006 10X Scope Probe (used) $7

TEI model 28-200 relative power / SWR / Field strength meter -- screw in whip antenna is missing. UHF connectors. $10

All of the above plus shipping, if necessary, naturally.

Cross-posted to: rec.radio.amateur.boatanchors,rec.radio.swap,rec.radio.amateur.swap,rec.radio.amateur.equipment

FOR SALE

Pair of brand new in boxes Telefunken VF-14 tubes
These are used in the famous Neumann U47 microphone.
Sold elsewhere for $1000.00 to $1750.00 each

See:
http://www.bavodekker.com/vf14.html
http://www.soniccircus.com/accessories.html
http://www.classicelectronics.com/Mics.html

Will sell for $800.00 each plus shipping.

(JUST SOLD TWO OF THESE - THESE ARE THE LAST TWO LEFT!)

1522. FS: Yaesu FT-101 series Digital Display unit

Newsgroup: rec.radio.amateur.swap
Date: 2001-10-26 14:05:24 UTC
From: SideValve <sabbatai_zvi@hotmail.com>
Message-ID: <n6rittsglu6r1e60mq2pvaa21kkuhjpvhb@4ax.com>
Source record: 4749
Cross-posted to: alt.ham-radio.marketplace,rec.radio.swap,rec.radio.amateur.swap

FOR SALE:

YAESU Model AYC-221 Digital Display Unit.

For Yaesu FT-101 series radios. Displays your exact frequency to
FIVE decimal places just like the modern all solid-state rigs.

Great little accessory and it works perfectly. Just plug it into the
VFO accessory jack in the back of your FT-101, FT-101B, FT-101E,
FT-101EX, FT-101EE, FT-101-F or
FT-101FE (did I leave any out? He he)

This neat little gadget sits on top of your FT-101 series radio and
lets you see exactly what frequency you are on. Has adjustable
calibration so that you can set it precisely using WWV or a secondary
crystal standard such as your rig's calibrator or any other signal
source.

Dimensions 4.5" X 6.25" X 1.5"

Comes with the original cable so it will plug and play.

I believe that this might also work with the FT-221 Analog 2m allmode
rig.

Will sell for $75.00 plus shipping

1523. FS: KENWOOD TS-850SAT

Newsgroup: rec.radio.amateur.swap

I have for sale an absolutely mint Kenwood TS-850SAT. I am the original non smoking owner. I have both shipping boxes, hand mic, owners manuals and unopened accessory bag. The radio is a 10 out of a 10 functionally and cosmetically. The radio includes the SO-2 TCXO unit which is a $180.00 option. This is one of the last 850's manufactured. The serial number is 80200024. This is most likely one of the finest 850's you will find. I am asking $950.00 shipped ground UPS CONUS.

I have for sale an Icom IC-471H all mode 432MHz rig. This radio is in excellent condition and has had the cap replacement mod. I have the original box, original owners manual, a copy of the owners manual, sales brochure, hand mic and power cord. This is the high power version. The radio comes from a non smoking environment.
I am asking $500.00 plus shipping from 48026

1527. WTB HP 8620 Dial Scales

Newsgroup: rec.radio.amateur.swap
Date: 2001-10-27 14:14:33 UTC
From: n6ax@arrl.net
Message-ID: <cd5f86bb.0110270614.10dd0d51@posting.google.com>
Source record: 4654

I am in need of dial scales for 8620 sweep generator...specifically I need ones to go with the 86240A, 2.0-8.4 GHz (scales would be full-band 2.0-8.4, 1.8-4.2, 4-6 and 6-8.4 GHz).

If you have spare scales for almost any band I could use them in a pinch and make overlays.

Thanks in advance.

The crime at Sodom was attempted gang rape of male angels.
The conflation of rape with consensual sex is dishonest and
propagandistic.

Therefore, if you an _alleged_ heterosexual, call gay men "sodomites",
they are entitled to cal you "rapist."

MANUALS' DESCRIPTIONS:

---

1. TV-7 Tube Tester Ops, Service, and Tube Data, 5-MANUAL SET:
($29.99)

You are bidding on FIVE different operator's, service/maintenance, and tube data chart MANUALS for the entire TV-7 series of Tube Testers. This is apparently the LATEST VERSION OF THE COMPLETE SET OF TV-7 MANUALS.

Manual #1: 100 pages, (17jan62), 6730kB, TEST DATA FOR ELECTRON TUBE TEST SETS TV-7/U, TV-7A/U, TV-7B/U, AND TV-7D/U.

Manual #2: 64 pages, (14jun60), 1867kB, OPERATOR'S AND ORGANIZATIONAL MAINTENANCE MANUAL, TEST SETS, ELECTRON TUBE, TV-7/U, TV-7A/U, TV-7B/U AND TV-7D/U.

Manual #3: 38 pages, (16jul79), 675kB, ORGANIZATIONAL, DIRECT SUPPORT, AND GENERAL SUPPORT MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS LISTS (INCLUDING DEPOT MAINTENANCE REPAIR PARTS AND SPECIAL TOOLS) FOR TEST SETS, ELECTRON TUBE TV-7A/U (NSN 6625-00-376-4939), TV-7B/U (NSN 6625-00-376-4939), AND TV-7D/U (NSN 6625-00-820-0064).

Manual #4: 78 pages, (13jun60), 1761kB, FIELD AND DEPOT MAINTENANCE MANUAL, TEST SETS, ELECTRON TUBE, TV-7/U, TV-7A/U, TV-7B/U, AND TV-7D/U.

Manual #5: 4 pages, (26jul62), 85kB, Requisition and Installation of Tube Socket Savers for Electron Tube Test Sets.

These manuals are all in electronic form, in Adobe Acrobat format PDF files. The files can be read, searched, enlarged, printed, etc, using the Adobe Acrobat Reader 5.0 software, which is also INCLUDED on the CD. I also include a text file with the manual files' descriptions and any usage notes, etc. This is a wonderful format in which to have the manuals, since the Adobe Acrobat reader allows you to do things like MAGNIFY the material to be as large as you want, and includes things such as hyperlinks, which allow you to jump directly to any part of the document, and much, much more.

---

2. Tektronix 475 Operator's and Service Manual: ($39.99)

Operator's and Service Manual for the Tektronix 475 Oscilloscope. The manual consists of 222 pages, and is in electronic form, on a CD. The manual is in Adobe Acrobat (PDF file) format. The Adobe Acrobat Reader 5.0 is included on the CD, and can be used to read, search, enlarge, print, etc, the Tek 475 ops and service manual. The PDF file's size is 14,286 kB. A CD case is included.
This manual includes sections covering: General Information, Specifications, Operating Information, Circuit Description, Calibration, Maintenance, Electrical Parts List, Diagrams and Circuit Board Illustrations, Mechanical Parts List and Illustrations, and more.
Questions? Email me at tomg@fullnet.com.

---

3. HP 8660B Signal Generator Ops and Service Manual ($49.99)

Operator's and Service Manual for the Hewlett Packard 8660B Signal Generator. The manual consists of 431 pages, and is in electronic form, on a CD. The manual is in Adobe Acrobat (PDF file) format. The Adobe Acrobat Reader 5.0 is included on the CD, and can be used to read, search, enlarge, print, etc, the 8660B manual. The PDF file's size is 67,512 kB.

---

4. Tektronix 7A22 Plug-In Ops and Service Manual ($29.99)

Operator's and Service Manual for the Tektronix 7A22 Vertical Amplifier Plug-in. The manual consists of 122 pages, and is in electronic form, on a CD. The manual is in Adobe Acrobat (PDF file) format. The Adobe Acrobat Reader 5.0 is included on the CD, and can be used to read, search, enlarge, print, etc, the 7A22 ops and service manual. The PDF file's size is 8,594 kB.

---

5. Tektronix FG501A Plug-In Ops and Service Manual ($29.99)

Operator's and Service Manual for the Tektronix FG501A 2 MHz Function Generator TM500-series plug-in. The manual consists of 88 pages, and is in electronic form, on a CD. The manual is in Adobe Acrobat (PDF file) format. The Adobe Acrobat Reader 5.0 is included on the CD, and can be used to read, search, enlarge, print, etc, the FG501A ops and service manual. The PDF file's size is 1,524 kB.
This manual includes sections covering: General Information, Specifications, Operating Instructions, Theory of Operation, Calibration, Maintenance, Options, Replaceable Electrical Parts, Diagrams and Circuit Board Illustrations, Replaceable Mechanical Parts, Manual Change Information, and more.

---

6. Tektronix 7B92A Plug-In Ops Manual and Service Manual, Set of Two ($34.99)

Two separate manuals: Operator's and Service Manuals for the Tektronix 7B92A vertical amplifier plug-in. The service manual consists of 167 pages, in 3,552 kB. The operator's manual is 35 pages, in 834 kB. They are both in electronic form, on a CD. The manual is in Adobe Acrobat (PDF file) format. The Adobe Acrobat Reader 5.0 is included on the CD, and can be used to read, search, enlarge, print, etc, the 7B92A ops and service manuals.

Source record: 4675

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=1290008519

If you're not familiar with the SA-2500, it was the last in a line of 2KW HF Antenna Tuners, and the first (and only) Heath Automatic tuner - - - using a motorized inductor and motor-driven capacitors which are controlled by an electronics package that senses minimum SWR

Tunes all bands 160-10 meters. Handles up to 2KW. Offers dual wattmeter and SWR that reads 0-200 or 0-2000 forward and 0-50 or 0-500 reflected. Digital readout turns counter. Audible warning when a user-selected SWR is exceeded. Manual tuning & touch-up available using three spring-loaded lever switches.

18 user-defined Preset positions to speed tuning. On the rear panel are two SO-239s for coax-fed antennas, one SO-239 as a bypass to a dummy load or resonant antenna, and a very large feed-through insulator for single-wire, end-fed antennas. Also at the rear panel is a connector to supply 12 VDC power, and even provision for remote control (choosing amongst the 18 Presets) if your transmitter or transceiver provides a switch closure to ground...

1549. Trade Icom 910H w 1.2 for Icom 970a/h

I'm looking for a Icom 970A/ H. I have a IC 910H with the 1.2 gig module installed. (1.2 gig module sold for $ 550.00)

Icom 910H 144/ 430/ 1.2 gig multi mode sat. radio 100 watts on
144-148mhz 75 watts on 430-450 mhz
10 watts on 1.2 gig band

I payed over $ 2000.00 for this unit in July of this year. (4 months)

1550. HF rig wanted in central Florida

Newsgroup: rec.radio.amateur.swap

I'm looking for a fairly inexpensive HF rig.

I am trying to get on the air for CW sweepstakes
this weekend so no time for shipping and I really
like face to face transactions anyway.

Let me know what you got.

HP Omnibook 800.

These are the nice small HP units, pentium processors, 133 and 166 mmx available. 800 x 600 SVGA TFT displays, pop out mouse (real mouse, not pad or stick). They have 2 Gb. HD for mmx version and 1.4 Gb for 133s. 32 Mbyte RAM, 3.5 lbs. 11" x 7" x 2", available with docking stations, external floppies and CD ROMs. Mmx versions have Windows 95 and full initial loads including manuals, etc. Can provide drivers for 133 versions, but don't have the product recovery disks for them. Run digipan or other PSK/digital software, or rig control and logging.

Let me know what you have for trade. Looking for Icom W21 hand held, or most any other gear including boat anchors.
Thanks,
Barry KD5VC

1554. FS: KENWOOD TS-850SAT

Newsgroup: rec.radio.amateur.swap
Date: 2001-11-02 22:54:20 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3BE32407.2467BCEE@home.com>

I have for sale an absolutely mint Kenwood TS-850SAT. I am the original non smoking owner. I have both shipping boxes, hand mic, owners manuals and unopened accessory bag. The radio is a 10 out of a 10 functionally and cosmetically. The radio includes the SO-2 TCXO unit which is a $180.00 option. This is one of the last 850's manufactured. The serial number is 80200024. This is most likely one of the finest 850's you will find. I am asking $950.00 shipped ground UPS CONUS.

1555. FS: ICOM IC_746

I have for sale an absolutely mint Icom IC-746. This radio is as new
and includes the optional UT-102 voice board. The radio is all mode and
covers HF, 2M and 6M. The radio has a built in antenna tuner. I am the
original non smoking owner. I have the original box, owners manual,
hand mic, unopened accessory bag and sales brochure.
I am asking $1,000 shipped ground UPS CONUS.

1556. FS: ICOM IC_471H

Newsgroup: rec.radio.amateur.swap

I Have the following VHF gear for sale.
2 ICOM IC-02AT's 2 meter hand helds in excellent condition with IC-BP7 heavy duty battery packs. 2 Icom CM-16U battery chargers, 1 leather case,
1 ICOM lapel speaker mike. 4 Bp-4 battery holders, and an operators and service manual.
1 Kenwood TM-221A 2 meter mobile transceiver with the operator's manual and the service manual.
The TM-221A works well but it decreases power from time to time.
I am asking $150.00 US for the package plus shipping costs.
I am Peter Christensen and my email is peter.christensen@home.com
Thank you. Peter.

1576. FS/FT NEC LAPTOP for ham gear

Newsgroup: rec.radio.amateur.swap
Date: 2001-11-06 04:14:54 UTC
From: NOSPAMcslc82@email.mot.com
Message-ID: <3be8638b.8818129@news.indpdnce1.mo.home.com>
Source record: 4503

Sorry if this is too off topic...but I have a nice NEC laptop which makes a good shack PC, logging computer, rig control, etc., which I'd be willing to trade for ham gear of similar value.

Here's the info: NEC VERSA 4080H laptop with accessories. Pentium 120MHZ, 40MB RAM, sound, 800x600 TFT color LCD and 1GB hard drive running Windows 95. Laptop works fine and is cosmetically like-new. Laptop includes swappable CD-ROM drive and 3.25" floppy, Touchpad mouse, onboard stereo sound, infrared port. Also includes XIRCOM PCMCIA Ethernet network card with 10-base-T adaptor. Includes two working batteries. Also includes two (2) AC adaptors, NEC external battery charger, and separate NEC thumb Trackball device. Includes battery pack adaptor so you can swap the second battery for the floppy/CDROM and operate TWO batteries at once for extended power. Includes leather TARGUS case, and separate leather case for storage of floppy, CD-ROM, or spare battery pack. Laptop is fully intact with all accessory panel doors. Keyboard is clean and operates without sticky keys or other problems.

$275 + freight.

Tnx & 73

FOR SALE:

AKAI model M8 REEL-TO-REEL, Stereo tape deck in excellent condition.

This is a classic commercial quality unit with seperate
left and right amplifiers, metering and electronics.

The case, including the cover, is in great shape as are the
mechanical and electronics. The gray tolex/vinyl covering is in
beautiful condition and the deck works fine, other than the rewind
does not run.

Pictures available on request.

Will sell for $75.00 plus shipping

I have for sale a Comet HF mobile antenna system. This is the Comet QE system. The package includes the QE28 which includes the UHF type stinger adapter and a 10 meter loaded element. I am also including in the package the optional OP14 20 meter loaded element. The elements are interchangeable via the included stinger adapter which screws onto your UHF mobile mount which is not included. Other loaded elements such as a 40 and 15 meter can be purchased from radio stores that carry Comet antennas. I am the original owner and have the packing sleeves and paperwork. These antennas are as new and were used very little. These work well with any HF rig that is put in the mobile. I am asking $75.00 shipped ground UPS CONUS for both.

SHIPPING:

The above manuals are all in electronic form, deliverable via email (FREE SHIPPING), or, on a CD ROM disk (includes CD case). Some of the larger ones may not be practical to send via email. The manuals are in Adobe Acrobat 5.0 (PDF file) format. The Adobe Acrobat Reader 5.0 is INCLUDED on the CD. It is also freely-downloadble, for use with emailed manuals, from www.adobe.com.

The free Adobe Acrobat Reader 5.0 software can be used to read, print, search, enlarge/magnify, copy and paste from, etc, the manuals, making them superior, in many ways, to paper versions of manuals. They are also extensively hyper-linked, enabling the user to jump directly to figures and tables, etc, from wherever they are referenced in the text, and to jump directly to any section, figure, page, etc, from the Table of Contents.

Shipping costs for CDs: Within the continental USA, cost for shipping a CD, with CD case, is $2 for 1st Class Mail, or $5 for Priority Mail (2 days). Other locations: email for cost.

PAYMENT:

I accept Visa and MasterCard, but only through the secure PayPal website, at https://www.paypal.com. My paypal ID is tomg@fullnet.com. I also accept checks, money orders, etc. Payee info:

Thomas P. Gootee, 1795 West Schuetter Road, Jasper, IN 47546, USA

QUESTIONS? Email me, at: tomg@fullnet.com.

I am continuously adding more manuals, and good used test equipment, at:

http://www.fullnet.com/u/tomg

Thanks,

Tom

1606. FS - Alinco DJ-S41T 440 HT

Newsgroup: rec.radio.amateur.swap

From: Wayne Faris <wfaris@inebraska.com>
Message-ID: <3BF07360.5A5E5364@inebraska.com>
Source record: 4533

I have an Alinco DJ-S41T 440 mhz mini handheld for sale. This is the 300 milliwatt cigarette pack sized rig (not the flimsy credit card sized

one). It works 100%. I regularly use it on a repeater some 5 or 6 miles from here and can hit that repeater solid from up to 20 miles. This is a great radio for simplex use at hamfests or doing work on your towers and antennas. The case is worn from many hours in my pocket, but

nothing wrong with it that affects operation in any way. No accessories, just the radio. For more info on this model, check out: http://world.std.com/~wdr/alinco.html

Asking $50 plus shipping (s/b about $4.00).

Wayne L. Faris, KEï¿½BZ

Another shack cleaning special!

I have way too many 2M radios and so the Yeasu FT-270RH must go! The radio is about an 8.5 cosmetically. The radio has given flawless service. The LCD is clear. It has the DTMF mic and does ctcss tones. It comes with the radio, mic, power cord, and the mobile mount with quick release.

A few specs for those interested. 2 meter FM mobile radio, 45 watts output. 10 memories, and scan. It does not have the optional tone board.

I would like $95 plus shipping for the radio. If you need a picture, I can take one and upload it to my webspace for your viewing.

I have a 2 meter amp for sale. It is new-in-box as I never got around to using it. It was made for Radio Shack and by all accounts was a good amp and did a superior job of rejecting intermod due to its good receive filter (that's why I bought it). It has all the mounting hardware, etc.

Specs are 1-5 watts in 30 watts out, has receive preamp.

Here's a picture: http://www.eskimo.com/~ghopper/2Mamp.jpg

I'd like $40.00 plus shipping but will consider offers.

Satellite station....2meter/440 rig, all modes SSB, CW, FM.

Here are the specs and photos....
www.qsl.net/sm7vhs/radio/yaesu/ft736r/ft736r.htm

It's a great rig ....9 out of 10. With the tone unit, manual and hand mike. This is a super satellite station! It is not a compromise between HF and V/UHF. It was designed for satellite operation.

Price $735 shipped Conus....Contact: n2tu@optonline.net

This is a 5 watt HT with a metal case and lots of features including cross band repeat, wide recieve
including cell, and lots more. Comes with ac charger. Radio has one flaw. The #3 key poped out .
I have the key, you need to put it in in a way it will stay. Evereything else works. Comes with
manueal and a list of special hidden features that this radio came with.

Because of the #3 key issue I am asking $150.00

Bob J.

For sale: This is the general coverage version of another ham band only receiver. This radio covers broadcast band through 33.5 Mhz in 4 bands. It has a main tuning dial and a band spread dial. The radio is electrically very good, and all functions work. It has 7 tubes. Physically there are no dents, but there are scratches on the top of the case and on the bottom lip of the case below the knobs (in the light gray areas). The front of the radio (dark gray area) has no scratches, and the dial glass is in excellent condition with no cracks. You will note in the picture below a close up of a 3/8 inch hole that has been drilled in the rear left corner of the top of the case. Why is the hole there? There is an adjustment screw below the hole on top of the chassis.
$75 plus Exact Shipping.

I have for sale a Comet HF mobile antenna system. This is the Comet QE system. The package includes the QE28 which includes the UHF type stinger adapter and a 10 meter loaded element. I am also including in the package the optional OP14 20 meter loaded element. The elements are interchangeable via the included stinger adapter which screws onto your UHF mobile mount which is not included. Other loaded elements such as a 40 and 15 meter can be purchased from radio stores that carry Comet antennas. I am the original owner and have the packing sleeves and paperwork. These antennas are as new and were used very little. These work well with any HF rig that is put in the mobile. I am asking $75.00 shipped ground UPS CONUS for both.

I have for sale a Diamond K600M mobile mount. This is a trunk lip mount with a UHF connector.
The mount is in excellent condition. I had to grind some of the plastic base away at the back of the mount so that it would clear the rear window molding when opening and closing the trunk. I was careful to be neat about it and does not affect the performance. furthermore you cannot see where it was altered because it faces the rear window on the car. I am the original owner and have the plastic container and instructions. I am asking $35.00 shipped ground UPS CONUS.

Satellite station....2meter/440 rig, all modes SSB, CW, FM.

Here are the specs and photos....
www.qsl.net/sm7vhs/radio/yaesu/ft736r/ft736r.htm

It's a great rig ....9 out of 10. With the tone unit, manual and hand mike. This is a super satellite station! It is not a compromise between HF and V/UHF. It was designed for satellite operation.

Price $735 shipped Conus....Contact: n2tu@optonline.net

Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Comet HF mobile antenna system. This is the Comet QE system. The package includes the QE28 which includes the UHF type stinger adapter and a 10 meter loaded element. I am also including in the package the optional OP14 20 meter loaded element. The elements are interchangeable via the included stinger adapter which screws onto your UHF mobile mount which is not included. Other loaded elements such as a 40 and 15 meter can be purchased from radio stores that carry Comet antennas. I am the original owner and have the packing sleeves and paperwork. These antennas are as new and were used very little. These work well with any HF rig that is put in the mobile. I am asking $65.00 shipped ground UPS CONUS for both.

1656. FS: KENWOOD PG2Z HF DC POWER CABLE

This is a 5 watt HT with a metal case and lots of features including cross band repeat, wide recieve
including cell, and lots more. Comes with ac charger. Radio has one flaw. The #3 key poped out .
I have the key, you need to put it in in a way it will stay. Evereything else works. Comes with
manueal and a list of special hidden features that this radio came with.

Because of the #3 key issue I am asking $150.00

Bob J.

Would help to see a picture. Second, I think you are looking for too much money for an old rig. Even if it is a "9" in your book.

I have for sale an absolutely mint Kenwood TS-850SAT. I am the original non smoking owner. I have both shipping boxes, hand microphone, owners manuals and unopened accessory bag. The radio is a 10 out of a 10 functionally and cosmetically. The radio includes the SO-2 TCXO unit which is a $180.00 Kenwood option. This is one of the last 850's manufactured. The serial number is 80200024. This is most likely the finest 850 you will find. I am asking $950.00 shipped ground UPS CONUS. This radio is as new.

1677. FS: ICOM IC_471H

I have for sale an Icom IC-471H all mode 432MHz rig. This radio is in excellent condition and has had the cap replacement mod. I have the original box, original owners manual, a copy of the owners manual, sales brochure, hand mic and power cord. This is the high power version. The radio comes from a non smoking environment.
I am asking $450.00 shipped ground UPS CONUS.

1678. FS: COMET HF MOBILE ANTENNA SYSTEM

Newsgroup: rec.radio.amateur.swap
Date: 2001-11-23 12:52:55 UTC

Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Comet HF mobile antenna system. This is the Comet QE system. The package includes the QE28 which includes the UHF type stinger adapter and a 10 meter loaded element. I am also including in the package the optional OP14 20 meter loaded element. The elements are interchangeable via the included stinger adapter which screws onto your UHF mobile mount which is not included. Other loaded elements such as a 40 and 15 meter can be purchased from radio stores that carry Comet antennas. I am the original owner and have the packing sleeves and paperwork. These antennas are as new and were used very little. These work well with any HF rig that is put in the mobile. I am asking $65.00 shipped ground UPS CONUS for both.

1679. FS: DIAMOND K600M MOBILE MOUNT

Newsgroup: rec.radio.amateur.swap
Date: 2001-11-23 12:53:21 UTC

Source record: 4556
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Diamond K600M mobile mount. This is a trunk lip mount with a UHF connector.
The mount is in excellent condition. I had to grind some of the plastic base away at the back of the mount so that it would clear the rear window molding when opening and closing the trunk. I was careful to be neat about it and does not affect the performance. furthermore you cannot see where it was altered because it faces the rear window on the car. I am the original owner and have the plastic container and instructions. I am asking $35.00 shipped ground UPS CONUS.

1680. FS: ICOM SM-8 DESK MICROPHONE

I have for sale a Heathkit IM-2420 frequency counter. This frequency counter is in mint condition. I have the original assembly manual with schematics. This is a bench type counter. The counters features are as follows:
Measures frequency, period and frequency radio
Wide range from 5Hz to 512MHz
25 mV gauranteed and 4 to 15 mV typical
Stability is less than .2 ppm/yr.
adjustable trigger level
Standby/on power switch
External time base input
Over-voltage protection
RF shielding
8 digit readout
Swing down stand

I am asking $130.00 shipped ground UPS CONUS

1683. FS: COLLECTORS DRAKE LP FILTER

Newsgroup: rec.radio.amateur.swap

FOR SALE -

AKAI model 4-track REEL-TO-REEL, Stereo tape deck in excellent condition.

This is a classic commercial quality unit with seperate left and right amplifiers, metering and electronics.

The case, including the cover, is in great shape as are the mechanical and electronics. The gray tolex/vinyl covering is in beautiful condition and the deck works fine, other than the rewind does not run.

Pictures available on request.

Will sell for $75.00 plus shipping

FOR SALE -

HAND-CRANKED MAGNETO GENERATOR! Produces
120V AC. These will provide about 20-30 Watts depending on
your cranking speed!

The size is about 3" diameter and 3" deep with retracting handle.
Fluke freq meter shows around 20 Hz on one pair of terminals and
around 60 Hz on another.
You can mount these behind a sturdy front panel with a single
hole and the large nut provided.

Will sell for $25.00 each plus $6.50 USA shipping

Picture available

This is an Icom IC-737 transceiver covering 160 - 10 meters. Built-In Antenna Tuner. No Mic is included with Rig I'm using a GOLDLINE mic and use it with my other rigs, I Do have Copy Of Owners Manual. Works perfectly in all modes and on all bands. General coverage mod. has been done. This is a 12 volt DC rig, and would require a 12 volt DC / 20 amp power supply for base operation. I do have the wiring harness for the rig. I used the rig weekly and is in excellent working condition, as with all electronics, I must sell as-is. Payment is Cashier's Check, Postal Money Order, or Paypal! Rig will be send out after funds are received the NEXT business day. I try to personally check out each item I list for auction, and to describe each item completely & carefully. However, since most of these items are used electronic pieces all items are sold "as is". Please contact me for any further information.

$550.00 + Shipping

Model number, please? Also, in most of these, the rewind is a
separate motor, and it would be good to know if the motor has bitten
the dust.

I have for sale an as new mint Diamond SX-400 watt/swr meter. This meter measures average plus PEP wattage. The meter is illuminated. I am the original non smoking owner. I have the box, paperwork and 12V power cord. I am asking $85.00 shipped ground UPS CONUS.

1701. FS: MFJ-1118 DC POWER STRIP

Newsgroup: rec.radio.amateur.swap
Date: 2001-11-25 13:04:02 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3C00EBEC.FF3C9A33@home.com>
Source record: 4578
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale an as new mint MFJ-1118 high current DC powe strip with volt meter. This power strip lets you power six or more accessories from your transceivers main 12 VDC supply. There are also two pairs of super heavy duty 30 amp 5-way binding posts to connect your tranceivers. Each pair is fused and RF bypassed. This also has an independent on/off switch with an "on" LED indicator. There ia also a built in 0-25 VDC volt meter. I am the original owner and have the box and paperwork. I am asking $60.00 shipped ground UPS CONUS.

1702. FS: KENWOOD SP-31 SPEAKER

Newsgroup: rec.radio.amateur.swap
Date: 2001-11-25 13:07:20 UTC

Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale an absolutely mint Kenwood SP-31 external speaker. I am the original non smoking owner. I have the box, and paperwork. This is a selectable filtered speaker. This speaker is flawless and has been covered when not in use. I am asking $75.00 plus shipping.

1703. FS: NEW KENWOOD TS-850 SERVICE MANUAL

Newsgroup: rec.radio.amateur.swap
Date: 2001-11-25 13:27:21 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3C00F164.FBFA718E@home.com>
Source record: 4580
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a new original service manual for the kenwood TS-850 HF transceiver. I bought this and never needed to use it. The manual included all schematics. I am asking $45.00 shipped CONUS.

1704. FS-WTT Apple Dot matrix printer

Newsgroup: rec.radio.amateur.swap
Date: 2001-11-26 01:28:02 UTC
From: Mike Kulyk <mkulyk@optonline.net>
Message-ID: <CUgM7.84467$636.12476991@news02.optonline.net>
Source record: 4581
Cross-posted to: rec.radio.swap,misc.industry.electronics.marketplace,rec.radio.amateur.swap

I have a older dot matrix Apple printer. Model # A9M0303

With 2 new ribbons and 2 db25- Apple mini Din connector cables. The DB25 is the wrong sex for the printer so a gender changer is required. This printer is untested. I was setting up a Apple at one time when I was supporting them. I don't support Apple/MAC any more at work.

$25 plus shipping

1705. FS HP dual trace scope

Tube type power transformers - NEW.

1) Brescia 10V CT at 10 Amps with 115V / 230V Primary
Will sell for $18.00

2) Raytheon TF15X02YY with 120V Primary.
Secondary is 1100V CT at 180 mA continuous.
Dimensions: 3" X 5.25" X 6.5" tall.
Potted, encased case with four mounting studs.
Will sell for $38.00 plus shipping

3) ADC Co. (AVCO-Crosley) model TF4SX03KA
Has 120V AC primary and two secondaries.
Sec A: 1050 V CT at 75 mA continuous
Sec B: 5V at 20 A continuous.
Will sell for $27.00 plus shipping

4) Also have a great filament transformer for that BIG final
amplifier:
115V / 230V primary.
Secondary is 7.5V CT at 51 Amps.
Brand new. Will sell for $95.00 plus shipping

Source record: 4590
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Comet HF mobile antenna system. This is the Comet QE system. The package includes the QE28 which includes the UHF type stinger adapter and a 10 meter loaded element. I am also including in the package the optional OP14 20 meter loaded element. The elements are interchangeable via the included stinger adapter which screws onto your UHF mobile mount which is not included. Other loaded elements such as a 40 and 15 meter can be purchased from radio stores that carry Comet antennas. I am the original owner and have the packing sleeves and paperwork. These antennas are as new and were used very little. These work well with any HF rig that is put in the mobile. I am asking $65.00 shipped ground UPS CONUS for both.

1714. FS: DIAMOND K600M MOBILE MOUNT

Newsgroup: rec.radio.amateur.swap
Date: 2001-11-27 21:02:34 UTC

Message-ID: <3C03FF0D.6AF6FE7A@home.com>
Source record: 4591
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Diamond K600M mobile mount. This is a trunk lip mount with a UHF connector.
The mount is in excellent condition. I had to grind some of the plastic base away at the back of the mount so that it would clear the rear window molding when opening and closing the trunk. I was careful to be neat about it and does not affect the performance. furthermore you cannot see where it was altered because it faces the rear window on the car. I am the original owner and have the plastic container and instructions. I am asking $35.00 shipped ground UPS CONUS.

1715. FS: ICOM SM-8 DESK MICROPHONE

I have for sale a Heathkit IM-2420 frequency counter. This frequency counter is in mint condition. I have the original assembly manual with schematics. This is a bench type counter. The counters features are as follows:
Measures frequency, period and frequency radio
Wide range from 5Hz to 512MHz
25 mV gauranteed and 4 to 15 mV typical
Stability is less than .2 ppm/yr.
adjustable trigger level
Standby/on power switch
External time base input
Over-voltage protection
RF shielding
8 digit readout
Swing down stand

I am asking $130.00 shipped ground UPS CONUS

1718. FS: COLLECTORS DRAKE LP FILTER

Hi Group,

I would like to buy a Millen 90800 or 90801 exciter and 90831 modulator in any condition, working or not. I am also looking for the coils for the same. They are 43000 series coils from Millen and I think National also made them. I would also be interested in the parts to make the coils, the ceramic bases (2" between outer pins) and the Miniductor/AirDux raw coil material.

Thanks

Paul

Hi there,

If you have used or own CSI or IDA brand two-way radio LTR Trunking controllers, please drop me an Email. I'm trying to choose between the two and I'd just like your opinions. Take the NOSPAMPLEASE out of my Email header above, or just use the one below.

thanks
skipp

This is a 5 watt HT with a metal case and lots of features including cross band repeat, wide recieve
including cell, and lots more. Comes with ac charger. Radio has one flaw. The #3 key poped out .
I have the key, you need to put it in in a way it will stay. Evereything else works. Comes with
manueal and a list of special hidden features that this radio came with.

Because of the #3 key issue I am asking $150.00

Bob J.

FS: Hammurlund SP-600 JX-31 VLF receiver

Classic VLF receiver for sale. Unit is in excellent shape physically. Has cabinet and original knobs. It has been stored a long time and needs cleaning and check up. Email me if you would like to see digital pictures of the receiver.

I'm just getting to the point now of cleaining it up, but don't really have time. I plan to sell or auction it once cleaned up but would be happy to sell it now for a big discount if you'd rather do the cleanup. This model has sold recently for as high as $2500 over the newsgroups and ebay. I'd be happy to sell it now for $1900 plus shipping from Southern California.

I have for sale an as new Heil Goldline Studio Microphone with
accessories. The Goldline also includes the HC-5 element. I would like
to offer a package which includes the Goldline Microphone, HS-1 hand
switch, CC-1-K Kenwood 8 pin cable and the desktop microphone stand.
This microphone is absolutely mint. I have all of the packaging and
paper work that comes with it. I am a non smoker.
I am asking $135.00 shipped ground UPS CONUS.
I am willing to deduct something for the Kenwood cord if it does not
work with your rig.

1739. FS: COMET HF MOBILE ANTENNA SYSTEM

Newsgroup: rec.radio.amateur.swap
Date: 2001-11-30 21:35:18 UTC

Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Comet HF mobile antenna system. This is the Comet QE system. The package includes the QE28 which includes the UHF type stinger adapter and a 10 meter loaded element. I am also including in the package the optional OP14 20 meter loaded element. The elements are interchangeable via the included stinger adapter which screws onto your UHF mobile mount which is not included. Other loaded elements such as a 40 and 15 meter can be purchased from radio stores that carry Comet antennas. I am the original owner and have the packing sleeves and paperwork. These antennas are as new and were used very little. These work well with any HF rig that is put in the mobile. I am asking $65.00 shipped ground UPS CONUS for both.

1740. FS: DIAMOND K600M MOBILE MOUNT

Newsgroup: rec.radio.amateur.swap
Date: 2001-11-30 21:38:01 UTC

Message-ID: <3C07FBD7.7489AB65@home.com>
Source record: 4367
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Diamond K600M mobile mount. This is a trunk lip mount with a UHF connector and 16.5 ft. of coax with a PL-259.
The mount is in excellent condition. I had to grind some of the plastic base away at the back of the mount so that it would clear the rear window molding when opening and closing the trunk. I was careful to be neat about it and does not affect the performance. furthermore you cannot see where it was altered because it faces the rear window on the car. I am the original owner and have the plastic container and instructions. I am asking $35.00 shipped ground UPS CONUS.

1741. FS: ICOM SM-8 DESK MICROPHONE

Newsgroup: rec.radio.amateur.swap

I have for sale a Heathkit IM-2420 frequency counter. This frequency counter is in mint condition. I have the original assembly manual with schematics. This is a bench type counter. The counters features are as follows:
Measures frequency, period and frequency radio
Wide range from 5Hz to 512MHz
25 mV gauranteed and 4 to 15 mV typical
Stability is less than .2 ppm/yr.
adjustable trigger level
Standby/on power switch
External time base input
Over-voltage protection
RF shielding
8 digit readout
Swing down stand

I am asking $130.00 shipped ground UPS CONUS

1744. FS: COLLECTORS DRAKE LP FILTER

All the radios and equipment below are in like new condition. I just do not have time for Amateur Radio so instead of letting this good equipment set, I may as well sell it. What does not sell in a couple days is going to Ebay. Email me for pics. Shipping is extra.

Icom IC-706MKIIG - Like new condition. Also included are the separation kit, mounting brackets, all the manuals and paperwork, and the box. This radio was purchased new in July 2001 and I doubt it has 2 hours of use. The warrantee card is still in the package for you to fill out. $795

LDG RT-11 remote mount auto tuner that was purchased in August 2001. It too is just like new and it includes the Icom interface cable for the706 and others. I believe this thing would tune a coat hanger! $190

Comet UHV-6 mobile antenna with the 20-meter coil. The Comet UHV-6 covers 6M/2M/70cm, 40M, 15M, 20M, and 10M. Also included is the Comet RS720 mount and 3D4M cable assembly. The antenna also was purchased in July and works great with the IC-706MKIIG. $165

Comet CF-706 Duplexer. It covers 1.3 - 57 MHz and 75 - 550 MHz. It to was bought new in July and is in great condition. It's a real must for the IC706. $45

Yaesu FT-920 - Radio is about 2 years old but has very few hours on it. It's in like new condition with no scratches and it has the FM module. Includes new hand mic (never used), manuals and paperwork, and original boxes. $895

Yaesu MD-100a8x desk mic. - It too is about two years old but in like new condition. I even have the original box. $90

Astron SS30 - 25 amp continuous PS - It was bought and used with the FT-920 and is like new. $85

FA: Extremely nice Hammarlund HQ-170 Amateur Band Receiver with the matching large Hammarlund S-200 Speaker. Includes original boxes for both the receiver and the speaker, and the original manual. This receiver's performance is excellent on all bands, and is a one-owner receiver from the estate of a Amateur Radio operator. There are no known modifications, and the receiver is extremely clean. It is sensitive, in calibration, and you will not need to do any "capacitor replacement", "alignment", etc. - it is a "Plug and play" receiver. No clock, but replacements are available if you want the matching analog clock. You'll have a hard time finding a nicer HQ-170 than this one! Thanks for looking.

This is a 5 watt HT with a metal case and lots of features including
cross band repeat, wide recieve
including cell, and lots more. Comes with ac charger. Radio has one
flaw. The #3 key poped out .
I have the key, you need to put it in in a way it will stay.
Evereything else works. Comes with
manueal and a list of special hidden features that this radio came
with.

Because of the #3 key issue I am asking $150.00

Bob J.

1771. FS: COMET HF MOBILE ANTENNA SYSTEM

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-04 22:54:33 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3C0D53B9.A150B4FE@home.com>
Source record: 4398
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Comet HF mobile antenna system. This is the Comet QE system. The package includes the QE28 which includes the UHF type stinger adapter and a 10 meter loaded element. I am also including in the package the optional OP14 20 meter loaded element. The elements are interchangeable via the included stinger adapter which screws onto your UHF mobile mount which is not included. Other loaded elements such as a 40 and 15 meter can be purchased from radio stores that carry Comet antennas. I am the original owner and have the packing sleeves and paperwork. These antennas are as new and were used very little. These work well with any HF rig that is put in the mobile. I am asking $65.00 shipped ground UPS CONUS for both.

1772. FS: DIAMOND K600M MOBILE MOUNT

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-04 22:54:44 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3C0D53C4.FCADBEFE@home.com>
Source record: 4399
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Diamond K600M mobile mount. This is a trunk lip mount with a UHF connector and 16.5 ft. of coax with a PL-259.
The mount is in excellent condition. I had to grind some of the plastic base away at the back of the mount so that it would clear the rear window molding when opening and closing the trunk. I was careful to be neat about it and does not affect the performance. furthermore you cannot see where it was altered because it faces the rear window on the car. I am the original owner and have the plastic container and instructions. I am asking $35.00 shipped ground UPS CONUS.

1773. FS: ICOM SM-8 DESK MICROPHONE

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-04 22:54:55 UTC

I have for sale an Icom MB-62 mobile mounting bracket for the Icom 706 radio. I am the original owner an have the box and all of the hardware that goes with it. The bracket is in excellent condition. I am asking $20.00 shipped ground UPS CONUS.

1775. FS: HEATHKIT IM-2420 FREQUENCY COUNTER

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-04 22:55:20 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3C0D53E8.D10913B8@home.com>
Source record: 4452
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Heathkit IM-2420 frequency counter. This frequency counter is in mint condition. I have the original assembly manual with schematics. This is a bench type counter. The counters features are as follows:
Measures frequency, period and frequency radio
Wide range from 5Hz to 512MHz
25 mV gauranteed and 4 to 15 mV typical
Stability is less than .2 ppm/yr.
adjustable trigger level
Standby/on power switch
External time base input
Over-voltage protection
RF shielding
8 digit readout
Swing down stand

I am asking $130.00 shipped ground UPS CONUS

1776. FS: COLLECTORS DRAKE LP FILTER

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-04 22:55:33 UTC

Sure, go to "http://www.arrl.org" and click on the link to "Hamfests".
You can do a search by state. I see 4 in Washington, 2 in Oregon, and
1 in BC. I go to every hamfest that I can.

This is a 5 watt HT with a metal case and lots of features including cross band repeat, wide recieve
including cell, and lots more. Comes with ac charger. Radio has one flaw. The #3 key poped out .
I have the key, you need to put it in in a way it will stay. Evereything else works. Comes with
manueal and a list of special hidden features that this radio came with.

Because of the #3 key issue I am asking $125.00

Bob J.

I guess I was a bit over the top. Sorry about that. Just seems I get lots of advie from forsale
groups. Would like to actually sell some things, and buy some things. I did that lots in Austin
forsale when I Lived there. Anyway I did lower the price and of course people can always make
offers!

Thanks for the polite reply, When I look back at what I wrote You could have taken more offense than
you did.

Bob J.

I have for sale a Comet HF mobile antenna system. This is the Comet QE system. The package includes the QE28 which includes the UHF type stinger adapter and a 10 meter loaded element. I am also including in the package the optional OP14 20 meter loaded element. The elements are interchangeable via the included stinger adapter which screws onto your UHF mobile mount which is not included. Other loaded elements such as a 40 and 15 meter can be purchased from radio stores that carry Comet antennas. I am the original owner and have the packing sleeves and paperwork. These antennas are as new and were used very little. These work well with any HF rig that is put in the mobile. I am asking $65.00 shipped ground UPS CONUS for both.

1796. FS: ICOM SM-8 DESK MICROPHONE

Newsgroup: rec.radio.amateur.swap

I have for sale a Heathkit IM-2420 frequency counter. This frequency counter is in mint condition. I have the original assembly manual with schematics. This is a bench type counter. The counters features are as follows:
Measures frequency, period and frequency radio
Wide range from 5Hz to 512MHz
25 mV gauranteed and 4 to 15 mV typical
Stability is less than .2 ppm/yr.
adjustable trigger level
Standby/on power switch
External time base input
Over-voltage protection
RF shielding
8 digit readout
Swing down stand

I am asking $125.00 shipped ground UPS CONUS

1799. FS: COLLECTORS DRAKE LP FILTER

I have for sale an unused Drake TV-1000LP low pass filter. The filter case is copper and shines like a new penny. This filter is new an most likely early 1970's vintage. The filter is rated at 1000 watts maximum below 30 MHz and can be used at reduced ratings up to 50 MHz. I have the original box and paperwork. This could be nice nice collectors item for Drake owners. I am asking $50.00 shipped ground UPS CONUS.

I have for sale a mint Yaesu VX-5R triband HT. I am the original non smoking owner. This ht is less than 1 year old and has had only a few hours of actual use, most of which was monitoring. This ht never left the inside of my house and is as new. The ht is super wide band receive from .5-999MHz cellular blocked. It transmits 5W on 6M, 5W on 2M and 4.5W on 70cm. I have the boxes and all paperwork including the warranty card. The following accessories are included in the price:
Yaesu MH-35 hand/speaker mic.
Yaesu CN3 antenna adapter for use with BNC connector
Yaesu CD-15 rapid charger
Yaesu FNB-58LI lithium ion extra battery
Yaesu SU-1 Barometric pressure/altitude board
Yaesu CSC-73 soft case
Yaesu E-DC-5B DC cable with voltage regulator and cigarette lighter plug
Comet MH-10 6m/2m/70cm triband HT high performance wide band receive ant

The radio has all of the factory included accessories.
I am asking $410.00 shipped ground UPS CONUS

Hi Bob,

No problem. I also could have not added my own 2 cents. ;-) I didn't
take offense (too much) to your reply because life is too short to sweat
the small stuff. And it's all small stuff. :-)

Good luck on the radio.

BTW, what is an "HT". I recently got into CB and a handheld would be
useful at times if this operates on the same bands. Do you have an URL
for the unit that I can read more about it?

I might be interested depending on the unit itself.

Thanks,

Mark

I have a MINT, optoelectronics Xplorer for sale, unit comes with all
original
accessories: Asking $600 shipped obo CONUS FedEx 2 day. Unit is factory
unblocked and works flawlessly. Older software version w/o LTR - I will
consider trade for 500MHz plus working laptop
Photo upon request mkatz3@cfl.rr.com

1 - Manual, some paper wear
1 - Original box
1 - Opto Xplorer - Unblocked, serial # 460108 - no mars, perfect condition,
good battery
1 - Opto soft case for above - perfect condition
1 - 3.5" floppy "Xplorer /Scout download Untility / OS456/OS535 checkout
utility"
3 - 3.5" floppies "Geo_db/Xplorer" from percon - unused
1 - Standard/rapid charger with cord - perfect condition
1 - download cable - xplorer to BD9 (pc)
5 - misc antennas

***** Power Supplies, Inverter, UPS *****

Open (L-shaped) frame linear power supplies 6" x 3" x 2" with attached 2 wire polarized line cord, 120V 60 Hz AC input; internal 1A line fuse. There is a relay that switches the 3 voltage outputs. They have a six-pin SIL output connector and come with a matching cable to pigtails. The wires are: GND, +5V switched, -5V switched, relay (gnd to operate), +12 switched, and +12 constant (for the relay). Just guessing from the 780X series regulators, I would think that the +12 and +5 outputs are good for about an amp. and the -5, which regulator is unheatsinked, perhaps a couple hundred mA.
$12 ea. (5 units available)

Lambda LM B0-60 -- 0-60V, .45A Linear Power supply with remote sense terminals, screwdriver voltage adjust, 5"x3"x7" -- used $25

Power General
Model 1035-2 -- 12V, 3A, Switching Power supply, uncased PCB 5"x3"x2" -- NOS $15

Model 3050-1 -- 5V@6A , 12V@1A & -12V@1A, Switching Power supply, uncased PCB 5"x4"x2" -- NOS -- $20 ea (4 available)

Model 3056-6 -- 5V@6A & 12V@3A, Switching Power supply, uncased PCB 5"x4"x1.5" -- NOS $25

Sierracin 5C12A -- 12V (5 Amp?) Switching Power supply with remote sense terminals -- open frame 5"x8.5" x2" -- used $15 ea (2 available)

NPC Model 12-115. 12VDC - 115 VAC 200W Square Wave inverter. Black case w/ gold anodized front panel measures 7"x7"x5" high. 10 lbs. shipping wgt. $20

International Instrumentation Model PUP-200. 200W computer style UPS. Off white case measures 15"x8"x6" high. Requires 24V worth of lead acid batteries, not included. 18 lbs. shipping wgt. $25

SAFT Model SPS400-117. 400W computer style UPS. Light tan case measures 11"x12"x6" high. Requires 24V worth of lead acid batteries, not included. 20 lbs. shipping wgt. $40

All of the above plus shipping, if necessary, naturally.

1829. FS: Transistorized Military VHF Power Amp

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-11 02:50:36 UTC
From: Marv_E_Ads@Juno.com
Message-ID: <9v3s9svsu1@news.netmar.com>
Source record: 4258
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

Late '70's vintage likely Military, probably airborne, VHF power amplifier assembly. It consists of 7 almost identical amplifier assemblies clustered around a
central housing that has splitter combiner networks which are plugged onto each end with a bunch of SMB connectors. There are TNC's for the main in's & outs. I think it was originally configured as one amp, driving two, driving four boards. The complete assembly measures 7.5" x 5" x 3.5" overall -- the individual RF amp boards are 4.5" by 2". The outer covers
are mostly missing. Each amplifier is a push pull design -- they appear to be
50 ohm in & out impedance with either PT6747 or PT6702 TRW transistors. I would
guess this unit operates on 28VDC. I don't know what frequency range it covers nor the power level though, just guessing, it probably puts out at least 100W. And there is no manufacturer name -- probably went with the outer cover. Six of the stages are marked OK and one, the input stage I think, is marked NO Good. The individual amps have integral heat sink plates so, they could be removed from the assembly and used separately. Think of it as 7 amplifier boards @ $10 ea --
Bare PCB's would cost as much! -- $70

plus shipping, if necessary, naturally.

Mark,

HT stands for handie talkie. GHam radio handheld. Check out Yeasu, Icom and Kenwood sites for more
help. (I too, read don't sweat the small stuff anf I am still trying to apply it.)

1838. FS: DIAMOND K600M MOBILE MOUNT

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-11 22:39:50 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3C168AB4.5ED824ED@home.com>
Source record: 4265
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Diamond K600M mobile mount. This is a trunk lip mount with a UHF connector and 16.5 ft. of coax with a PL-259.
The mount is in excellent condition. I had to grind some of the plastic base away at the back of the mount so that it would clear the rear window molding when opening and closing the trunk. I was careful to be neat about it and does not affect the performance. furthermore you cannot see where it was altered because it faces the rear window on the car. I am the original owner and have the plastic container and instructions. I am asking $35.00 shipped ground UPS CONUS.

1839. FS: COMET HF MOBILE ANTENNA SYSTEM

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-11 22:40:09 UTC

Message-ID: <3C168AC7.9BD3BA8@home.com>
Source record: 4266
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Comet HF mobile antenna system. This is the Comet QE system. The package includes the QE28 which includes the UHF type stinger adapter and a 10 meter loaded element. I am also including in the package the optional OP14 20 meter loaded element. The elements are interchangeable via the included stinger adapter which screws onto your UHF mobile mount which is not included. Other loaded elements such as a 40 and 15 meter can be purchased from radio stores that carry Comet antennas. I am the original owner and have the packing sleeves and paperwork. These antennas are as new and were used very little. These work well with any HF rig that is put in the mobile. I am asking $65.00 shipped ground UPS CONUS for both.

1840. FS: ICOM SM-8 DESK MICROPHONE

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-11 22:40:30 UTC

I have for sale an as new Icom SM-8 desk microphone. I am the original non smoking owner. I have the box and the paperwork. I am asking $120.00 shipped ground UPS CONUS.

1841. FS: ICOM MB-62 MOUNTING BRACKET

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-11 22:40:41 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3C168AE6.D535584@home.com>
Source record: 4268
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale an Icom MB-62 mobile mounting bracket for the Icom 706 radio. I am the original owner an have the box and all of the hardware that goes with it. The bracket is in excellent condition. I am asking $20.00 shipped ground UPS CONUS.

1842. FS: HEATHKIT IM-2420 FREQUENCY COUNTER

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-11 22:41:04 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3C168AFE.967D9C9B@home.com>
Source record: 4269
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Heathkit IM-2420 frequency counter. This frequency counter is in mint condition. I have the original assembly manual with schematics. This is a bench type counter. The counters features are as follows:
Measures frequency, period and frequency radio
Wide range from 5Hz to 512MHz
25 mV gauranteed and 4 to 15 mV typical
Stability is less than .2 ppm/yr.
adjustable trigger level
Standby/on power switch
External time base input
Over-voltage protection
RF shielding
8 digit readout
Swing down stand

I am asking $120.00 shipped ground UPS CONUS

1843. FS: MFJ-1118 DC POWER STRIP

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-11 22:41:22 UTC

Message-ID: <3C168B10.7E8F59C3@home.com>
Source record: 4270
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale an as new mint MFJ-1118 high current DC powe strip with volt meter. This power strip lets you power six or more accessories from your transceivers main 12 VDC supply. There are also two pairs of super heavy duty 30 amp 5-way binding posts to connect your tranceivers. Each pair is fused and RF bypassed. This also has an independent on/off switch with an "on" LED indicator. There ia also a built in 0-25 VDC volt meter. I am the original owner and have the box and paperwork. I am asking $60.00 shipped ground UPS CONUS.

1844. FS: KENWOOD SP-31 SPEAKER

Source record: 4272
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale an as new mint Diamond SX-400 watt/swr meter. This meter measures average plus PEP wattage. The meter covers 140-525 MHz and is illuminated.
I am the original non smoking owner. I have the box, paperwork and 12V power cord. I am asking $80.00 shipped ground UPS CONUS.

1846. FS: YAESU VX-5R TRIBAND HT WITH ACCESSORIES

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-11 22:42:00 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3C168B36.38C4BC08@home.com>
Source record: 4273
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a mint Yaesu VX-5R triband HT. I am the original non smoking owner. This ht is less than 1 year old and has had only a few hours of actual use, most of which was monitoring. This ht never left the inside of my house and is as new. The ht is super wide band receive from .5-999MHz cellular blocked. It transmits 5W on 6M, 5W on 2M and 4.5W on 70cm. I have the boxes and all paperwork including the warranty card. The following accessories are included in the price:
Yaesu MH-35 hand/speaker mic.
Yaesu CN3 antenna adapter for use with BNC connector
Yaesu CD-15 rapid charger
Yaesu FNB-58LI lithium ion extra battery
Yaesu SU-1 Barometric pressure/altitude board
Yaesu CSC-73 soft case
Yaesu E-DC-5B DC cable with voltage regulator and cigarette lighter plug
Comet MH-10 6m/2m/70cm triband HT high performance wide band receive ant

The radio has all of the factory included accessories.
I am asking $410.00 shipped ground UPS CONUS

***** B&W Air Dux coils *****

These are all shiny NOS, 10" lengths, unless noted otherwise

#2408T 3" dia, 8TPI, #14 wire -- $30

#2008-31 2.5"dia x 4" long , 8TPI, #14 wire with 2 turn #14 link at center.
NIB $25

#1604T 2" dia, 4TPI, #12 wire, slight tarnish $20

#1208T 1.5" dia, 6TPI, #12 wire, slight tarnish $20
#1216T 1.5" dia, 16TPI, #16 wire, somewhat tarnished $20

#1006T 1.25" dia, 6TPI, #14 wire, somewhat tarnished $15

These are all somewhat tarnished NOS partial lengths

#1008T 1.25" dia, 8 TPI, #16 wire, 8" long -- $12
#1016T 1.25" dia, 16 TPI, #20 wire, 8" long -- $12
#1032T 1.25" dia, 32 TPI, #24 wire, 5" long -- $10

and a couple of Illumintronic Engineering parts

375 7367-P1 -- 1.5" dia.x 5.75" winding w/ indented turns, 14 TPI, #17, 7"
overall
including plastic center support, un-used somewhat tarnished $25

980-0121-000 -- 2.5" dia. x 7.5" winding w/ indented turns, 8 TPI, #14, 9.5"
overall
including plastic center support, used somewhat tarnished but, no turns
soldered $30

All of the above plus shipping, if necessary, naturally.

----- 50 Nuvistors -------

Actually there are more like 60-70 parts in the box. Most look like
pulls, some are in boxes and some may be new.

The collection includes:
6CW4
6DS4
6DV4
7586
7595
8393

Asking $50 for all of them

--- Planar Tubes (used)---
2C39A -- $10 ea
322 -- $10
7289 (3CX100A5) -- $15 ea or 5 for $60
7698 -- $10 ea
7843 -- $5 ea
Y602B -- $10
Y2177 -- $10 ea
EE144 -- $10

---- Lighthouse tubes ----
2C46 pull $3

---- Pencil tubes ------
6442 pull $5 ea
7554 pull $5

----- and the rest -----

6CL6 pulls $2 ea
6DQ6B RCA likely NIB + GE 6DQ6B pull -- $10 both
4637 (RCA) pull $40
5654 (6AK5) pulls $2 ea
5763 pulls/NOS $5 ea
6481 new $50

All of the above plus shipping, if necessary, naturally.

1856. FS: Five RC Radios

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-12 01:05:05 UTC
From: Marv_E_Ads@Juno.com
Message-ID: <9v6ag1$ne8$1@news.netmar.com>
Source record: 4284
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap,rec.models.rc.air,rec.models.rc.helicopter,rec.models.rc.land

FS: Five pieces of radio control equipment

Airtronics Vector VT2P 75 MHz R/C transmitter -- Channel 64.

KO Propo EX-5 27 MHz R/C transmitter on 27.045 Mhz... I think

JR Remote Control / Circus Hobbies Unlimited Series FM transmitter module (only) -- 72.550 MHz

JR Remote Control / Circus Hobbies Unlimited Series 8 Channel Receiver NER-J128M -- 72.4 MHz

JR Remote Control / Circus Hobbies 9 Channel Receiver NER-529X -- 72.550 MHz

I checked the top two transmitters and they output on a spectrum analyzer. I have no way to check the receivers -- they may be NOS; the antennas appear to have never been uncoiled.

I don't think that these units are interoperable. The top two transmitters look like they are for use with cars and the bottom two receivers seem to have nomenclature that would suggest model planes.

Asking $100 for the lot, plus shipping if necessary, naturally.

With overtime becoming abundant over the holiday season for me, I am actually going to have some extra cash to spend on something other than bills!

I am looking for either a 6 meter FM only rig or 6 meter all-mode rig, preferably a mobile configured rig, or a "base" model capable of recieving 12-13.8vDC from my auto. Please feel free to email me with what you have for sale. Appearance not as important as long as the display is readable, and the information around any dials or buttons is discernable. The radio MUST BE 100% fully operational as it was designed to be.

Thanks,
Ryan KC8PMX

kc8pmx@tm.net

1866. FS: Coax Connectors & Coax relay

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-13 01:36:26 UTC
From: Marv_E_Ads@Juno.com
Message-ID: <9v90mqdej1@news.netmar.com>
Source record: 4293
Cross-posted to:
rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap,sci.electronics.components

***** Used Coax Connectors ****

These are mostly used, fairly clean, (at least 80%) Amphenol parts.
There are anywhere from about 4 to 25 of each type available.

UHF female - UHF female barrel connectors -- $1 ea

UHF male - BNC female adapters -- $2 ea
UHF female - BNC male adapters -- $2 ea
UHF F-M-F Tees -- $2 ea

UG-57B/U N Male-Male connector -- $4 ea
UG-635/U C Female - BNC Male adapter -- $5 ea
UG-636A/U BNC Female - C Male adapter -- $5 ea
UG-259A/U 91836 -- HN female to LC female bulkhead adapter -- $30

SMA Female-Female Bulkhead connector -- $1 ea

N Female Chassis Mount connectors with gold (plated/flashed) PC style center
pin (entends about 1/8" back from the insulator). Connex brand -- $1ea

***** New Coax Connectors *****

UG-1213/U HN Male Cable connector NOS -- $10

Kings KH-39-11 HN Female Cable connector NOS -- $10

Below are all new crimp on connectors, with all hardware, in individual
plastic bags; early-mid 1990's date codes.
I believe that they are all for RG-59 size cable.

Kings Electronics
KC-59-642-M06 BNC Cable Male -- $1 ea
KA-59-385-M06 TNC Cable Male -- $1 ea
KA-19-43 TNC Bulkhead Female -- $1 ea

*** Coax Antenna Relay ****

Dow-Key DK-60 style 110 VAC coil -- $30 (last one)

(3) UHF connectors. Somewhat old looking on the outside but,
I popped the inspection port and all the contacts are all happy -- goes
"clunk" upon application of the appropriate voltage.

All of the above plus shipping, if necessary, naturally.

*** RF Attenuators ***

Heavily built RF Attenuator, adjustable between 0-50dB in 10dB steps. 8"
flying leads w/one terminated in a BNC Bulkhead female and the other with an
N Male
connector. Looks like it should be good to at least 1 GHz. 3 1/2" diameter
by 4" deep overall and weighs about 4 pounds each. There are tapped holes in
the front frame for
panel mounting. No manufacturer is indicated. A 3/8" shaft adjusts by pulling
(with a
spring return) and turning so there is no chance of inadvertent resetting. No
knob
nor dial is included. $25

Mfg. Unknown, 0-59 dB 50 ohm RF attenuator -- about 3" diameter by 6" long
overall with concentric knobs (10db & 1 dB steps) & side mounted TNC
connectors. -- $35

Telonic TB-50A 0-10dB 50 ohm RF attenuator -- 3" diameter by 3" deep w/ side
mounted BNC connectors. $20

6 dB low power pads with N connectors, male on one end, female on the other.
Approx. 1"x1"x3" overall. 2 available $10 ea.

All of the above plus shipping, if necessary, naturally.

Sierra Electronics model 164B Bi-Directional Power / SWR meter (looks just like a URM-120) with 181-A-1000 element -- covers 200-1000 MHz with four power ranges: 10W, 50W, 100W & 500W full scale. Case is in good condition finished in "Howard Hughes" (light) green -- leather carrying strap is in very good condition. N connectors (M&F) -- $100

Teaberry model TB 6503 HF SWR / Power meter. 100W / 10W ranges FWD & REF power plus SWR. UHF connectors. $7

TEI model 28-200 relative power / SWR / Field strength meter -- screw in whip antenna is missing. UHF connectors. $10

All of the above plus shipping, if necessary, naturally.

*** Homebrew Radio things ***

Many hams build things with a large investment in time & parts that are worth far less... later. Here are some items from the estate stuff I've been selling that fit that description -- priced accordingly.

Unless noted, most of the items below are built on PCB material and most of the enclosures are made by soldering pieces of PCB material into a box -- not all sides may be present! Batteries not included! A few of these devices come with schematics, mostly not. The wiring is all open enough that you can generally see what is going on.

Battery drainer -- LM317K (TO-3) plus a pot wired as a current sink to drain batteries -- 4" x 3" x 1.5" -- $2

PL Tone generator -- Wein Bridge Oscillator powered by two 9 volt batteries. - $3

Touch Tone Encoder -- Western Electric Touch Tone Dial mounted in a 4"x4"x2" metal enclosure with power switch. Has a 4 pin DIN connector plus matching cable terminated in a 1/8" mini plug. $4

Two Tone generator -- Two Wein Bridge Oscillators powered by two 9 volt batteries on perf board. - $4

Some kind of test oscillator with a 556, two pots with anodized gold (colored) knobs, pwr. sw.. LED,. & Banana jack outputs -- $4

60dB Sampling Tap -- HN female connectors for the main line and a BNC for the tap. 1KW in the line puts 1mW to the tap. -- $10

435 MHz power splitter with (3) N connectors. This is made out of brass sheet stock and is about 15" long by 1" square. $10

Varactor multiplier (unfinished) -- looks like it's designed for 144 to 432. Built in a 3.5" x 2" x 7/8" extruded aluminum case -- top plate missing. Silver plated coils, Johnson 189-6-4 caps. It think it is complete execpt for the input and output leads. $10

Some kind of VHF thing just started. Pomona 4"x2.5"x1.5" cast box with a couple 160-104 capacitors, BNC connectors, a miniature 50K bourns pot., 6 capacitors mounted to gold plated terminals with a very pretty gold flashed internal shield structure. Nothing is soldered -- this was just started. $10

Antenna Noise bridge? -- Pot & Cap plus 4 transistor circuit mounted in a 5" x 4" x 2" enclosure. BNC connectors marked ANT & RX. Pwr SW. & Led Powered by a single 9 volt battery. - $10

Two Meter to 24-28 MHz converter (I think!) -- 5" x 4" x 1.75" -- $10

A VHF thing -- Two trombone lines adjustable between 4-6" with a transistor connected between them plus a Phasotron 50 ua 2" round meter on a BNC cable with a small loop w/a diode. -- $10

NTSC Frequency reference -- I think this was a QST project in the early 1980's. PCB in 4"x5"x8" metal case (top missing) w/feet, AC line powered. -- $15

144-148 MHz to 24-28 MHz Transverter -- 5" x4" x 4" overall -- 2N3866 Output transistor, probably runs about a watt on transmit. Barrier strip for power (12V?) and an 8 pin Japanese style Mike connector for ?. Transmit & receive sections are each 5" x4" x 2" and only interconnected with a few wires -- $20

All of the above plus shipping, if necessary, naturally.

1872. FS: Four Keys and a Keyer

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-13 01:47:38 UTC
From: Marv_E_Ads@Juno.com
Message-ID: <9v91bqdqn1@news.netmar.com>
Source record: 4299
Cross-posted to: rec.radio.amateur.swap,rec.radio.swap,alt.ham-radio.marketplace,rec.ham-radio.swap

*** An Old Electronic Keyer, & 4 straight keys ***

Hallicrafters HA-1, "T.O." keyer, with original manual. Working! Including the octal to phone plug cable to connect it to a transmitter. $60.

The Keyer may be seen at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=TO-1.jpg&.src=bc&.view=t&.hires=t

A SpeedX with a rectangular base. Note crack in left pillar casting does not affect functionality. $15
Photo on display at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Speedx1jpg&.src=bc&.view=t&.hires=t

A SpeedX with an oval base; Note, the tune lever is missing its knob. $15
Photo on display at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Speedx2jpg&.src=bc&.view=t&.hires=t

A Military Key marked SC1184A on the bottom. Color is not really as "brassy" as in the photo. $15
Photo on display at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Milkey.jpg&.src=bc&.view=t&.hires=t

A Key made in Japan. $15
Photo on display at:
http://y42.briefcase.yahoo.com/bc/marv_email/vwp?.dir=/Jpegs&.dnm=Jkey.jpg&.src=bc&.view=t&.hires=t

All of the above plus shipping, if necessary, naturally.

********** Old Knobs **********

These are all used, most have set screws, with nothing worse than minor scuffs and smudges and fit 1/4" shafts, unless noted.

Dakaware
1-1/16" Knurled Knob -- $3
1-1/16" Knurled Knob w/ 1.5" skirt w/ white indicator line -- $5ea
1-1/16" Knurled Knob w/ 2" skirt marked 0-10 -- $8
1-5/8" Knurled Knob w/ 2-1/16" skirt & unfilled indicator line -- $8
2-3/8" Knurled Knob w/ white vinyl pointer at skirt level -- $12 ea
2-3/8" Knurled Knob w/ 3" skirt & unfilled indicator line -- $12
2-1/16" skirt only -- $2

Short (1-3/16")pointer knob w/ white indicator line $1 ea
Long (2") pointer knob w/ white indicator line $1.50

Harry Davies
#1206 1-3/8" knobs -- $4 ea
Short (1-3/16")pointer knob unfilled indicator line -- Not sure if this is Davies... There are a box of these -- 2/$1 ea

Hewlett Packard (70's vintage)1-5/8" spinner knob w/ 3/8" bushing -- $10

Kenwood 5CM diameter knobs that look like they are from a Kenwood TS-830 (main tuning knob) or similar
"Stock" knob -- $7
One that's been backfilled with shot to give it some heft -- $7
The plastic spinner version -- $15

Kurz-Kasch
#308 1-1/8" knob -- $4
#308 1-1/8" knob w/ 1-3/4" brite metal skirt with 100 graduations and tens indicated in black -- $8
#309 1-5/8" knob w/ metal spinner and 2-1/4" black metal skirt with 100 graduations and tens indicated in white -- $12
#309? (may not be KK) 1-5/8" knob w/ plastic spinner and 2-1/4" metal skirt with 100 graduations and tens indicated -- $12

#310 2-3/8" knob -- hub drilled out to 3/8" -- $8
#310 2-3/8" knob w/metal spinner shaft -- $12 ea
#311 2-1/16" skirted knob (some of the white lines are need refilling on these) -- $8ea
#380 1.5" skirted knob -- $5

These look like what was on some '60's Hammarlund, Eico & Knight Kit
stuff
#642 1.5" skirted knob -- $5
#S-645 .75" skirted knob w/indicator line -- $5
#647 1" skirted knob w/indicator line -- $5 ea
#653 1.5" skirted knob w/indicator line -- $5 ea

Millen? (has a logo that looks like a "M" with an "I" superimposed at the
center) #309 3-1/2" Handwheel style knobs as seen on the SX-28, if I recall
correctly.
These are all in need of minor plastic surgery -- two have chips out the
skirt where the set screw goes and one has had it's center drilled through...
perhaps, to make a concentric assembly??
$10 ea.

National HRT 2-1/16" diameter
Black, trim rings somewhat tarnished -- $5 ea
Gray, trim ring shiny like new -- $10

National Type A Velvet Vernier dials-style 2 (marked 0-100 over 180 degrees)
3-3/8" or 4" diameter -- good condtion, $25 ea

There are also many knobs from 1960's Tektronix and Hewlett Packard
oscilloscopes, if anyone has any need, please inquire.

All of the above plus shipping, if necessary, naturally.

********** Old Radio Books & Catalogs **********

Radio Amateur Callbook V62 #1 -- US & DX listings 1984. Just a bit of wear at the corners. $10 (2 books)

Handbook of Electronic Communication by Gary Miller, Prentice Hall 1979. Hardbound, very good condition, owners name written on frontleaf, 339 pages. $7

101 Ways to Use your VOM & VTVM by Middleton -- Howard W Sams. Good condition 144 pages. $5

Radio Amateur Callbook V41 #2 -- DX listings only 1963 Front cover a bit torn up and it looks like something heavy was resting on it for 20 years. Insides OK. $4

RCA HB-3 Tube Handbook
Loose leaf 6 ring binder style data sheets starting in the late '40's with additions and
updates through October 1966. Sepatate sections cover Transmitting Tubes, Receiving Tubes (Part 1 & 2),
Industrial receiving tubes, Photosensitive devices, Thyratons & such, CRT's & Picture tubes,
Miscellaneous types, & semiconductors. The updates appear to have been made in all
these sections except Picture Tubes which is somewhat disorganized. It also appears that the
obsolete data sheets were kept for reference. The whole collection is about 30" wide on a shelf.
Shipping weight will be 20 lbs. Excellent condition; mostly never read! One gotcha - No binders. $150

RCA Transistor Manual SC-13, 1967. Good condition 540 pages. $10

Having Fun with Transistors by Buckwalter -- Howard W Sams. Good condition 127 pages. $5

Amateur Single Sideband by Collins Radio. 1962 Hardbound. Excellent condition except owners name in ink on p.106. 143 pages. $50

Allied Electronics Data Handbook. Lots of formulas. Water damage on cover and about 1/2" into edges, no pages stuck. 1962. $2

Understanding Transistors by Allied Radio. 1962 First Edition, first printing. Good condition 96 pages. $10

Heathkit Catalogs
1954, 55, 56, 57, 58, 59 &
Fall-Winter '62-63,
Xmas '89 + Winter, Spring, Summer '90 $100 all

Handbook of PREFERED CIRCUITS
Navy Aeronautical Electronic Equipment
vols. 1&2 (1955 tubes & 1962 transistors)
very good condtion $25

40 Uses for Germanium Diodes by Sylvania Electric Products. First edition, first printing, 1951. Cover separated, some writing on cover & frontspiece, otherwise good condition. 47 pages. $7

Electronic Shortcuts for Hobbyists by Sylvania Electric Products. Second edition, first printing, 1951. Cover separated, otherwise good condition. 35 pages. $7

Electrical Fundamentals (AC) TM11-681 US ARMY Technical manual. December 1951. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 231 pages. $7

A Course in Radio Fundamentals by George Grammer, ARRL. Third edition, 1948. Good condition except cover taped at spine, owner's name written on front. 300 pages. $5

Surplus Radio Conversion Manual Vol. 2 1948 Good condition, 125 pages. $15

Radar Electronic Fundamentals T.O.16-1-195 US Navy Technical manual. June 1, 1944. Good Condition except for water damage on front edge; no pages stuck nor ink bleed. 474 pages. $15

Reference Data for Radio Engineers by Federal Telephone & Radio Corp. Lots of realllly useful info about tubes & formulas in this small format hardbound book -- Good condition small part of frontspiece, probably where owner's was stamped, missing. 200 pages. $25

Tuned Circuits by J.M. Quinn, 1943. Small hardcover book 52 pages. Very Good condition, one page is punched with Los Angeles Public Library ID. $7

Most Often Needed 1926-1938 Radio Diagrams, originally published by
Supreme Publications 1941. This is a REPRINT, by Vintage Radio.
240 pages, solid schematics! Like new, $15

Radio Television Supply Company catalog #15 (1940?) (they used to be in downtown Los Angeles). Small tear at the top of the spine, otherwise in very good condition.
256 pages. $15

RCA RC-14 Receiving Tube Manual 1940. Front cover rough and half of spine cover missing. Insides good. 255 pages, $15

RCA TT-3 Air-Cooled Transmitting Tubes 1938 copyright
overall good condition w/slight damage at top & bottom of
spine & first 20 pages of lower right corner. 192 pages -- $20

Radio Supply Company catalog #10 1938? (they used to be in downtown Los Angeles) Front cover loose, back cover missing. 160 pages $10

Radio Television Supply Company catalog (1937?) (they used to be in downtown Los Angeles). A couple of spots on the cover otherwise in very good condition.
172 pages. $15

Advanced Laboratory Practice in Electricity and Magnetism by Earle Terry, McGraw Hill, Third edition, 1936. Hardbound, 318 pages. $7

Radio Supply Company catalog 1934 (they used to be in downtown Los Angeles) -- a little smudging on the back cover and two middle pages torn on the edge but, otherwise in fine condition. There is a sticker from the (original?)
owner on the first inside page. 85 pages, the last 10 or so of which are receiving and transmitter tube data from the era. $15

5 Meter Radiotelephony by Frank Jones -- This is a REPRINT of a 1934 booklet Excellent condition 20 pages or so $4

Elin company overview book 1932
very good condition except cover is almost loose
Text is in GERMAN. Lots of photographs of electrical equipment, tools, machinery, and construction projects.
128 pages $4

Radio Amateur's Handbook Ninth Edition by the ARRL, 1931. Has a typewritten note glued to the frontspiece stating that it belongs in the radio room of the USS Maryland (which was moored just inshore of the USS Oklahoma on the first Pearl Harbor Day). Cover somewhat rough, torn at spine, index and first two chapters missing up to page 24, otherwise good, no writing nor torn pages. Softbound, about 200 pages left. $500

Radio Doings Call Book Spring 1931 edition
cover taped at spine, otherwise very good
50 pages $7

Radio Amateur's Handbook Sixth Edition by the ARRL, November 1929. Cover a little worn at edges and on spine otherwise excellent, no writing nor torn pages. Softbound 225 pages. $125

Radio Doings Vol 15, #1 June 1929 edition
cover, first two & last two sheets missing otherwise o.k.
pages 5-62 remain $4

Official Radio Service Manual 1930, originally published by Gernsback Publications. This is a REPRINT by Vestal Press, 1984. Schematics & some service info. 352 pages, like new $15

All of the above plus shipping, if necessary, naturally.

1881. Antenna MADE for AO-40 now available!

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-14 09:04:32 UTC
From: Glenn Rollins <glenn@n3iyr.com>
Message-ID: <0gfj1uccsngdbv7nks6jr0hc9hie73a371@4ax.com>
Source record: 4308

I am now accepting orders. Overseas shipment is confirmed. 20 3' antenna and feeds to arrive in about 14 days. 3 taken.
I have worked very hard to bring these antennas into the country after they were made to my design. These antenna are NOT BBQ grills posing as microwave antenna. These are the real thing. I'm not a big company, i'm just a Ham like you trying to fill a void out there. I was amazed that there wasn't a single company making anything of real quality for AO-40, so I thought I would give it a try. I hope I am not offending anyone by posting here. I'm just trying to get the word out and save possible customers the cost of advertising.

Drop by my new web site and look around. Leave me a comment if you like.

Glenn N3IYR

Used caps?????

Bad enough that no direct reply is possible... But used caps takes the cake.

Oh, on those values where Santech has a match, their prices are uniformly 30% cheaper, for -new- caps.

Santech Electronics
P.O. Box 187
Tappan, NY 10938
845-359-1130 voice
845-359-5918 fax

I have been using them for about three years now, and find them excellent, prompt and honest. A bit old-fashioned (no computer, no credit cards), but then so are my radios.

Not trying to interfere with commerce here, but merely providing a point of comparison.

I have for sale a Heathkit IM-2420 frequency counter. This frequency counter is in mint condition. I have the original assembly manual with schematics. This is a bench type counter. The counters features are as follows:
Measures frequency, period and frequency radio
Wide range from 5Hz to 512MHz
25 mV gauranteed and 4 to 15 mV typical
Stability is less than .2 ppm/yr.
adjustable trigger level
Standby/on power switch
External time base input
Over-voltage protection
RF shielding
8 digit readout
Swing down stand

I am asking $120.00 shipped ground UPS CONUS

1885. FS: MFJ-1118 DC POWER STRIP WITH VOLT METER

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-15 00:44:54 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3C1A9C7D.B8F3B86E@home.com>
Source record: 4312
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale an as new mint MFJ-1118 high current DC powe strip with volt meter. This power strip lets you power six or more accessories from your transceivers main 12 VDC supply. There are also two pairs of super heavy duty 30 amp 5-way binding posts to connect your tranceivers. Each pair is fused and RF bypassed. This also has an independent on/off switch with an "on" LED indicator. There ia also a built in 0-25 VDC volt meter. I am the original owner and have the box and paperwork. I am asking $60.00 shipped ground UPS CONUS.

1886. FS:DIAMOND SX-400 SWR/POWER METER

Newsgroup: rec.radio.amateur.swap

Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale an as new mint Diamond SX-400 watt/swr meter. This meter measures average plus PEP wattage. The meter covers 140-525 MHz and is illuminated.
I am the original non smoking owner. I have the box, paperwork and 12V power cord. I am asking $80.00 shipped ground UPS CONUS.

1887. FS: YAESU VX-5R HT WITH ACCESSORIES

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-15 00:46:00 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3C1A9CC0.D0D5433D@home.com>
Source record: 4314
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a mint Yaesu VX-5R triband HT. I am the original non smoking owner. This ht is less than 1 year old and has had only a few hours of actual use, most of which was monitoring. This ht never left the inside of my house and is as new. The ht is super wide band receive from .5-999MHz cellular blocked. It transmits 5W on 6M, 5W on 2M and 4.5W on 70cm. I have the boxes and all paperwork including the warranty card. The following accessories are included in the price:
Yaesu MH-35 hand/speaker mic.
Yaesu CN3 antenna adapter for use with BNC connector
Yaesu CD-15 rapid charger
Yaesu FNB-58LI lithium ion extra battery
Yaesu SU-1 Barometric pressure/altitude board
Yaesu CSC-73 soft case
Yaesu E-DC-5B DC cable with voltage regulator and cigarette lighter plug
Comet MH-10 6m/2m/70cm triband HT high performance wide band receive ant

The radio has all of the factory included accessories.
I am asking $410.00 shipped ground UPS CONUS

1895. Re: Homebrew Radio Things

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-16 16:27:43 UTC
From: Dave Edwards <kd2e@home.com>
Message-ID: <3Y3T7.272569$ez.38101936@news1.rdc1.nj.home.com>
Source record: 4322

In the early '80s, there was a lot of belief that nicad life could be
extended by 'deep cycling' the batteries now and then. Drain them fully, and
charge them back up.
Also, a lot of people liked to experiment by measuring the voltage over time
as they were discharging.
It was very popular then, and in the '70s to fool with nicad behavior.

The "Electronic Shortcuts For Hobbyists" origionally cost 25 cents!
Diode book about the same,
Don't you think $7.00 each is a little much!

I have for sale a Diamond K600M mobile mount. This is a trunk lip mount with a UHF connector and 16.5 ft. of coax with a PL-259.
The mount is in excellent condition. I had to grind some of the plastic base away at the back of the mount so that it would clear the rear window molding when opening and closing the trunk. I was careful to be neat about it and does not affect the performance. furthermore you cannot see where it was altered because it faces the rear window on the car. I am the original owner and have the plastic container and instructions. I am asking $40.00 shipped ground UPS CONUS.

Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Heathkit IM-2420 frequency counter. This frequency counter is in mint condition. I have the original assembly manual with schematics. This is a bench type counter. The counters features are as follows:
Measures frequency, period and frequency radio
Wide range from 5Hz to 512MHz
25 mV gauranteed and 4 to 15 mV typical
Stability is less than .2 ppm/yr.
adjustable trigger level
Standby/on power switch
External time base input
Over-voltage protection
RF shielding
8 digit readout
Swing down stand

I am asking $120.00 shipped ground UPS CONUS

1933. FS:DIAMOND SX-400 ILLUMINATED SWR/POWER METER

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-22 00:15:25 UTC

I have for sale an as new mint Diamond SX-400 watt/swr meter. This meter measures average plus PEP wattage. The meter covers 140-525 MHz and is illuminated.
I am the original non smoking owner. I have the box, paperwork and 12V power cord. I am asking $80.00 shipped ground UPS CONUS.

1934. FS: DIAMOND K600M TRUNK MOUNT WITH COAX

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-22 00:16:21 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3C23D039.A797CC8E@home.com>
Source record: 4410
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Diamond K600M mobile mount. This is a trunk lip mount with a UHF connector and 16.5 ft. of coax with a PL-259.
The mount is in excellent condition. I had to grind some of the plastic base away at the back of the mount so that it would clear the rear window molding when opening and closing the trunk. I was careful to be neat about it and does not affect the performance. furthermore you cannot see where it was altered because it faces the rear window on the car. I am the original owner and have the plastic container and instructions. I am asking $40.00 shipped ground UPS CONUS.

1935. FS Computer Monitor, 56k Modem, Panasonic Printer

I have a 15" CTX computer monitor. Very few hours on it. It was off most of the time because it was on a server. Like new $75

Diamond 56K PCI internal modem. No driver disk but you should be able to download the drivers. $20

Panasonic Dot Matrix Printer 24 pin. Self test is OK. Ribbon is dried out. This printer was also on a server. All never used.
$25

I'm posting these here before resorting to eBay. I recently came by some HP gear with greater capabilities, so these are no longer needed.

Both of these units are in pristine condition electrically and mechanically and were expertly built. Both have original manuals with NO marks, tears or dog-eared pages.

I have pictures ready to email to anyone interested. Will consider trades for other test equipment or unbuilt kits. Also looking for a nice husky 19" equipment rack, preferably with sloping top section.

IG-1275 Lin/Log Sweep Generator - $125 plus shipping

* Sine, square & triangle waves from 3 Hz to 3 MHz
* 10V P-P into 50 Ohms
* Wide range attenuator
* Trigger, sync, variable symmetry, variable offset
* VCO input (+/-5V for 3 decade span)
* Analog output (0-6V for 3 decade span)

IP-2721 Power Supply - $125 plus shipping

* 0-15V @ 0-5A
* Digital readout
* Remote sensing
* Large heatsink - no fan required
* Terminals on front and barrier strips on back

Geez, and I remember when we used to give these away to new hams and club
libraries, along with scores of old CQ and QST magazines dating back into
the 1930's..

Now you gotta pay for outdated literature. Is nothing sacred anymore?

WHo says you need to burn it to a CD? I've installed Linux many many times from a hard drive. It's entirely possible, and much cheaper than purchasing stuff that's easily downloaded. Sometimes it takes a couple days to download (especially on a 56K modem), but I felt, five years ago, it was worth the wait, and I was right.

As for the printed materials, I never needed them. The online documentation was sufficient.

FYI: You might consider the Kenwood TS520.....can be purchased for around
$250. Built like a tank. Good luck.

Yeah, and ain't it a cryin' shame that the hobby has degenerated to the
degree that moneyminded opportunists are profiting off the the sheep by
asking over two times the value that these outdated publications are
actually worth. Just my two cents worth..

Yeah, I know. Money is what makes the world go around. Well driver, stop
right here, cuz I want to get off before we get to the end of the line..

I have for sale a Diamond K600M mobile mount. This is a trunk lip mount with a UHF connector and 16.5 ft. of coax with a PL-259.
The mount is in excellent condition. I had to grind some of the plastic base away at the back of the mount so that it would clear the rear window molding when opening and closing the trunk. I was careful to be neat about it and does not affect the performance. furthermore you cannot see where it was altered because it faces the rear window on the car. I am the original owner and have the plastic container and instructions. I am asking $40.00 shipped ground UPS CONUS.

RADIOHF - FOR SALE: ICOM IC-737 HF STATION
This is an Icom IC-737 transceiver covering 160 - 10 meters. Built-In Antenna Tuner. No Mic is included with Rig I'm using a GOLDLINE mic and use it with my other rigs, I Do have Copy Of Owners Manual. Works perfectly in all modes and on all bands. General coverage mod. has been done. This is a 12 volt DC rig, and would require a 12 volt DC / 20 amp power supply for base operation. I do have the wiring harness for the rig. As with all electronics, I must sell as-is. Payment is Cashier's Check, Postal Money Order, or Paypal! Rig will be send out after funds are received the NEXT business day. I try to personally check out each item I list for sell/trade, and to describe each item completely & carefully. However, since most of these items are used electronic pieces all items are sold "as is". Please contact me for any further information. Pictures can be email as requested.

Best REASONABLE OFFER + Shipping

Yaesu 767GX multi-mode transciever plus accessories for sale as
package.

Transceiver is solid state, multi-mode, with all of Yaesu's bells and
whistles: built in digital freq display, auto antenna tuner, digital
swr meter, digital rf power meter, am and cw filters, built-in digital
key pad for freq entry, and optional TSU-8 CTCSS tone board. Freq
coverage is 1.5 to 29.99999MHz, and also has the three optional boards
for 2mtrs, 70cm (440MHZ option) and 6mtrs, all multi mode. Comes with
Operator's Manual and "Technical" (Service Manual) Supplement. Clean
(non-smoking environment) and sharp looking.

The following accessories are included in the package for sale as a
package deal, and will not be split out:

Yaesu matching external speaker and phone patch, SP-767P.
Heil Headset (dual muffs) with HC-4 element.
Heil Dual element (Switchable on mic) cardoid microphone, HM-10, with
the HC-4 and HC-5 elements.
VibroPlex "Bug" (brass base, chrome and 'red' keyer)

All components are in excellent working and cosmetic condition. The
Heil headset needs new muffs, however the old ones are still
servicable and clean.

Asking $1225 plus shipping and insurance from 92083
(Southern CA).
Certified Check, USPS Money Order.

I'm posting this for a friend of mine, please contact him DIRECTLY at
km4o@fairburn.com

I need 4(four) traps for a HyGAIN vertical ant. Model 18AVQ.
If someone has the whole antenna forsale at a good price may go that
way......But all I really need is the traps

I have for sale a Heathkit IM-2420 frequency counter. This frequency counter is in mint condition. I have the original assembly manual with schematics. This is a bench type counter. The counters features are as follows:
TCXO
Measures frequency, period and frequency radio
Wide range from 5Hz to 512MHz
25 mV gauranteed and 4 to 15 mV typical
Stability is less than .2 ppm/yr.
adjustable trigger level
Standby/on power switch
External time base input
Over-voltage protection
RF shielding
8 digit readout
Swing down stand

I can provide digital pictures upon request.
I am asking $120.00 shipped ground UPS CONUS

1997. FS: DIAMOND K-600M ANT.TRUNK MOUNT WITH COAX

Newsgroup: rec.radio.amateur.swap
Date: 2001-12-30 12:49:00 UTC
From: Dean Kastoris <n8ihs@home.com>
Message-ID: <3C2F0C85.D7D592B@home.com>
Source record: 4173
Cross-posted to: rec.radio.swap,rec.radio.amateur.swap

I have for sale a Diamond K600M mobile mount. This is a trunk lip mount with a UHF connector and 16.5 ft. of coax with a PL-259.
The mount is in excellent condition. I had to grind some of the plastic base away at the back of the mount so that it would clear the rear window molding when opening and closing the trunk. I was careful to be neat about it and does not affect the performance. furthermore you cannot see where it was altered because it faces the rear window on the car. I am the original owner and have the plastic container and instructions. I am asking $40.00 shipped ground UPS CONUS.

1998. FS: NEW ALUMINUM MAST

Thanks for reading my message.

I received this HT in a trade a year or so ago, haven't messed with it that much since. ADI Sender 145.
Cosmetic condition is Good to excellent, battery does hold a charge, and the rig sounds good from the reports that I have received. As far as I can TELL the radio DOES NOT have a tone board. I did NOT receive a manual with the HT. Radio comes with a wall wart charger, takes about 12 hours to charge battery.

Best offer over $65.00. Email me DIRECT please.

Like all people who operate outside the law, one must be willing to
suffer the consequences of one's actions. Spitting on the sidewalk
will get one flogged in at least one nation.

Aside from the fact that Scott did not write this idiocy, when are you
taking the code test so you can enjoy it a hell of a lot more???

Hi Dick, I wasn't responding to any single individual but to the world
at large. Thus the use of the pronoun "one".

I don't think you do it with a clear conscience. I think you do it because
there is very little chance of your getting busted.

Are there any other illegal activities you do not consider to be
"wrong"? If someone commits a crime against you, will you ignore
it because he didn't think he was "wrong"? I doubt it.

There are others who choose to operate outside the law with a
clear conscience. When one of these robs your house, you may get
upset, but too damn bad.

As soon as I can get my copy up to the 5wpm requirement.
I'm listening to the ARRL code practice files off the Internet
and I'll go for my test as soon as I can copy the 7.5 wpm
files, that way I'll know for _SURE_ I can do the 5 wpm test.

Like the tag line. And the best of luck to you so you can pontificate with the best. Take a look at Morse Academy at http://ah0a.org and see if it meets a need. Some of the groupies who have passed the Extra of late swear by the ARRL tapes. Damfino.

Go for it! I can testify to the sense of accomplishment. It may sound
cliche-like, but privileges earned are far more appreciated and less
likely to be taken for granted. Good luck, I'll keep my fingers
crossed for you. (A little luck never hurt anybody...unless it's bad
luck, that is.)

I used the ARRL CD's and was quite pleased with the results. The code
is taught/sent/practiced/learnt (Your choice.) @ 18-wpm with increased
spacing between the words to slow the overall word rate to 5-wpm. This

is known as ARRL/Fast Farnsworth. Traditional Farnsworth is 13 to 15-wpm with the appropriately "spaced out" to 5-wpm. IMHO, using the ARRL CD's offers two advantages. The first being that it's a little faster than the actual test. Not so much that it bothers you while practicing, but enough so that you notice it immediately when the actual test begins. I actually started grinning when they sent the opening two sets of three V's. (..._)

The second advantage is that it allows for a quicker/easier transition to higher speeds should you desire to use it after passing. This is still a work-in-progress for me, so I'll let you know. ;-) The code tests are given in Farnsworth now. I'm not exactly sure whar the motivation is behind this. Some on the NG have suggested that it may have been a backhanded attempt to retain a pseudo-13-wpm code test since the gaps between the words really aren't saying anything...literally. I dunno...and, quite frankly, don't care...I'll use it to my advantage. You take it easy and the very best of luck to you.

New stuff has been added to the Shameless Unabashed Trading Page at
http://www.ParisMtnSignCo.com/Trading.htm

Some prices also been reduced.

Cheers and Happy New Year
